Published semimonthly by Academic Press, Inc., 111 Fifth Avenue, New York, N.Y. 10003

1984: Volumes 118–125. Price: $496.00 U.S.A. and Canada; $595.00 all other countries

1985: Volumes 126–133. Price: $544.00 U.S.A. and Canada; $633.00 all other countries

All prices include postage and handling.

Information concerning personal subscription rates may be obtained by writing to the Publisher. All correspondence and subscription orders should be addressed to the office of the Publishers at 111 Fifth Avenue, New York, N.Y. 10003. Send notices of change of address to the office of the Publishers at least 6 to 8 weeks in advance. Please include both old and new addresses. POSTMASTER: Send changes of address to *Biochemical and Biophysical Research Communications*, 111 Fifth Avenue, New York, New York 10003.

CUMULATIVE TABLE OF CONTENTS FOR VOLUMES 118–125

Volume 118, Number 1, January 13, 1984

AUTHOR INDEX, Volume 118, Number 1, January 13, 1984 ii

Glycoprotein Assembly in *Leishmania mexicana*
Armando J. Parodi, Josefina Martin-Barrientos, and Juan C. Engel 1

hCG-Increased Phosphorylation of Proteins in Primary Culture of Leydig Cells: Further Characterization *A. Dazord, A. Genot, D. Langlois-Gallet, C. Mombrial, F. Haour, and J. M. Saez* 8

Inactivation of Betaine-Homocysteine Methyltransferase by Adenosylmethionine and Adenosylethionine *James D. Finkelstein and John J. Martin* 14

Identification of Leukotriene D_4 Receptor Binding Sites in Guinea Pig Lung Homogenates Using [^{3}H] Leukotriene D_4
John B. Cheng and Robert G. Townley 20

Tamoxifen Is a Calmodulin Antagonist in the Activation of cAMP Phosphodiesterase
Hing-Yat Peter Lam 27

Modulation of Prostacyclin Synthetase and Unmasking of PGE_2 Isomerase in Bovine Coronary Arterial Microsomes *D. B. McNamara, J. L. Hussey, M. D. Kerstein, R. S. Rosenson, A. L. Hyman, and P. J. Kadowitz* 33

A Putative Second Messenger of Insulin Action Regulates Hepatic Microsomal Glucose-6-phosphatase *Susumu Suzuki, Takayoshi Toyota, Hiroshi Suzuki, and Yoshio Goto* 40

Inhibition of Urea Synthesis by Pent-4-enoic Acid: Potentiation by Ammonia
François X. Coude and Gisèle Grimber 47

Enhancement of Chemiluminescence of the Neutrophils by Low Concentrations of Trifluoperazine *Yukio Ozaki and Shoji Kume* 53

3T3 Variants Unable to Bind Epidermal Growth Factor Cannot Complement in Co-Culture *Ernest Terwilliger and Harvey R. Herschman* 60

Regulation of C_4 Photosynthesis: Catalytic Phosphorylation as a Prerequisite for ADP-Mediated Inactivation of Pyruvate, P_i Dikinase
J. N. Burnell and M. D. Hatch 65

Alpha$_1$- and Beta$_2$-Adrenergic Receptors Co-expressed on Cloned MDCK Cells Are Distinct Glycoproteins *Kathryn E. Meier, Daniel R. Sternfeld, and Paul A. Insel* 73

Sialosylglobotetraosylceramide: A Marker for Amyotropic Lateral Sclerosis
Samar K. Kundu, Yadollah Harati, and Lalith K. Misra 82

Inhibition of Brain Hexokinase by a Multisubstrate Analog Results from Binding to a Discrete Regulatory Site *Thomas A. Manning and John E. Wilson* 90

Human Aldehyde Dehydrogenase: Catalytic Activity in Oriental Liver
Katalin Ferencz-Biro and Regina Pietruszko 97

Human Cystatin, a New Protein Inhibitor of Cysteine Proteinases
Jože Brzin, Tatjana Popovič, Vito Turk, Ursula Borchart, and Werner Machleidt 103

Regulation of Alternative Pathways of Glucose Metabolism in Rat Heart in Alloxan Diabetes: Changes in the Pentose Phosphate Pathway
Milena Sochor, Ana-Maria Gonzalez, and Patricia McLean 110

Effect of E-64, a Thiol Protease Inhibitor, on Antibody Formation in Mice
Toshiro Amamoto, Tadayasu Okazaki, Toshi Komurasaki, Kazunori Hanada, and Sadafumi Omura 117

Copyright © 1984 by Academic Press, Inc.
All rights of reproduction in any form reserved.

The Effect of Interferon on Cells Deficient in Nucleoside Transport or Lacking Thymidine Kinase Activity *Dirk R. Gewert, Amos Cohen, and Bryan R. G. Williams* 124
Purification and Complete Amino Acid Sequence of α-Human Atrial Natriuretic Polypeptide (α-hANP) *Kenji Kangawa and Hisayuki Matsuo* 131
Analysis of 5′-Ends of Short DNA Fragments Excreted by Phytohemagglutinin Stimulated Lymphocytes *Gaspar Banfalvi, Krzysztof Szyfter, and Ferenc Antoni*
Rapid Efflux of CA^{2+} from Heart Mitochondria in the Presence of Inorganic Pyrophosphate *Anibal Vercesi and Albert L. Lehninger* 147
Proteolysis of Human Trypsinogen. 1. Pathogenic Implication in Chronic Pancreatitis *C. Figarella, M. Amouric, and O. Guy-Crotte* 154
The Activity of 3-Hydroxyacyl-CoA Epimerase Is Insufficient to Account for the Rate of Linoleate Oxidation in Rat Heart Mitochondria. Evidence for a Modified Pathway of Linoleate Degradation *Chin-Hung Chu, Leslie Kushner, Dean Cuebas, and Horst Schulz* 162
Role of Retinoic Acid in Maturation of Fetal Liver Cells *in Vitro* *Janice Yang Chou and Fumiyuki Ito* 168
The Binding of Selenium to the Lipids of Two Unicellular Marine Algae *J. M. Gennity, Nestor R. Bottino, Ralph A. Zingaro, Andrew E. Wheeler, and Kurt J. Irgolic* 176
Ontogeny of the Cytosolic Receptor for 2, 3, 7, 8-Tetrachlorodibenzo-*p*-dioxin in Rat Liver, Lung, and Thymus *Thomas A. Gasiewicz, William C. Ness, and George Rucci* 183
The Nonphotosensitized Potentiation by the Photosensitizer Hematoporphyrin of the Horseradish Peroxidase-Catalyzed H_2O_2-Mediated Oxidation of NADPH to $NADP^+$ *Richard S. Bodaness* 191
Cholesterol Side-Chain Cleavage Activity in the Outer and Inner Zones of the Adrenal Cortex *Takao Obara and Charles A. Strott* 198
Gonadotropin Receptor Complexes and Free Receptors in Porcine Leydig Cell Cultures during Recovery from hCG Stimulation *Françoise-Charlotte Mombrial, Martine Begeot, Patrick Leduque, Paul Dubois, José Saez, and France Haour* 206
Separation of Cytidine Diphosphate Reductase from Rat Yoshida Ascites Sarcoma *T. Morita, J. Murayama, N. Shimizu, Y. Moriyama, and S. Fujimura* 212
The Appearance of Phospholipase Activity in the Human Macrophage-like Cell Line U937 during Dimethyl Sulfoxide-Induced Differentiation *Robin F. Myers and Marvin I. Siegel* 217
High Field Proton NMR Studies of Tryptic Fragments of Calmodulin: A Comparison with the Native Protein *Ann Aulabaugh, Walter P. Niemczura, and William A. Gibbons* 225
The Effect of Chronic Alcohol Feeding on Lipid Peroxidation in Microsomes: Lack of Relationship to Hydroxyl Radical Generation *Spencer Shaw, Elizabeth Jayatilleke, and Charles S. Lieber* 233
[^{3}H]Verapamil Binding Sites in Skeletal Muscle Transverse Tubule Membranes *Jean-Pierre Galizzi, Michel Fosset, and Michel Lazdunski* 239
Erroneous Synthesis of Ribosomal Proteins in Amino Acid Starved *E. coli* *E. Andrieux, E. Robert, and A. J. Cozzone* 246
In Vitro Translation of Distinct mRNAs Coding for the Precursors of Porcine LH Subunits *O. Pascal, H. Lejeune, and J. André* 254
Characterization of a Sheep Elastin cDNA Clone Containing Translated Sequences *Kyonggeun Yoon, Mary May, Norma Goldstein, Zena K. Indik, Louise Oliver, Charles Boyd, and Joel Rosenbloom* 261
Reversion of the Effects of a Threonine Deaminase Regulatory Mutant by a Mutation in *ilvH* in *Escherichia coli* K-12 *Phillip A. Singer, Mark Levinthal, and Luther S. Williams* 270

Specificity of a Phosphatase for Phospholipid, Ca^{2+}-Dependent Protein Kinase-Phosphorylated Histone H1 Resides in the Catalytic Subunit
Harry LeVine III, Naji Sahyoun, Randy McConnell, Duane Bronson, and Pedro Cuatrecasas 278
Determination of Some Mitochondrial RNAs Concentration in Adult Rat Liver
P. Cantatore, M. N. Gadaleta, and C. Saccone 284
Thiamine Pyrophosphatase and Nucleoside Diphosphatase in Rat Brain
Shin-ichiro Sano, Yoshihiro Matsuda, Shuzo Miyamoto, and Hachiro Nakagawa 292
Purification and Sequence of an Opioid Peptide Derived from Ovine Proenkephalin
Radmila Micanovic, Purnima Ray, William Kruggel, and Randolph V. Lewis 299
Accumulation of Galactonate in Liver of Suckling Rats Perfused with Galatose
Shirley Rogers, Gary Lichtenstein, Diane Gentile, and Stanton Segal 304
DNA-Mediated Gene Transfer Is More Efficient during S-Phase of the Cell Cycle
Elena Giulotto and Nicole Israel 310
Nucleophile Specificity in Chymotrypsin Peptide Synthesis
D. D. Petkov and Iv. Stoineva 317
Sequences Related to Mouse Mammary Tumor Virus Genome in Tumor Cells and Lymphocytes from Patients with Breast Cancer
M. Crépin, R. Lidereau, J. C. Chermann, P. Pouillart, H. Magdamenat, and L. Montagnier 324
Amino Acid Sequence of the Carboxy-Terminal End of Human Erythrocyte Glucose-6-phosphate Dehydrogenase *Fiorella Descalzi-Cancedda, Carla Caruso, Mario Romano, Guido di Prisco, and Laura Camardella* 332
A Biologically Active Thrombin Cleavage Product of Human Serum Spreading Factor
Janet Silnutzer and David W. Barnes 339
A New Class of Antihypertensive Neutral Lipid: 1-Alkyl-2-acetyl-*sn*-glycerols, a Precursor of Platelet-Activating Factor *Merle L. Blank, Edgar A. Cress, and Fred Snyder* 344
Long-Term Inhibition of Ovulation by a GnRH-Antagonist at Low Dose Level
Magdolna Kovacs, Imre Mezo, Bela Flerko, Istvan Teplan, and Karoly Nickolics 351
Structural and Functional Properties of Rat Liver Mitochondria in Hexachlorobenzene-Induced Experimental Porphyria
Alberto Masini, Daniela Ceccarelli-Stanzani, Tommaso Trenti, Emilio Rocchi, and Ezio Ventura 356
Post-irradiation Inactivation of the Sulfhydryl Enzyme Malate Synthase
Helmut Durchschlag and Peter Zipper 364
Phosphate Depletion Decreases Mitogen-Mediated Stimulation of Phospholipid Synthesis in Human Peripheral Lymphocytes
C. Rampini, C. Dubois, and V. Barbu 371
Cell-free Translation of Human Uroporphyrinogen Decarboxylase mRNAs
Bernard Grandchamp, Paul Henri Roméo, Hubert de Verneuil, Anne Dubart, Michel Goossens, Jean Rosa, and Yves Nordmann 378
ANNOUNCEMENT 383
ERRATUM
Volume 117, Number 1, November 30, 1983: F. Malpartida, M. Zalacain, A. Jiménez, and J. Davis, "Molecular Cloning and Expression in *Streptomyces lividans* of a Hygromycin B Phosphotransferase Gene from *Streptomyces hygroscopicus*," pp. 6–12 384

Volume 118, Number 2, January 30, 1984

AUTHOR INDEX, Volume 118, Number 2, January 30, 1984 ii
Insulin Modulates Thyrotropin-Induced Follicle Reconstruction and Iodine Metabolism in Hog Thyroid Cells Cultured in a Chemically Defined Medium
Kimie Sho and Yoichi Kondo 385

Epidermal Growth Factor and Tumor Promoters Prevent DNA Fragmentation by Different Mechanisms *Peter Kanter, Kirk J. Leister, L. David Tomei, Peter A. Wenner, and Charles E. Wenner* 392

The Role of Lysine-Rich Proteins in the Acute Steroidogenic Response of Rat Adrenal Cells to ACTH *B. C. Mc Namara and G. S. Boyd* 400

Synthesis and Biological Activities of Neurokinin α and β *Karl Folkers, Yi-An Lu, and Sune Rosell* 405

Evidence for the Involvement of Cytochrome *P*-450-Dependent Monooxygenase(s) in the Formation of Genotoxic Metabolites from *N*-Hydroxyurea *Ulrich Andrae* 409

GuHCl-Induced Unfolding–Folding Transition of a Hinge-Bending Protein: Horse Muscle Phosphoglycerate Kinase *M. Desmadril, A. Mitraki, J. M. Betton, and J. M. Yon* 416

The Isolation of Identical Thyroxine-Containing Amino Acid Sequences from Bovine, Ovine, and Porcine Thyroglobulins *Allen B. Rawitch, Mitchell R. Litwer, Joni Gregg, Carol Dziadik Turner, James B. Rouse, and James W. Hamilton* 423

Catalytic Properties of the Resolved Flavoprotein and Cytochrome *b* Components of the NADPH-Dependent $O_2^-\cdot$-Generating Oxidase from Human Neutrophils *Theodore G. Gabig and Bruce A. Lefker* 430

Fatty Acyl-coenzyme A Oxidase Activity and H_2O_2 Production in *Phanerochaete chrysosporium* Mycelia *Richard V. Greene and J. Michael Gould* 437

Induction of New Proteins in the Nuclear Matrix of CHO Cells by a Heat Shock: Detection of a Specific Set in the Nucleolar Matrix *M. Caizergues-Ferrer, F. Dousseau, N. Gas, G. Bouche, B. Stevens, and F. Amalric* 444

Effect of Insulin on α_1-Adrenergic Actions in Hepatocytes from Euthyroid and Hypothyroid Rats: Possible Involvement of Two Pathways in α_1-Adrenergic Actions *Choliparambil K. Pushpendran, Silvia Corvera, and J. Adolfo García-Sáinz* 451

Vitamin A Acid-Induced Activation of Ca^{2+}-Activated, Phospholipid-Dependent Protein Kinase from Rabbit Retina *Setsuya Ohkubo, Eiji Yamada, Toyoshi Endo, Hiroo Itoh, and Hiroyoshi Hidaka* 460

Changes of an Androgen-Dependent Nuclear Protein during Functional Differentiation and by Dedifferentiation of the Dorsolateral Prostate of Rats *Yuhsi Matuo, Nozomu Nishi, Yukio Tanaka, Yasuyoshi Muguruma, Koichiro Tanaka, Yoshiki Akatsuka, Sei-Ichi Matsui, Avery A. Sandberg, and Fumio Wada* 467

Superoxide- and Hydrogen Peroxide-Dependent Lipid Peroxidation in Intact and Triton-Dispersed Erythrocyte Membranes *Albert W. Girotti and James P. Thomas* 474

Variable Denaturation of Ovalbumin by Incorporation of Amino Acid Analogs *Katherine Heilig, Janet Willand, Michael J. Gast, and Glen Hortin* 481

Immunohistochemical Detection of the Sex Steroid-Binding Plasma Protein in Human Mammary Carcinoma Cells *J. Tardivel-Lacombe, M. Egloff, A. Mazabraud, and H. Degrelle* 488

Factor VIII/von Willebrand Factor Has Potent Lectin Activity *William J. Booth, Fiona H. Furby, Michael C. Berndt, and Peter A. Castaldi* 495

Suggestion of Existence of Two Forms of Halorhodopsin in Alkaline Solution *Norio Hazemoto, Naoki Kamo, and Yonosuke Kobatake* 502

Role of Actin-Binding Protein Phosphorylation in Platelet Cytoskeleton Assembly *Qing-Qi Zhuang, S. Rosenberg, J. Lawrence, and A. Stracher* 508

The Transport and Processing of Carbamyl Phosphate Synthetase I in Mouse Hepatic Mitochondria *Narayan K. Bhat and Narayan G. Avadhani* 514

Hydrogen Ion Diffusion in Dog Gastric Mucus Glycoprotein: Effect of Associated Lipids and Covalently Bound Fatty Acids *Jerzy Sarosiek, Amalia Slomiany, Atsushi Takagi, and Bronislaw L. Slomiany* 523

Stimulatory Effect of an Endogenous Peptide in Rat Pancreatic Juice on Pancreatic Enzyme Secretion in the Presence of Atropine: Evidence for Different Mode of Action of Stimulation from Exogenous Trypsin Inhibitors *Tohru Fushiki, Shin-ichi Fukuoka, and Kazuo Iwai* 532

Nonfunctional Epidermal Growth Factor Receptor in Cells Transformed by Kirsten Sarcoma Virus *Chu Chang Chua, Deborah E. Geiman, Alain B. Schreiber, and Roger L. Ladda* 538

TCDD (2,3,7,8-Tetrachlorodibenzo-*p*-dioxin) Causes Reduction in the Low-Density Lipoprotein (LDL) Receptor Activities in the Hepatic Plasma Membrane of the Guinea Pig and Rat *David W. Bombick, Fumio Matsumura, and B. V. Madhukar* 548

The Mode of Action of Chloride on Rabbit Heart Adenylate Cyclase *S. E. Harding, L. Leclerc, and P. Harris* 555

The Effect of Anions and Cations on Cardiac Adenylate Cyclase: Interactions with Isoprenaline and GTP *L. Leclerc, S. E. Harding, and P. Harris* 561

Metabolite-Induced Activation of Hepatic Phosphofructokinase *Christopher G. Proud* 567

Oxygen Radical Formation Induced by Gossypol in Rat Liver Microsomes and Human Sperm *Ann de Peyster, Alex Quintanilna, Lester Packer, and Martyn T. Smith* 573

Presence of Actin in Oncornaviruses *Lena Stanislawsky, Françoise Mongiat, and Vivaldo Moura Neto* 580

A Cell Division-Active Protein from *E. coli* *Alfredo Caprioli, Gianfranco Donelli, Vincenzo Falbo, Roberta Possenti, L. Giorgio Roda, Gianna Roscetti, and Franco M. Ruggeri* 587

Nucleoside Transport: Photoaffinity Labeling of High-Affinity Nitrobenzylthioinosine Binding Sites in Rat and Guinea Pig Lung *Maggie M. Shi, Jin-Shyun R. Wu, Chi-Ming Lee, and James D. Young* 594

Lipid-Associated Calcium Ionophores in Islet Cell Plasma Membrane following Glucose Stimulation *Marjorie Dunlop and Richard G. Larkins* 601

DNA Polymerases in Isolated "Nuclear Matrix" of Ehrlich Ascites Cells *Shi Chanpu, M. Müller, and D. Werner* 609

Inhibition of Complement-Induced [^{14}C]Sucrose Release by Intracellular and Extracellular Monoclonal Antibodies to C9: Evidence that C9 Is a Transmembrane Protein *B. P. Morgan, J. P. Luzio, and A. K. Campbell* 616

Pancreatic CCK Receptors: Characterization of Covalently Labeled Subunits *Choitsu Sakamoto, Ira D. Goldfine, and John A. Williams* 623

Calmodulin Antagonists Inhibit Formation of Platelet-Activating Factor in Stimulated Human Neutrophils *M. Motasim Billah and Marvin I. Siegel* 629

Function of Calmodulin in Mammalian Sperm: Presence of a Calmodulin-Dependent Cyclic Nucleotide Phosphodiesterase Associated with Demembranated Rat Caudal Epididymal Sperm *Wilma M. Wasco and George A. Orr* 636

Hydrogen Bonding Involving the Ornithine Side Chain of Gramicidin S *George Némethy and Harold A. Scheraga* 643

In Vitro Interaction between Calcitonin and Calmodulin *L. Gnessi, G. Camilloni, A. Fabbri, V. Politi, G. DeLuca, G. DiStazio, C. Moretti, and F. Fraioli* 648

Segmental Homologies in the Coding and 3′ Noncoding Sequences of Rat Liver Cytochrome *P*-450*e* and *P*-450*b* cDNAs and Cytochrome *P*-450*e*-like Genes *Markus Affolter and Alan Anderson* 655

ADP-Ribosylation of Isolated Rat Islets of Langerhans *Carl Bernofsky and David G. Amamoo* 663

The Coexistence in Rat Muscle Cells of Two Distinct Classes of Ca^{2+}-Dependent K^+ Channels with Different Pharmacological Properties and Different Physiological Functions *Georges Romey and Michel Lazdunski* 669

Vanadate Stimulates Na^+/H^+ Exchange Activity in A431 Cells *Dan Cassel, Ying-Xin Zhuang, and Luis Glaser* 675

Inhibition of Leukocyte Chemotaxis by Glu-Glu-Glu-Glu-Tyr-Pro-Met-Glu and Leu-Ile-Glu-Asp-Asn-Glu-Tyr-Thr-Ala-Arg-Gln-Gly *Fusao Hirata, Yoshitada Notsu, Keiichi Matsuda, Geetha Vasanthakumar, Elliott Schiffmann, Tai-Wai Wong, and Alan R. Goldberg* 682

Nonproductive Activation of the Proteinase Binding Sites of α_2-Macroglobulin on Reaction of the Inhibitor with Matrix-Linked Trypsin *Ingemar Björk* 691

ERRATUM

Volume 114, Number 3, August 12, 1983: M. Carla Roncaglioni, Berry A. M. Soute, Marian A. G. de Boer-v.d. Berg, and Cees Vermeer, "Warfarin-Induced Accumulation of Vitamin K-Dependent Proteins: Comparison between Hepatic and Non-hepatic Tissues," pp. 991–997 696

Volume 118, Number 3, February 14, 1984

AUTHOR INDEX, Volume 118, Number 3, February 14, 1984 ii

Molecular Localization of Copper and Zinc in Rat Fetal Liver in Dietary and Drug-Induced Copper Deficiency *Carl L. Keen, Nancy L. Cohen, Lucille S. Hurley, and Bo Lönnerdal* 697

Diadenosine Triphosphate (Ap_3A) Mediates Human Platelet Aggregation by Liberation of ADP *Jürgen Lüthje and Adaling Ogilvie* 704

Spermine Specifically Inhibits the Phosphorylation of an 11,000-Dalton Nuclear Protein in Various Cultured Mammalian Cell Lines *Kuang Yu Chen and Rati Verma* 710

Rhodamine-123 Inhibits Bioenergetic Function in Isolated Rat Liver Mitochondria *Josephine S. Modica-Napolitano, Michael J. Weiss, Lan Bo Chen, and June R. Aprille* 717

All Three Chains of $1\alpha 2\alpha 3\alpha$ Collagen from Hyaline Cartilage Resist Human Collagenase *David R. Eyre, Jiann-jiu Wu, and David E. Woolley* 724

Age-Related Changes in Unscheduled DNA Synthesis by Rat Hepatocytes *Marguerite M. Plesko and Arlan Richardson* 730

Ca^{2+}-Activated, Phospholipid-Dependent Protein Kinase Catalyzes the Phosphorylation of Actin-Binding Proteins *Sachiyo Kawamoto and Hiroyoshi Hidaka* 736

Interactions in the Hydrogen Belts of Membranes: Cholesterol Leaving Phosphatidylcholine Bilayers *L. S. Ramsammy, V. P. S. Chauhan, L. L. Box, and H. Brockerhoff* 743

Negatively Supercoiled DNA from Plants Infected with a Single-Stranded DNA Virus *G. Sunter, R. H. A. Coutts, and K. W. Buck* 747

Modifications of Redox Equilibria with Semiquinone Stabilization upon Pyruvate Binding to L-Lactate Cytochrome *c* Oxidoreductase (Flavocytochrome b_2). *M. Tegoni, J. M. Janot, M. C. Silvestrini, M. Brunori, and F. Labeyrie* 753

Reductive Activation of Methanol: 5-Hydroxybenzimidazolylcobamide Methyltransferase of *Methanosarcina barkeri* *Peter van der Meijden, Chris van der Lest, Chris van der Drift, and Godfried D. Vogels* 760

Complete Nucleotide Sequence of the Messenger RNA Coding for Chicken Muscle Glyceraldehyde-3-Phosphate Dehydrogenase *F. Panabières, M. Piechaczyk, B. Rainer, Ch. Dani, Ph. Fort, S. Riaad, L. Marty, J. L. Imbach, Ph. Jeanteur, and J. M. Blanchard* 767

IGF-II Binding on Human Lymphoid Cells: Demonstration of a Common High Affinity Receptor for Insulin-like Peptides *Raymond L. Hintz, Arni V. Thorsson, Gösta Enberg, and Kerstin Hall* 774

2-Methylbutyryl CoA Dehydrogenase from Mitochondria of *Ascaris suum* and Its Relationship to NADH-Dependent 2-Methylcrotonyl CoA Reduction *Richard Komuniecki, Steven Fekete, and Julia Thissen* 783

Synthesis of Interphotoreceptor Retinoid-Binding Protein (IRBP) by Monkey Retina in Organ Culture: Effect of Monensin *Barbara Wiggert, Ling Lee, Paul J. O'Brien, and Gerald J. Chader* 789

Protein Phosphorylation in Pancreatic Islets: Evidence for Separate Ca^{2+}- and cAMP-Enhanced Phosphorylation of Two 57,000 M_r Proteins *Anjaneyulu Kowluru and Michael J. MacDonald* 797

De Novo Biosynthesis of 6β-Hydroperoxyandrostenedione in Human Placental Microsomes *L. Tan, P. Navennec, and G. Gévry* 805
Biosynthesis of Riboflavin: Enzymatic Formation of the Xylene Moiety from [^{14}C]Ribulose 5-Phosphate *Peter Nielsen, Gerhard Neuberger, Heinz G. Floss, and Adelbert Bacher* 814
DNA Sequences from a Ligninolytic Filamentous Fungus *Phanerochaete chrysosporium* Capable of Autonomous Replication in Yeast *Tekmal R. Rao and C. Adinarayana Reddy* 821
β-Lapachone Greatly Enhances MMS Lethality to Human Fibroblasts *Robert J. Boorstein and Arthur B. Pardee* 828
Platelet Ca^{2+}-Activated, Phospholipid-Dependent Protein Kinase: Evidence for Proteolytic Activation of the Enzyme in Cells Treated with Phospholipase C *Peter M. Tapley and Andrew W. Murray* 835
Enhancement of Calcium Influx in Human Platelets by CGP 28392, a Novel Dihydropyridine *P. Erne, E. Bürgisser, F. R. Bühler, B. Dubach, H. Kühnis, M. Meier, and H. Rogg* 842
Poly(d2NH_2A–dT): Effect of 2-Amino Substituent on the *B* to *Z* Transition *Frank B. Howard, Chi-wan Chen, Jack S. Cohen, and H. Todd Miles* 848
Cross-Reacting Material to Monoclonal Anti-G6PD in the Absence of Catalytic Activity *M. L. Dao, B. C. Johnson, and C. DeLuca* 854
Sepiapterin Reductase Exhibits an NADPH-Dependent Dicarbonyl Reductase Activity *Setsuko Katoh and Terumi Sueoka* 859
Intramolecular Isotope Effects Associated with *meta*-hydroxylation of Biphenyl Catalyzed by Cytochrome *P*-450 *D. C. Swinney, W. N. Howald, and W. F. Trager* 867
Prostaglandin E_2 and I_2 Production in Isolated Dog Renal Arteries in the Absence or Presence of Vascular Endothelial Cells *Hiroyuki Satoh and Susumu Satoh* 873
Thermodynamic Properties of the Cholesterol Transfer Reaction from Liposomes to Cytochrome $P\text{-}450_{scc}$: An Enthalpy–Entropy Compensation Effect *Daniel K. Hsu, Yung Y. Huang, and Tokuji Kimura* 877
Dispersity of Des-L-Val^7–D-Val^8-Gramicidin A Single-Channel Conductances Argues for Different Side Chain Orientations as Basis *D. W. Urry, S. Alonso-Romanowski, C. M. Venkatachalam, R. D. Harris, and K. U. Prasad* 885
Hydrolysis of a Fluorescent Phospholipid Substrate by Phospholipase A_2 and Lipoprotein Lipase *Laura A. Wittenauer, Kohji Shirai, Richard L. Jackson, and J. David Johnson* 894
Construction of a cDNA Clone for a Nuclear-Coded Subunit of Cytochrome *c* Oxidase from Rat Liver *Satish Parimoo, R. Sathiagnana Seelan, Suresh Desai, Gerhard Buse, and Govindarajan Padmanaban* 902
Differential Effects of Thyrotropin on Various Glycosyltransferases in Porcine Thyroid Cells *Jean-Louis Franc, Sonia Hovsepian, Guy Fayet, and Simone Bouchilloux* 910
Substrate Binding Site of Microsomal Cytochrome *P*-450 Directly Faces Membrane Lipids *Hisaaki Taniguchi, Yoshio Imai, and Ryo Sato* 916
Purification of a Latent Protein Phosphatase from Rabbit Skeletal Muscle *Shiaw-Der Yang, Jackie R. Vandenheede, and Wilfried Merlevede* 923
Highly Potent and Specific Inhibitors of Human Renin *T. Kokubu, K. Hiwada, Y. Sato, T. Iwata, Y. Imamura, R. Matsueda, Y. Yabe, H. Kogen, M. Yamazaki, Y. Iijima, and Y. Baba* 929
Human Apolipoprotein A-I and C-III Genes Reside in the p11–q13 Region of Chromosome 11 *S. W. Law, G. Gray, H. B. Brewer, Jr., A. Y. Sakaguchi, and S. L. Naylor* 934
Trihydroxytetraenes: A Novel Series of Compounds Formed from Arachidonic Acid in Human Leukocytes *Charles N. Serhan, Mats Hamberg, and Bengt Samuelsson* 943

The Differential Loss of [^{3}H]Pirenzepine vs [(-)-[^{3}H]Quinuclidinylbenzilate Binding to Soluble Rat Brain Muscarinic Receptors Indicates that Pirenzepine Binds to an Allosteric State of the Muscarinic Receptor
William R. Roeske and J. Craig Venter 950

Formation of *N*-Nitrosodiphenylamine from 1,1-Diphenylhydrazine by Rat Liver Microsomal Preparations
Kiyoshi Tatsumi, Shigeyuki Kitamura, and Masahiro Sumida 958

Isolation and Characterization of Cytochrome c_1 from Photosynthetic Bacterium *Rhodopseudomonas sphaeroides* R-26
Chang-An Yu, Qing-Chao Mei, and Linda Yu 964

AUTHOR INDEX, Volume 119, Number 1, February 29, 1984 ii

Nonresponsiveness of Immature B Lymphocytes to Anti-Immunoglobulin Is Reversed by Pronase *Sastry V. S. Gollapudi, Madduri Ramanadham, and Milton Kern* 1

Insulin-like Growth Factor-I (IGF-I) Stimulates Tyrosine Kinase Activity in Purified Receptors from a Rat Liver Cell Line
Yehiel Zick, Norio Sasaki, Robert W. Rees-Jones, George Grunberger, S. Peter Nissley, and Matthew M. Rechler 6

Neuromedin C: A Bombesin-like Peptide Identified in Porcine Spinal Cord
Naoto Minamino, Kenji Kangawa, and Hisayuki Matsuo 14

Biochemical Correlates of Phenotypic Reversion in Interferon-Treated Mouse Cells Transformed by a Human Oncogene
Dvorit Samid, Esther H. Chang, and Robert M. Friedman 21

Structural Changes of Liver Microsomes in Rat during Neonatal Life: Influence on the Glucuronidation Rates of Various Substrates
Isabelle Delpech, Liliane Kiffel, Jacques Magdalou, Gérard Siest, Patrick Martin, Michel Bouchy, and Jean-Claude André 29

Chemical Crosslinking of the Mononuclear Phagocyte Specific Growth Factor CSF-1 to Its Receptor at the Cell Surface *Claudia J. Morgan and E. Richard Stanley* 35

Affinity Isolation of RNA Polymerase II on Amanitin–Sepharose
Leonard C. Lutter and Heinz Faulstich 42

Receptor Binding and Biological Activity of [Ser^{B24}]-Insulin, an Abnormal Mutant Insulin *Masashi Kobayashi, Masakazu Haneda, Hiroshi Maegawa, Nobuaki Watanabe, Yasumitsu Takada, Yukio Shigeta, and Ken Inouye* 49

Platelet Activating Factor (PAF–Acether) Is Released into Rat Pulmonary Alveolar Fluid as a Consequence of Hypoxia
Marie-Claude Prevost, Clotilde Cariven, Marie-Françoise Simon, Hugues Chap, and Louis Douste-Blazy 58

Effect of Crosslinking on Glucocorticoid Receptor Activation *Péter Arányi* 64

Mitogens and Melittin Stimulate an Increase in Intracellular Free Calcium Concentration in Human Fibroblasts
Leslie L. Mix, Robert J. Dinerstein, and Mitchel L. Villereal 69

Identification of a Tumor Inhibitory Factor in Rat Ascites Fluid
Alan E. Levine, David A. Hamilton, Lynn C. Yeoman, Harris Busch, and Michael G. Brattain 76

Dehydroepiandrosterone Is a Substrate for Estradiol 17β-Dehydrogenase from Human Placenta *G. Mendoza-Hernández, M. Calcagno, H. R. Sánchez-Nuncio, and J. C. Díaz-Zagoya* 83
Synergistic Activation of Rat Hepatocyte Glycogen Phosphorylase by A23187 and Phorbol Ester *John N. Fain, Shih-Ying Li, Irene Litosch, and Michael Wallace* 88
Evidence for a Role of a Serum Factor Stimulated by Metoclopramide in Regulating Aldosterone Secretion *Maurizio Bevilacqua, Daniele Scorza, Rachele Meroni, Tarcisio Vago, Regina Dagani, Ettore Malacco, and Guido Norbiato* 95
Hexosaminidase A Deficient Adults: Presence of α Chain Precursor in Cultured Skin Fibroblasts *Amos Frisch, Dana Baram, and Ruth Navon* 101
Hybrid Recombinant Human Leukocyte Interferon Inhibits Differentiation in Murine B-16 Melanoma Cells *Paul B. Fisher, Henry Hermo, Jr., Diane R. Prignoli, I. Bernard Weinstein, and Sidney Pestka* 108
Comparison of Serotonin Uptake by Dense Bodies Inside and Outside Human Platelets *Denise D. Fay, John F. Madden, and Jonathan L. Costa* 116
Regulation of Intracellular Magnesium by Mg^{2+} Efflux *T. Günther, J. Vormann, and R. Förster* 124
Associated Effects of Sodium Butyrate on Histone Acetylation and Estrogen Receptor in the Human Breast Cancer Cell Line MCF-7 *M. Sandra Stevens, Zarrintaj Aliabadi, and Michael R. Moore* 132
The Crucial Role of Hypoxia in Halothane-Induced Lipid Peroxidation *Herbert de Groot and Thomas Noll* 139
Enhanced Xanthine Oxidase Activity in Mice Treated with Interferon and Interferon Inducers *Pietro Ghezzi, Marina Bianchi, Alberto Mantovani, Federico Spreafico, and Mario Salmona* 144
Characterization and Cloning of the Kirsten Murine Leukemia Virus Genome *John D. Norton, Andrew T. Carter, and Roger J. Avery* 150
Differences in the Expression of the Human Interferon-γ Gene in Fresh Lymphocytes and Cultured Lymphoblasts *Kenneth W. Siggens, Miles F. Wilkinson, Paul G. Boseley, Patrick M. Slocombe, Graham Cowling, and Alan G. Morris* 157
Muscarinic Cholinergic Receptors in a Rat Phaeochromocytoma Cell Line *Alan J. Cross, Julie A. Johnson, Chris Frith, and Graham R. Taylor* 163
Inhibition of Photosynthetic Oxygen Evolution in Nonvesicular Preparations Releases Mn^{2+} into a Restricted Aqueous Compartment *Mette Miller and Raymond P. Cox* 168
MAP2 Competes with MAP1 for Binding to Microtubules *S. A. Kuznetsov, V. I. Rodionov, V. I. Gelfand, and V. A. Rosenblat* 173
Effects of Inhibitors of Arachidonic Acid Metabolism on Thromboplastin Activity in Human Monocytes *David J. Crutchley* 179
Involvement of Hyposialylated Immunoglobulins in the Inactivation of α1-Proteinase Inhibitor *M. Duc Dodon and L. Gazzolo* 185
Identification of Adenylate Cyclase-Coupled β-Adrenergic Receptors in the Developing Mammalian Palate *Michele P. Garbarino and Robert M. Greene* 193
Receptor-Mediated Endocytosis of Tuftsin by Macrophage Cells *Philip Gottlieb, Eli Hazum, Esther Tzehoval, Michael Feldman, Shraga Segal, and Mati Fridkin* 203
Effects of Glucagon on the Redox States of Cytochromes in Mitochondria *in Situ* in Perfused Rat Liver *Satoshi Kimura, Takuji Suzaki, Shigeki Kobayashi, Kaoru Abe, and Etsuro Ogata* 212
Angiotensin II Receptors in Chromatin Fragments Generated by Micrococcal Nuclease *Richard N. Re, Douglas L. Vizard, Jean Brown, and Sara E. Bryan* 220
Host-Cell Invasion by *Trypanosoma cruzi:* Role of Cell Surface Galactose Residues *Fernando Villalta and Felipe Kierszenbaum* 228

Activation of the Cyclic Nucleotide Phosphodiesterase from Rat Heart Cytosol by Phospholipase C *A. F. Prigent, G. Némoz, M. Picq, M. Dubois, and H. Pacheco* 236

Repair of Amino Acid Radicals by a Vitamin E Analog *R. H. Bisby, S. Ahmed, and R. B. Cundall* 245

Cloning a cDNA for the Lysosomal α-Glucosidase *Ad Konings, Pauline Hupkes, Rogier Versteeg, Gerard Grosveld, Arnold Reuser, and Hans Galjaard* 252

Derepression of Nitrate Reductase in the Presence of Excess Ammonium in a Unicellular Alga Growing under Conditions of Phosphate Limitation *Vittoria Di Martino Rigano, Vincenza Vona, Amodio Fuggi, Anna Martello, Catello Di Martino, and Carmelo Rigano* 254

Super-Active Analogs of Growth Hormone-Releasing Factor (1-29)-Amide *Valentine A. Lance, William A. Murphy, Javier Sueiras-Diaz, and David H. Coy* 265

Molecular Cloning and Sequence Analysis of cDNA for Human Transferrin *Georges Uzan, Monique Frain, Insoo Park, Claude Besmond, Gérard Maessen, José Sala Trépat, Mario M. Zakin, and Axel Kahn* 273

Atrial Natriuretic Factor: Atrial Conversion of High to Low Molecular Weight Forms *N. C. Trippodo, R. D. Ghai, A. A. MacPhee, and F. E. Cole* 282

High Affinity [^{3}H]Pirenzepine Binding to Putative M_1 Muscarinic Sites in the Neuroblastoma × Glioma Hybrid Cell Line (NG 108-15) *Kazufumi Akiyama, Mark Watson, William R. Roeske, and Henry I. Yamamura* 289

Copper Complexes at N- and C-Site of Ovotransferrin: Quantitative Determination and Visible Absorption Spectrum of Each Complex *Takaki Yamamura, Shizuo Hagiwara, Katsuyoshi Nakazato, and Kazuo Satake* 298

Possible Participation of Membrane Thiol Groups on the Mechanism of NAD(P)$^+$-Stimulated Ca^{2+} Efflux from Mitochondria *Anibal E. Vercesi* 305

Brain and Pituitary Fibroblast Growth Factor Activities Behave Identically on Three Independent High Performance Liquid Chromatography Systems *John A. Smith, Derek P. Winslow, Michael J. O'Hare, and Philip S. Rudland* 311

Oxidation of Monosubstituted Olefins by Cytochromes *P*-450 and Heme Models: Evidence for the Formation of Aldehydes in Addition to Epoxides and Allylic Alcohols *Daniel Mansuy, Jacques Leclaire, Marc Fontecave, and Michel Momenteau* 319

Mechanism of Interferon Action: Inhibition of Vesicular Stomatitis Virus in Human Amnion U Cells by Cloned Human Leukocyte Interferon *Paul S. Masters and Charles E. Samuel* 326

The Structure of a Naturally Occurring 10K Polypeptide Derived from the Amino Terminus of Bovine Thyroglobulin *Allen B. Rawitch, Luc Mercken, James W. Hamilton, and Gilbert Vassart* 335

Calmodulin Binding Proteins in Rat Liver Mitochondria *Paolo Gazzotti, Monika Gloor, and Ernesto Carafoli* 343

Multiple Forms of L1210 Dihydrofolate Reductase Differing in Affinity for Methotrexate *Thomas H. Duffy, Selene B. Beckman, and F. M. Huennekens* 352

Cholecystokinin and Insulin Regulate Insulin-like Growth Factor II Binding to Pancreatic Receptors; Evidence of a Role for Intracellular Calcium *Neus Potau, Joachim Mössner, John A. Williams, and Ira D. Goldfine* 359

Aldosterone Biosynthesis by a Reconstituted Cytochrome *P*-450_{11B} System *Akira Wada, Mitsuhiro Okamoto, Yasuki Nonaka, and Toshio Yamano* 365

A Voltammetric Investigation of TCNQ-Containing Bilayer Lipid Membranes *H. Ti Tien and Z. K. Lojewska* 372

Organic Acids Prevent Aluminum-Induced Conformational Changes in Calmodulin
Charles G. Suhayda and Alfred Haug 376
The Induction of Cytochrome *P*-450 and Monooxygenase Activities in the Chick Embryo by 2-Acetylaminofluorene
Nigel J. Darby, Frank R. Burnet, and Alberto Lodola 382
Absence of Diglyceride Kinase Activity in the Photoreceptor Cells of *Drosophila* Mutants *Tohru Yoshioka, Hiroko Inoue, and Yoshiki Hotta* 389
Fluorescence Polarization Study of Lipids and Membranes Prepared from Brain Hemispheres of a Hibernating Mammal
D. Montaudon, J. Robert, and B. Canguilhem 396
Modulation by Dexamethasone of the Fatty Acyl-CoA Desaturase System in *Tetrahymena* Microsomes *Shigenobu Umeki and Yoshinori Nozawa* 401
Glucocorticoids Increase Pulmonary Epidermal Growth Factor Receptors in Female and Male Fetal Rabbit *H. Farouk Sadiq and Uday P. Devaskar* 408
A Putative Processing Enzyme from Aplysia that Cleaves Dynorphin A at the Single Arginine Residue *Ellen F. Wallace, Eckard Weber, Jack D. Barchas, and Christopher J. Evans* 415
Kinetic Studies on Interaction of (Na,K)-ATPase with Cibacron Blue F3GA as Probe of the Nucleotide Fold *Werner Schönfeld, Karl-Heinz Menke, Reinhild Schönfeld, and Kurt R. H. Repke* 423

Recovery of Megacaryocyte Thromboxane Production *in Vitro* after Aspirin Inhibition *Ronald W. Walenga, Jonathan L. Miller, and Marie J. Stuart* 982

Raman Spectroscopic Evidence for the Microenvironmental Change of Some Tyrosine Residues of Lens Proteins in Cold Cataract *A. Mizuno, Y. Ozaki, K. Itoh, S. Matsushima, and K. Iriyama* 989

Activities of the Initial Enzymes of Glycerolipid and Sphingolipid Synthesis in Lung Microsomes from Rats Exposed to Air or 85% Oxygen *A. H. Merrill, Jr., E. Wang, J. Stevens, and G. W. Brumley* 995

Effect of Intracellular Injection of cAMP on the Electrical Coupling of Mammalian Cardiac Cells *Walmor C. De Mello* 1001

Phosphorylation of the Glucose Analog 3-O-Methyl-D-glucose by Rat Heart *S. John Gatley, James E. Holden, James R. Halama, Timothy R. DeGrado, Dana R. Bernstein, and Chin K. Ng* 1008

Glutathione *S*-Transferase Isozymes of Mouse Intestine: Differential Induction by 2(3)-*tert*.-Butyl-4-hydroxyanisole *Ralph E. Parchment and Ann M. Benson* 1015

The Potent Induction of Intestinal Heme Oxygenase by the Organotin Compound, Bis(tri-*N*-butyltin)oxide *Daniel W. Rosenberg, Karl E. Anderson, and Attallah Kappas* 1022

Epidermal Fucosylation of Cell Surface Glycoprotein *J. D. Zieske and I. A. Bernstein* 1028

Inhibition of Purified Glutathione *S*-Transferases by Indomethacin *F. A. Nicholls and J. T. Ahokas* 1034

Oxaloacetate Uptake into Rat Brain Mitochondria and Reconstruction of the Malate/Oxaloacetate Shuttle *Salvatore Passarella, Maria Barile, Anna Atlante, and Ernesto Quagliariello* 1039

Organ-Specific Alcohol Metabolism: Placental χ-ADH
Xavier Parés, Jaume Farrés, and Bert L. Vallee 1047
Quenching of Singlet Oxygen by D-α-Tocopherol in Human Granulocytes
G. Paolo Littarru, Silvio Lippa, Pasquale De Sole, Allessandro Oradei, Francesco Dalla Torre, and Maria Macrì 1056
Phorbol Esters Inhibit LH-Stimulated Steroidogenesis by Mouse Leydig Cells *in Vitro*
A. K. Mukhopadhyay, H. G. Bohnet, and F. A. Leidenberger 1062
Requirement for Both Choleragen and Pertussis Toxin to Obtain Maximal Activation of Adenylate Cyclase in Cultured Cells *Judith A. Hsia, Joel Moss, Erik L. Hewlett, and Martha Vaughan* 1068
Isolation of the Fibrinogen-Binding Region of Platelet Thrombospondin
Vishva M. Dixit, Gregory A. Grant, William A. Frazier, and Samuel A. Santoro 1075
Activation of Cyclic AMP-Dependent Protein Kinase in Macrophages *N. H. Hunt, L. K. Lim, R. D. Eichner, G. D. Buffinton, and M. J. Weidemann* 1082
Radioprotection by Superoxide Dismutase of Macrophage Progenitor Cells from Mouse Bone Marrow *A. Petkau and W. S. Chelack* 1089
Expressions of the c-Ha-*ras* and c-*myc* Genes in Rat Liver Tumors *Reiko Makino, Kenshi Hayashi, Shigeaki Sato, and Takashi Sugimura* 1096
Inhibition of *Escherichia coli* Fructose-1,6-bisphosphatase by Fructose 2,6-Bisphosphate
Frank Marcus, Ida Edelstein, and Judith Rittenhouse 1103
Stimulation of Rat Liver 4-Hydroxybenzoate: Polyprenyl Transferase Activity by a Cytosolic Protein Factor: Evidence for a Polyprenyl Pyrophosphate Transport Protein
A. Gupta, B. C. Paton, S. Ranganathan, and H. Rudney 1109
Solubilization of Brain α-2-Adrenoceptor with a Zwitterionic Detergent: Preservation of Agonist Binding and Its Sensitivity to GTP
Fritz Sladeczek, Joël Bockaert, and Bruno Rouot 1116
Interaction of Retinoids and Bilirubin with the Binding of Arachidonic Acid to Human α-Fetoprotein *Claude Aussel and René Masseyeff* 1122
Phorbol Esters Inhibit α_1-Adrenergic Stimulation of Glycogenolysis in Isolated Rat Hepatocytes *Silvia Corvera and J. Adolfo García-Sáinz* 1128
Effect of Dextran–Charcoal Treatment on the Dissociation Kinetics of Glucocorticoid–Receptor Complexes: Possible Involvement of Lipid *Philip A. Bell, T. Ryland Jones, and Philip J. Weatherill* 1134
Short-Term Regulation of Lysine of Ornithine Decarboxylase Activity in *Dictyostelium discoideum* *Ramón F. Pinilla, Amparo Cano, Luis Boto, and Angel Pestaña* 1141
A DNA-Binding Protein from *E. coli*: Isolation, Characterization, and Its Relationship with Proteins H1 and B1 *Bernard Laine, Pierre Sautiere, Annick Spassky, and Sylvie Rimsky* 1147
Fluorescence Investigations of Calmodulin Hydrophobic Sites
Anny Follenius and Dominique Gerard 1154
Active Cation Transport and Na + K + Mg ATPase of the Monotreme Erythrocytes
Hyun Dju Kim, Martha Baird, John Sallis, Stewart Nicol, and Russell E. Isaacks 1161
Hormonal Effects on the Development Changes of Mouse Small Intestinal Glycolipids
Eiji Sato, Michio Fujie, Tadayoshi Uezato, Michiya Fujita, and Kenji Nishimura 1168
The Biochemical and Functional Heterogeneity of Circulating Human Plasma Fibronectin
B. J. Boughton and A. W. Simpson 1174
Binding of Epidermal Growth Factor (EGF) and Insulin to Human Liver Microsomes and Golgi Fractions *Arye Lev-Ran, D. Hwang, Z. Josefsberg, G. Barseghian, M. Kemeny, M. Meguid, and D. Beatty* 1181
Inhibition of Dopamine Uptake by *N*-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine: A Cause of Parkinsonism *Timothy Denton and Bruce D. Howard* 1186
Retrohydroxamate Ferrichrome, a Biomimetic Analog of Ferrichrome
Thomas Emery, Lilane Emery, and Richard K. Olsen 1191
Stimulation of Synaptosomal Uptake of Neurotransmitter Amino Acids by Insulin: Possible Role of Insulin as a Neuromodulator *Dennis E. Rhoads, Richard J. DiRocco, Linda D. Osburn, Neal A. Peterson, and E. Raghupathy* 1198

Novel Peptides with Orally Active and Long-Lasting Antihypertensive Activity
Tadanori Morikawa, Katsumi Takada, Terutoshi Kimura, Shumpei Sakakibara, Masahiko Kurauchi, Yoichi Ozawa, Chikahiko Eguchi, Shigebumi Hashimoto, and Yasumi Yukari 1205

ERRATUM
Volume 118, Number 3, February 14, 1984: Jean-Louis Franc, Sonia Hovsepian, Guy Fayet, and Simone Bouchilloux, "Differential Effects of Thyrotropin on Various Glycosyltransferases in Porcine Thyroid Cells," pp. 910–915 1211

The DDCD-Reactive Aspartyl Residue of Subunit *c* from the *Escherichia coli* ATP Synthase Is Important for the Conformation of F_0 *Peter Friedl, Jürgen Hoppe, and Hans Ulrich Schairer* 527
Oxidation of Nitroxide Radicals by the Reaction of Hemoglobin with Hydrogen Peroxide
Takeo Yamaguchi, Tomoko Nakano, and Eiji Kimoto 534
Effects of Forskolin and Cholera Toxin on Cyclic AMP Release in a Neurotensin-Secreting Rat C-Cell Line *Fusun Zeytin, Christiane Mougin, Paul Brazeau, and Nicholas Ling* 540

A Previously Unidentified Leukotriene Produced by Human Polymorphonuclear Leukocytes *William Jubiz and George Nolan* 548
Inhibition of Parathormone-Stimulated Bone Resorption by Type I Interferon *Robert L. Jilka and James W. Hamilton* 553
Regulation of C_4 Photosynthesis Catalytic Dephosphorylation and P_i-Mediated Activation of Pyruvate P_i Dikinase *J. N. Burnell* 559
Hydroxyurea Has the Capacity to Induce Damage to Human Erythrocytes Which Can Be Modified by Radical Scavengers *J. Malec, W. M. Przybyszewski, M. Grabarczyk, and E. Sitarska* 566
Metabolism of the Neurotoxic Tertiary Amine, MPTP, by Brain Monoamine Oxidase *Kan Chiba, Anthony Trevor, and Neal Castagnoli, Jr.* 574
Cytoplasmic Ca^{2+} in Platelets Is Controlled by Cyclic AMP: Antagonism between Stimulators and Inhibitors of Adenylate Cyclase *George B. Zavoico and Maurice B. Feinstein* 579
Facilitated Transfer of Cholesteryl Ester between Rough and Smooth Microsomal Membranes of Plasma Lipid Transfer Protein *S. Hashimoto, R. E. Morton, and D. B. Zilversmit* 586
Retinoid-Binding Proteins Are Phosphorylated *in Vitro* by Soluble Ca^{2+}- and Phosphatidylserine-Dependent Protein Kinase from Mouse Brain *Frederick O. Cope, Jon M. Staller, Richard A. Mahsem, and R. K. Boutwell* 593
Involvement of Liver Aldehyde Oxidase in the Reduction of Nicotinamide *N*-Oxide *Shigeyuki Kitamura and Kiyoshi Tatsumi* 602
Enzymatic Synthesis of the Penicillin and Cephalosporin Nuclei from an Acyclic Peptide Containing Carboxymethylcysteine *R. J. Bowers, Susan E. Jensen, Leah Lyubechansky, D. W. S. Westlake, and Saul Wolfe* 607
Rapid Elevation of Rat Serum Prolactin Concentration by Cyclosporine, a Novel Immunosuppressive Drug *Stephan B. Cardon, Douglas F. Larson, and Diane Haddock Russell* 614
Modulation of Renal ATPase Activities by Cyclic AMP *E. M. Giesen, J. L. Imbs, M. Grima, M. Schmidt, and J. Schwartz* 619
Nicotine-Induced Inhibition of Lycopene Cyclization in *Phaseolus vulgaris* Cotyledons *Ryszard A. Sadowski* 625
The Place of Human γ-Trace (Cystatin C) among the Cysteine Proteinase Inhibitors *Alan J. Barrett, M. Elisabeth Davies, and Anders Grubb* 631
Effects of Cyclic 12-, 8-, and 6-Carbon Compounds on Glutathione *S*-Transferase Activity *Velta L. Sparnins, Luke K. T. Lam, and Lee W. Wattenberg* 637
Gastric Inhibitory Peptide (GIP), Pancreatic Glucagon, and Vasoactive Intestinal Peptide (VIP) are cAMP-Inducing Hormones in the Human Gastric Cancer Cell Line HGT-1: Homologous Desensitization of VIP Receptor Activity *Christian Gespach, Shahin Emami, and Gabriel Rosselin* 641
Antisera to Synthetic Peptide Recognize High-Molecular-Weight Enkephalin-Containing Proteins *David L. Christie, Nigel P. Birch, Jacqueline F. Aitken, David R. K. Harding, and William S. Hancock* 650
Antagonistic Action of Cholesterol toward the Toxicity of Hydroxysterols on Cultured Hepatoma Cells *Hélène Hietter, Elisabeth Trifilieff, Lysiane Richert, Jean-Paul Beck, Bang Luu, and Guy Ourisson* 657
Simultaneous Assay of Muscarinic and β-Adrenergic Receptors Using a Double Isotope Technique *Chris J. van Koppen, Helene L. M. Siero, Jaap F. Rodrigues de Miranda, Arie J. Beld, and Everardus J. Ariëns* 665
Binding of 5-Methoxypsoralen to Human Serum Low-Density Lipoproteins *Teresa de Sa E Melo, Patrice Morlière, Sonia Goldstein, René Santus, Louis Dubertret, and Dominique Lagrange* 670
Tissue-Specific Control of α-Fetoprotein Gene Expression *Gilbert J. Cote and Jen-Fu Chiu* 677
Kinetic Studies on the Mechanism and the Specificity of Peptide Semisynthesis Catalyzed by the Serine Proteases α-Chymotrypsin and β-Trypsin *L. Riechmann and V. Kasche* 686

Solubilization and Anionic Regulation of Cerebral Sedative/Convulsant Receptors Labeled with *tert*-Butylbicyclophosphoro[^{35}S]thionate (TBPS) *Rosario R. Trifiletti, Adele M. Snowman, and Solomon H. Snyder* 692
Inhibition of ADP-Ribosyltransferase Activity of Cholera Toxin by MDL 12330A and Chlorpromazine *Alan J. Bitonti* 700
Changes in tRNA Levels during the Induction of Hemoglobin Synthesis in Friend Leukemia Cells *Susan C. Weil, Roli K. Hirata, Anne L. McNamara, and David W. E. Smith* 707

Volume 120, Number 3, May 16, 1984

AUTHOR INDEX, Volume 120, Number 3, May 16, 1984 ii
Evidence for the Presence of a Hybrid of Phosphoglyceromutase/Bisphosphoglyceromutase in the Red Cells: Partial Characterization of the Hybrid *Raymonde Rosa, Marie-Claude Calvin, Marie-Odette Préhu, Mathieu Levy-Strauss, and Jean Rosa* 715
Effect of Dibromothymoquinone (DBMIB) on Reduction Rates of Photosystem I Donors in Intact Chloroplasts *Jack Farineau, Hervé Bottin, and Gyözö Garab* 721
Effects of L-Carnitine on Urea Synthesis following Acute Ammonia Intoxication in Mice *Mercedes Costell, José-Enrique O'Connor, María-Prado Míguez, and Santiago Grisolía* 726
Isolation and Characterisation of a cDNA Encoding the Precursor for Human Apolipoprotein AII *T. J. Knott, L. M. Priestley, M. Urdea, and J. Scott* 734
A Transient Species of Poly(A)+ RNA Detected by a Myosin Heavy Chain cDNA Probe in Muscle Cell Culture during Terminal Differentiation *Rongti Liang* 741
The Interaction of Divicine with Glutathione and Pyridine Nucleotides *U. Benatti, L. Guida, and A. De Flora* 747
Intermediates in the Enzymic Synthesis of Tetrahydrobiopterin in *Drosophila melanogaster* *Arthur C. Switchenko, Jann P. Primus, and Gene M. Brown* 754
Two New Tetrahydropterin Intermediates in the Adrenal Medullary *de Novo* Biosynthesis of Tetrahydrobiopterin *Gary K. Smith and Charles A. Nichol* 761
Kinase Activities Associated with Calcium-Activated Neutral Proteases *Un-Jin P. Zimmerman and William W. Schlaepfer* 767
FAD Requirement for the Reduction of Coenzyme F_{420} by Hydrogenase from *Methanobacterium formicicum* *Michael J. K. Nelson, David P. Brown, and James G. Ferry* 775
High Mobility Group Proteins HMG1 and HMG2 Do Not Decrease the Melting Temperature of DNA *Lyuben N. Marekov, Beltcho G. Beltchev, and Ladislav Pivec* 782
Presence of Platelet-Activating Factor in Blood from Humans and Experimental Animals: Its Absence in Anephric Individuals *Carlos Caramelo, Sagrario Fernández-Gallardo, Dolores Marín-Cao, Pedro Iñarrea, Juan C. Santos, José M. López-Novoa, and Mariano Sánchez Crespo* 789
Forskolin Suppresses the Slow Cyclic Variations of Glucose-Induced Electrical Activity in Pancreatic B Cells *J. C. Henquin, W. Schmeer, M. Nenquin, and H. P. Meissner* 797
The Rate of Initiation of α- and β-Globin mRNA Translation Is Modulated by 50-, 28-, and 24-kDa Polypeptide-Containing Fractions *Antonio Parets Soler, Louise Reibel, and Georges Schapira* 804
Preparation of Neurotensin Selectively Iodinated on the Tyrosine 3 Residue: Biological Activity and Binding Properties on Mammalian Neurotensin Receptors *Jean-Louis Sadoul, Jean Mazella, Shimon Amar, Patrick Kitabgi, and Jean-Pierre Vincent* 812
Activity of Endogenous Phospholipase C and Phospholipase A_2 in Glucose-Stimulated Pancreatic Islets *Marjorie E. Dunlop and Richard G. Larkins* 820
Photoaffinity Labeling of an Interferon-γ Receptor on the Surface of Cultured Fibroblasts *Paul Anderson and Cathryn Nagler* 828
Regulation of Platelet Activating Factor Synthesis: Modulation of 1-Alkyl-2-lyso-*sn*-glycero-3-phosphocholine:Acetyl-CoA Acetyltransferase by Phosphorylation and Dephosphorylation in Rat Spleen Microsomes *Daniel J. Lenihan and Ten-Ching Lee* 834

Synthesis and Biological Activity of a Cyclic Pseudohexapeptide Analog of Somatostatin
Thomas W. Gero, Arno F. Spatola, Ignacio Torres-Aleman, and Andrew V. Schally 840
Specific Desensitization of Actin Polymerization of Bovine Platelets
T. Imada, T. Kikuchi, H. Shimada, Y. Inada, and Y. Saito 846
Effects of the Novel Dihydropyridine BAY-K-8644 on Adrenomedullary Catecholamine Release Evoked by Calcium Reintroduction
Carmen Montiel, Antonio R. Artalejo, and Antonio G. García 851
Inositol(1,4,5)Trisphosphate-Promoted Ca^{2+} Release from Microsomal Fractions of Rat Liver
Alan P. Dawson and Robin F. Irvine 858
Inactivation of Glucosamine-6-phosphate Synthetase from *Salmonella typhimurium LT 2 SL 1027* by N^{6}-Fumarylcarboxyamido-*L*-2,3-diaminopropionic Acid

α_2-Adrenoceptors in Human Lymphocytes: Direct Characterization by [^{3}H]Yohimbine Binding
Sa'ad Titinchi and Barry Clark 1
Regulation of Glucose Metabolism in Rat Adrenal Gland in Alloxan-Diabetes: The Possible Role of Fructose 2,6-Bisphosphate
Milena Sochor, Ana Maria Gonzalez, and Patricia McLean 8
Release of Liposomal Markers by *Cerebratulus* Toxin A-III *Kenneth M. Blumenthal* 14
Cyclic Nucleotide- and Ca^{2+}-Independent Phosphorylation of Tubulin and Microtubule-Associated Protein-2 by Glycogen Synthase (Casein) Kinase-1
Toolsee J. Singh, Akira Akatsuka, Kuo-Ping Huang, Adavi S. N. Murthy, and Martin Flavin 19
Interaction of *Solanum tuberosum* Agglutinin with Human Platelets
Masaaki Higashihara, Yukio Ozaki, Tatsuya Ohashi, and Shoji Kume 27
Affinity Engineering of Maltoporin: Variants with Enhanced Affinity for Particular Ligands
Anne Clune, Kin-Sang Lee, and Thomas Ferenci 34
Nucleotide Sequence of the Promoter Region of the Melibiose Operon of *Escherichia coli*
Tadashi Shimamoto, Hiromichi Yazyu, Masamitsu Futai, and Tomofusa Tsuchiya 41
HPLC Purification of a Biologically Active Membrane Protein: The Reaction Center from Photosynthetic Bacteria *Gérard Berger, M. David Tiede, and Jacques Breton* 47
The Mitogenic Principle of *Escherichia coli* Lipoprotein: B-Lymphocyte Mitogenicity of the Synthetic Analog Palmitoyl-tetrapeptide (Pam-Ser-Ser-Asn-Ala).
W. G. Bessler, M. Cox, K. H. Wiesmüller, and G. Jung 55
The DNase Activity of an Endoplasmic Reticulum Nuclease and Its Effect on DNA Synthesis *in Vitro* *Athanasios Triantos, Sofia Kouidou, George Papageorgiou, Evangelos Kavoukopoulos, and Antonios Trakatellis* 62
Primary Amines and Chloroquine Inhibit Cytotoxic Responses to *Shigella* Toxin and Permit Late Antibody Rescue of Toxin-Treated Cells *Gerald T. Keusch and Mary Jacewicz* 69
Isolation of a Mitochondrial DNA Topoisomerase from Human Leukemia Cells
Frank J. Castora and Gary M. Lazarus 77
Characterization of Triglyceride Lipase Activities in Rat Skeletal Muscle
Peter Strohfeldt and Christian Heugel 87

Functional Reconstitution of Rat Liver Cytochrome *P*-450 with Mesohemin
Lester M. Bornheim, Maria Almira Correia, and Kevin M. Smith 95
Extracellular Calcium Protects Isolated Rat Hepatocytes from Injury
Marc W. Fariss, Kristin Olafsdottir, and Donald J. Reed 102
The Effects of Long-Term Growth Hormone Releasing Factor (GRF 1–40) Administration on Growth Hormone Secretion and Synthesis *in Vitro*
Carlos Dieguez, Steven M. Foord, Gerald Shewring, Catherine A. Edwards, Philip J. Heyburn, John R. Peters, Reginald Hall, and Maurice F. Scanlon 111
Incorporation of the Cytochrome *P*-450 Monooxygenase System into Large Unilamellar Liposomes Using Octylglucoside, Especially for Measurements of Protein Diffusion in Membranes
D. Schwarz, K. Gast, H. W. Meyer, U. Lachmann, M. J. Coon, and K. Ruckpaul 118
Characterization of the RNA-Dependent DNA Polymerase of a New Human T Lymphotropic Retrovirus (Lymphadenopathy-Associated Virus)
M. A. Rey, B. Spire, D. Dormont, F. Barre-Sinoussi, L. Montagnier, and J. C. Chermann 126
Insulin-Promoted Decrease in the Phosphorylation of Protein Synthesis Initiation Factor eIF-2
C. A. Towle, H. J. Mankin, J. Avruch, and B. V. Treadwell 134
Characterization of Phosphotyrosyl-protein Phosphatase Activity Associated with Calcineurin
Jonathan Chernoff, Mary Ann Sells, and Heng-Chun Li 141
Amino Acid Sequence of Rat Epidermal Thiol Proteinase Inhibitor *Koji Takio, Eiki Kominami, Yoshiaki Bando, Nobuhiko Katunuma, and Koiti Titani* 149
Diadenosine Tetraphosphate Activates AMP Deaminase from Rat Muscle
Ascensión Fernández, María J. Costas, María A. Günther Sillero, and Antonio Sillero 155
Two-Step Dissociation of Bovine 6 S Procarboxypeptidase A by Dimethylmaleylation
B. Kerfelec, C. Chapus, and A. Puigserver 162
Stimulation of Sphingomyelin Hydrolysis by Cannabidiol in Fibroblasts from a Niemann–Pick Patient *Sumner Burstein, Sheila A. Hunter, and Lori Renzulli* 168
A Rapid and Sensitive *in Vitro* Assay of 25-Hydroxyvitamin D_3 1α-Hydroxylase and 24-Hydroxylase Using Rat Kidney Homogenates
Noboru Horiuchi, Toshimasa Shinki, Satoshi Suda, Naoyuki Takahashi, Sachiko Yamada, Hiroaki Takayama, and Tatsuo Suda 174
Stereochemical Course of the Biosynthesis of 1-Aminocyclopropane-1-carboxylic Acid. I. Role of the Asymmetric Sulfonium Pole and the α-Amino Acid Center
Shahrokh Khani-Oskouee, Jeffrey P. Jones, and Ronald W. Woodard 181
Reporter Molecules as Probes of DNA Conformation: Structure of a Crystalline Complex Containing 2-Methyl-4-nitroaniline Ethylene Dimethylammonium Hydrobromide: 5-Iodocytidylyl(3′–5′)guanosine *Nand K. Vyas, Meenakshi N. Vyas, Shri C. Jain, and Henry M. Sobell* 188
Amino-Terminal Variation in Melanoma Antigens *John J. Marchalonis, Christian Schwabe, Douglas M. Gersten, and Vincent J. Hearing* 196
Hydropathic Anti-complementarity of Amino Acids Based on the Genetic Code
J. Edwin Blalock and Eric M. Smith 203
Development and Regional Distribution of Two Molecular Forms of the Catalytic Subunit of the Na,K-ATPase in Rat Brain *Susan C. Specht* 208
Activation Mechanism of Tris(2,3-dibromopropyl)phosphate to the Potent Mutagen, 2-Bromoacrolein *Sidney D. Nelson, James G. Omichinski, Łokanathan Iyer, W. Perry Gordon, Erik J. Soderlund, and Erik Dybing* 213
Keratin- and Polyamide-Coated Inorganic Matrices as Supports for Glucoamylase Immobilization *J. Lobarzewski, A. Paszczyński, T. Wolski, and J. Fiedurek* 220
High-Pressure NMR Studies of Hemoproteins: The Effect of Pressure on the Quaternary Structure of Hemoglobin *Isao Morishima and Mitsunobu Hara* 229
Inhibition of Polyriboinosinic:Polyribocytidylic Acid-Induced Depression of Mouse Hepatic Mixed Function Oxidases by Actinomycin D or Cycloheximide
P. Gorce and A. E. Wade 237

2′-*O*-Methyl-1-methyl Adenosine: A New Modified Nucleoside in Ragi *(Eleusine coracana)* tRNA *K. S. Raviprakash and Joseph D. Cherayil* 243

Isolation from Rat Liver of a Peroxisomal Enzyme Which Converts Molecular Form 1 of Biliverdin Reductase into Molecular Form 3 *Rosalía B. Frydman, María L. Tomaro, Josefina Awruch, and Benjamín Frydman* 249

Enhancement of Renal Medulla Prostaglandin Synthetase Activity by Dexamethasone Treatment in the Rat *A. Erman and A. Nasjletti* 255

A Chemical Modification to Make Horseradish Peroxidase Soluble and Active in Benzene *K. Takahashi, H. Nishimura, T. Yoshimoto, Y. Saito, and Y. Inada* 261

The Effect of Carbonic Anhydrase Inhibition on the Velocity of Thrombin-Stimulated Platelet Aggregation under Physiological Conditions *Winfried Siffert, Georg Fox, and Gerolf Gros* 266

Mg^{2+} Counteracts the Inhibitory Effect of Spermine on Liver Phosphorylase Kinase *Eikichi Hashimoto, Tomoko Kobayashi, and Hirohei Yamamura* 271

1,25-Dihydroxyvitamin D_3 Receptors in a Subset of Mitotically Active Lymphocytes from Rat Thymus *D. M. Provvedini, L. J. Deftos, and S. C. Manolagas* 277

Visualization of Antigenic Proteins Blotted onto Nitrocellulose Using the Immuno-Gold-Staining (IGS) Method *Barbara Surek and Erwin Latzko* 284

Changes in the Conformation of the Interferon-β Gene during Differentiation and Induction *J. Coveney, G. Scott, R. King, D. C. Burke, and D. Skup* 290

In Organello and *in Vitro* Phosphorylation of Chloroplast Ribosomal Proteins *Carole Guitton, Anne-Marie Dorne, and Regis Mache* 297

Induction of Laurate ω-Hydroxylase by Di(2-ethylhexl)phthalate in Rat Liver Microsomes *Richard Okita and Christina Chance* 304

Thyroglobulin Structure–Function: The Effect of Iodination on the Structure of Human Thyroglobulin *Kenneth M. Zabel and Allen B. Rawitch* 310

Specific Binding of a Calcium Channel Activator, [^{3}H]BAY k 8644, to Membranes from Cardiac Muscle and Brain *R. A. Janis, D. Rampe, J. G. Sarmiento, and D. J. Triggle* 317

One Base Substitution in IVS-2 Causes a β^+-Thalassemia Phenotype in a Chinese Patient *Yoshihiro Takihara, Eiji Matsunaga, Takanori Nakamura, Shou-tien Lin, Hung-tu Lee, Yasuyuki Fukumaki, and Yasuyuki Takagi* 324

Structural Asymmetry of the F_1 of *Escherichia coli* as Indicated by Reaction with Dicyclohexyl-carbodiimide *Hans Ruedi Lötscher and Roderick A. Capaldi* 331

Effects of Verapamil on the Binding Properties of Rat Heart Muscarinic Receptors: Evidence for an Allosteric Site *Magali Waelbroeck, Patrick Robberecht, Philippe De Neef, and Jean Christophe* 340

Comparison of Rat and Human Left Ventricle β-Adrenergic Receptors: Subtype Heterogeneity Delineated by Direct Radioligand Binding *Tarcisio Vago, Maurizio Bevilacqua, Regina Dagani, Rachele Meroni, Giulio Frigeni, Carmine Santoli, and Guido Norbiato* 346

Opposing Actions of Methylxanthines and Dibutyryl Cyclic AMP on 1,25-Dihydroxyvitamin D_3 Production and Calcium Fluxes in Isolated Chick Renal Tubules *J. L. Taft, M. French, J. A. Danks, and R. G. Larkins* 355

Retinoids Increase the Incorporation of D-[^{3}H]Galactose into Epidermal Glycoproteins *Ian A. King and F. Michael Pope* 364

N-Acetyl-5-methoxy Kynurenamine, a Brain Metabolite of Melatonin, Is a Potent Inhibitor of Prostaglandin Biosynthesis *R. W. Kelly, F. Amato, and R. F. Seamark* 372

Isolation and Regional Localization by *in Situ* Hybridization of a Unique Gene Segment to Chromosome 21 *Evelyn A. Devine, Sarah L. Nolin, George E. Houck, Jr., Edmund C. Jenkins, David L. Miller, and W. Ted Brown* 380

1,2-Diacylglycerols Do Not Potentiate the Action of Phospholipases A_2 and C in Human Platelets *S. P. Watson, B. R. Ganong, R. M. Bell, and E. G. Lapetina* 386

Visualization of Protein Kinases in Lymphocytes Stimulated to Proliferate with Concanavalin A or Inhibited with a Phorbol Ester *Anand P. Iyer, Sharon A. Pishak, Marion J. Sniezek, and Andrea M. Mastro* 392

Crosslinking of Uteroglobin by Transglutaminase
Ramanathapuram Manjunath, Soo Il Chung, and Anil B. Mukherjee 400

Inhibition of Endoribonuclease VI from *Artemia* Larvae by Cytidine 2′-Phosphate
Claudio F. Heredia 408

Ethanolamine Mimics Insulin Effects *in Vitro*
Gegham Barseghian, Thomas Papoian, David L. Hwang, Avraham Roitman, and Arye Lev-Ran 413

Prolactin Receptors on Human Lymphocytes and Their Modulation by Cyclosporine *Diane Haddock Russell, Lynn Matrisian, Ruthann Kibler, Douglas F. Larson, Bonnie Poulos, and Bruce E. Magun* 899
Dissociation of Single-Stranded DNA from Nucleosomes following Modification with Acetic Anhydride *Juan Jordano, Francisco Montero, and Enrique Palacián* 907
UM-X7.1 Myopathic Hamster Heart Shows Altered Calcimedin Protein Levels *Pamela B. Moore* 915
Hydroxamate Siderophore-Mediated Iron Uptake in *E. coli:* Stereospecific Recognition of Ferric Rhodotorulic Acid *Berthold F. Matzanke, Gertraud I. Müller, and Kenneth N. Raymond* 922
Modulation of Macrophage Interaction with *Trypanosoma cruzi* by Phospholipase A_2-Sensitive Components of the Parasite Membrane *Mark C. Connelly and Felipe Kierszenbaum* 931
An ATP-Stimulated Factor That Enhances the Nuclear Binding of "Activated" Receptor–Glucocorticoid Complex *Kazuki Okamoto, Fumihide Isohashi, Masatsugu Horiuchi, and Yukiya Sakamoto* 940
Effect of Human High-Density Lipoproteins, Anti-apolipoproteins CII and CIII, and Hydrolysis of Very Low-Density Lipoprotein (VLDL) Cholesterol Ester on VLDL Catabolism *in Vitro* *B. W. Liu, B. A. Hynd, and M. L. Kashyap* 946
A Circular Dichroism Study of (+)-Gossypol Binding to Proteins *Kevin J. Whaley, D. S. Sampath, and P. Balaram* 953
The Mechanism of the Cytochrome *P*-448-Mediated 6-Hydroxylation of 7-Ethoxycoumarin *John S. Walsh and Gerald T. Miwa* 960
Importance of the Stereo-orientation of Aromatic Groups in Enkephalins to Opiate Receptor Recognition *Yasuyuki Shimohigashi, Tommaso Costa, Theodore J. Nitz, Hao-Chia Chen, and Charles H. Stammer* 966
Phorbol Diesters Promote β-Adrenergic Receptor Phosphorylation and Adenylate Cyclase Desensitization in Duck Erythrocytes *David R. Sibley, Ponnal Nambi, Jack R. Peters, and Robert J. Lefkowitz* 973
Investigation of the Kinetic and Stereochemical Recognition of Arene and Azaarene Oxides by Isozymes A_2 and C_2 of Glutathione *S*-Transferase *Charles C. Boehlert and Richard N. Armstrong* 980

Stimulation of Hepatic Microsomal β-Glucuronidase by Calcium
Patricia M. Sokolove, Margaret A. Wilcox, Ronald G. Thurman, and Frederick C. Kauffman 987
Purification of Cytochrome *P*-450 Catalyzing 25-Hydroxylation of Vitamin D_3 from Rat Liver Microsomes *Shin-ichi Hayashi, Mitsuhide Noshiro, and Kyuichiro Okuda* 994
Oxidation of Organosulfur Compounds by the Microsomal Fraction of Germinating Pea Seeds *(Pisum sativum)* *Daniel R. Doerge and Michael D. Corbett* 1001
Cadmium Binding to Metallothioneins and the Estimation of Protein Concentration Using Cadmium-Saturation Methods *Annie Y. C. Law and Martin J. Stillman* 1006
Identification of a New Glutathione *S*-Tranferase from Rat Liver Cytosol
C. Channa Reddy, Nan-qian Li, and Chen-Pei D. Tu 1014
A Two-Dimensional NMR Method for Assignment of Deoxyribose Proton NMR Signals in d(ApGpCpT)
Kofen Lai, Dinesh O. Shah, Eugene DeRose, and David G. Gorenstein 1021
NaCl-Induced Ornithine Decarboxylase and DNA Synthesis in Rat Stomach Mucosa
Chie Furihata, Yuko Sato, Masaki Hosaka, Taijiro Matsushima, Fumio Furukawa, and Michihito Takahashi 1027
The Inhibition of Both Initiation and Elongation of Adenovirus DNA Replication by Actinomycin D *Steven Pincus and David Rekosh* 1033
Activation of *nit-1*-Nitrate Reductase by W-Formate Dehydrogenase
Joseph C. Deaton, Edward I. Solomon, Charles N. Durfor, Phyllis J. Wetherbee, Barbara K. Burgess, and Deloria B. Jacobs 1042
Author Index for Volume 121 1048

Volume 122, Number 1, July 18, 1984

AUTHOR INDEX, Volume 122, Number 1, July 18, 1984 ii
The Distribution and Intracellular Translocation of Aflatoxin B_1 in Isolated Hepatocytes
John J. Ch'ih and Thomas M. Devlin 1
Purification and Properties of the H_2-Oxidizing (Uptake) Hydrogenase of the N_2-Fixing Anaerobe *Clostridium pasteurianum* W5 *Jiann-Shin Chen and D. K. Blanchard* 9
A Rapid, High-Yield Method for the Purification of the Water-Soluble 33-Kilodalton Protein of Spinach Thylakoids *Lars-Gunnar Franzén and Lars-Erik Andréasson* 17
A Pioneer Synthesis of Conjugates of a Thymic Peptide Hormone and Polyamines
Hong-Ming Shieh, Duane Campbell, and Karl Folkers 21
On the Mechanism of Peroxidase-Catalyzed Chemiluminescence from Isobutyraldehyde
H. Brian Dunford, Wilhelm J. Baader, Cornelia Bohne, and Giuseppe Cilento 28
Conformations of Adducts and Kinetics of Binding to DNA of the Optically Pure Enantiomers of Anti-benzo[a]pyrene Diol Epoxide *Nicholas E. Geacintov, Hiroko Yoshida, Victor Ibanez, Stephen A. Jacobs, and Ronald G. Harvey* 33
Hepatic Heme Metabolism: Possible Role of Biliverdin in the Regulation of Heme Oxygenase Activity *R. Krishnan Kutty and Mahin D. Maines* 40
Purification and Partial Characterization of a 19 kDa/p*I* 4.5 Nucleolar Phosphoprotein
Donald K. McRorie, M. R. S. Rao, Ira L. Goldknopf, T. Patrick Harty, David Roll, Young Soo Ahn, and Harris Busch 47
Target Size Analysis of Rhodopsin in Retinal Rod Disk Membranes
Simon M. Hughes, Glyn Harper, and Martin D. Brand 56
The Complete Amino Acid Sequence of Aspartate Aminotransferase from *Escherichia coli*: Sequence Comparison with Pig Isoenzymes
Kiyoshi Kondo, Sadao Wakabayashi, Toshiharu Yagi, and Hiroyuki Kagamiyama 62
Autocrine Regulation of Growth. I. Glucocorticoid Inhibition Is Overcome by Exogenous Platelet-Derived Growth Factor
Allan J. Syms, James S. Norris, and Roy G. Smith 68

Subsite Profile of the Active Center of Porcine Pancreatic α-Amylase: Kinetic Studies Using Maltooligosaccharides as Substrates
Eugenio Prodanov, Christiane Seigner, and Guy Marchis-Mouren 75
Biosynthesis of Intestinal Microvillar Proteins: Intracellular Processing of Lactase–Phlorizin Hydrolase *E. Michael Danielsen, Hanne Skovbjerg, Ove Norén, and Hans Sjöström* 82
Nature of the Principal Photointermediate of Halorhodopsin *Janos K. Lanyi* 91
Effect of Glucose on β-Adrenergic-Induced Downregulation of Insulin Receptor Binding in Human Fat Cells *Peter Arner, Johan Hellmér, Staffan Ewerth, and Jan Östman* 97
The Isolation and Characterization of an Insulin-Releasing Tetrapeptide from Urines of Patients with Lipoatrophic Diabetes
K. L. Reichelt, J. H. Johansen, K. Titlestad, and P. D. Edminson 103
Isolation and Characterization of Post γ-Globulin in Mouse
A. Colle, C. Tonnelle, Th. Jarry, C. Coirre, and Y. Manuel 111
Relevance of Protease "Inhibitor" to the ATP–Ubiquitin Proteolytic System
Esther Eytan and Avram Hershko 116
Autocrine Regulation of Growth. II. Glucocorticoids Inhibit Transcription of c-*sis* Oncogene-Specific RNA Transcripts *J. S. Norris, L. E. Cornett, J. W. Hardin, P. O. Kohler, S. L. MacLeod, A. Srivastava, A. J. Syms, and R. G. Smith* 124
Circulating Digitalis-like Substance Is Increased in DOCA-Salt Hypertension
Itaru Kojima 129
Quantification of Two Cytochrome *P*-450 Isoenzymes by an Enzyme-Linked Immunosorbent Assay (ELISA) *Marc Paye, Philippe Beaune, Pierre Kremers, F. P. Guengerich, Francine Letawe-Goujon, and Jacques Gielen* 137
Amino Acid Distribution in Brain after Use of Amphetamines and β-Phenylethylamine
M. M. Widelitz, A. M. Gugger, and L. Lakritz 143
Altered Expression of the H^+ ATPase in *Streptococcus faecalis* Membranes
Adolph Abrams and Charlotte Jensen 151
Modulation of Ca^{2+}-Activated, Phospholipid-Dependent Protein Kinase in Platelets Treated with a Tumor-Promoting Phorbol Ester *Peter M. Tapley and Andrew W. Murray* 158
Inhibition of the DNA Catenation Activity of Type II Topoisomerase by VP16-213 and VM26
Anil Minocha and Byron H. Long 165
Effect of Atrial Natriuretic Factor (ANF)-Related Peptides on Aldosterone Secretion by Adrenal Glomerulosa Cells: Critical Role of the Intramolecular Disulfide Bond
Lynn Chartier, Ernesto Schiffrin, and Gaétan Thibault 171
Cloning in *Bacillus subtilis* of an Extremely Thermostable α-Amylase: Comparison with Other Cloned Heat-Stable α-Amylases *Richard P. Piggott, Ann Rossiter, Stephen A. Ortlepp, J. Tony Pembroke, and James F. Ollington* 175
Role of Oxygen Reactive Species in *Schistosoma mansoni* Egg-Induced Granulomatous Inflammation *S. W. Chensue, L. Quinlan, G. I. Higashi, and S. L. Kunkel* 184
Homogeneous Magnetic Fields Influence Pancreatic Islet Function *in Vitro*
Alberto Hayek, Carmela Guardian, Julian Guardian, and Gregory Obarski 191
Reevaluation of Lipolytic Activity of Growth Hormone in Rabbit Adipocytes
Bruno Barenton, Véronique Batifol, Yves Combarnous, Jean-Paul Dulor, Philippe Durand, and André Vezinhet 197
Concanavalin A Can Trap Insulin and Increase Insulin Internalization into Cells Cultured in Monolayer *Kenji Sorimachi and Yosihiro Yasumura* 204
Expression of the Transferrin Gene during Development of Nonhepatic Tissues: High Level of Transferrin mRNA in Fetal Muscle and Adult Brain
Mariano J. Levin, David Tuil, George Uzan, Jean-Claude Dreyfus, and Axel Kahn 212
Chemical Identity of the Glucose Transporter with the [^{3}H]Cytochalasin B-Photolabeled Component of Human Erythrocyte Membranes: Equal Sensitivity to Trypsin and Endoglycosidase F. *Amira Klip, Mark Deziel, and Denise Walker* 218
Raman Spectroscopy of Liver Alcohol Dehydrogenase
K. T. Yue, J.-P. Yang, C. L. Martin, D. L. Sloan, and R. H. Callender 225

Stimulation of Plasminogen Activator in Osteoblast-like Cells by Bone-Resorbing Hormones
J. A. Hamilton, S. R. Lingelbach, N. C. Partridge, and T. J. Martin 230
Ca^{2+}-Dependent K^+ Permeability of Heart Sarcolemmal Vesicles: Modulation by cAMP-Dependent Protein Kinase Activity and by Calmodulin
Yeshao Wen, Konrad S. Famulski, and Ernesto Carafoli 237
On the Mechanism for Inactivation of Cytochalasin Binding Activity Associated with F-Actin and Spectrin-Band 4.1-Actin Complex by Sulfhydryl Reagents
Diane C. Lin, Katherine D. Tobin, and David H. Cribbs 244
Surface Charge of Purple Membranes Measured by Laser Doppler Velocimetry
Lester Packer, Bernard Arrio, Georges Johannin, and Pierre Volfin 252
Correlated Increase of the Expression of the c-*ras* Genes in Chemically Induced Hepatocarcinomas
D. Corcos, N. Defer, M. Raymondjean, B. Paris, M. Corral, L. Tichonicky, J. Kruh, D. Glaise, A. Saulnier, and C. Guguen-Guillouzo 259
A Very High Affinity Opioid Binding Site in Rat Brain: Demonstration by Computer Modeling
R. A. Lutz, R. A. Cruciani, T. Costa, P. J. Munson, and D. Rodbard 265
Mast Cell Products Stimulate Collagenase and Prostaglandin E Production by Cultures of Adherent Rheumatoid Synovial Cells
Joan R. Yoffe, David J. Taylor, and David E. Woolley 270
Inhibition of Ornithine Decarboxylase and Glutamic Acid Decarboxylase Activities by Phosphorylethanolamine and Phosphorylcholine
Gad M. Gilad and Varda H. Gilad 277
The GIP Receptor on Pancreatic Beta Cell Tumor: Molecular Identification by Covalent Crosslinking *Alain Couvineau, Brigitte Amiranoff, Nicole Vauclin-Jacques, and Marc Laburthe* 283
Identification of GTP as a Physiologically Relevant Inhibitor of *Escherichia coli* ADP-Glucose Synthetase *David N. Dietzler, Sharon E. Porter, William G. Roth, and Mary P. Leckie* 289
Transition Metals Mediate Enzymatic Inactivation Caused by Favism-Inducing Agents
Tikva Navok and Mordechai Chevion 297
Synthesis and *in Vitro* Bioactivity of Human Growth Hormone-Releasing Factor Analogs Substituted at Position 1
Nicholas Ling, Andrew Baird, William B. Wehrenberg, Naoto Ueno, Toratane Munegumi, Teh-Chang Chiang, Milagros Regno, and Paul Brazeau 304
Interaction of Terbium with Human Platelets
D. Del Principe, A. Menichelli, W. De Matteis, and A. Finazzi Agrò 311
^{125}I-Labeled Inulin: A Convenient Marker for Deposition of Liposomal Contents *in Vivo*
E. F. Sommerman, P. H. Pritchard, and P. R. Cullis 319
Molecular Heterogeneity of Platelet-Activating Factor Produced by Stimulated Human Polymorphonuclear Leukocytes *R. Neal Pinckard, Evelyn M. Jackson, Carol Hoppens, Susan T. Weintraub, Janet C. Ludwig, Linda M. McManus, and Glen E. Mott* 325
Receptor-Mediated Regulation of Calcium Mobilization and Cyclic GMP Synthesis in Neuroblastoma Cells *Shunji Ohsako and Takeo Deguchi* 333
Alkaline Transfer of DNA to Plastic Membrane
Piotr Chomczynski and Pradman K. Qasba 340
Tiazofurin-Induced Selective Depression of NAD Content in Hepatoma 3924A
Juris J. Liepnieks, Mary A. Faderan, May S. Lui, and George Weber 345
Growth Inhibition by Methionine Analog Inhibitors of *S*-Adenosylmethionine Biosynthesis in the Absence of Polyamine Depletion
Carl W. Porter, Janice R. Sufrin, and Dennis D. Keith 350
The Metabolic Activation of Cyanamide to an Inhibitor of Aldehyde Dehydrogenase Is Catalyzed by Catalase *Eugene G. DeMaster, Frances N. Shirota, and Herbert T. Nagasawa* 358
Regulation of Repair of Naturally Occurring DNA Strand Breaks in Lymphocytes
W. L. Greer and J. G. Kaplan 366

Cyclic AMP and Calcium as Potential Mediators of Stimulation of Cultured Schwann Cell Proliferation by Axolemma-Enriched and Myelin-Enriched Membrane Fractions *James H. Meador-Woodruff, Brenda L. Lewis, and George H. DeVries* 373
Corticotropin-Releasing Factor Is Contained within Perikarya and Nerve Fibers of Rat Duodenum *Hermann J. Wolter* 381
Polyamines in *Acanthamoeba castellanii*: Presence of an Unusually High, Osmotically Sensitive Pool of 1,3-Diaminopropane *Richard Poulin, Jacques Larochelle, and Paul Nadeau* 388
Rat Lung Tissue Is a Site of α_1-Proteinase Inhibitor Synthesis: Evidence by Cell-Free Translation *Werner Budek, Peter Bünning, and Peter C. Heinrich* 394
Dissipation of Membrane Potential of *Escherichia coli* Cells Induced by Macromolecular Polylysine *Takashi Katsu, Tomofusa Tsuchiya, and Yuzaburo Fujita* 401
Studies on the Glutathione *S*-Transferase of Human Platelets *K. S. Rogerson, D. Mitchell, A. Lawton, R. Ibbotson, W. Cotton, and R. C. Strange* 407
Phosphorylation of Zymogen Granule Membrane Proteins in Intact Rat Pancreatic Acinar Cells *Andy Peiffer, Claude Gagnon, and Seymour Heisler* 413
Synthesis of DNA Polymerase by *in Vitro* Translation of Calf RNA *Sevilla Detera-Wadleigh, Essam Karawya, and Samuel H. Wilson* 420
β-Endorphin: Evidence for the Existence of Opioid- and Non-opioid-Binding Components for the Tritiated Human Hormone in NG108-15 Cells *Manfred Westphal and Choh Hao Li* 428
NMR Studies on Angiotensin II: Histidine and Phenylalanine Ring Stacking and Biological Activity *John M. Matsoukas and Graham J. Moore* 434
Evidence that Intracellular Synthesis of 5-Fluorouridine-5′-phosphate from 5-Fluorouracil and 5-Fluorouridine Is Compartmentalized *Jashovam Shani and Peter V. Danenberg* 439
Phase Transitions in Combined Rabbit Muscle Sarcoplasmic Reticulum Lipids by Raman Spectroscopy *Ellen Bicknell-Brown and Kenneth G. Brown* 446
Na^+/H^+ Exchange in the Cyanobacterium *Synechococcus* 6311 *Eduardo Blumwald, J. Mario Wolosin, and Lester Packer* 452
Inhibition of Initiation of DNA Synthesis by Aminoglycoside Antibiotics *Nobuo Tanaka, Keita Matsunaga, Hiroshi Yamaki, and Toshio Nishimura* 460
Characterization of the Newly Formed Internucleotide Bond of *in Vitro* Spliced mRNAs *Jozsèf Szeberènyi and Carlos J. Goldenberg* 466
The Level of Thyroglobulin mRNA Is Regulated by TSH Both *in Vitro* and *in Vivo* *V. Enrico Avvedimento, Donatella Tramontano, M. Valeria Ursini, Antonella Monticelli, and Roberto Di Lauro* 472

Volume 122, Number 2, July 31, 1984

AUTHOR INDEX, Volume 122, Number 2, July 31, 1984 ii
Evidence for the Presence of ATP-Dependent Calcium Pump and ATPase Activities in Bull Sperm Head Membranes *H. Breitbart, R. Darshan, and S. Rubinstein* 479
Enzyme-Activated Inhibition of Bacterial *D*-Amino Acid Transaminase by β-Cyano-D-alanine *Hiroshi Ueno, Thomas S. Soper, and James M. Manning* 485
Strain Differences among Inbred Mice in Protein Kinase C Activity *Alvin M. Malkinson, Kathleen Conway, Stephen Bartlett, Martin S. Butley, and Christine Conroy* 492
Photoaffinity Labeling of Methyltransferase Enzymes with *S*-Adenosylmethionine: Effects of Methyl Acceptor Substrates *Jeffrey H. Hurst, Melvin L. Billingsley, and Walter Lovenberg* 499
Sterol Carrier $Protein_2$ (SCP_2)-Mediated Transfer of Cholesterol to Mitochondrial Inner Membranes *G. V. Vahouny, P. Dennis, R. Chanderbhan, G. Fiskum, B. J. Noland, and T. J. Scallen* 509
Influence of Ethanol on Fatty Acid Composition of Phospholipids in Cultured Neurons *M. Morrisson, P. A. Wilce, and B. C. Shanley* 516
The Permeability of Human Lymphocytes to Chloride *William Negendank* 522

Changes in Fructose 2,6-Bisphosphate Levels after Glucose Loading of Starved Rats
Thomas H. Claus, Fritz Nyfeler, Helen A. Muenkel, Michael G. Burns, and Simon J. Pilkis 529
Leukotriene B_4 Is an Incomplete Agonist for the Activation of Human Neutrophils
Stephen M. Prescott, Guy A. Zimmerman, and Anthony R. Seeger 535
Neuromedin N: A Novel Neurotensin-like Peptide Identified in Porcine Spinal Cord
Naoto Minamino, Kenji Kangawa, and Hisayuki Matsuo 542
Polyamine Binding to Phospholipid Vesicles and Inhibition of Lipid Peroxidation
B. Tadolini, L. Cabrini, L. Landi, E. Varani, and P. Pasquali 550
Heterogeneity of 3′ Nontranslated Regions in Prooiomelanocortin (POMC) Precursor mRNA of Chum Salmon *Onchorynchus keta*: Polymorphism of the Gene
Takashi Nishizawa, Namiko Kitahara, Hisako Nanami, Naomi Hara, Chikako Kotake, Hideo Okazaki, Toshiwo Andoh, and Gen-Ichiro Soma 556
Identification of a 58,000-Dalton Phosphoprotein with Tyrosine Protein Kinase Activity in a Murine Lymphoma Cell Line
G. Gacon, R. Fagard, J. P. Boissel, S. Fischer, L. Reibel, J. P. Piau, G. Schapira, and P. M. Comoglio 563
Peptidyl Carbamate Esters: A New Class of Specific Elastase Inhibitors
K. Tsuji, B. J. Agha, M. Shinogi, and G. A. Digenis 571
Photoaffinity Label for Cellular Retinol-Binding Protein
Mordechai Sheves, Adina Makover, and Samuel Edelstein 577
Basic Somatomedin (B-SM) Receptors in Human Term Placenta Explants
B. Bhaumick and R. M. Bala 583
Direct Radioimmunoassay of Atrial Natriuretic Factor
J. Gutkowska, G. Thibault, P. Januszewicz, M. Cantin, and J. Genest 593
An Immunochemical Approach to the Identification of the MBTA Binding Site of the Nicotinic Acetylcholine Receptor of *Torpedo californica* *Sean Cahill and Jakob Schmidt* 602
2,3-Bisphosphoglycerate Inhibits the Transport of Phosphoenolpyruvate across the Erythrocyte Membrane *Naotaka Hamasaki* 609
Synthesis and Biological Actions of Melanin Concentrating Hormone
Brian C. Wilkes, Victor J. Hruby, Wade C. Sherbrooke, Ana M. de L. Castrucci, and M. E. Hadley 613
Phosphorylation of Rabbit Liver Cytochrome *P*-450 LM_2 and Its Effect on Monooxygenase Activity *W. Pyerin, H. Taniguchi, A. Stier, F. Oesch, and C. R. Wolf* 620
Chinese Hamster Cell Mutants with Defective Endocytosis of Low-Density Lipoprotein Contain Altered Fatty Acid Composition in the Membrane
Akinori Masuda, Kichinobu Tomita, and Michihiko Kuwano 627
Destruction of Tryptophan Residues by Hydrogen Peroxide in Iron–Superoxide Dismutase
Fumiyuki Yamakura 635
Neocarzinostatin Abstracts a Hydrogen during Formation of Nucleotide 5′-Aldehyde on DNA
Robert L. Charnas and Irving H. Goldberg 642
Dynamic Interaction between Functional Groups in the Active Site of Glycogen Phosphorylase *b*
János Matkó, Ildikó Seres, Sándor Papp, and Béla Somogyi 649
Fluorescence Study of the Effects of Histone Tyrosyl Residues of DNA *A. Mozo-Villarías* 656
Amino Acid Sequence Homology between the C_3 Chain of Rat Prostatic Steroid-Binding Protein and Human α_2-Macroglobulin *Michael E. Baker* 662
Myeloperoxidase Singlet Molecular Oxygen Generation Detected by Direct Infrared Electronic Emission *Ahsan U. Khan* 668
Inactivation of Human α-1-Proteinase Inhibitor by Gas-Phase Cigarette Smoke
William A. Pryor, Margaret M. Dooley, and Daniel F. Church 676
Regulation of Mn–SOD Activity in the Mouse Heart: Glucose Effect
Daret Kasemset and Larry W. Oberley 682
The Localization of the Gene for Apolipoprotein C-II to Chromosome 19
S. S. Fojo, S. W. Law, H. B. Brewer, Jr., A. Y. Sakaguchi, and S. L. Naylor 687
Molecular Weights of Subunits of Acetyl CoA Carboxylase in Rat Liver Cytoplasm
Jonathan Goodson, Terri S. Pope, and John B. Allred 694

Conformational Aspects of Angiotensinogen Analogs with Renin Inhibitory Activity
Inta Liepina, Gregory V. Nikiforovich, and Antonio C. M. Paiva 700
Stimulation of Phospholipid Methylation by Glucose in Pancreatic Islets
Anjaneyulu Kowluru, Rajendra S. Rana, and Michael J. MacDonald 706
Identification of a Prealbumin Variant in the Serum of a Japanese Patient with Familial Amyloidotic Polyneuropathy
Masamitsu Nakazato, Kenji Kangawa, Naoto Minamino, Satoru Tawara, Hisayuki Matsuo, and Shukuro Araki 712
Radioimmunoassay for Detecting Abnormal Prealbumin in the Serum for Diagnosis of Familial Amyloidotic Polyneuropathy (Japanese Type)
Masamitsu Nakazato, Kenji Kangawa, Naoto Minamino, Satoru Tawara, Hisayuki Matsuo, and Shukuro Araki 719
Inhibition of Glycogen Synthesis in Rat Hepatocytes by Medium Zn^{2+} *Robert Rognstad* 726
Superoxide Release by Neutrophils: Synergistic Effects of a Phorbol Ester and a Calcium Ionophore *John M. Robinson, John A. Badwey, Manfred L. Karnovsky, and Morris J. Karnovsky* 734
Alkaline Phosphatase Isozymes in Large Intestines and Large Intestinal Tumors of Fischer 344 Rats *Roland A. Owens and Philip E. Hartman* 740
Inhibition of Peptidyltransferase and Possible Mode of Action of a Dipeptidyl Chloramphenicol Analog *Sara C. McFarlan and Robert Vince* 748
Amiloride-Sensitive Na^+/H^+ Exchange in Human Neutrophils: Mechanism of Activation by Chemotactic Factors *Sergio Grinstein and Wendy Furuya* 755
Essentiality of the Small Subunit (B) in the Catalysis of RuBP Carboxylase/Oxygenase Is Not Related to Substrate Binding in the Large Subunit (A)
Tetsuko Takabe, Aran Incharoensakdi, and T. Akazawa 763
The *in Vivo* Effect of Benzamide and Phenobarbital on Liver Enzymes: Poly(ADP-ribose) Polymerase, Cytochrome *P*-450, Styrene Oxide Hydrolase, Cholesterol Oxide Hydrolase, Glutathione *S*-Transferase, and UDP-Glucuronyl Transferase
Martin J. Griffin, Eva Kirsten, Raoul Carubelli, Ram B. Palakodety, Jerome McLick, and Ernest Kun 770
TPA-Induced Contraction of Isolated Rabbit Vascular Smooth Muscle
Howard Rasmussen, John Forder, Itaru Kojima, and Alexander Scriabine 776
Characterization of the Binding of Apolipoprotein E-Free High-Density Lipoprotein to Cultured Human Endothelial Cells
Louis Havekes, Donald Schouten, Victor van Hinsbergh, and Elly de Wit 785
Azapeptides: A New Class of Angiotensin-Converting Enzyme Inhibitors
W. J. Greenlee, E. D. Thorsett, J. P. Springer, A. A. Patchett, E. H. Ulm, and T. C. Vassil 791
Reversal of *L*-Cysteine of the Growth-Inhibitory and Glutathione-Depleting Effects of *N*-Methylformamide and *N,N*-Dimethylformamide
Robert F. Cordeiro and Todd M. Savarese 798
Stopped-Flow Kinetic, ^1H, and ^{31}P NMR Analysis of the Intercalation of Ethidium with Poly[d(G–C) · d(G–C)] *Subramanian Chandrasekaran, C. R. Krishnamoorthy, Robert L. Jones, J. C. Smith, and W. David Wilson* 804
TCDD (2,3,7,8-Tetrachlorodibenzo-*p*-dioxin) Reduces Lipoprotein Lipase Activity in the Adipose Tissue of the Guinea Pig *David W. Brewster and Fumio Matsumura* 810
The Stereospecific Activation of Protein Kinase C *Robert R. Rando and Nelson Young* 818
1-*O*-Hexadecyl-2-acetyl-*sn*-glycerol Stimulates Differentiation of HL-60 Human Promyelocytic Leukemia Cells to Macrophage-like Cells
Michael J. C. McNamara, Jeffrey D. Schmitt, Robert L. Wykle, and Larry W. Daniel 824
Molecular Cloning of cDNA for Rat Liver Catalase
Takashi Osumi, Hisashi Ozasa, Shoko Miyazawa, and Takashi Hashimoto 831
U1 Small Nuclear RNA-like Sequences in Human High-Molecular-Weight RNA
J. M. Capasso, M. A. Docherty, A. Ray, E. D. Kaplan, and G. L. Eliceiri 838

Ester Synthesis Catalyzed by Polyethylene Glycol-Modified Lipase in Benzene
Yuji Inada, Hiroyuki Nishimura, Katsunobu Takahashi, Takayuki Yoshimoto, Anutosh Ranjan Saha, and Yuji Saito 845

Vitamin A Inhibition of Polyoma Virus Replication
Jeffry K. Russell and J. Edwin Blalock 851

The Identification of Terminal $\alpha(1\rightarrow3)$-Linked Galactose in *N*-Acetyllactosamine Type of Glycopeptides by Means of 500-MHz ^{1}H NMR Spectroscopy
Lambertus Dorland, Herman van Halbeek, and Johannes F. G. Vliegenthart 859

Resonance Raman Spectra of β-Carotene in Native and Modified Low-Density Lipoprotein
Surendra P. Verma, Jean R. Philippot, Bernard Bonnet, Josette Sainte-Marie, Yves Moschetto, and Donald F. H. Wallach 867

Volume 122, Number 3, August 16, 1984

AUTHOR INDEX, Volume 122, Number 3, August 16, 1984 ii

The Human Apolipoprotein A-II Gene Is Located on Chromosome 1
K. J. Lackner, S. W. Law, H. B. Brewer, Jr., A. Y. Sakaguchi, and S. L. Naylor 877

L-Proline Is an Essential Amino Acid for Hepatocyte Growth in Culture
Toshikazu Nakamura, Hideo Teramoto, Yumiko Tomita, and Akira Ichihara 884

Regional Distribution of Metorphamide in Rat and Guinea Pig Brain
Mark Sonders, Jack D. Barchas, and Eckard Weber 892

Isolation and Characterization of the Bovine Hypothalamic Corticotropin-Releasing Factor
Frederick Esch, Nicholas Ling, Peter Böhlen, Andrew Baird, and Roger Guillemin 899

Fructose-2,6-Bisphosphate, a Potent Regulator of Carbohydrate Metabolism, Inhibits Trehalose Phosphorylase from Protist *Euglena gracilis*
Kazutaka Miyatake, Yukari Kuramoto, and Shozaburo Kitaoka 906

Molecular Diversity of Calpastatin in Mammalian Organs
Emiko Takano, Noboru Yumoto, Reiji Kannagi, and Takashi Murachi 912

Colinear Organization of *Xenopus laevis* and Mouse Mitochondrial Genomes
Anne-Marie Champagne, Nicole Dennebouy, Jean-François Julien, Jean-Claude Lehegarat, and Jean-Claude Mounolou 918

Kainate Reversibly Aggregates Brain Tubulin *in Vitro*
Ana María López-Colomé and Armando Casas 925

Two-Dimensional Peptide Mapping by Polyacrylamide–Gel Electrophoresis with Limited Proteolysis in SDS *Akiko Takeda and Robert E. Cone* 932

Human Placenta β-Galactoside-Binding Lectin: Purification and Some Properties
Jun Hirabayashi and Ken-ichi Kasai 938

Effect of Dietary Cholesterol on Mevalonate Metabolism by Sterol and Nonsterol Pathways
J. A. Aguilera, A. Linares, V. Arce, and E. Garcia-Peregrin 945

Evidence for a Similar Receptor Site for Binding of [^{3}H]Leukotriene E_4 and [^{3}H]Leukotriene D_4 to the Guinea Pig Crude Lung Membrane *John B. Cheng and Robert G. Townley* 949

Effects of AY 9944 on Low-Density-Lipoprotein Metabolism in Cultured Human Fibroblasts
J. C. Mazière, C. Mazière, L. Mora, J. Gardette, C. Wolf, D. Rainteau, V. Barbu, C. Roux, and J. Polonovski 955

Synthesis of Rat Transferrin in *Escherichia coli* Containing a Recombinant Bacteriophage
Angela R. Aldred, Geoffrey J. Howlett, and Gerhard Schreiber 960

A Distinct β-Hexosaminidase Isoenzyme Separated from Human Leukemic Lymphocytes and Myelocytes *Aldo Orlacchio, Claudio Maffei, Carla Emiliani, Pietro Rambotti, and Stephen Davis* 966

[1,6-α-Aminosuberic acid, 3-(*p*-azidophenylalanine), 8-arginine]vasopressin as a Photoaffinity Label for Renal Vasopressin Receptors: An Evaluation
Falk Fahrenholz and Peter Crause 974

Chlorpromazine Inhibits the Calcium-Mediated Effects of S-100 Protein(s) on Assembled Brain Microtubule Proteins, but Not Those on Microtubule Protein Assembly
Rosario Donato 983

The Calcium Agonist Bay K 8644 Stimulates Secretion from a Pituitary Cell Line
John J. Enyeart and Patricia M. Hinkle 991
Phosphorylation of Rat Heart Ornithine Decarboxylase by Type 2 Casein Kinase
Flavio Meggio, Flavio Flamigni, Claudio M. Caldarera, Carlo Guarnieri, and Lorenzo A. Pinna 997
Rapid Elevation of Plasminogen Activator Activity in Rat Tissues by Prolactin
Arthur R. Buckley, Charles W. Putnam, and Diane H. Russell 1005
Cytoplasmic Free Calcium Measured by Quin2 Fluorescence in Isolated Ventricular Myocytes at Rest and during Potassium Depolarization
T. Powell, P. E. R. Tatham, and V. W. Twist 1012
The Role of Histone H1 and Nonstructured Domains of Core Histones in Maintaining the Orientation of Nucleosomes within the Chromatin Fiber
Vladimir L. Makarov, Stephan I. Dimitrov, Irina R. Tsaneva, and Iliya G. Pashev 1021
High-Molecular-Weight Aggregates from Human Cataracts: Characterization by Western Blot Analysis *L. J. Takemoto, J. S. Hansen, and J. Horwitz* 1028
Biotin-Labeled DNA: A Novel Approach for the Recognition of a DNA Binding Site on Cell Membranes *Gary Gabor and Robert M. Bennett* 1034
Selective Activation of Cyclic AMP-Dependent Protein Kinase by Calcitonin in a Calcitonin-Secreting Lung Cancer Cell Line *J. D. Zajac, S. A. Livesey, and T. J. Martin* 1040
Insulin Stimulates the Dephosphorylation of Phosphothreonine from Fat-Pad ATP–Citrate Lyase
Seethala Ramakrishna, Dominick L. Pucci, and William B. Benjamin 1047
Stimulation of Hepatic Glycogenolysis by 12-*O*-Tetradecanoylphorbol-13-acetate (TPA) via a Calcium-Requiring Process *Satoshi Kimura, Koichi Nagasaki, Isamu Adachi, Ken Yamaguchi, Hirota Fujiki and Kaoru Abe* 1057
Activation of Partially Purified Rat Liver Lipid Methyltransferase by Phosphorylation
Isabel Varela, Isabel Mérida, María Pajares, Mayte Villalba, and José M. Mato 1065
Testicular GnRH-like Factors: Characterization of Biologic Activity
Shalender Bhasin and Ronald S. Swerdloff 1071
Isolation and Nucleotide Sequence of a Cloned Cardionatrin cDNA
B. P. Kennedy, J. J. Marsden, T. G. Flynn, A. J. de Bold, and P. L. Davies 1076
Study of the Carbohydrate Part of Yeast Acid Phosphatase
Branko Kozulić, Slobodan Barbarić, Blanka Ries, and Pavao Mildner 1083
Diltiazem Potentiates Mechanical Activity in Mammalian Skeletal Muscle
K. B. Walsh, S. H. Bryant, and A. Schwartz 1091
Mechanism of Estrogen Action on Cellular Proliferation: Evidence for Indirect and Negative Control on Cloned Breast Tumor Cells *Ana M. Soto and Carlos Sonnenschein* 1097
Identification of the Sporulation Gene *spoOA* Product of *Bacillus subtilis*
Jun Kudoh, Toshihiko Ikeuchi, and Kiyoshi Kurahashi 1104
Effect of Specific Carboxyl Modifications on the Blue Acid Species and O_{650} Photocycle Intermediate of Bacteriorhodopsin
Eva Hrabeta, A. Edward Robinson, and Lester Packer 1110
Inhibitory Factor of Phospholipase A_2 in Normal Human Serum
Jacqueline Etienne, Annick Grüber, and Jacques Polonovski 1117
Separation of Two Forms of Glutamate Synthase in Leaves of Tomato *(Lycopersicon esculentum)*
C. Avila, F. Cánovas, I. Núñez de Castro, and V. Valpuesta 1125
Alzheimer's Disease and Down's Syndrome: Sharing of a Unique Cerebrovascular Amyloid Fibril Protein *George G. Glenner and Caine W. Wong* 1131
Isolation and Characterization of Five Subfractions of Chicken Erythrocyte Histone H1
Thierry Dupressoir and Pierre Sautiere 1136
Amino Acid Sequence of Toxin VII, a β Toxin from the Venom of the Scorpion *Tityus serrulatus*
G. Bechis, F. Sampieri, P-M. Yuan, T. Brando, M-F. Martin, C. R. Diniz, and H. Rochat 1146
Pentobarbital Anesthesia Decreases Fructose 2,6-Bisphosphate Levels in Rat Liver
Fritz Nyfeler, Robert W. McCain, Bart J. DeBrock, and Simon J. Pilkis 1154
Deoxynucleoside Triphosphate Pool of Mouse FM3A Cell Lines Unaffected by Mutagen Treatment *Masao Hyodo, Narushi Ito, and Kenshi Suzuki* 1160

Metabolism of Valproic Acid by Hepatic Microsomal Cytochrome *P*-450
Kathryn S. Prickett and Thomas A. Baillie 1166
A Globular Protein with Slower Amide Proton Exchange from an α Helix than from Antiparallel β Sheets *K. Wüthrich, P. Štrop, S. Ebina, and M. P. Williamson* 1174
Insulin-Stimulating Peptide from Tryptic Digest of Bovine Serum Albumin
Akemichi Ueno, Naokatu Arakaki, Hideo Inoue, Toshiya Oribe, and Yoshiro Takeda 1179
Dissociated Regulation of Growth and Ornithine Decarboxylase Activity by Estrogen in the Rat Uterus *Ellen A. Rorke and Benita S. Katzenellenbogen* 1186
The Interaction of Calmodulin with Human and Avian Spectrin
Athar Husain, Geoffrey J. Howlett, and William H. Sawyer 1194
Purification of a NADH–Ferricyanide Reductase from Plant Microsomal Membranes with a Zwitterionic Detergent
Anne-Marie Galle, Claire Bonnerot, Alain Jolliot, and Jean-Claude Kader 1201
The Monoclonal Antibody HNK-1 Reacts with a Human Peripheral Nerve Ganglioside
Amjad A. Ilyas, Richard H. Quarles, and Roscoe O. Brady 1206
7-Hydroxymethotrexate Formation in a Human Lymphoblastic Cell Line
Paul A. Newton and Raymond L. Blakley 1212
Isolation and Characterization of Caprine Corticotropin-Releasing Factor
Nicholas Ling, Frederick Esch, Peter Böhlen, Andrew Baird, and Roger Guillemin 1218
Structural Features of the Nicotinic Acetylcholine Receptor Revealed by Antibodies to Synthetic Peptides *Manohar Ratnam and Jon Lindstrom* 1225
Phospholipid Metabolism in Calcium-Regulated Differentiation in Cultured Murine Keratinocytes *V. A. Ziboh, R. R. Isseroff, and R. Pandey* 1234
Separation of Bovine Brain Mono- and Diacylglycerol Lipases by Heparin–Sepharose Affinity Chromatography *Akhlaq A. Farooqui, W. Allen Taylor, and Lloyd A. Horrocks* 1241
The C–C Bond Cleavage of a Lignin Model Compound, 1,2-Diarylpropane 1,3-Diol, with a Heme–Enzyme Model Catalyst Tetraphenylprophyrinatoiron(III) Chloride in the Presence of *tert.*-Butylhydroperoxide *Mikio Shimada, Tsuyoshi Habe, Toshiaki Umezawa, Takayoshi Higuchi, and Tadashi Okamoto* 1247
Evidence for Repetitive Structure of the Large Acyl-Carrier Protein Subunit of *Escherichia coli* Citrate Lyase
Subhalakshmi Subramanian, Amaresh Basu, Sita Nilekani, and Churya SivaRaman 1253
An Oligosaccharide of the O-Linked Type Distinguishes the Free from the Combined Form of hCGα Subunit *Laurence A. Cole, Fulvio Perini, Steven Birken, and Raymond W. Ruddon* 1260
Protein Kinase C: Rapid Enzyme Purification and Substrate Dependence of the Diacylglycerol Effect *M. Wolf, N. Sahyoun, H. LeVine III, and P. Cuatrecases* 1268
An NMR Study of the Oxidation State of Cu,Zn Superoxide Dismutase in Human Red Blood Cells *Marina Scarpa, Paolo Viglino, and Adelio Rigo* 1276
Purification to Apparent Homogeneity of Inactive Kallikrein from Rat Urine
Masanori Takaoka, Hirofumi Okamura, Takahiro Iwamoto, Chitose Ikemoto, Yasuko Mimura, and Shiro Morimoto 1282
Gonadotropin-Releasing Hormone Rapidly Alters Polyphosphoinositide Metabolism in Rat Granulosa Cells *John S. Davis, Leigh A. West, and Robert V. Farese* 1289
Affinity of Chromatin Constituents for Isopeptidase
Fusayuki Kanda, Sei-ichi Matsui, Donald E. Sykes, and Avery A. Sandberg 1296
Regulation of LH β-Subunit mRNA in the Sheep Pituitary Gland during Different Feedback States of Estradiol *Thomas Landefeld and Jadwiga Kepa* 1307
Particulate Protein-Synthesis Factors Associated with Translatable mRNA in Mouse Hybridoma Cells *Petr Pohlreich, František Franěk, Lubor Šimek, and Jan Hradec* 1314
α-Fetoprotein Receptors in a Human Breast Cancer Cell Line
M. J. Villacampa, R. Moro, J. Naval, C. Failly-Crepin, F. Lampreave, and J. Uriel 1322
Parallel Increases in Amount of [^{3}H]GDP Binding and Thermogenin Antigen in Brown-Adipose-Tissue Mitochondria of Cafeteria-Fed Rats
Jan Nedergaard, Atso Raasmaja, and Barbara Cannon 1328

Evidence for Intracellular Formation of Angiotensins: Coexistence of Renin and Angiotensin-Converting Enzyme in Leydig Cells of Rat Testis
Kailash N. Pandey, Kunio S. Misono, and Tadashi Inagami 1337
Complete Deficiency of AMP Deaminase in Human Erythrocytes
N. Ogasawara, H. Goto, Y. Yamada, I. Nishigaki, T. Itoh, and I. Hasegawa 1344
Trifluoperazine Binding to Calmodulin: A Shift Reagent ^{43}Ca NMR Study
Hans J. Vogel, Thomas Andersson, William H. Braunlin, Torbjörn Drakenberg, and Sture Forsén 1350
Purification of the Dihydropyridine Receptor of the Voltage-Dependent Ca^{2+} Channel from Skeletal Muscle Transverse Tubules Using (+) [^{3}H]PN 200–110
Marc Borsotto, Jacques Barhanin, Robert I. Norman, and Michel Lazdunski 1357
Regulatory Effects of Adenosine Diphosphate on the Activity of the Plasma Membrane ATPase of Corn Roots *Shu-I Tu, Gerald Nagahashi, and Bernadene J. Sliwinski* 1367
Polyamine-Stimulated Phosphorylation of Proteins from Corn *(Zea mays* L.) Coleoptiles
K. Veluthambi and B. W. Poovaiah 1374
Alteration of Poly(ADP-ribose) Metabolism by Hyperthermia
Hector Juarez-Salinas, Gilberto Duran-Torres, and Myron K. Jacobson 1381
Subunit A of Calmodulin-Dependent Protein Phosphatase Requires Mn^{2+} for Activity
Dennis L. Merat, Zhuo Yi Hu, Timothy E. Carter, and Wai Yiu Cheung 1389
Endogenous Phosphorylation of Retinal Photoreceptor Outer Segment Proteins by Calcium Phospholipid-Dependent Protein Kinase *C. Lal Kapoor and Gerald J. Chader* 1397
Succinate and Phenylsuccinate as Modifiers of Sulfhydryl Groups of Inner Mitochondrial Membrane Protein: Study by EPR
Christine Mutet, Gérard Crémel, and Albert Waksman 1404
T7 DNA Polymerase Is Not a Zinc-Metalloenzyme and the Polymerase and Exonuclease Activities Are Inhibited by Zinc Ions *Ivan Slaby, Birger Lind, and Arne Holmgren* 1410
Protein Synthesis in Rabbit Reticulocytes: Requirements for Met-$tRNA_f$ · 40 S Preinitiation Complex Formation with AUG Codon and Physiological mRNAs
Reena Roy, Nargis Nasrin, Mir Firoz Ahmad, and Naba K. Gupta 1418
Purification of a Human Alternative Complement Pathway Inhibitor from Hemolymph of Larval Fall Armyworm *(Spodoptera frugiperda)*
Osmond J. M. D'Cruz and Noorbibi K. Day 1426
Immunological Similarity of Epoxide Hydrolase Activity in the Mitochondrial and Cytosolic Fractions of Mouse Liver *Sarjeet S. Gill* 1434
Cleavage of Nascent UDP Glucuronosyltransferase from Rat Liver by Dog Pancreatic Microsomes *Peter I. Mackenzie and Ida S. Owens* 1441
Partial Purification and Characterization of Hepatocyte Growth Factor from Serum of Hepatectomized Rats *Toshikazu Nakamura, Katsuhiko Nawa, and Akira Ichihara* 1450
Author Index for Volume 122 1460

Volume 123, Number 1, August 30, 1984

AUTHOR INDEX, Volume 123, Number 1, August 30, 1984 ii
Human Apolipoprotein A-II: Nucleotide Sequence of a Cloned cDNA, and Localization of Its Structural Gene on Human Chromosome 1 *Marsha N. Moore, Fa-Ten Kao, Yuan-Kai Tsao, and Lawrence Chan* 1
Synthesis of the Disaccharide 6-*O*-β-D-Galactopyranosyl-2-acetamido-2-deoxy-D-galactose Using Immobilized-β-Galactosidase *Lars Hedbys, Per-Olof Larsson, Klaus Mosbach, and Sigfrid Svensson* 8
E. coli Aspartokinase II–Homoserine Dehydrogenase II Polypeptide Chain Has a Triglobular Structure *Jamila Belfaiza, Akram Fazel, Klaus Müller, and Georges N. Cohen* 16
Stimulation of Prostacyclin Synthesis by Thromboxane A_2-like Prostaglandin Endoperoxide Analogs in Cultured Vascular Smooth Muscle Cells *Aviv Hassid* 21
On the Influence of Hydrophobicity in the SIMS Spectra of Amino Acids in Glycerol Matrix
E. De Pauw, G. Pelzer, Dao Viet Dung, and J. Marien 27

Steroidogenic Effect of Exogenous Phospholipase C on Bovine Adrenal Fasciculata Cells
A. J. Hadjian, M. Culty, and E. M. Chambaz 33

Solubilization and Affinity Labeling of a Dihydropyridine Binding Site from Skeletal Muscle: Effects of Temperature and Diltiazem on [^{3}H]Dihydropyridine Binding to Transverse Tubules *Terence L. Kirley and Arnold Schwartz* 41

Simultaneous Isolation of Two Platelet Membrane Fractions: Biochemical, Immunological, and Functional Characterization *Jocelyne Enouf, Raymonde Bredoux, Bernadette Boizard, Jean-Luc Wautier, Hugues Chap, Jany Thomas, Meno de Metz, and Sylviane Levy-Toledano* 50

The Mode of Action of Zaluzanin C, an Inhibitor of Translation in Eucaryotes
F. Santamaría, E. Zaera, D. Vázquez, and A. Jiménez 59

Diacylglycerols Enhance Human Neutrophil Degranulation Responses: Relevancy to a Multiple Mediator Hypothesis of Cell Function *Joseph T. O'Flaherty, Jeffery D. Schmitt, Charles E. McCall, and Robert L. Wykle* 64

Rat Brain Acetylcholinesterase Turnover *in Vivo*: Use of a Radioactive Methylphosphonothioate Irreversible Inhibitor *Pierre Goossens, Jacques Viret, and François Leterrier* 71

RNA-Containing Nuclear Binding Sites for Glucocorticoid-Receptor Complexes
Gian Paolo Rossini 78

Specific Internalization of Estrogen and Binding to Nuclear Matrix in Isolated Uterine Cells
Richard J. Pietras and Clara M. Szego 84

Affinity Labeling of the Exchangeable Nucleotide Binding Site in Platelet Tubulin
Manfred Steiner 92

Calelectrins Are a Ubiquitous Family of Ca^{2+}-Binding Proteins Purified by Ca^{2+}-Dependent Hydrophobic Affinity Chromatography by a Mechanism Distinct from That of Calmodulin
Thomas C. Cüdhof 100

The β-Major and β-Minor Globin Genes in Murine Erythroleukemia Cells Replicate during the Same Early Interval of the S Phase *J. D. Braunstein and C. L. Schildkraut* 108

Aortic Endothelial Cells in Culture Secrete Glycoproteins Reacting with Blood Platelets
Françoise Fauvel, Robert Campos-Oriola, Dominique Leger, Georges Pignaud, Jean Rosenbaum, and Yves J. Legrand 114

Rapid Diglyceride Phosphorylation in Isolated Bovine Rod Outer Segments
Mark A. Seyfred, Russell E. Kohnken, Christine A. Collins, and David G. McConnell 121

Modulation of Normal Myelopoiesis *in Vitro* by Retinoic Acid
Keiya Ozawa, Noriharu Sato, Akio Urabe, and Fumimaro Takaku 128

Membrane Protein Carboxylmethylation Does Not Appear to Be Involved in the Response of Erythrocytes to Cytoskeletal Stress *Jack R. Barber and Steven Clarke* 133

Hormone-Regulated Expression of Cellular *ras*^{H} Oncogene in Mammary Carcinomas in Rats
Freesia L. Huang and Yoon Sang Cho-Chung 141

Leumorphin Is a Novel Endogenous Opioid Peptide in Man
Mitsuaki Suda, Kazuwa Nakao, Makoto Sakamoto, Takaaki Yoshimasa, Narito Morii, Noboru Yanaihara, Shosaku Numa, and Hiroo Imura 148

Electrolysis-Mediated Irreversible Inactivation of Lipoxygenase Directed toward Electroaffinity Labeling *Thomas J. Holmes, Jr., Jonathan L. Vennerstrom, and Varghese John* 156

1,25-Dihydroxyvitamin D_3 Inhibits Selectively the Mitogenic Stimulation of Mouse Medullary Thymocytes *Amiram Ravid, Ruth Koren, Abraham Novogrodsky, and Uri A. Liberman* 163

Tumor-Promoting Phorbol Diesters: Substrates for Diacylglycerol Lipase
Myles C. Cabot 170

Effect of Lipid Composition Changes on Carbocyanine Dye Fluorescent Response
Michel Deleers, Jean-Paul Servais, Françoise de Laveleye, and Ernst Wulfert 178

Cytochrome *P*-450 Inducibility by Ethanol and 7-Ethoxycoumarin *O*-Deethylation in *S. cerevisiae* *R. Del Carratore, C. Morganti, A. Galli, and G. Bronzetti* 186

Use of a 2-5A Analog Probe for Detecting RNA Ligase and RNA Ligase Substrates in Mammalian Cell Extracts *Walden K. Roberts, P. Jane Cayley, and Ian M. Kerr* 194

Activation of Pyruvate Dehydrogenase Complex (PDC) of Rat Heart Mitochondria by Glyburide *Cynthia K. Buffington and Abbas E. Kitabchi* 202

1,25-Dihydroxyvitamin D Causes Attenuation of Cyclic AMP Responses in Monocyte-like Cells
J. E. Rubin and B. D. Catherwood 210

Isolation and Characterization of Plasma Membranes from Rabbit Skeletal Muscle
E. Rock, L. Lefaucheur, and J. Chavallier 216

Sulfate Transport in Brush Border Membrane Vesicles Prepared from Human Placental Syncytiotrophoblast *David E. C. Cole* 223

Skin Calcium-Binding Protein: Effect of Vitamin D Deficiency and Vitamin D Treatment
M. Rizk, J. H. Pavlovitch, L. Didierjean, J. H. Saurat, and S. Balsan 230

Inhibition of the Methylcoenzyme M–Methylreductase System by NAD^+ and $NADP^+$ in Cell Extracts of *Methanosarcina barkeri* *Douglas O. Mountfort and Rodney A. Asher* 238

Infrared Spectra of Carbon Monoxide Bound to Mitochondria from Diverse Species and Tissues Reveal Structurally Similar Cytochrome *c* Oxidase Dioxygen Reaction Sites
Lawrence J. Young, Ólöf Einarsdóttir, Charles R. Vossbrink, and Winslow S. Caughey 247

Monoclonal Antibodies to Mitochondrial F1-ATPase and Oligomycin Sensitivity-Conferring Protein (OSCP): Tools for Recognition of Well-Conserved and Essential Antigenic Sites
Ph. Archinard, M. Moradi-Améli, c. Godinot, and D. C. Gautheron 254

Metabolism of Nitropolycyclic Aromatic Hydrocarbons by Human Intestinal Microflora
Carl. E. Cerniglia, Paul C. Howard, Peter P. Fu, and Wirt Franklin 262

Cross-Linking of Proteins to DNA in Newly Synthesized Chromatin by Diisopropylfluorophosphate, a Serine Protease Inhibitor
Ken Tsutsui, Koji Aoyama, and Takuzo Oda 271

Evolutionary Conservation of DNA Coding for Maternal RNA in Sea Urchins
Gordon P. Moore 278

Trapping of Mannitol in Rat-Liver Mitochondria and Lysosomes
Simone Wattiaux-De Coninck and Robert Wattiaux 286

Microelectrophoretic Study of Radiation-Induced DNA Damages in Individual Mammalian Cells *O. Ostling and K. J. Johanson* 291

Mechanism of the Action of the Inhibitor of Reverse Transcriptase
Makoto Rokutanda, Sumiyo T. Watanabe, and Yukiko Y. Maeda 299

Two Multigene Families for Marsupial Neurohypophyseal Hormones? Identification of Oxytocin, Mesotocin, Lysipressin, and Arginine Vasopressin in the North American Opossum *(Didelphis virginiana)* *Jacqueline Chauvet, Dominique Hurpet, Gilles Michel, Maria-Thérèse Chauvet, and Roger Archer* 306

Dopamine Receptors in Rat Pituitary and Estradiol-Induced Pituitary Tumor: Effect of Chronic Treatment with Bromocriptine *Thérèse Di Paolo and Pierre Falardeau* 312

Role of Insulin on the Control of Postnatal Increase in Ornithine Transcarbamylase Activity in Rat Liver *Claude Gautier and René Vaillant* 317

Comparison of Repair of Methylated Pyrimidines in Poly(dT) by Extracts from Rat Liver and *Escherichia coli* *M. Eileen Dolan, David Scicchitano, B. Singer, and Anthony E. Pegg* 324

Activation by Hemoglobin of the Ca^{2+}-Requiring Neutral Proteinase of Human Erythrocytes: Structural Requirements *S. Pontremoli, B. Sparatore, E. Melloni, M. Michetti, and B. L. Horecker* 331

Synthesis of Atrial Natriuretic Peptides and Studies on Structural Factors in Tissue Specificity
M. Sugiyama, H. Fukumi, R. T. Grammer, K. S. Misono, Y. Yabe, Y. Morisawa, and T. Inagami 338

The Small Nuclear Ribonucleoproteins That React with Anti-Sm and Anti-RNP Antibodies
Arturo Martí, Motoo Matsuda, Ram K. Sihag, and George L. Eliceiri 345

Angle-Resolved Fluorescence Depolarization of 1,6-Diphenyl-1,3,5-hexatriene (DPH) in Unsaturated Digalactosyldiacylglycerol (DGDG) Lipid Bilayers
Martin van de Ven, Gijs van Ginkel, and Yehudi K. Levine 352

Vanadate- and Dicyclohexylcarbodiimide-Insensitive Proton Extrusion from Oxygen-Pulsed Cells of the Cyanobacterium *Anacystis nidulans*
Wolfgang H. Nitschmann and Günter A. Peschek 358

Transcriptional Control of Human Diploid Fibroblast Collagen Synthesis by Interferon-γ
Joel Rosenbloom, George Feldman, Bruce Freundlich, and Sergio A. Jimenez 365
Production of an Insulin-like Growth Factor by Osteosarcoma
Julie Blatt, Carlie White, Suzette Dienes, Howard Friedman, and Thomas P. Foley, Jr. 373
Reduction of Epidermal Growth Factor Receptor Affinity by Heterologous Ligands: Evidence for a Mechanism Involving the Breakdown of Phosphoinositides and the Activation of Protein Kinase C *Kenneth D. Brown, Jonathan Blay, Robin F. Irvine, John P. Heslop, and Michael J. Berridge* 377
Effects of Calmodulin Antagonists on Human Ovarian Cancer Cell Proliferation *in Vitro*
Yoshihiro Kikuchi, Ichiro Iwano, and Koichi Kato 385
Ionomycin Can Elevate Intraplatelet Ca^{2+} and Activate Phospholipase A without Activating Phospholipase C *S. E. Rittenhouse and W. C. Horne* 393
Heterogeneity of Protein Kinase NII from Rat Liver Nuclei
Akira Inoué, Yoko Tei, Shang-Le Qi, Youtaro Higashi, Munehiko Yukioka, and Seiji Morisawa 398
Amino Terminal Fragments of Human Progastrin from Gastrinoma
Joseph R. Reeve, Jr., John H. Walsh, Ronald K. Tompkins, David Hawke, and John E. Shively 404
ERRATUM
Volume 120, Number 2, April 30, 1984: Federico Leighton, Rosina Pérsico, and Cecilia Necochea, "Peroxisomal Fatty Acid Oxidation Is Selectively Inhibited by Phenothiazines in Isolated Hepatocytes," pp. 505–511 410

Volume 123, Number 2, September 17, 1984

AUTHOR INDEX, Volume 123, Number 2, September 17, 1984 ii
The Mitogenic Activity of $pp60^{v\text{-}src}$, the Oncogenic Protein Product of the *src* Gene of Avian Sarcoma Virus, Is Independent of External Serum Growth Factors
Jon P. Durkin and James F. Whitfield 411
A Basal Unit of Valine-Sensitive Acetolactate Synthase of *Neurospora crassa*
Hiroshi Tanaka and Homare Kuwana 418
Isolation and Characterization of Yeast Mutants Blocked in Mevalonic Acid Formation
Madeleine Servouse, Nicole Mons, Jean-Louis Baillargeat, and Francis Karst 424
Short-Term Ammonium Inhibition of Nitrogen Fixation in *Azotobacter*
F. J. Cejudo, A. de la Torre, and A. Paneque 431
Regulation of $(Na^+ + K^+)$-ATPase by Inorganic Phosphate: pH Dependence and Physiological Implications *W.-H. Huang and A. Askari* 438
Rat Atrial Natriuretic Factor: Isolation, Structure, and Biological Activities of Four Major Peptides *K. S. Misono, R. T. Grammer, H. Fukumi, and T. Inagami* 444
Structure of Angiotensin II-Binding Site Probed with Diaminoalkanes
Nobuyuki Imai, Fuminori Masugi, Toshio Ogihara, and Yuichi Kumahara 452
Crown Gall Transformation of Tobacco Callus Cells by Cocultivation with *Agrobacterium tumefaciens* *Andreas Muller, Thianda Manzara, And Paul F. Lurquin* 458
Energy-Dependent Activation of Spore-Lytic Enzyme Precursor by Germinated Spores of *Clostridium perfringens* *Y. Ando and T. Tsuzuki* 463
Studies on Myelin Basic Protein-Specific Protein Methylase I in Various Dysmyelinating Mutant Mice *Sangduk Kim, Martin Tuck, Myunghee Kim, Anthony T. Campagnoni, and Woon Ki Paik* 468
Carbon Monoxide Inhibits ω-Oxidation of Leukotriene B_4 by Human Polymorphonuclear Leukocytes: Evidence That Catabolism of Leukotriene B_4 Is Mediated by a Cytochrome *P*-450 Enzyme *Steven Shak and Ira M. Goldstein* 475
The Proteolytic Activity of Human Prostate-Specific Antigen
Yoshihito Ban, Ming C. Wang, Ken W. K. Watt, Rueyming Loor, and T. Ming Chu 482

Uptake of Free Hemoglobin by Rat Liver Parenchymal Cells
Murray B. Weinstein and Harold L. Segal 489
GRF (Somatocrinin) Stimulates Release of Neurotensin, Calcitonin, and cAMP by a Rat C-Cell Line *Füsun Zeytin and Paul Brazeau* 497

Serum, Bradykinin, and Vasopressin Stimulate Release of Inositol Phosphates from Human Fibroblasts *Lucia M. Vicentini and Mitchel L. Villereal* 663
Functional GIP Receptors in a Hamster Pancreatic Beta Cell Line, In 111: Specific Binding and Biological Effects *B. Amiranoff, N. Vauclin-Jacques, and M. Laburthe* 671
3′-Deoxyinosine As an Anti-leishmanial Agent: The Metabolism and Cytotoxic Effects of 3′-Deoxyinosine in *Leishmania tropica* Promastigotes *Yusuke Wataya and Osamu Hiraoka* 677
PTH Release Stimulated by High Extracellular Potassium Is Associated with a Decrease in Cytosolic Calcium in Bovine Parathyroid Cells *Dolores M. Shoback and Edward M. Brown* 684
In Vitro Biosynthesis of Isoprene from Mevalonate Utilizing a Rat Liver Cytosolic Fraction *Evan S. Deneris, Robert A. Stein, and James F. Mead* 691
Differential Kinetics of Histone H1° Accumulation in Neuronal and Glial Cells from Rat Cerebral Cortex during Postnatal Development *B. Piña, P. Martínez, L. Simón, and P. Suau* 697
Phorbol Esters Inhibit Agonist-Induced [^{3}H]Inositol 1-Phosphate Accumulation in Rat Hippocampal Slices *R. Labarca, A. Janowsky, J. Patel, and S. M. Paul* 703
Inhibition of Macrophage Activation and Tumor Cell Cytolysis by Cyclosporin A *Bonny Wright, Russell Greig, and George Poste* 710
Iron Depletion: Possible Cause of Tumor Cell Cytotoxicity Induced by Activated Macrophages *John B. Hibbs, Jr., Read R. Taintor, and Zdenek Vavrin* 716
A Diphenylmethane Derivative Specific for the Antiestrogen Binding Site Found in Rat Liver Microsomes *Lorne J. Brandes and Mark W. Hermonat* 724
Mechanism of Silver Staining of Histones: Evidence for Involvement of Clustered Lysine Residues *Tomohiro Kurosaki, Ken Tsutsui, Kimiko Tsutsui, Koji Aoyama, and Takuzo Oda* 729
Synergistic Stimulation of Prolactin Release by Phorbol Ester, A23187, and Forskolin *Dominique Delbeke, Itaru Kojima, Priscilla S. Dannies, and Howard Rasmussen* 735
Deoxynucleoside Triphosphate Pool Changes and uv-Induced Depression of DNA Synthesis *T. Daniel Griffiths and S. Y. Ling* 742
Characterization of the Exchange Reactions of Rat Liver 6-Phosphofructo-2-kinase/Fructose-2,6-bisphosphatase *M. Raafat El-Maghrabi, Tina M. Pate, and Simon J. Pilkis* 749
On the Fundamental Role of the Glu 2^-–Arg 10^+ Salt Bridge in the Folding of Isolated Ribonuclease A S-Peptide *M. Rico, E. Gallego, J. Santoro, F. J. Bermejo, J. L. Nieto, and J. Herranz* 757
Two Kinetically Distinguishable ATP Sites in Firefly Luciferase *M. DeLuca and W. D. McElroy* 764
Circular Dichroic Spectroscopy of Nonhuman α-Macroglobulins *Steven R. Feldman and Salvatore V. Pizzo* 771
Phosphorylation of the Androgen Receptor by a Nuclear cAMP-Independent Protein Kinase *Said A. Goueli, Jeremy L. Holtzman, and Khalil Ahmed* 778
Nicotinamide and Other Inhibitors of ADP-Ribosylation Block Deoxyglucose Uptake in Cultured Cells *Carl Grunfeld and Judy K. Shigenaga* 785
Oscillation of Electrical Potential in a Porous Membrane Doped with Triolein Induced by an Na^+/K^+ Concentration Gradient *Toshio Ishii, Yumiko Kuroda, Kenichi Yoshikawa, Kyoko Sakabe, Yasuhiro Matsubara, and Keiji Iriyama* 792
Site-Specific Antibodies to the *erbB* Oncogene Product Immunoprecipitate Epidermal Growth Factor Receptor *Tetsu Akiyama, Yasuhiro Yamada, Hiroshi Ogawara, Nancy Richert, Ira Pastan, Tadashi Yamamoto, and Masato Kasuga* 797
Rapid Calcium Mobilization by Vasopressin and Prostaglandin $F_{2\alpha}$ Is Independent of Sodium Influx in Quiescent 3T3 Cells *Jeffrey Bingham Smith and Lucinda Smith* 803

The Effects of Extracellular K^+ and Angiotensin II on Cytosolic Ca^{2+} and Steroidogenesis in Adrenal Glomerulosa Cells
Lynne Braley, Alphonsa Menachery, Edward Brown, and Gordon Williams 810
Studies on Thiol Proteinase Inhibitors in Rat Peripheral Blood Cells
Eiki Kominami, Toshifumi Tsukahara, Kunio Ii, Kazuo Hizawa, and Nobuhiko Katunuma 816
Sarcoid Granulomas Metabolize 25-Hydroxyvitamin D_3 *in Vitro*
Tetsuro Okabe, Seiichi Ishizuka, Michio Fujisawa, Junichi Watanabe, and Fumimaro Takaku 822
Thermal Melting of Poly(dA-dT) · Poly(dA-dT) in Methanol-Water Solutions
Jaroslav Kypr and Michaela Vorlíčková 831
The L-Aspartate Oxidase Reported to Be Present in Higher Plants Is Actually Glutamic-Oxaloacetic Transaminase
John Paul Wilder, Jaruay A. Sae-Lee, E. D. Mitchell, and R. K. Gholson 836
Superinduction of Human Interleukin 2 Messenger RNA by Inhibitors of Translation
Shimon Efrat, Silviu Zelig, Boris Yagen, and Raymond Kaempfer 842
Absence of Covalent Binding by Insulin to Erythrocyte and Reticulocyte Insulin Receptors
Glenn M. Ward, Stella Clark, and Len C. Harrison 849
Synthesis and *in Vitro* Bioactivity of C-Terminal-Deleted Analogs of Human Growth Hormone-Releasing Factor *Nicholas Ling, Andrew Baird, William B. Wehrenberg, Naoto Ueno, Toratane Munegumi, and Paul Brazeau* 854
Multiple Binding Sites for Local Anesthetics on Reconstituted Acetylcholine Receptor Membranes *Julie P. Earnest, Howard H. Wang, and Mark G. McNamee* 862
A Chemiluminescent Probe Specific for Singlet Oxygen *Gary H. Posner, John R. Lever, Kyo Miura, Carol Lisek, Howard H. Seliger, and Ambler Thompson* 869

AUTHOR INDEX, Volume 123, Number 3, September 28, 1984 ii
Polyphosphoinositide Turnover in Rat Mast Cells Stimulated by Antigen: Rapid and Preferential Breakdown of Phosphatidylinositol 4-Phosphate (DPI)
Yasuhiro Ishizuka, Atsushi Imai, and Yoshinori Nozawa 875
In Vivo ^{13}C Nuclear Magnetic Resonance Spectroscopy Using a Solenoid Transmit/Receiver Coil
James Field, Michael G. Irving, William M. Brooks, and David M. Doddrell 882
Glycosylation of Lens Proteins in Senile Cataract and Diabetes Mellitus
Jin H. Lee, Dong H. Shin, Aaron Lupovitch, and Dian X. Shi 888
Effects of Parathyroid Hormone on cAMP Production and Alkaline Phosphatase Activity in Osteoblastic Clone MC3T3-E1 Cells *Yoshinori Nakatani, Mayuri Tsunoi, Yoshiuki Hakeda, Noriyoshi Kurihara, Kunya Fujita, and Masayoshi Kumegawa* 894
Change in the Protein Tertiary Structure with Nonenzymatic Glycosylation of Calf α-Crystallin
J. N. Liang and L. T. Chylack, Jr. 899
Natural Variation in the Expression of Cytochrome *P*-450 and Dimethylnitrosamine Demethylase in *Drosophila* *Larry C. Waters, Shigemi I. Simms, and Carroll E. Nix* 907
On the Inhibition of the RNA Polymerase-Catalyzed Synthesis of RNA by Daunomycin: Interference of the Inhibitor with Elongation and Prelongation Steps
Tassos Kriebardis, Dan Meng, and Stelios Aktipis 914
Revised Analysis of Amino Acid Replacement in a Prealbumin Variant (SKO-III) Associated with Familial Amyloidotic Polyneuropathy of Jewish Origin
Masamitsu Nakazato, Kenji Kangawa, Naoto Minamino, Satoru Tawara, Hisayuki Matsuo, and Shukuro Araki 921
Transport of Glutathione by Intestinal Brush Border Membrane Vesicles
Monique Linder, Georges De Burlet, and Pierre Sudaka 929
Development of Membrane-Potential Responsiveness by Myeloid Leukemia Cells during Neutrophilic Differentiation *Glenn E. Brown, Steven A. Fischkoff, and Jose V. Ordonez* 937
Characteristics of the Epitope of Leukotriene B_4 Recognized by a Highly Specific Mouse Monoclonal Antibody *J. Y. Lee, T. Chernov, and E. J. Goetzl* 944

Impaired Plasma Membrane Glycoprotein Assembly in the Liver following Acute Ethanol Administration *Mark E. Mailliard, Michael F. Sorrell, Gary D. Volentine, and Dean J. Tuma* 951

A Subnanosecond-Pulse Fluorometric Study of the Ca^{2+}- and Mg^{2+}-Induced Conformational Changes on S 100a Protein *Jacques Baudier, Janusz Tyrzyk, Jan-Erik lôfroth, and Panagiotis Lianos* 959

Patterns of Product Inhibition for Bacterial Nitrite Reductase *Rahul Dhesi and Russell Timkovich* 966

Effect of Heparin Modification on Its Circular Dichroism Spectrum *German B. Villanueva and Nancy Allen* 973

The Major Rat Heart Glutathione *S*-Transferases Are Anionic Isozymes Composed of Y_b Size Subunits *Chen-Pei D. Tu, Mei Chang, and C. Channa Reddy* 981

Photochemical Intermediate of Third Rhodopsin-like Pigment in *Halobacterium halobium* by Simultaneous Illumination with Red and Blue Light *Hiroaki Tomioka, Naoki Kamo, Tetsuo Takahashi, and Yonosuke Kobatake* 989

Studies of Chloroplast Thylakoid Proteins Using Monoclonal Antibodies *R. E. Slovacek and M. A. Harvey* 995

A Method for the Measurement and Characterization of Protease Activities Responsible for Extracellular or Intracellular Degradation of Collagen Precursors *J. Farjanel, A. Rattner, P. Pujol, and S. Cordier* 1002

Irreversible Inhibition of Hepatic Glutathione *S*-Transferase by Ciprofibrate, a Peroxisome Proliferator *Y. C. Awasthi, S. V. Singh, S. K. Goel, and J. K. Reddy* 1012

A 3′ to 5′ Exonuclease Activity Is Associated with Phage ϕ29 DNA Polymerase *Kounosuke Watabe, Mark S. Leusch, and Junetsu Ito* 1019

Transfer RNA Chromatography on Reversed Phase Five: Effect of Cadmium Ion on a Queuine-type tRNA *K. Bruce Jacobson and Eva H. Lee* 1027

Cartilage Type IX Collagen Is Crosslinked by Hydroxypyridinium Residues *Jiann-jiu Wu and David R. Eyre* 1033

Identification of an Essential Lysine Residue in the β Subunit of the F_1- ATPase from the Thermophilic Bacterium, PS3, Using 7-Chloro-4-nitro[^{14}C] benzofurazan *William W. Andrews, Masasuke Yoshida, Fred C. Hill, and William S. Allison* 1040

Simultaneous Detection of Native and Luminol-Dependent Luminescence of Stimulated Human Polymorphonuclear Leukocytes *Paul Roschger, Wolfgang Graninger, and Herbert Klima* 1047

Activity of Peroxisomal Enzymes and Intracellular Distribution of Catalase in Zellweger Syndrome *R. J. A. Wanders, M. Kos, B. Roest, A. J. Meijer, G. Schrakamp, H. S. A. Heymans, W. H. H. Tegelaers, H. van den Bosch, R. B. H. Schutgens, and J. M. Tager* 1054

Gating and Blocking of Calcium Channels by Dihydropyridines in the Pancreatic B Cell *F. Malaisse-Lagae, P. C. F. Mathias, and W. J. Malaisse* 1062

Extreme X-Ray-Sensitive Modification of Type I Aldolases by Blue Dye Ligand Chromatography *J. Sygusch, L. Lehoux, and D. Beaudry* 1069

A New Model for Chemotactic Signal Transduction in *Dictyostelium discoideum* *S. J. McRobbie and P. C. Newell* 1076

Cation-Dependent Prolactin Activation of Guanylate Cyclase *David L. Vesely* 1084

The Expression of Glycoproteins on Single Blood Platelets from Healthy Individuals and from Patients with Congenital Bleeding Disorders *G. I. Johnston, S. Heptinstall, R. A. Robins, and M. R. Price* 1091

The B_4 Lectin from *Vicia villosa* Seeds Interacts with *N*-Acetylgalactosamine Residues on Erythrocytes with Blood Group Cad Specificity *Sherida E. Tollefsen and Rosalind Kornfeld* 1099

Sodium Regulation of Opioid Agonist Binding Is Potentiated by Pertussis Toxin *M. Wüster, T. Costa, K. Aktories, and K. H. Jakobs* 1107

Subcellular Glutathione Contents in Isolated Hepatocytes Treated with L-Buthionine Sulfoximine *Francisco J. Romero and Helmut Sies* 1116

T_3 Stimulates the Synthesis of a Specific mRNA in Primary Hepatocyte Culture *Cary N. Mariash, Donald B. Jump, and Jack H. Oppenheimer* 1122

Benzodiazepine Anticonvulsant Action: γ-Aminobutyric Acid-Dependent Modulation of the Chloride Ionophore *Lowell J. Lawrence, Kelvin W. Gee, and Henry I. Yamamura* 1130
The Role of Na_2S in Anoxygenic Photosynthesis and H_2 Production in the Cyanobacterium *Nostoc muscorum* *Ian Fry, A. Edward Robinson, Susan Spath, and Lester Packer* 1138
In Vivo Uptake of Insulin into Hepatic Golgi Fractions: Application of the Diaminobenzidine-Shift Protocol *Denis G. Kay, M. N. Khan, B. I. Posner, and J. J. M. Bergeron* 1144
Presence of B-100 in Rat Mesenteric Chyle *Diana M. Lee, Eugen Koren, Shyam Singh, and Tina Mok* 1149
Effect of Unsaturated Fatty Acids on Protoporphyrinogen Oxidation, a Step in Heme and Chlorophyll Synthesis in Plant Organelles *J. M. Jacobs and N. J. Jacobs* 1157
Microanalysis for Coenzyme Q_{10} in Endomyocardial Biopsies of Cardiac Patients and Data on Bovine and Canine Hearts *Surasi Vadhanavikit, Masayuki Morishita, Gordon Andrew Duff, and Karl Folkers* 1165
Induction of Cellular DNA Polymerases in a Burkitt Lymphoma-Derived Cell Line by Treatment with 5-Iododeoxyuridine *Katsuhiko Ono, Hideo Nakane, Michèle Souyri-Caporale, Françoise Barré-Sinoussi, Françoise Rey, Claude Jasmin, and Jean-Claude Chermann* 1170
Monoclonal Antibodies against β-Galactoside-Binding Lectin of Chick Embryo Recognizes Conformational Change of the Antigen *Yuko Oda and Ken-ichi Kasai* 1179
Two Forms of Acid α-D-Mannosidase in Monkey Brain: Evidence for the Coexistence of High Mannose and Complex Oligosaccharides in One Form *Rajesh Mathur, Keith Alvares, and A. S. Balasubramanian* 1185
Inhibition of Guanylate Cyclases by Methylxanthines and Papaverine *Sarah Taylor Strinden and Robert H. Stellwagen* 1194
Amino-Terminal Sequence Analysis of Six Cytochrome *P*-450 Isozymes Purified by Monoclonal Antibody-Directed Immunopurification *Kuo-Chi Cheng, Henry C. Krutzsch, Sang S. Park, Preston H. Grantham, Harry V. Gelboin, and Fred K. Friedman* 1201
Inhibition of Reconstituted Vitamin D_3 25-Hydroxylase by a Protein Fraction from Rat Liver Microsomes *Inger Holmberg* 1209
Photochemical Crosslinking of β-Galactoside-Binding Lectin to Polylactosamino Proteoglycan of Chick Embryonic Skin *Yuko Oda and Ken-ichi Kasai* 1215
Antagonists of the Luteinizing Hormone-Releasing Hormone (LHRH) with Emphasis on the Trp^7 of the Salmon and Chicken II LHRHs *Karl Folkers, Cyril Y. Bowers, Hong-Ming Shieh, Liu Tin Zeng, Xiao Shao-Bo, Pui-Fun Louisa Tang, and Chu Ji-Yu* 1221
Tyrosine Protein Kinase Activity in the DMBA-Induced Rat Mammary Tumor: Inhibition by Quercetin *Joseph Levy, Iris Teuerstein, Miriam Marbach, Sara Radian, and Yoav Sharoni* 1227
Purification and Properties of Cytochrome *b* from Photosynthetic Bacterium *Rhodopseudomonas sphaeroides* R-26 *Linda Yu and Chang-An Yu* 1234

AUTHOR INDEX, Volume 124, Number 1, October 15, 1984 ii
Glutathione Conjugation of Arylnitroso Compound: Detection and Monitoring Labile Intermediates *in Situ* inside a Fast-Atom Bombardment Mass Spectrometer *Kazuki Saito and Ryuichi Kato* 1
Involvement of Protease in L-Glutamine Control of Nucleic Acid and Polyphosphate Metabolism in Cells Transformed by 9,10-Dimethyl-1,2-benzanthracene, SV40, and H-*ras* Oncogene *Abdulai M. Deffie and Herb B. LéJohn* 6
Stimulation of Hexose Uptake in Rat Thymic Lymphocytes by Phorbol Ester: A Role for Ca^{2+} and Na^+/H^+ Exchange? *Amira Klip, Aser Rothstein, and Esther Mack* 14
PGE_1 Not $PGF_{2\alpha}$ Reverses the Anti-actin Antibody Stimulation of Protein Phosphorylation and DNA Synthesis in L Cells *William T. Shearer and Ellen B. Gilliam* 23

The Binding of Thyroid Hormone Receptors to DNA
B. D. Wilson, C. A. Wium, and W. L. Gent 29

Isolation of the Covalent Binary Complex of 5-Fluorodeoxyuridylate and Thymidylate Synthetase by Trichloroacetic Acid Precipitation
Mark A. Moore, Faizy Ahmed, and R. Bruce Dunlap 37

Molecular Cloning of cDNA for Rat Glycine Methyltransferase *Hirofumi Ogawa, Tomoharu Gomi, Toshihiro Horii, Hideyuki Ogawa, and Motoji Fujioka* 44

Sulfhydryl Groups of Aldosterone Receptors from Swine Kidney
Yohtalou Tashima, Miyuki Terui, Hideaki Itoh, Hiroshi Shima, Hideo Mizunuma, and Ryoji Kobayashi 51

Estrogen-like Effects of Combined Dexamethasone and Tamoxifen in the Chick Oviduct
Achille Gravanis, Nadine Binart, Paul Robel, Etienne-Emile Baulieu, and Maria-Grazia Catelli 57

Calcium- and Phospholipid-Dependent Protein Kinase Activity in Mouse Epidermis Cytosol: Stimulation by Complete and Incomplete Tumor Promoters and Inhibition by Various Compounds *M. Gschwendt, F. Horn, W. Kittstein, G. Fürstenberger, E. Besemfelder, and F. Marks* 63

Rat Renal Medulla Possesses High Capacity to Catabolize Prostaglandins
E. Speziale, N. Speziale, S. Lugo, and M. Gimeno 69

Cu(II)-Dependent Inactivation of MN-Catalase by Hydroxylamine *Yasuhisa Kono* 75

Inhibition of Ruthenium Red-Induced Ca^{2+} Efflux from Liver Mitochondria by the Antibiotic X-537A *L. Pereira da Silva, C. F. Bernardes, and A. E. Vercesi* 80

GnRH-Secreting Cultured Fetal Rat Hypothalamic Cells Do Not Degrade GnRH
György Kéri, Balás Szőke, Károly Nikolics, Anikó Horváth, István Teplán, Judit Molnár, and Angéla Gyévai 87

Stimulation of Pyruvate Dehydrogenase Phosphatase Activity by Polyamines
Zahi Damuni, Jean S. Humphreys, and Lester J. Reed 95

The Role of Interferon-γ in Induction of Differentiation of Human Myeloid Leukemia Cell Lines, ML-1 and HL-60 *Makiko Takei, Ken Takeda, and Kunio Konno* 100

Effect of Chromium(III) on Poly(dG-dC) Conformation
Norman A. Floro and Karen E. Wetterhahn 106

Stereoselective Hydroxylation at the Aliphatic Carbons of 7,8- and 9,10-Dihydrobenzo[*a*]-pyrenes by Rat Liver Microsomes *Pei-Lu Chiu, Mohammad Mushtaq, Henri B. Weems, and Shen K. Yang* 114

NADPH-Cytochrome *c* Reductases of *Trypanosoma cruzi*
Toyoko Kuwahara, Robert A. White, Jr., and Moises Agosin 121

Isolation of an Evolutionarily Conserved Epidermal Growth Factor Receptor cDNA from Human A431 Carcinoma Cells *Frank A. Simmen, Mohan L. Gope, Tanya Z. Schulz, David A. Wright, Graham Carpenter, and Bert W. O'Malley* 125

A Monoclonal Antibody to a Unique Cell Surface Growth Regulatory Glycopeptide
Robert J. Kinders, Behrooz G. Sharifi, and Terry C. Johnson 133

Ketomethyldipeptides. I. A New Class of Angiotensin-Converting Enzyme Inhibitors
S. Natarajan, E. M. Gordon, E. F. Sabo, J. D. Godfrey, H. N. Weller, Jelka Pluščec, M. B. Rom, and D. W. Cushman 141

Ketomethyldipeptides. II. Effect of Modifications of the α-Aminoketone Portion on Inhibition of Angiotensin-Converting Enzyme
E. M. Gordon, S. Natarajan, Jelka Pluščec, H. N. Weller, J. D. Godfrey, M. B. Rom, E. F. Sabo, J. Engebrecht, and D. W. Cushman 148

Conversion of 1-Alkyl-2-acetyl-*sn*-glycerols to Platelet-Activating Factor and Related Phospholipids by Rabbit Platelets *Merle L. Blank, Ten-ching Lee, Edgar A. Cress, Boyd Malone, Veronica Fitzgerald, and Fred Snyder* 156

Molecular Cloning and Characterization of a cDNA Clone for a Protein Specifically Expressed in Embryo as well as in a Chemically Induced Pancreatic B-Cell Tumor of Rat
Gen-Ichiro Soma, Namiko Kitahara, and Toshiwo Andoh 164

Effect of 5'-Methylthioadenosine on Induction of Murine Erythroleukemia Cell Differentiation
Tim D. Shafman, Matthew L. Sherman, and Donald W. Kufe 172

Incorporation of ^{18}O-Water into 4-Hydroxybenzoic Acid in the Reaction of 4-Chlorobenzoate Dehalogenase from *Pseudomonas* sp. CBS 3
Rudolf Müller, Jürgen Thiele, Uwe Klages, and Franz Lingens 178
Evidence That the ATP-Binding Site of Sarcoplasmic Reticulum Ca-ATPase Has a Mg(2+) Ion-Binding Subsite *Stefan Highsmith* 183
Effect of *Bordetella pertussis* Toxin on ADP Ribosylation of Membrane Proteins, Adenylate Cyclase Activity, and Insulin Release in Rat Pancreatic Islets
W. J. Malaisse, M. Svoboda, S. P. Dufrane, F. Malaisse-Lagae, and J. Christophe 190
Fc-Receptor-Mediated Protein Phosphorylation in Murine Peritoneal Macrophages
Paul A. Johnston, Dolph O. Adams, and Thomas A. Hamilton 197
Distinct Receptors for IGF-I, IGF-II, and Insulin Are Present on Bovine Capillary Endothelial Cells and Large Vessel Endothelial Cells *Robert S. Bar and Mary Boes* 203
Spin-Labeled Ouabain as a Probe for Cardiac Glycoside Receptor/Na,K-ATPase
Larry P. Solomonson and Michael J. Barber 210
Administration of Human Pancreatic Growth Hormone-Releasing Factor (GRF) Analogs Enhances Responsiveness of Cultured Rat Pituitary Cells to GRF
Mark L. Heiman, William A. Murphy, Mary V. Nekola, Valentine A. Lance, and David H. Coy 217
The Activity of Tyrosine 3-Monooxygenase Is Usually Suppressed by an Endogenous Factor in Brain *Sachiko Okuno and Hitoshi Fujisawa* 223
Enhanced Lysosomal Phospholipid Degradation and Lysophospholipid Production Due to Free Radicals *William B. Weglicki, Benjamin F. Dickens, and I. Tong Mak* 229
Demethylation of the Type I Procollagen Genes in Transformed Fibroblasts Treated with 5-Azacytidine *M. Iqbal Parker and Wieland Gevers* 236
A Diphenylmethane Derivative Selective for the Anti-estrogen-Binding Site May Help Define Its Biological Role *Lorne J. Brandes* 244
Partial cDNA Sequence of the γ Subunit of Transducin
Cornelis Van Dop, Daniel Medynski, Kathleen Sullivan, Anna M. Wu, Bernard K.-K. Fung, and Henry R. Bourne 250
Inactivation of Human Blood Coagulation Factor X by Chemical Modification of γ-Carboxyglutamic Acid Residues *G. Bradley Sherrill, David L. Straight, Richard G. Hiskey, Harold R. Roberts, and Michael J. Griffith* 256
The Isolation and Purification of Two Anionic Endothelial Cell Growth Factors from Human Brain *Greg Conn and Victor B. Hatcher* 262
EPR Studies on the Photosystem II Donor Side in Salt-Washed and Reconstituted Inside-out Thylakoids
Christer Jansson, Örjan Hansson, Hans-Erik Åkerlund, and Lars-Erik Andreasson 269
Estrogen Induces Secretary Proteins in Transformed Mouse Leydig Cell *in Vivo*, but Not *in Vitro*
Bunzo Sato, Yasuko Nishizawa, Makoto Nakao, Keizo Noma, Susumu Kishimoto, and Keishi Matsumoto 277
Correlation of Tumor Metastasis with Sterol Carrier Protein and Plasma Membrane Sterol Levels *Friedhelm Schroeder, Ann B. Kier, Carol D. Olson, and Mary E. Dempsey* 283
Antibodies against a 23-kDa Heparin-Binding Fragment of Thrombospondin Inhibit Platelet Aggregation *T. Kent Gartner, Daniel A. Walz, Martha Aiken, Linda Starr-Spires, and Mary L. Ogilvie* 290
Protein Kinase C Phosphorylates the Synthetic Peptide Arg–Arg–Lys–Ala–Ser–Gly–Pro–Pro–Val in the Presence of Phospholipid Plus either Ca^{2+} or a Phorbol Ester Tumor Promoter *Catherine A. O'Brian, David S. Lawrence, E. Thomas Kaiser, and I. Bernard Weinstein* 296
Melittin-Stimulated Arachidonic Acid Metabolism by Cultured Malignant Human Epidermal Keratinocytes *Robert H. Rice and Lawrence Levine* 303
Analysis of the ApoC-II Gene in ApoC-II-Deficient Patients
S. S. Fojo, S. W. Law, D. L. Sprecher, R. E. Gregg, G. Baggio, and H. B. Brewer, Jr. 308

Volume 124, Number 2, October 30, 1984

AUTHOR INDEX, Volume 124, Number 2, October 30, 1984 ii

Inhibition of Calmodulin-Dependent Cyclic Nucleotide Phosphodiesterase by Flunarizine, a Calcium-Entry Blocker *Kazuhiro Kubo, Yuzuru Matsuda, Hiroshi Kase, and Koji Yamada* 315

Stereospecific Incorporation of Hydrogens from NADPH in Elongation of Very Long Fatty Acyl-CoA by Swine Cerebral Microsomes *Satoshi Yoshida, Masazumi Takeshita, and Akihiko Kawaguchi* 322

Preparation and Biological Activity of Taxol Acetates *Wilfredo Mellado, Neal F. Magri, David G. I. Kingston, Renee Garcia-Arenas, George A. Orr, and Susan Band Horwitz* 329

Changes of Aldolase A and B Messenger RNA Levels in Rat Liver during Azo-Dye-Induced Hepatocarcinogenesis *Makoto Daimon, Ken-ichi Tsutsumi, Jun-ichi Sato, Reiko Tsutsumi, and Kiichi Ishikawa* 337

A Leukemia Virus-Related Protein in the Murine Pancreas *Gillian M. Beattie, John F. Reece, Javier F. Villela, and Nathan O. Kaplan* 344

Structures of Two Cockroach Neuropeptides Assigned by Fast Atom Bombardment Mass Spectrometry *Jane L. Witten, Martin H. Schaffer, Michael O'Shea, J. Carter Cook, Mark E. Hemling, and Kenneth L. Rinehart, Jr.* 350

Is Renin Secretion Governed by the Calcium Permeability of the Juxtaglomerular Cell Membrane? *Armin Kurtz, Josef Pfeilschifter, and Christian Bauer* 359

S1 Nuclease Sensitivity to *cis*- and *trans*-Diamminedichloroplatinum(II) Modified DNAs: Influence of (G+C) Content and Nucleotide Sequence *William M. Scovell and Vincent J. Capponi* 367

Induction of the Ethanol-Inducible Form of Rabbit Liver Microsomal Cytochrome *P*-450 by Inhibitors of Alcohol Dehydrogenase *Magnus Ingelman-Sundberg and Hans Jörnvall* 375

Further Characterization of the Porcine LH Subunit Precursors in the Translation Products of Pituitary RNAs *O. Pascal, Y. Morel, H. Lejeune, and J. André* 383

Enhancement of S1 Nuclease Susceptibility of Negatively Superhelical DNA by Netropsin *Kazuo Shishido, Reiko Sakaguchi, and Yoshiaki Nosoh* 388

Rapid Polyphosphoinositide Decrease Is an Early Event in the Steroidogenic Response of Bovine Adrenocortical Fasciculata Cells to Angiotensin II *A. J. Hadjian, M. Culty, and E. M. Chambaz* 393

Distribution of Repeated DNA Families in the Human Genome *Raffaella Meneveri, Alessandra Agresti, and Enrico Ginelli* 400

Corticotropin-Releasing Factor Differentially Regulates Proopiomelanocortin Messenger Ribonucleic Acid Levels in Anterior as Compared to Intermediate Pituitary Lobes of Rats *Volker Höllt and Ingeborg Haarmann* 407

Covalent Binding of the Antitumor Agent N^2-Methyl-9-hydroxy-ellipticinium Acetate (NSC 264137) on RNA and Poly(A) *in Vitro* *Bernard Dugue, Claude Paoletti, and Bernard Meunier* 416

Lack of Detectable Polyamines in an Extremely Halophilic Bacterium *Kuang Yu Chen and Heddie Martynowicz* 423

Cooxidation of 13-*cis*-Retinoic Acid by Prostaglandin H Synthase *Victor M. Samokyszyn, Bonnie F. Sloane, Kenneth V. Honn, and Lawrence J. Marnett* 430

Proteolysis of Band 3 Is Enhanced by Anti-Rh_o(D) Binding to the Red Cell Membrane *Edward J. Victoria, Jeanine E. Kleeman, and S. P. Masouredis* 437

Cellular Mechanism of Release of Atrial Natriuretic Factor *Harald Sonnenberg and Anthony T. Veress* 443

Identification of Cellular Prosomatostatin and Nonsomatostatin Peptides Derived from Its Amino Terminus *D. C. Aron, P. C. Andrews, J. E. Dixon, and B. A. Roos* 450

3-Aminobenzamide Does Not Alter DNA Repair in Human Fibroblasts through Modulation of Deoxynucleoside Triphosphate Pools *Ronald D. Snyder* 457

Functional Efficiency of Mitochondrial Membrane of Rats with Hepatic Chronic Iron Overload *Alberto Masini, Tommaso Trenti, Ezio Ventura, Daniela Ceccarelli-Stanzani, and Umberto Muscatello* 462

Conversion of N^6-Isopentenyladenine to Zeatin by *Actinidia* Tissues *John W. Einset* 470
Inactivation and Affinity Labeling of Rat Liver Iodothyronine Deiodinase with *N*-Bromoacetyl-3,3′,5-triiodothyronine *Jan A. Mol, Roel Docter, Ellen Kaptein, Godfried Jansen, George Hennemann, and Theo J. Visser* 475
Comparative Effects of Insulin and Insulin-like Growth Factors on DNA Synthesis and Differentiation of Porcine Granulosa Cells *J. L. S. Baranao and J. M. Hammond* 484
Diacylglycerol Causes Major Structural Transitions in Phospholipid Bilayer Membranes *Sudipto Das and R. P. Rand* 491
Brain CCK Receptors Are Structurally Distinct from Pancreas CCK Receptors *Choitsu Sakamoto, John A. Williams, and Ira D. Goldfine* 497
Phosphatidylinositol 4,5-Bisphosphate: Light-Mediated Breakdown in the Vertebrate Retina *Abdallah Ghalayini and Robert E. Anderson* 503
Phorbol Myristate Acetate Stimulates Formation of Phosphatidylinositol 4-Phosphate and Phosphatidylinositol 4,5-Bisphosphate in Human Platelets *Stephen P. Halenda and Maurice B. Feinstein* 507
Pseudouridylic Modification of a 6 S RNA Transcribed *in Vitro* from Highly Repetitive and Transcribable (Hirt) Sequences of Salmon Total DNA *Ken-ichi Matsumoto, Kazuo Murakami, and Norihiro Okada* 514
Blood Group A Glycolipid (A^x) with Globo-Series Structure Which Is Specific for Blood Group A_1 Erythrocytes: One of the Chemical Bases for A_1 and A_2 Distinction *Henrik Clausen, Kiyohiro Watanabe, Reiji Kannagi, Steven B. Levery, Edward Nudelman, Yasuko Arao-Tomono, and Sen-itiroh Hakomori* 523
Identification of the mRNA Coding for Prolactin in the Human Decidua *Shunzo Taii, Yoshiyuki Ihara, and Takahide Mori* 530
1,10-Phenanthroline Reversibly Inhibits Proliferation of Two Human Prostate Carcinoma Cell Lines (PC-3 and DU145) *Joy L. Ware, David F. Paulson, and Karen S. Webb* 538
Enhanced Phosphorylation of Endogenous Membrane Proteins during Induction of B-Lymphocyte Proliferation *Madduri Ramanadham, Sastry V. S. Gollapudi, and Milton Kern* 544
The Role of Binding Ligand in Toxic Hybrid Proteins: A Comparison of EGF–Ricin, EGF–Ricin A Chain, and Ricin *Harvey R. Hershman* 551
Cloning and Sequence Analysis of cDNA for Human Prealbumin *Shuji Mita, Shuichiro Maeda, Kazunori Shimada, and Shukuro Araki* 558
Cross-linking of Bacteriorhodopsin Using Specific Carboxyl Modifications and Proteolytic Cleavage *Sherry Wu-Chou, A. Edward Robinson, Eva Hrabeta, and Lester Packer* 565
Recognition Site of Yeast Glutathione Reductase for 2′-Phosphate of $NADP^+$ *C. S. Tsai* 572
Binding and Internalization of ^{125}I-Bolton–Hunter–Substance P by Pancreatic Acinar Cells *Lars Sjödin* 578
Monensin, Like Methylamine, Prevents Degradation of ^{125}I-Epidermal Growth Factor, Causes Intracellular Accumulation of Receptors, and Blocks the Mitogenic Response *A. Christie King* 585
Synthesis of Active Firefly Luciferase by *in Vitro* Translation of RNA Obtained from Adult Lanterns *K. V. Wood, J. R. de Wet, N. Dewji, and M. DeLuca* 592
Guanine Nucleotides Modulate Cell Surface cAMP-Binding Sites in Membranes from *Dictyostelium discoideum* *Peter J. M. Van Haastert* 597
Human Aglycosyl-IgG Exhibits Increased Hydrophobicity: Binding/Fluorescence Studies with 8-Anilinonaphthalene-1-sulfonic Acid (ANS) *Cynthia J. Taves, Akihiro Kusumi, and Jeffrey L. Winkelhake* 605
Insulin Decreases Apical Cell Membrane Resistance in Cultured Kidney Cells (A6) *T. C. Walker, M. L. Fidelman, C. O. Watlington, and T. U. L. Biber* 614
Crystallization of α_1-Acid Glycoprotein *Alexander McPherson, M. L. Friedman, and H. Brian Halsall* 619
The Realm of the Steady State in *Escherichia coli* *SungAe Cho, Gail Gasparich, Darren Sledjeski, Carol Ezzell, and Carl W. Vermeulen* 625

On the Interaction of Cobra Venom Protein Cardiotoxins with Erythrocytes
Neil Zusman, Theodore M. Miklas, Thomas Graves, George E. Dambach, and Richard A. Hudson 629

Paf-Acether Formation and Arachidonic Acid Freeing from Platelet Ether-Linked Glyceryl-phosphorylcholine *Michel Chignard, Jean-Pierre Le Couedic, Eliane Coëffier, and Jacques Benveniste* 637

Pertussis Toxin Inhibits the Rise in the Intracellular Concentration of Free Calcium That Is Induced by Chemotactic Factors in Rabbit Neutrophils: Possible Role of the "G Proteins" in Calcium Mobilization *T. F. P. Molski, P. H. Naccache, M. L. Marsh, J. Kermode, E. L. Becker, and R. I. Sha'afi* 644

Insulin's and Glucagon's Reciprocal Mediation of a Dual Regulation Mechanism for Pyruvate Kinase *Ritchie J. Feuers and Daniel A. Casciano* 651

Structure of Insulin/Insulin-like Growth Factor-1 Receptors on the Insulinoma Cell, RIN-m5F *Peter G. Colman and Len C. Harrison* 657

Atrial Natriuretic Factor in Rat Hypothalamus, Atria, and Plasma: Determination by Specific Radioimmunoassay *I. Tanaka, K. S. Misono, and T. Inagami* 663

The Origin of the Oxygen Incorporated during the Dehalogenation/Hydroxylation of 4-Chlorobenzoate by an *Arthrobacter* sp. *T. S. Marks, R. Wait, A. R. W. Smith, and A. V. Quirk* 669

ADDENDUM

Volume 123, Number 3, September 28, 1984: Kuo-Chi Cheng, Henry C. Krutzsch, Sang S. Park, Preston H. Grantham, Harry V. Gelboin, and Fred K. Friedman, "Amino-Terminal Sequence Analysis of Six Cytochrome *P*-450 Isozymes Purified by Monoclonal Antibody Directed Immunopurification," pp. 1201–1208 675

Volume 124, Number 3, November 14, 1984

AUTHOR INDEX, Volume 124, Number 3, November 14, 1984 ii

Influence of Neonatal Age on Changes in Fatty Acid Composition of Microsomal Lipids Induced by Long-Term and Short-Term Cholesterol Feeding
M. Garcia-Gonzalez, M. J. Alejandre, E. Garcia-Peregrin, and J. L. Segovia 677

Stimulation of Tyrosine Phosphorylation in Lectin-Treated Human Lymphocytes
S. Fischer, R. Fagard, G. Gacon, N. Genetet, J. P. Piau, and C. Blaineau 682

A New Purification Procedure for *Clostridium difficile* Enterotoxin
B. Rihn, J. M. Scheftel, R. Girardot, and H. Monteil 690

ATP Produced by Myocardial Sarcolemmal-Bound Creatine Kinase Is Not Preferentially Used by the Na^+ Pump *Kenneth D. Philipson and Ann Y. Nishimoto* 696

Detection and Characterization of a Selective Endopeptidase from *Plasmodium berghei* by Using Fluorogenic Peptidyl Substrates
Joseph Schrével, François Bernard, Christèle Maintier, Roger Mayer, and Michel Monsigny 703

Atriopeptin Release from the Isolated Perfused Rabbit Heart
Mark G. Currie, Dean Sukin, David M. Geller, Barbara R. Cole, and Philip Needleman 711

Subunit Interactions in Human Plasma Fibronectin
Randall M. Robinson and Jan Hermans 718

Reduction by *N*-(6-Aminohexyl)-5-chloro-1-naphthalenesulfonamide (W-7), a Calmodulin Antagonist, in the Number of Phorbol Ester Receptors in Mouse Skin
Hoyoku Nishino, Hirota Fujiki, Masami Suganuma, Takahiko Horiuchi, Akio Iwashima, and Takashi Sugimura 726

Regional Distribution of Neuromedin K and Neuromedin L in Rat Brain and Spinal Cord
Naoto Minamino, Hiroshi Masuda, Kenji Kangawa, and Hisayuki Matsuo 731

^1H–^{13}C Selective NOE Studies of the Decapeptide Gramicidin S
Neri Niccolai, Claudio Rossi, Paolo Mascagni, Paolo Neri, and William A. Gibbons 739

Evidence for Essential Lysines in Heparin Cofactor II
Frank C. Church and Michael J. Griffith 745

Conditions for Reproducible Detection of Calmodulin and S 100β in Immunoblots
Linda J. Van Eldik and Sandra R. Wolchok 752
A Plasmid-Encoded Arsenite Pump Produces Arsenite Resistance in *Escherichia coli*
Barry P. Rosen and Miguel G. Borbolla 760
Higher Tyrosine Protein Kinase Activity in Resting Lymphocytes than in Proliferating Normal or Leukemic Blood Cells
Andrea Piga, M. Reza Taheri, John C. Yaxley, R. Gitendra Wickremasinghe, and A. Victor Hoffbrand 766
Sequential Assignment of the ^{1}H and ^{31}P Resonances of the Double-Stranded Deoxynucleotide $d(ATGCAT)_2$ by 2D-NMR Correlation Spectroscopy
Dominique Marion and Gérard Lancelot 774
Inability of Skin Enzyme Preparations to Biosynthesize Arachidonic Acid from Linoleic Acid
Robert S. Chapkin and Vincent A. Ziboh 784
Inhibition of Rat Liver Phosphofructokinase 2 by Phosphoenolpyruvate and ADP
Matthias Kretschmer and Eberhard Hofmann 793
Properties of the Ca-Pumping ATPase of Sarcoplasmic Reticulum from Vascular Smooth Muscle *Michele Chiesi, Juerg Gasser, and Ernesto Carafoli* 797
Coupling between Redox and Acid–Base Energy by Cytochrome *b*-564 in Baker's Yeast Mitochondria *M. M. Hervás, F. F. de la Rosa, M. A. de la Rosa, and M. Losada* 807
Radioimmunoassay for α-Human and Rat Atrial Natriuretic Polypeptide
Kazuwa Nakao, Akira Sugawara, Narito Morii, Makoto Sakamoto, Mitsuaki Suda, Junichi Soneda, Toshihiko Ban, Masahiro Kihara, Yukio Yamori, Masanori Shimokura, Yoshiaki Kiso, and Hiroo Imura 815
The Cholesterol Content of the Human Erythrocyte Influences Calcium Influx through the Channel *Rudolf Locher, Ludwig Neyses, Michael Stimpel, Beatrix Küffer, and Wilhelm Vetter* 822
Extracellular Matrix Proteins Involved in Bone Induction Are Vitamin D Dependent
T. K. Sampath, S. Wientroub, and A. H. Reddi 829
Zinc Is a Constituent of Bovine Heart Cytochrome *c* Oxidase Preparations
Ólöf Einarsdóttir and Winslow S. Caughey 836
Metabolism and Subcellular Localization of Angiotensin-Converting Enzyme in Cultured Human Monocytes *Michael S. Rohrbach* 843

Colcemid Treatment of Myeloma prior to Cell Fusion Increases the Yield of Hybridomas between Myeloma and Splenocyte *Michinori Miyahara, Harumi Nakamura, and Yoshitaka Hamaguchi* 903
Cathepsins J and K: High-Molecular-Weight Cysteine Proteinases from Human Tissues *John C. R. Liao and James F. Lenney* 909
DNA Polymerases and DNA Topoisomerases Solubilized from Nuclear Matrices of Regenerating Rat Livers *Miwako Nishizawa, Kazushi Tanabe, and Taijo Takahashi* 917
Neuromedin B Is a Major Bombesin-like Peptide in Rat Brain: Regional Distribution of Neuromedin B and Neuromedin C in Rat Brain, Pituitary, and Spinal Cord *Naoto Minamino, Kenji Kangawa, and Hisayuki Matsuo* 925
Cell Fusion Responsible for Horizontal Oncogenesis by Human Tumors in Nude Mice *J. Kömpf, H. J. Staab, H. Heilbronner, F. A. Anderer, and H. Ritter* 933
Cyclic Tetrameric Clusters of Chemotactic Peptides as Superactive Activators of Lysozyme Release from Human Neutrophils *Jean-Louis Kraus, Antonia DiPaola, and Bernard Belleau* 939
Synaptosomal Phospholipase D: Potential Role in Providing Choline for Acetylcholine Synthesis *Hiroshi Hattori and Julian N. Kanfer* 945
Human X- and Y-Bearing Sperm Differ in Cell Surface Sialic Acid Content *Satoru Kaneko, Shigeru Oshio, Toshifumi Kobayashi, Rihachi Iizuka, and Hideo Mohri* 950
Antibodies against the Plasma Membrane 3,3′,5-Triiodo-L-thyronine Binding Protein of Rat Pituitary GH_3 Cells: Partial Characterization and Cross-Species Immunoreactivity *S. Hasumura, B. Rossi, R. Alderson, I. Pastan, and S.-y. Cheng* 956
Association of Leukotriene B_4 with the Cytoskeleton of Rabbit Neutrophils: Effect of Chemotactic Factor and Phorbol Esters *Paul H. Naccache, Thaddeus F. P. Molski, Pierre Borgeat, and Ramadan I. Sha'afi* 963
Differences in Physical and Biological Properties of 50 S Ribosomes and 23 S RNAs Derived from Tight and Loose Couple 70 S Ribosomes *D. P. Burma, A. K. Srivastava, S. Srivastava, D. S. Tewari, D. Dash, and S. K. Sengupta* 970
TTX Displacement of [H^3]Nitrendipine Binding in Developing Spinal Cord Neurons *Marcia J. Litzinger and Douglas E. Brenneman* 979
Variations in the Organization of Human Genomic DNA Segments Containing H1 Histone Genes *P. Zwollo, G. S. Stein, and J. L. Stein* 988
ERRATUM
Volume 119, Number 1, February 29, 1984: Ellen F. Wallace, Eckard Weber, Jack D. Barchas, and Christopher J. Evans "A Putative Processing Enzyme from Aplysia that Cleaves Dynorphin A at the Single Arginine Residue," pp. 415–422 994
Author Index for Volume 124 995

Volume 125, Number 1, November 30, 1984

AUTHOR INDEX, Volume 125, Number 1, November 30, 1984 ii
Characterisation of the Interferon-Mediated Protein Kinase by Polyclonal Antibodies *Anne G. Laurent, Bernard Krust, Josette Svab, and Ara G. Hovanessian* 1
Thermodynamics of Reverse Electron Transfer across Site 1: ATP/$2e^-$ Is Greater than One *Jo A. Freedman and John J. Lemasters* 8
Relationship between the Rate of Erythrocyte Hexose Monophosphate Pathway and the Glucose 6-Phosphate Concentration *Mauro Magnani, Vilberto Stocchi, Antonio Fazi, Marina Dachà, and Giorgio Fornaini* 14
Identification of GABA Receptor Binding Sites in Rat and Rabbit Uterus *Sándor L. Erdő* 18
Preparation of an Immunotoxin for *Acanthamoeba castellanii* *C. L. Villemez and P. L. Carlo* 25
Enhancement of the *in Vitro* Antibody Response by Thyrotropin *J. Edwin Blalock, Howard M. Johnson, Eric M. Smith, and Barbara A. Torres* 30

Temperature- and Dose-Dependent Internalization of Concanavalin A in Monolayer Culture *Kenji Sorimachi* 35
Distribution of Protein-Bound Zinc in Serum of Analbuminemic Rat *Noriyuki Shiraishi, Hiromichi Yamamoto, Makoto Kimoto, Toshiaki Shiragami, Izumi Togami, Harutaka Niiya, and Kaname Aono* 45
Siderophore Reduction Catalyzed by Higher Plant NADH:Nitrate Reductase *Domenic Castignetti and John Smarrelli, Jr.* 52
Inhibition of Carrageenan Edema Formation by Organotin Compounds *Yasuaki Arakawa and Osamu Wada* 59
Structural and Functional Abnormalities in the Adipocyte Plasma Membrane from *db/db* Mouse, and the Effect on the Abnormalities of Oral Treatment with AS-6 *Tomoyoshi Hosokawa, Kunio Ando, and Gakuzo Tamura* 64
Insulin Receptors on Chinese Hamster Ovary (CHO) Cells: Altered Insulin Binding to Glycosylation Mutants *Judith Podskalny, Aidan McElduff, and Phillip Gorden* 70
Rapid Reduction by IAA of Malondialdehyde Levels in *Avena* Coleoptiles, a Possible Effect on Lipid Peroxidation *Rajinder S. Dhindsa, A. Cristina Amaral, and Robert E. Cleland* 76
Design of Conformationally Constrained Angiotensin-Converting Enzyme Inhibitors *Harold N. Weller, Eric M. Gordon, Mary Beth Rom, and Jelka Pluščec* 82
Human Leukemia K562 Cells: Relationship between Hemin-Mediated Erythroid Induction, Cell Proliferation, and Expression of c-ABL and c-MYC Oncogenes *Roberto Gambari, Laura del Senno, Roberta Piva, Raffaella Barbieri, Francesca Amelotti, Francesco Bernardi, Giovanna Marchetti, Franca Citarella, Marco Tripodi, and Antonio Fantoni* 90
Leukotriene Biosynthesis and Metabolism Detected by the Combined Use of HPLC and Radioimmunoassay *Beatrice C. Beaubien, John R. Tippins, and Howard R. Morris* 97
Platelet-Activating Factor Stimulation of Peptidoleukotriene Release: Inhibition by Vasoactive Polypeptide *Beatrice B. Beaubien, John R. Tippins, and Howard R. Morris* 105
Thiyl Radicals—Formation during Peroxidase-Catalyzed Metabolism of Acetaminophen in the Presence of Thiols *D. Ross, E. Albano, U. Nilsson, and P. Moldéus* 109
Rabbit Lung Flavin-Containing Monooxygenase Is Immunochemically and Catalytically Distinct from the Liver Enzyme *D. E. Williams, D. M. Ziegler, D. J. Nordin, S. E. Hale, and B. S. S. Masters* 116
Participation of Peroxisomal β-Oxidation System in the Chain-Shortening of a Xenobiotic Acyl Compound *Junji Yamada, Shuichi Horie, Takafumi Watanabe, and Tetsuya Suga* 123
Specific Increase in Thymidine Transport at a Permissive Temperature in the Rat Kidney Cells Infected with src^{ts}-Rous Sarcoma Virus *Yoshimasa Uehara, Makoto Hori, and Hamao Umezawa* 129
Cyclic AMP as a Transcriptional Inhibitor of Upper Eukaryotic Gene Transcription *Sophie Vaulont, Arnold Munnich, Joëlle Marie, Gérard Reach, Anne-Lise Pichard, Marie-Pierre Simon, Claude Besmond, Pascal Barbry, and Axel Kahn* 135
Ganglioside Composition of Substrate-Adhesion Sites of Normal and Virally Transformed Balb/c 3T3 Cells *G. Mugnai, D. Tombaccini, and S. Ruggieri* 142
Tunicamycin Prevents Stimulation of Protein Synthesis by Branched Chain Amino Acids in Isolated Rat Muscles *James C. Pryor and Maria G. Buse* 149
Ceruloplasmin Receptors of Erythrocytes *Grady Barnes and Earl Frieden* 157
Structural and Chemical Specificity of Diradylglycerols for Protein Kinase C Activation *Myles C. Cabot and Susan Jaken* 163
Kinetic Analyses of the Effects of Hyperoxia and Hypoxia on Vascular Cyclooxygenase Activity *in Vitro* *B. N. Yamaja Setty, Ronald W. Walenga, and Marie J. Stuart* 170
Factor IXa Protects Activated Factor VIII against Inactivation by Activated Protein C *Rogier M. Bertina, Rosemiek Cupers, and Aat van Wijngaarden* 177
Chlorpromazine: A Potential Anticancer Agent? *S. Darkin, J. McQuillan, and R. K. Ralph* 184

Creatine Kinase-BB Isoenzyme in Rat Plasma after Chronic Lead Intoxication
Thomas Delahunty 192

Salmon Calcitonin Inhibits Human Sperm Motility *in Vitro*
Lucio Gnessi, Leopoldo Silvestroni, Andrea Fabbri, Costanzo Moretti, Alberto E. Panerai, Vincenzo Bonifacio, and Franco Fraioli 199

Inhibition of Growth of *Mycoplasma dispar* by DL-α-Difluoromethyllysine, a Selective Irreversible Inhibitor of Lysine Decarboxylase, and Reversal by Cadaverine (1,5-Diaminopentane) *Hannu Pösö, Peter P. McCann, Raili Tanskanen, Philippe Bey, and Albert Sjoerdsma* 205

Identification of Glycosphingolipid–Glycoprotein Hybrids in Gastric Epithelium
A. Slomiany, A. Takagi, and B. L. Slomiany 211

Chemical Characterization of the Two Forms of Epidermal Growth Factor in Murine Saliva
Petro E. Petrides, Peter Böhlen, and John E. Shively 218

Isolation and Characterization of the 1 to 49 Amino-Terminal Sequence of Pro-opiomelanocortin from Bovine Posterior Pituitaries *H. P. J. Bennett* 229

Growth Hormone Directly Alters Glucose Utilization in 3T3 Adipocytes
Jessica Schwartz 237

Characterization of Substance P (1–7) and (1–8) Generating Enzyme in Human Cerebrospinal Fluid *Fred Nyberg, Pierre Le Greves, Christer Sundqvist, and Lars Terenius* 244

Characterization of a Protein Kinase–Substrate Complex Precipitable with Ca^{2+} from the Cytosol Fraction of AH-66 Hepatoma Cells
Shigeo Nakajo, Kazuyasu Nakaya, Takemi Yoshida, and Yasuharu Nakamura 251

1-(5-Isoquinolinesulfonyl)-2-methylpiperazine (H-7) Is a Selective Inhibitor of Protein Kinase C in Rabbit Platelets *Sachiyo Kawamoto and Hiroyoshi Hidaka* 258

The Influence of Albumin on Vitamin D Metabolism in Fetal Chick Osteoblast-like Cells
Huibert A. P. Pols, Hans P. Schilte, Peter J. Nijweide, Theo J. Visser, and Jan C. Birkenhäger 265

Pulmonary Macrophage: A Major Source of Lipoprotein Lipase in the Lung
Tetsuro Okabe, Hiroshi Yorifuji, Toshio Murase, and Fumimaro Takaku 273

Serine Proteinase Activation of Latent Human Skin Collagenase
Mark Eisenberg, Lambro Johnson, and Kenneth E. Moon 279

A Large-Molecular-Weight Regulating Factor for Chromatin-Dependent RNA Polymerase II Reactions in Rat Liver Cytoplasm *Yasuji Okai* 286

The Control of Phosphorylase Kinase Phosphatase Activity by Polycations and the Deinhibitor Protein *Jozef Goris, Donal A. Walsh, and Wilfried Merlevede* 293

Chromosomal Localization of the Human Apoprotein CI Gene and of a Polymorphic Apoprotein AII Gene *Timothy J. Knott, Roger L. Eddy, M. Elaine Robertson, Linda M. Priestley, James Scott, and Thomas B. Shows* 299

Use of Fast Protein Liquid Chromatography in the Purification of Inhibin from Bovine Follicular Fluid *Simon van Dijk, Frank H. de Jong, and Henk J. van der Molen* 307

Atrial Natriuretic Factor Is a Circulating Hormone *J. Gutkowska, K. Horký, G. Thibault, P. Januszewicz, M. Cantin, and J. Genest* 315

The Effect of 1-Deoxymannojirimycin on Rat Liver α-Mannosidases
Joyce Bischoff and Rosalind Kornfeld 324

Synergism betweeen A23187 and 1-Oleoyl-2-acetyl-glycerol in Superoxide Production by Human Neutrophils *Adrienne Penfield and M. Maureen Dale* 332

Calcium Compartments and Fluxes Are Affected by the *src* Gene Product of Rat-1 Cells Transformed by Temperature-Sensitive Rous Sarcoma Virus
Klaus Seuwen and Gerold Adam 337

cis Isomer of Centchroman: A Selective Ligand for the Microsomal Antiestrogen Binding Site
Ashraf Saeed, Neelam Durani, Susheel Durani, Suprabhat Ray, and Randhir S. Kapil 346

Phorbol Esters as Probes of the Regulation of Thyrotropin Secretion
Ronald J. Koenig, David Senator, and P. Reed Larsen 353

Enhancement of Amphotericin B Selectivity by Antibiotic Incorporation into Gel State Vesicles: A Circular Dichroism and Permeability Study *A. Vertut-Croquin, J. Bolard, and C. M. Gary-Bobo* 360

Activation of NADPH Oxidase of Human Neutrophils: Potentiation of Chemotactic Peptide by a Diacylglycerol *Beatrice Dewald, Trevor G. Payne, and Marco Baggiolini* 367

Characterization of a Common Genetic Defect of Cytochrome *P*-450 Function (Debrisoquine–Sparteine-Type Polymorphism): Increased Michaelis Constant (K_m) and Loss of Stereoselectivity of Bufuralol 1′-Hydroxylation in Poor Metabolizers *Pierre Dayer, Rodolfo Gasser, Joseph Gut, Thomas Kronbach, Gerda-Marie Robertz, Michel Eichelbaum, and Urs A. Meyer* 374

Membrane Insertion of Prothrombin *M. F. Lecompte, Ian Rosenberg, and Carlos Gitler* 381

Effects of Dihydropyridine Calcium Channel Modulators in the Heart: Pharmacological and Radioligand Binding Correlations *Arnold Schwartz, Ingrid L. Grupp, Gunter Grupp, Judith S. Williams, and Pal L. Vaghy* 387

Loss of High-Affinity Neurotensin Receptors in *Substantia nigra* from Parkinsonian Subjects *Jean-Louise Sadoul, Frédéric Chécler, Patrick Kitabgi, William Rostène, France Javoy-Agid, and Jean-Pierre Vincent* 395

Activation of the Voltage-Dependent Ca^{2+} Channel in Rat Heart Cells by Dihydropyridine Derivatives *Jean-François Renaud, Jean-Pierre Méaux, Georges Romey, Annie Schmid, and Michel Lazdunski* 405

Different Susceptibility of Alkylacyl- versus Diacyl- and Alkenylacyl-phosphatidylcholine Subclasses to Stimulation of Biosynthesis by Phospholipase C *François Terce, Michel Record, Hugues Chap, and Louis Douste-Blazy* 413

The Effect of Oncomodulin on cAMP Phosphodiesterase Activity *C. B. Klee and L. A. Heppel* 420

Copper-Facilitated Chemiluminescence from the Sulfhydryl Proteins: Yeast Alcohol Dehydrogenase, Spinach Ferredoxin, and Metallothionein *Ka-Ho Wong, Erin E. Boh, and Richard H. Steele* 425

Restoration and Stimulation of the *in Vitro* Immune Response of B Cells to Sheep Erythrocytes by Interleukins and Muramyl Dipeptide (MDP) *Vongthip Souvannavong and Arlette Adam* 431

Volume 125, Number 2, December 14, 1984

AUTHOR INDEX, Volume 125, Number 2, December 14, 1984 ii

In Vivo and *in Vitro* Evidence for the Involvement of Cysteine Proteinases in Bone Resorption *Jean-Marie Delaissé, Yves Eeckhout, and Gilbert Vaes* 441

γ-Melanotropin Is Contained within Neurons, Nerve Fibres, and Nerve Endings of Rat Duodenum *Hermann J. Wolter* 448

Effect of Vitamin A Deprivation on the Mitogenic Factor Activity in the Rat Testes *Emmanual Unni, K. V. Kesari, and M. R. S. Rao* 454

Plasmin Cleaves Human β-Casein *Rae Greenberg and Merton L. Groves* 463

Androgen-Dependent Peptides of the Rat Ventral Prostate Nuclear Envelope *Jaya T. Venkatraman, Gillian M. Howell, and Yvonne A. Lefebvre* 469

Production and Purification of Monoclonal T-Lymphocyte Antigen Binding Molecules (TABM) *Kenneth D. Beaman and Robert E. Cone* 475

Metabolism of 1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP) in Mouse Liver Preparations *John K. Baker, Ronald F. Borne, W. Marvin Davis, and I. Wade Waters* 484

Inhibition of Dimethylsulfoxide-Induced Differentiation in Friend Erythroleukemic Cells by Diacylglycerols and Phospholipase C *S. M. Pincus, B. S. Beckman, and W. J. George* 491

Regulation of Na/K/Cl Cotransport in Vascular Smooth Muscle Cells *Nancy E. Owen* 500

Inhibition of Fibroblastic Cell Division by a Fraction of Structural Glycoproteins Extracted from Rabbit Dermis *F. X. Maquart, J. Cornillet-Stoupy, A. Randoux, and J. P. Borel* 509

Characterization and N-Terminal Sequence of a Degradation Product of 14,000 Molecular Weight Isolated from Human Pancreatic Juice *O. Guy-Crotte, M. Amouric, and C. Figarella* 516

Characterization of a Chemically Tritiated Large-Molecular-Weight Glucagon Immunoreactive Protein Species by Lectin-Affinity Column Chromatography and Reaction with Anti-glucagon Antibodies *A. K. Tung and K. P. Siu* 524

Photoaffinity Labeling of Gonadotropin Releasing Hormone Receptors in Control and Desensitized Pituitary Cells *E. Hazum and I. Schvartz* 532

Resolution and Absolute Configuration of 7,12-Dimethylbenz[*a*]anthracene 5,6-Epoxide Enantiomers *Mohammad Mushtaq, Henri B. Weems, and Shen K. Yang* 539

Postnatal Changes in Biosynthesis of Microvillus Membrane Glycans of Rat Small Intestine. I. Evidence of a Developmental Shift from Terminal Sialylation to Fucosylation *Ramon Torres-Pinedo and Akhtar Mahmood* 546

Adrenocortical Cytochrome *P*-450 Responsible for Cholesterol Side Chain Cleavage ($P\text{-}450_{scc}$) Is Phosphorylated by the Calcium-Activated, Phospholipid-Sensitive Protein Kinase (Protein Kinase C). *I. Vilgrain, G. Defaye, and E. M. Chambaz* 554

Specific Receptors for Atrial Natriuretic Factor (ANF) in Cultured Vascular Smooth Muscle Cells of Rat Aorta *Yukio Hirata, Masahiro Tomita, Hiroki Yoshimi, and Masao Ikeda* 562

Location of DNA and Nucleotide Binding Sites on Wheat Germ RNA Polymerase II *Erik Bateman and Bruce H. Nicholson* 569

Cryptic Estrogen Binding Protein Complicates Analysis of Estrogen Receptor Distribution *E. J. Smanik, J. A. Copland, and T. G. Muldoon* 577

Absence of Generation of Oxygen-Containing Free Radicals with 4′-Deoxydoxorubicin, a Noncardiotoxic Anthracycline Drug *Alan C. Dickinson, John O. DeJordy, Michael G. Boutin, and Daniel Teres* 584

Two-Dimensional Electron Transfer from Cytochrome *c* to Photosynthetic Reaction Centers *Johann Riegler, Joachim Peschke, and Helmut Möhwald* 592

Detection of Proteins Which Recognize and Bind *oriC* Sequences *Martin Weinberger, Robert S. Greene, Cheryl R. Nash, and Charles E. Helmstetter* 600

Growth Hormone-Releasing Factor from Ovine and Caprine Hypothalamus: Isolation, Sequence Analysis, and Total Synthesis *Paul Brazeau, Peter Böhlen, Frederick Esch, Nicholas Ling, William B. Wehrenberg, and Roger Guillemin* 606

A Cell-Free Preparation of Human Neutrophils Catalyzing NADPH-Dependent Conversion of Leukotriene B_4 *Hideki Sumimoto, Koichiro Takeshige, Hironori Sakai, and Shigeki Minakami* 615

A Variant Prealbumin-Related Low-Molecular-Weight Amyloid Fibril Protein in Familial Amyloid Polyneuropathy of Japanese Origin *Fuyuki Kametani, Hiroshi Tonoike, Akihiko Hoshi, Tomotaka Shinoda, and Shozo Kito* 622

Phosphorylation of Microsomal HMG CoA Reductase Increases Susceptibility to Proteolytic Degradation *in Vitro* *Rex A. Parker, Steven J. Miller, and David M. Gibson* 629

Diagnosis of Familial Amyloidotic Polyneuropathy by Recombinant DNA Techniques *H. Sasaki, Y. Sakaki, H. Matsuo, I. Goto, Y. Kuroiwa, I. Sahashi, A. Takahashi, T. Shinoda, T. Isobe, and Y. Takagi* 636

Finding of a Galactose Oxidation Product in Lens of Galactose-Fed Guinea Pig *Eiko Wada and Toru Tsumita* 643

Transplasma Membrane Redox Stimulates HeLa Cell Growth *I. L. Sun, F. L. Crane, H. Löw, and C. Grebing* 649

Changes in Key Regulatory Enzymes of Hepatic Carbohydrate Metabolism after Glucose Loading of Starved Rats *Thomas H. Claus, Fritz Nyfeler, Helen A. Muenkel, Michael G. Burns, Tina Pate, and Simon J. Pilkis* 655

Detection of Renin mRNA in Mouse Testis by Hybridization with Renin cDNA Probe *Kailash N. Pandey, Masatoshi Maki, and Tadashi Inagami* 662

Production of a Monoclonal Antibody Directed against Rat Liver Glutathione–Insulin Transhydrogenase *D. Brian Dawson, Randall A. Smith, and Partab T. Varandani* 668

Photosensitized Irreversible Binding of Estrone to Protein via a Hydroperoxide Intermediate: An Explanation of (Photo-)allergic Side Effects of Estrogens *A. G. J. Sedee, G. M. J. Beijersbergen van Henegouwen, K. J. Lusthof, and G. Lodder* 675

Effects of Estrogen Depletion on Rat Casein Gene Expression *Lakshmanan Sankaran, Pradman Qasba, and Yale J. Topper* 682

Comparative Characterization of Monoclonal Antibodies to Carbonic Anhydrase *P. J. Linser, M. S. Perkins, F. W. Fitch, and A. A. Moscona* 690

Significance of Isomerization in Hydroxocobalamin *Rakesh K. Kohli and Amar Nath* 698

Monoclonal Antibodies to Low-Density Lipoprotein Used for the Study of Low- and Very-Low-Density Lipoproteins, in "ELISA" and Immunoprecipitation Technics *S. Salmon, S. Goldstein, D. Pastier, L. Theron, M. Berthelier, M. Ayrault-Jarrier, M. Dubarry, R. Rebourcet, and B. Pau* 704

Investigation of the Mechanism of Hepatotoxicity of *N*-Methylformamide in Mice: Effects on Calcium Sequestration in Hepatic Microsomes and Mitochondria and on Hepatic Plasma Membrane Potential *Helen Whitby, Suresh B. Chahwala, and Andreas Gescher* 712

Phospholipase A_2 Activity in Rat and Human Lymphocytes *Jacqueline Etienne and Jacques Polonovski* 719

Degradation of Substance P by Neurones and Glial Cells *Bernhard Horsthemke, Michael Schulz, and Karl Bauer* 728

Peptide Alignment of the Porcine 21-Hydroxylase Cytochrome *P*-450 Using a cDNA Sequence of the Corresponding Bovine Enzyme *Michael J. Bienkowski, Mitsuru Haniu, Shizuo Nakajin, Masato Shinoda, Kazutoshi Yanagibashi, Peter F. Hall, and John E. Shively* 734

Docosahexaenoic Acid (22:6, *n*-3) Is Metabolized to Lipoxygenase Reaction Products in the Retina *Nicolas G. Bazan, Dale L. Birkle, and T. Sanjeeva Reddy* 741

Isolation of Pure, Catalytically Active Human Liver Monoamine Oxidase B: Antibody Complex *Nutan T. Patel, Richard R. Fritz, and Creed W. Abell* 748

Leishmanial Differentiation *in Vitro*: Induction of Heat Shock Proteins *K. W. Hunter, C. L. Cook, and E. G. Hayunga* 755

Polyethylene Glycol-Modified Catalase Exhibits Unexpectedly High Activity in Benzene *Katsunobu Takahashi, Ayako Ajima, Takayuki Yoshimoto, and Yuji Inada* 761

The Amino Acid Sequence of the Fluorescein Isothiocyanate Reactive Site of Lamb and Rat Kidney Na^+- and K^+-Dependent ATPase *Terence L. Kirley, Earl T. Wallick, and Lois K. Lane* 767

A Calcium-Binding Protein Is a Regulatory Subunit of Quinate:NAD^+ Oxidoreductase from Dark-Grown Carrot Cells *Annick Graziana, Marietta Dillenschneider, and Raoul Ranjeva* 774

Sulfoxide Configuration in Sparsomycin Determines Time-Dependent and Competitive Inhibition of Peptidyl Transferase *Ronald J. Ash, Gary A. Flynn, Rob M. J. Liskamp, and Harry C. J. Ottenheijm* 784

Effects of A23187 and Ca^{2+} on Volume- and Thiol-Stimulated, Ouabain-Resistant K^+Cl^- Fluxes in Low-K^+ Sheep Erythrocytes *Peter K. Lauf and A. Mangor-Jensen* 790

Cloning of Genomic DNA for Human Atrial Natriuretic Factor *Masatoshi Maki, Marc Parmentier, and Tadashi Inagami* 797

Thermal Stability of the *Z* Conformation of the Tetranucleoside Triphosphate $(m^5dC\text{-}dG)_2$ *D. Genest, B. Hartmann, N. T. Thuong, M. Ptak, and M. Leng* 803

Comparison of the Effectiveness of S Phase Inhibitors in Altering Gene Expression *S. Detke* 812

Frequent Occurrence of a ξ-Globin-Region Deletion in American Blacks Accounts for a Previously Described Restriction Site Polymorphism *Eric F. Rappaport, Elias Schwartz, Mortimer Poncz, and Saul Surrey* 817

Iron Uptake from Transferrin by Isolated Hepatocytes: Effect of Ethanol *Rose Nunes, Oscar Beloqui, Paul D. Berk, and Barry J. Potter* 824

Oxidation of the Neurotoxic Amine 1-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP) by Monoamine Oxidases A and B and Suicide Inactivation of the Enzymes by MPTP
James I. Salach, Thomas P. Singer, Neal Castagnoli, Jr., and Anthony Trevor 831
Long-Chain Unsaturated Diacylglycerols Cause a Perturbation in the Structure of Phospholipid Bilayers Rendering Them Susceptible to Phospholipase Attack
R. M. C. Dawson, R. F. Irvine, J. Bray, and P. J. Quinn 836
ERRATUM
Volume 123, Number 2, September 17, 1984: Edward I. Ginns, Prabhakara V. Choudary, Brian M. Martin, Suzanne Winfield, Barbara Stubblefield, June Mayor, Denise Merkle-Lehman, Gary J. Murray, Lisa A. Bowers, and John A. Barranger, "Isolation of cDNA Clones for Human β-Glucocerebrosidase Using the λ_{gt11} Expression System," pp. 574–580. 843

Volume 125, Number 3, December 28, 1984

AUTHOR INDEX, Volume 125, Number 3, December 28, 1984 ii
Primary Structure of Heat-Stable Enterotoxin Produced by *Yersinia enterocolitica*
Toshifumi Takao, Noriko Tominaga, Yasutsugu Shimonishi, Saburo Hara, Takashi Inoue, and Akio Miyama 845
Spasmogenic Activity of $C5a_{desArg}$ Anaphylatoxin on Guinea Pig Lung Parenchymal Strips: Sensitivity of the Leukotriene-Mediated Component to Cyclooxygenase Inhibitors
Norma P. Stimler 852
Enhanced Tyrosine Phosphorylation in E Lymphocytes upon Complexing of Membrane Immunoglobulin *Andre E. Nel, Gary E. Landreth, Pascal J. Goldschmidt-Clermont, H. Edward Tung, and Robert M. Galbraith* 859
Ca^{2+}-Dependent and Phorbol Ester-Activating Phosphorylation of a 36K-Da Protein of Rat Basophilic Leukemia Cell Membranes and Immunoprecipitation of the Phosphorylated Protein with IgE–Anti IgE System *Reiko Teshima, Hideharu Ikebuchi, and Tadao Terao* 867
Glucose Inhibits Insulin Release When Not Promoting the Entry of Calcium into the β Cells
Peter Bergsten and Bo Hellman 875
Induction of Hepatic and Renal Ornithine Decarboxylase by Cadium in Rats
Takemi Yoshida, Satoshi Numazawa, and Yukio Kuroiwa 882
Isolation of a Plasma Protein Elevated during Hypertension in the Rat *Martin Diesterhaft* 888
Cloning and Expression in *Streptomyces lividans* of a Paromomycin Phosphotransferase from *Streptomyces rimosus forma paromomycinus* *J.A. Pérez-Gonzalez and A. Jiménez* 895
Structural Requirements for Allosteric Activators of Rat Liver Microsomal 3-Hydroxy-3-methylglutaryl Coenzyme A Reductase *Joseph Roitelman and Ishaiahu Shechter* 902
Regulation of Plasma Membrane Ca^{2+} ATPases by Lipids of the Phosphatidylinositol Cycle
Debra Choquette, Gabriele Hakim, Adelaida G. Filoteo, Gordon A. Plishker, J. Robert Bostwick, and John T. Penniston 908
Production and Identification of Bityrosine in Horseradish Peroxidase–H_2O_2–Tyrosine System
Yoshio Ushijima, Minoru Nakano, and Toshio Goto 916
The Structure of Crystalline and Membrane-Bound Gramicidin A by Vibrational Analysis
V. M. Naik and S. Krimm 919
Locating Peptides Generated by Limited Proteolysis in Known Protein Sequences by Means of Computer Search *Graham Cameron, Sergio Schenkman, and Jürg P. Rosenbusch* 926
Thyroid Hormone Regulation of Poly(adenylate) Polymerase Activities in Neuronal Nuclei of Developing Rat Brain Cortex *Dan B. Lindholm* 931
Structure–Activity Relationships of Atrial Natriuretic Factor (ANF). I. Natriuretic Activity and Relaxation of Intestinal Smooth Muscle *G. Thibault, R. Garcia, F. Carrier, N. G. Seidah, C. Lazure, M. Chrétien, M. Cantin, and J. Genest* 938
An Unusual Cyclic AMP-Dependent Protein Kinase from Nematodes *Alexander Vardanis* 947
Effect of Anthracyclines and Mitoxantrone on Oxygen Uptake and ATP Intracellular Concentration in Rat Heart Slices *B. Neri, G. Cini-Neri, and M. D'Alterio* 954

Identification of Hormonogenic Domains in the Carboxyl Terminal Region of Bovine Thyroglobulin *Luc Mercken, Marc Massaer, Marie-Jeanne Simons, Stéphane Swillens, and Gilbert Vassart* 961
Oxidized Glutathione Reductase Activity in Mouse Epidermis: TPA-Induced Change and Its Modulation by Vitamin A *Sushil Kumar, Mary Antony, and N. K. Mehrotra* 967
Optically Detected Magnetic Resonance in Lysozyme: Evidence for Three Phosphorescent Trp Residues *R. L. Williamson and Alvin L. Kwiram* 974
Platelet-Activating Factor Intravenous Infusion in Rats Stimulates Vascular Lysosomal Hydrolase Secretion Independent of Blood Neutrophils *Thomas W. Doebber, Margaret S. Wu, and T. Y. Shen* 980
Radioisotopic Evidence for the Polypeptides Associated with Photosystem II *H. Daniell, M. Krishnan, M. Ranganathan, and A. Gnanam* 988
Hexadecane Increases the Toxicity of 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin (TCDD): Is Brown Adipose Tissue the Primary Target in TCDD-Induced Wasting Syndrome? *K. Rozman* 996
Rat Hypothalamic Growth Hormone-Releasing Factor: Isolation, Sequence Analysis, and Total Synthesis *Peter Böhlen, William B. Wehrenberg, Frederick Esch, Nicholas Ling, Paul Brazeau, and Roger Guillemin* 1005
Complement Channels in Membranes: Inhibition with a Monoclonal Antibody to a Neoantigen of Polymerized C9 *Agustin P. Dalmasso, Barbara A. Benson, and Ronald J. Falk* 1013
Quantitative Study of Aluminum Binding to Human Serum Albumin and Transferrin by a Chelex Competitive Binding Assay *Roger L. Bertholf, Michael R. Wills, and John Savory* 1020
A Cytoplasmic Nickel–Iron Hydrogenase with High Specific Activity from *Desulfovibrio multispirans* sp. N., a New Species of Sulfate-Reducing Bacterium *M. H. Czechowski, S. H. He, M. Nacro, D. V. DerVartanian, H. D. Peck, Jr., and J. LeGall* 1025
Different Efficiency of Various Synthetic Antioxidants toward NADPH-Induced Chemiluminescence in Rat Liver Microsomes *A. Weimann, A. G. Hildebrandt, and R. Kahl* 1033
Thiazolidine-2-carboxylate Derivatives Formed from Glyoxylate and L-Cysteine or L-Cysteinylglycine as Possible Physiological Substrates for D-Aspartate Oxidase *Charlene L. Burns, Dennis E. Main, David J. Buckthal, and Gordon A. Hamilton* 1039
Inhibition of Lipid Peroxidation by a Novel Compound (CV-2619) in Brain Mitochondria and Mode of Action of the Inhibition *Masahiro Suno and Akinobu Nagaoka* 1046
Purification and Characterization of a New Form of Glutathione *S*-Transferase from Human Erythrocytes *Yogesh C. Awasthi and Shivendra V. Singh* 1053
2′, 5′-Oligoadenylate and 2′, 5′-Oligoadenylate Phosphodiesterase in Human Plasma *Hiroaki Sawai, Kaichiro Ishibashi, Masao Itoh, and Shoichi Watanabe* 1061
Protein Kinase Activity of Purified Rat Liver Glucocorticoid Receptor *Virendra B. Singh and V. K. Moudgil* 1067
Cardiac Substances That Influence Blood Pressure. I. Identification of the Agent That Lowers Blood Pressure in Anesthetized Rate *J. J. Nieuwenhuis, B. C. Labuschagne, J. J. Theron, and R. P. Biagio* 1074
Polypentapeptide of Elastin: Temperature Dependence Correlation of Elastomeric Force and Dielectric Permittivity *Dan W. Urry, Rolf Henze, Roland D. Harris, and Kari U. Prasad* 1082
Purification and Properties of Cytochrome *P*-450 from Untreated Monkey Liver Microsomes *Shigeru Ohmori, Keiko Motohashi, Mitsukazu Kitada, Yoshio Kanakubo, Takashi Igarashi, Koichi Ueno, and Haruo Kitagawa* 1089
Evidence That 2-Allyl-2-isopropylacetamide and Phenobarbital Induce the Same Cytochrome *P*-450 in Cultured Chick Embryo Hepatocytes *Lea Oron and Shoshana Bar-Nun* 1096
Phorbol Ester-Induced Contraction of Arterial Smooth Muscle and Inhibition of α-Adrenergic Response *Naga Raju Danthuluri and Richard C. Deth* 1103
Cultured Tonsillar Lymphocytes Excrete [^{3}H] Thymidine-Labeled DNA and Revert to Resting State *Maria Sasvari-Szekely, Maria Staub, Janos Taljanidisz, Gabor Szabo, Jr., Jozsef Takacs, and Ferenc Antoni* 1110

NAD(P)H-Dependent Reduction of Nicotinamide N Oxide by an Unique Enzyme System Consisting of Liver Microsomal NADPH-Cytochrome *c* Reductase and Cytosolic Aldehyde Oxidase *Shigeyuki Kitamura, Yukio Wada, and Kiyoshi Tatsumi* 1117
Evidence for a Role of Na^+/H^+ Exchange in Platelets Activated with Calcium Ionophore A 23187 *Winfried Siffert, Klaus Mückenhoff, and Peter Scheid* 1123
Effect of Sodium Butyrate on Gene Expression in a Rat Myogenic Cell Line *M. P. Leibovitch, S. A. Leibovitch, M. Raymondjean, and J. Kruh* 1129
A Direct Demonstration That Inositol-trisphosphate Induces an Increase in Intracellular Calcium in *Limulus* Photoreceptors *J. E. Brown and L. J. Rubin* 1137
Computer-Aided Evaluation of Two-Dimensional NMR Spectra of Proteins *K. P. Neidig, H. Bodenmueller, and H. R. Kalbitzer* 1143

CUMULATIVE SUBJECT INDEX FOR VOLUMES 118-125

A

23187, see Ionophore A23187
-Acetamido-2-deoxy-3-O-(2'-D-lactyl-L-alanyl-D-glutamylamine)-D-glucose -bound mannosylated bovine serum albumin, tumoricidal activation of alveolar macrophages (mouse, rat), 122, 579
cetaminophen
with thiols, peroxidase-catalyzed metabolism, thiyl radical formation, 125, 109
cetate ion
effect on basal and isoprenaline- and GTP-stimulated adenylate cyclase (rabbit heart), 118, 561
cetic anhydride
nucleosome modification, induction of single- and double-stranded DNA release (chicken erythrocytes), 121, 907
cetoacetate
succinate reverse electron transfer, ATP-driven, thermodynamics (rat hepatic mitochondria), 125, 8
cetoacetyl-CoA thiolase, see Acetyl-CoA acetyltransferase
cetolactate synthase
valine-sensitive basal unit, purification and stabilization (Neurospora crassa), 123, 418
-Acetylaminofluorene, see N-2-Fluorenylacetamide
cetylcholine
synthesis, choline liberation, synaptosomal phospholipase-D role (rat brain), 124, 945
cetylcholine receptors
cation flux, inhibition by caprine acetylcholine receptor antibodies (Torpedo californica), 120, 368
membranes, reconstituted, multiple binding sites for local anesthetics (Torpedo californica), 123, 862
nicotinic
4-(N-maleimidobenzyl)trimethylammonium-binding site, immunochemical identification (Torpedo californica), 122, 602
structural characterization by antibodies to synthetic peptides (Torpedo californica), 122, 1225
α-subunit, antibodies, induction by synthetic peptide from receptor sequence (Torpedo californica), 121, 673
Acetylcholinesterase
inactivation by divicine and isouramil, mediation by Cu ions (human erythrocyte ghosts), 122, 297
turnover in vivo, analysis with radioactive methylphosphonothiate irreversible inhibitor (rat brain), 123, 71
Acetyl-CoA acetyltransferase
and ß-hydroxy-ß-methyl-glutaryl-CoA synthase, -deficient mutants, isolation and characterization (yeast), 123, 424
Acetyl-CoA carboxylase
subunits, molecular weight determination (rat hepatic cytoplasm), 122, 694
N-Acetylcysteine
in peroxidase-catalyzed acetaminophen metabolism, thiyl radical formation, 125, 109
N-Acetylgalactosamine
residues on Cad erythrocytes, interaction with B_4 lectin (Vicia villosa seeds), 123, 1099
N-Acetyl-glycosamine
and derivatives, binding to wheat germ agglutinin, fluorescence and NMR spectroscopy, 119, 603
ß-N-Acetyl-D-glucosaminidase
α-chain precursor, identification in hexosaminidase A-deficient adults (cultured human skin fibroblasts), 119, 101
deficiency, frequency in lymphoblastoid cell lines, 119, 841
isoenzyme, separation from leukemic lymphocytes and myelocytes (human), 122, 966
N-Acetyllactosamine
-type glycopeptides, identification of terminal α(1→3)-linked galactose, NMR (bovine), 122, 859

*Underscored numbers indicate the appropriate volumes; numbers without underscores indicate pagination.

N-Acetyl-5-methoxy kynurenamine
prostaglandin biosynthesis inhibition (bovine, ovine seminal vesicle microsomes), 121, 372
2'-Acetyltaxol
preparation and biological activity 124, 329
7'-Acetyltaxol
preparation and biological activity 124, 329
Acid α-D-mannosidase
complex oligosaccharide- and high mannose-containing forms, identification (Macaca radiata brain), 123, 1185
Acid phosphatase
carbohydrates, crosslinking and structural characterization (Saccharomyces cerevisiae), 122, 1083
Acrosin
and proacrosin, amino terminal sequences, comparison (boar sperm), 121, 884
ACTH (adrenocorticotropic hormone), see Adrenocorticotropin
Actin
antibody-stimulated DNA synthesis and protein phosphorylation, effects of prostaglandins E_1 and $F_{2\alpha}$ (murine L cells), 124, 23
-binding proteins, phosphorylation, role in platelet cytoskeleton assembly (human), 118, 508
cellular levels in ataxia telangiectasia lymphoblastoid cell culture, regulation by cell density (human), 119, 561
chemoattractant-mediated accumulation in cytoskeleton, refractoriness and adaptation (Dictyostelium discoideum), 123, 1076
F-, cytochalasin binding, inhibition by p-hydroxymercuribenzoate, mechanism (rabbit skeletal muscle), 122, 244
gene expression in proliferating L6 myoblasts and differentiated L6 myotubes (rat), 119, 630
identification in oncornaviruses (chicken embryo fibroblasts), 118, 580
polymerization, induction by platelet activation, agonist-specific desensitization (bovine), 120, 846
-protein complex, 90-kD, and cytochalasin D: actin filament shortening, phalloidin and tropomyosin effects, comparison (bovine brain), 123, 596
role in Ca^{2+} transport through plasma membrane (bovine chromaffin cells), 119, 652
-spectrin-band 4.1 complex, cytochalasin binding, inhibition by p-hydroxymercuribenzoate, mechanism (human erythrocyte membranes), 122, 244
α-Actin
gene expression, sodium butyrate effects (rat L6 myoblasts), 125, 1129
α-Actinin
phosphorylation, Ca^{2+}-activated phospholipid-dependent protein kinase effect (chicken gizzard), 118, 736
susceptibility to Ca^{2+}-activated protease (human platelets), 124, 877
Actinomycin D, see Dactinomycin
Acyl
-carrier protein subunit of citrate lyase, repetitive structure (Escherichia coli), 122, 1253
side-chains, shortening in xenobiotic compounds, role of peroxisomal ß-oxidation system (rat hepatocytes), 125, 123
N-Acylation
palmitic acid in sphingomyelin, enhancement in antiserum-stimulated L cells (mouse), 121, 605
Acyl-CoA desaturase
modulation by dexamethasone (Tetrahymena microsomes), 119, 401
Acyl-CoA:dihydroxyacetone phosphate acyltransferase, see Dihydroxyacetone-phosphate acyltransferase
1-Acyl-2-[6-[(7-nitro-2,1,3-benzoxadiazol-4-yl)amino]-caproyl]phosphatidylcholine
hydrolysis by bovine lipoprotein lipase and porcine phospholipase A_2, 118, 894
Adenosine
2-amino substitution, effect on poly(d2NH_2A-dT) B to Z transition, 118, 848
and derivatives in cardiac extracts, hypotensive effects on anesthetized rats (rabbit), 125, 1074
efflux and influx in adenosine deaminase-deficient lymphoma cells, dipyramidole and nitrobenzylthioinosine effects (human), 121, 514
Adenosine deaminase
-deficient lymphoma cells, adenine nucleoside efflux and influx, dipyridamole and nitrobenzylthioinosine effects (human), 121, 514
P^1-(Adenosine-5')-P^3-(glucose-6)-triphosphate
hexokinase inhibition by binding to discrete regulatory site (rat

brain), 118, 90
enosine receptors
adenylate cyclase-coupled, detection (rat renal papillae), 121, 434
Adenosylethionine
betaine-homocysteine methyltransferase inactivation (rat liver), 118, 14
Adenosylmethionine
betaine-homocysteine methyltransferase inactivation (rat liver), 118, 14
biosynthesis, methionine analog inhibitor effects (murine L1210 leukemia cells), 122, 350
enovirus type 5
DNA, replication initiation and elongation, inhibition in vitro and in vivo by actinomycin D (HeLa cells), 121, 1033
enylate cyclase
Bordetella pertussis toxin effect (rat pancreatic islets), 124, 190
-coupled
adenosine receptors, detection (rat renal papillae), 121, 434
ß-adrenergic receptors, identification in developing palate (mouse), 119, 193
desensitization, catecholamine and phorbol diester effects (duck erythrocytes), 121, 973
inhibition by synthetic atrial natriuretic factor (rat aortic particles; mesenteric, renal arteries), 121, 855
maximal activation, choleragen and pertussis toxin requirement (NG108-15 cell culture), 119, 1068
stimulation by
chloride, mechanism (rabbit heart) 118, 555
isoprenaline and GTP, anion and cation effects (rabbit heart), 118, 561
stimulator-inhibitor antagonism, cytoplasmic platelet Ca regulation by cAMP (human), 120, 579
vasoactive intestinal peptide partial sequence effect in epithelial membranes (human, rat intestine), 121, 493
ipocytes
plasma membrane structural and functional abnormalities in obese diabetic strains, ascochlorin derivative AS-6 effects (mouse), 125, 64
3T3, glucose utilization, human growth hormone effect, 125, 237
ipose tissue
brown, primary target in 2,3,7,8-tetrachlorodibenzo-p-dioxin-induced wasting syndrome (rat), 125, 996
ADP (adenosine 5'-diphosphate)
liberation in diadenosine triphosphate-mediated platelet aggregation (human), 118, 704
-mediated pyruvate,P_i dikinase inactivation, ATP-dependent catalytic phosphorylation requirement (Zea mays), 118, 65
phosphofructokinase-2 inhibition (rat liver), 124, 793
regulatory effects on plasma membrane ATPase (corn roots), 122, 1367
ADP-glucose synthetase, see Glucose-1-phosphate adenylyltransferase
ADP-ribosylation
islets of Langerhans (rat), 118, 663
membrane proteins, effect of Bordetella pertussis toxin (rat pancreatic islets), 124, 190
role in repair of naturally occurring DNA breaks (murine lymphocytes), 122, 366
ADP-ribosylation inhibitors
deoxyglucose uptake inhibition in cultured cells (3T3-L1, OK, UMR-106 cells), 123, 785
ADP-ribosyltransferase
cholera toxin, inhibition by MDL 12330A and chlorpromazine (rat liver), 120, 700
Adrenal gland
regional distribution of neuromedins B and C, comparison (rat), 124, 925
Adrenalin, see Epinephrine
α-Adrenergic receptors
response inhibition by 12-O-tetradecanoylphorbol-13-acetate (rabbit, rat), 125, 1103
α_1-Adrenergic receptors
and β_2-adrenergic receptors, coexpressed on cloned cells, characterization (Madin-Darby canine kidney), 118, 73
α_2-Adrenergic receptors
solubilization by zwitterionic detergent, preservation of agonist binding and sensitivity to GTP (bovine cerebral cortex), 119, 1116
subtypes, characterization by [^{3}H]yohimbine binding (human lymphocytes), 121, 1
ß-Adrenergic receptors
adenylate cyclase-coupled, identification in developing palate (mouse), 119, 193
agonist-induced internalization, mechanism (BC3H-1 cells), 124, 863
characterization in fresh tissue and

cell culture, comparison (bovine corneal epithelium), 121, 664
and muscarinic receptors, simultaneous assay with double isotope technique (bovine smooth muscle), 120, 665
phosphorylation, catecholamine and phorbol diester effects (duck erythrocytes), 121, 973
subtype binding properties, identification and comparison (human, rat left ventricle), 121, 346
$ß_1$-Adrenergic receptors
photoaffinity labeling, peptide heterogeneity, preparation procedure role (turkey erythrocytes), 119, 458
$ß_2$-Adrenergic receptors
and α_1-adrenergic receptors, coexpressed on cloned cells, characterization (Madin-Darby canine kidney), 118, 73
Adrenochrome
formation by cardiac sarcolemma (bovine), 120, 22
Adrenocorticotropic hormone (ACTH), see Adrenocorticotropin
Adrenocorticotropin
angiotensin-II receptor regulation in vitro (bovine adrenal glomerulosa cells), 121, 441
-induced protein mRNA cell-free translation (rat adrenal gland), 119, 975
steroidogenesis stimulation, lysine-rich protein role (rat adrenal cells), 118, 400
synthetic, and growth hormone: lipolytic activity in isolated rabbit adipocytes, comparison (human, ovine, porcine, rabbit), 122, 197
Adrenorphin
distribution, comparison with dynorphin[1-8] (rat brain), 120, 1030
Affinity chromatography
Ca^{2+}-dependent hydrophobic, calelectrin and calmodulin purification, comparison (bovine), 123, 100
heparin-Sepharose, separation of lipoprotein lipase and monoacylglycerol lipase (bovine brain), 122, 1241
with naltrexone derivative, opioid binding site solubilization (bovine, rat, toad cerebral membranes), 119, 624
Afibrinogenemia
congenital, fibrinogen gene analysis (human liver), 120, 376
Aflatoxin B_1
distribution and intracellular translocation (isolated rat hepatocytes), 122, 1
Aging effects
[^{3}H]nitrendipine binding displacement by tetrodotoxin (fetal murine spinal cord culture), 124, 979
microsomal lipid
composition, UDPglucuronosyltransferase role (rat neonate liver), 119, 29
fatty acid composition after long- and short-term cholesterol feeding (chick neonate liver), 124, 677
myelin basic protein-specific protein methylase-I levels in brain (dysmyelinating mutant, normal mice), 123, 468
uv-induced unscheduled DNA synthesis (rat hepatocytes), 118, 730
Aglycosyl
-IgG2, binding-fluorescence analysis with 8-anilinonaphthalene-1-sulfonic acid (human), 124, 605
Agrobacterium tumefaciens
crown gall transformation of tobacco callus cells after cocultivation, 123, 458
D-Alanine aminotransferase
enzyme-activated temperature-dependent inhibition by ß-cyano-D-alanine (Bacillus sphaericus), 122, 485
Albumin
long-term production by hepatocytes cocultured with epithelial cells (adult rat liver), 120, 311
serum, see Serum albumin
two-dimensional peptide mapping by polyacrylamide-gel electrophoresis with limited proteolysis in sodium dodecyl sulfate (mouse), 122, 932
Alcohol dehydrogenase
Cu-facilitated chemiluminescence (yeast), 125, 425
placental, ethanol metabolism (human) 119, 1047
Raman spectroscopy (equine liver), 122, 225
Alcohols
allylic, formation during monosubstituted olefin oxidation by rat hepatic microsomal cytochrome P-450 and heme models, 119, 319
chronic feeding, effect on lipid peroxidation, role in hydroxyl radical generation (rat hepatic microsomes), 118, 233
Aldehyde dehydrogenase
catalytic activity in liver (Asian individuals), 118, 97

Aldehyde dehydrogenase inhibitor
cyanamide conversion in vitro and in vivo, catalase role (rat), 122, 358
Aldehyde oxidase
cytosolic
-NADPH-cytochrome c reductase system, nicotinamide N-oxide reduction (rabbit hepatic microsomes), 125, 1117
role in
nicotinamide N-oxide reduction (rabbit liver), 120, 602
tertiary amine N-oxide reduction (mammalian liver), 121, 749
Aldehydes
formation during monosubstituted olefin oxidation by rat hepatic microsomal cytochrome P-450 and heme models, 119, 319
Aldolase, see Fructose-bisphosphate aldolase
Aldosterone
biosynthesis in reconstituted cytochrome P-450$_{11\beta}$ (bovine adrenocortical mitochondria), 119, 365
secretion
inhibition by atrial natriuretic factor-related peptides, intramolecular disulfide bond role (rat adrenal glomerulosa cells), 122, 171
regulation, metoclopramide-stimulated serum factor role (bovine adrenal glomerulosa cells), 119, 95
Aldosterone receptors
binding sites, identification of sulfhydryl groups (porcine renal cytosol), 124, 51
Alkaline phosphatase
1,25-dihydroxyvitamin D_3 effect (murine MC3T3-E1 osteoblastic cells), 119, 767
isozymes from large intestine, relationship with colon tumor and small intestine isozymes (Fischer 344 rat), 122, 740
parathyroid hormone effect in vitro (osteoblastic MC3T3 cells), 123, 894
1-Alkyl-2-acetyl-sn-glycerols
antihypertensive activity (hypertensive, normotensive rats), 118, 344
conversion to platelet-activating factor and related phospholipids by platelets (rabbit), 124, 156
1-O-Alkyl-2-acetyl-sn-glyceryl-3-phosphorylcholine
effect on Ca release from platelet microsomes (human), 120, 474
formation, and arachidonic acid freeing from ether-linked glyceryl-phosphorylcholine (rabbit platelets), 124, 637
O^6-Alkylguanine-DNA alkyltransferase
repair of methylated pyrimidines in poly(dT), comparison (Escherichia coli, rat liver), 123, 324
1-Alkyl-2-lyso-sn-glycero-3-phosphocholine:acetyl-CoA acetyltransferase
phosphorylation-dephosphorylation, role in platelet-activating factor synthesis regulation (rat splenic microsomes), 120, 834
Alloxan
-induced diabetes, glucose metabolism regulation, fructose 2,6-bisphosphate role (rat adrenal gland), 121, 8
Allylisopropylacetamide
-mediated cytochrome P-450 destruction, functional reconstitution in vitro by mesohemin (rat liver), 121, 95
and phenobarbital, induction of cytochrome P-450 de novo synthesis (cultured chick embryo hepatocytes), 125, 1096
Aluminum
binding to albumin and transferrin, quantitative analysis by chelex competitive binding assay (human serum), 125, 1020
-induced conformational changes in calmodulin, citrate effects (bovine brain), 119, 376
Alzheimer's disease
cerebrovascular amyloid protein, isolation and characterization (human), 120, 885
and Down's syndrome, cerebrovascular amyloid fibril protein: chemical relationship (human), 122, 1131
Amelogenin
isolation and amino acid sequence (bovine incisor enamel), 121, 592
Amide oxidase (copper-containing)
Cu-free form, preparation and substrate reaction stoichiometry (lentil seedings), 120, 242
Amide oxidase (flavin-containing)
1-methyl-4-phenyl-1,2,4,5-tetrahydropyridine metabolism (rat brain), 120, 574
type A, oxidation of and suicide inactivation by 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (bovine liver), 125, 831
type B
-monoclonal antibody complex, catalytically active, isolation from

hepatic mitochondria (human), 125, 748
oxidation of and suicide inactivation by 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (human placenta), 125, 831
Amide protons
exchange, proteinase inhibitor IIA α-helix and antiparallel ß-sheets, comparison (bovine seminal plasma), 122, 1174
Amines
biogenic, noncovalent complexes with diadenosine 5',5'''-P^1,P^4-tetraphosphate, 120, 1037
primary, transglutaminase inhibitor, effect on Shigella toxin activity and late antibody rescue (HeLa cells), 121, 69
Amino acid composition
Ca^{2+}-binding proteins (bovine liver), 119, 440
cell division-active protein (Escherichia coli), 118, 587
citrate lyase large acyl-carrier protein subunit (Escherichia coli), 122, 1253
cystatin (human), 118, 103
cytochrome b (Rhodopseudomonas sphaeroides R-26), 123, 1234
cytochrome c_1 (Rhodopseudomonas sphaeroides R-26), 118, 964
DNA-binding protein (Escherichia coli), 119, 1147
ß-galactoside-binding lectin (human placenta), 122, 938
glutathione S-transferase (human erythrocytes), 125, 1053
growth hormone-releasing factor C-terminal-deleted analogs (human), 123, 854
histone H1 subtypes (chicken erythrocyte chromatin), 122, 1136
H_2O_2-treated and native Fe-superoxide dismutase, comparison (Pseudomonas ovalis), 122, 635
human alternative complement pathway inhibitor (larval fall armyworm hemolymph), 122, 1426
HU-type DNA-binding proteins, comparison (Agrobacterium tumefaciens, Rhizobium japonicum, R. meliloti), 121, 471
microcin 7 (Escherichia coli), 119, 779; erratum, 121, 741
neurohypophysial hormones (Didelphis virginiana), 123, 306
nucleolar 19-kDa/pI 4.5 phosphoprotein (Novikoff hepatoma cells), 122, 47
post γ-globulin, human and murine, comparison, 122, 111
purified 4-(N-maleimidobenzyl)trimethylammonium peptide fraction, comparison with α-subunit cysteinyl residue-flanking sequences (Torpedo californica), 122, 602
synthetic atrial natriuretic peptides, role in tissue specificity (chick rectum, rabbit aorta, rat), 123, 338
water-soluble 33-kDa protein (spinach thylakoids), 122, 17
D-Amino-acid oxidase
analysis in Zellweger syndrome (human), 123, 1054
Amino acids
branched-chain, -stimulated protein synthesis, inhibition by tunicamycin or 2-deoxy-D-glucose (rat muscle), 125, 149
distribution in brain, d-amphetamine and ß-phenylethylamine effects (rat), 122, 143
in glycerol matrix, SIMS spectra, hydrophobicity effect, 123, 27
hydropathic, anti-complementarity, codon role, 121, 203
neurotransmitter, synaptosomal uptake, stimulation by insulin, role in neuromodulation (rat brain), 119, 1198
α-Amino acids
center, 1-aminocyclopropane-1-carboxylic acid, role in stereochemical course during biosynthesis (Lycopersicon esculentum), 121, 181
Amino acid sequence
amelogenin (bovine incisor enamel), 121, 592
amino-terminal
acrosin and proacrosin, comparison (boar sperm), 121, 884
DNA-binding protein (Escherichia coli), 119, 1147
epidermal growth factors I and II (murine saliva), 125, 218
melanoma antigens, variations (murine B16 cells), 121, 196
nonspecific phospholipid exchange protein (bovine liver), 120, 232
progastrin (human gastrinoma cells), 123, 404
pro-opiomelanocortin (bovine posterior pituitary), 125, 229
prosomatostatin (rat), 124, 450
prostate-specific antigen (human), 123, 482
protein from pancreatic juice (human), 125, 516
thyroglobulin 10K polypeptide (bovine), 119, 335
vitamin D_3 25-hydroxylation-catalyzing cytochrome P-450 (rat

hepatic microsomes), 121, 994
amyloid fibril protein, revision (familial amyloidotic polyneuropathy patient), 123, 921
aspartate aminotransferase and porcine cardiac cytoplasmic and mitochondrial isoenzymes, comparison (Escherichia coli), 122, 62
atrial natriuretic factor
major peptides (rat), 123, 444
peptide components (rat), 120, 981
polypeptides (rat), 121, 585
rat, 119, 524
α-atrial natriuretic factor (human), 118, 131
ß-atrial natriuretic factor (rat), 119, 933
atriopeptigen (rat), 121, 802
calcitonin and related peptide cDNA clones (human lung, medullary thyroid carcinoma cells), 123, 648
carboxy-terminal
fibronectin (human plasma), 120, 1015
glucose-6-phosphate dehydrogenase (human erythrocytes), 118, 332
thyroglobulin (bovine), 125, 961
cerebrovascular amyloid protein in Alzheimer's disease patients, 120, 885
Down's syndrome and Alzheimer's disease patients, 122, 1131
Clostridium botulinum neurotoxin type-A heavy and light chains, 119, 900
corticotropin-releasing factor
bovine hypothalamus, 122, 899
caprine hypothalamic median eminence tissues, 122, 1218
fluorescein 5'-isothiocyanate reactive site of Na^+,K^+- ATPase (ovine, rat kidney), 125, 767
ß-glucocerebrosidase cDNA clones from λ_{gt11} expression system (human), 123, 574
growth hormone-releasing factor from caprine and ovine hypothalamus, 125, 606
rat hypothalamus, 125, 1005
heat-stable enterotoxin (Yersinia enterocolitica), 125, 845
immunopurified cytochrome P-450 isozymes (guinea pig, mouse, rat), 123, 1201; addendum, 124, 675
low-molecular-weight prealbumin-related amyloid fibril protein (Japanese familial amyloidotic polyneuropathy patient), 125, 662
α-macroglobulin and C_3 chain of prostatic steroid-binding protein, homology (human, rat), 122, 662
neurokinin α and ß, 118, 405
neuromedin C (porcine spinal cord), 119, 14
neuromedin N (porcine spinal cord), 122, 542
neuropeptides M I and II by fast atom bombardment mass spectrometry (cockroach), 124, 350
plasmin-cleaved ß-casein (human), 125, 463
proenkephalin-derived opioid peptide (ovine), 118, 299
protein expressed in embryo and chemically-induced pancreatic B-cell tumor (rat), 124, 164
serum prealbumin variant (familial amyloidotic polyneuropathy patient), 122, 712
steroid 21-hydoxylase, determination with bovine enzyme cDNA (porcine), 125, 734
thiol proteinase inhibitor (rat epidermis), 121, 149
thyroxine-containing tryptic peptides in thyroglobulin (bovine, ovine, porcine), 118, 423
toxin VII (scorpion venom), 122, 1146
Amino acid starvation
effect on ribosomal protein synthesis (Escherichia coli), 118, 246
D-Amino acid transaminase, see D-Alanine aminotransferase
Amino acid transport
serum-dependent post-translational control by carrier availability (cultured human fetal fibroblasts), 120, 172
3-Aminobenzamide
effect on DNA repair and deoxynucleoside triphosphate pools (human fibroblasts), 124, 457
2-Aminobicyclo[2.1.1.]hexane-2-carboxylic acid
effect on S-adenosylmethionine formation, cell growth, leucine incorporation, and polyamine biosynthesis (murine L1210 leukemia cells), 122, 350
γ-Aminobutyric acid
-benzodiazepin receptor complex convulsant/barbiturate binding activity solubilization (rat cerebral membranes), 119, 530
[^{35}S]-tert-butylbicyclophosphorothionate-labeled, solubilization and anionic regulation (rat brain), 120, 692
carrier-mediated translocation into mitochondria (rat brain), 121, 770
-dependent regulation of chloride ionophore by benzodiazepines (rat cortical membranes), 123, 1130
levels in uterine tissues (rabbit,

rat), 125, 18
γ-Aminobutyric acid receptors
binding site identification in uterine tissues (rabbit, rat), 125, 18
p-Aminoclonidine
binding to α_2-adrenergic receptors, preservation after receptor solubilization by zwitterionic detergent (bovine cerebral cortex), 119, 1116
1-Aminocyclopropane-1-carboxylic acid
biosynthesis, stereochemical course, sulfonium pole and amino acid center roles (Lycopersicon esculentum), 121, 181
Aminoglycosides
antibiotics, effects on DNA elongation and synthesis initiation (Escherichia coli), 122, 460
Amino groups
substitution in adenosine, effect on poly(d2NH_2A-dT) B to Z transition, 118, 848
N-(6-Aminohexyl)-5-chloro-1-naphthalene sulfonamide
inhibition of ionophore A23187-induced platelet-activating factor formation (human neutrophils), 118, 629
reduction of phorbol ester receptors (murine skin), 124, 726
α-Aminoisobutyrate
uptake by term placenta explants, effect of basic somatomedin receptor binding (human), 122, 583
α-Aminoketone
moiety of ketomethyldipeptides, chemical modification, effect on angiotensin-converting enzyme inhibition, 124, 148
L-2-Amino-4-methoxy-cis-but-3-enoic acid
effect on S-adenosylmethionine formation, cell growth, leucine incorporation, and polyamine biosynthesis (murine L1210 leukemia cells), 122, 350
Aminopyrine
accumulation, 12-O-tetradecanoylphorbol-13-acetate effect (isolated rat parietal cells), 121, 566
[1,6-α-Aminosuberic acid,3-(p-azidophenylalanine),8-arginine]vasopressin
photoaffinity label for vasopressin receptors, evaluation (bovine kidney), 122, 974
Ammonia
acute intoxication, L-carnitine effect on urea synthesis (mouse), 120, 726
effect on synaptosomal membranes (murine brain), 119, 516
potentiation of ureogenesis inhibition by pent-4-enoic acid (rat hepatocytes), 118, 47
Ammonium
excess in culture with phosphate limitation, nitrate reductase derepression (Cyanidium caldarium), 119, 259
short-term inhibition of nitrogenase (Azotobacter chroococcum), 123, 431
AMP deaminase
activation by diadenosine tetraphosphate (rat muscle), 121, 155
erythrocyte, complete deficiency, genetic and biochemical analysis (human), 122, 1344
d-Amphetamine
effect on amino acid distribution (rat brain), 122, 143
Amphotericin B
selectivity, enhancement by antibiotic incorporation into gel state vesicles: circular dichroism and permeability analysis, 125, 360
Amylase
release, carbamylcholine-stimulated, inhibition by Ca^{2+} chelators (rat pancreatic acini), 119, 876
α-Amylase
heatstable, cloning, comparison with other cloned α-amylases (Bacillus subtilis), 122, 175
maltooligosaccharide hydrolysis, subsite binding kinetics (porcine pancreas), 122, 75
Amyloid
proteins, cerebrovascular
in Alzheimer's disease patients and Down's syndrome patients, chemical relationship, 122, 1131
isolation and characterization, 120, 885
Amyotropic lateral sclerosis
sialosylglobotetraosylceramide marker (human), 118, 82
Anacystis nidulans
O_2-pulsed cells, proton translocation, inhibition by dicyclohexylcarbodiimide and vanadate, 123, 358
Analbuminemia
protein-bound Zn distribution in serum (rat), 125, 45
Anaphylatoxins
$C5a_{desArg}$, leukotriene C_4- and D_4-mediated spasmogenic activity on lung parenchymal strips, cyclooxygenase inhibitor effects, comparison (guinea pig), 125, 852

Androgen receptors
complex in vitro activation by heat and KCl (rat liver), 120, 953
phosphorylation by nuclear cAMP-dependent protein kinase (rat ventral prostate), 123, 778
Androgens, see also specific androgens
-binding plasma proteins, immunohistochemical detection (human mammary carcinoma cells), 118, 488
dependence of nuclear membrane peptides (rat ventral prostate), 125, 469
5α-Androstan-3α,17β-diol
dihydrotestosterone-converted, ethanol effect (rat Leydig cells), 121, 558
5α-Androstan-3β,17β-diol
dihydrotestosterone-converted, ethanol effect (rat Leydig cells), 121, 558
Anesthesia
pentobarbital-induced, effect on fructose 2,6-bisphosphate levels (rat liver), 122, 1154
Anesthetics
local, multiple binding sites in reconstituted acetylcholine membranes (Torpedo californica), 123, 862
Angiotensin I
peptide aldehyde derivatives, human renin inhibitors, 118, 929
Angiotensin II
and extracellular K^+, effects on cytosolic Ca^{2+} and steroidogenesis, comparison (rat adrenal glomerulosa cells), 123, 810
histidine and phenylalanine ring stacking, interaction, role in receptor activation, NMR, 122, 434
-induced steroidogenesis, effect on polyphosphatidylinositide compounds (bovine adrenocortical fasciculata cells), 124, 393
-stimulated glycogenolysis and ureogenesis, phorbol ester effects (rat hepatocytes), 119, 1128
Angiotensin-converting enzyme, see Dipeptidyl carboxypeptidase
Angiotensinogen
analogs, renin-inhibitory, conformational analysis, 122, 700
Angiotensin II receptors
binding site structure, characterization with diaminoalkanes (bovine adrenal cortex), 123, 452
identification in micrococcal endonuclease-generated chromatin fragments (rat hepatic nuclei), 119, 220
regulation in vitro by adrenocorticotropin (bovine adrenal glomerulosa cells), 121, 441
Angiotensins
intracellular formation, renin and angiotensin-converting enzyme identification in Leydig cells (rat testes), 122, 1337
8-Anilinonaphthalene-1-sulfonic acid
binding-fluorescence analysis of IgG2 and acid and aglycosyl conformers (human), 124, 605
Anions
effect on phosphoglycerate mutase (rabbit muscle), 121, 834
Antibiotics
aminoglycoside, effects on DNA elongation and synthesis initiation (Escherichia coli), 122, 460
X-537A, see Lasalocid A
Antibodies, see also Antiserum
acetylcholine receptor α-subunit, induction by synthetic peptide from receptor sequence (Torpedo californica), 121, 673
actin, -stimulated DNA synthesis and protein phosphorylation, effects of prostaglandins E_1 and $F_{2\alpha}$ (murine L cells), 124, 23
auto-, myositis-specific, histidyl-tRNA synthetase inhibition (rat liver), 120, 15
caprine acetylcholine receptor, cation flux inhibition (Torpedo californica), 120, 368
chick oviduct progesterone receptor B-subunit, purification and characterization (rabbit), 119, 433
cytochrome c oxidase subunit-III mono- and divalent fragments, vesicle proton pumping inhibition, mechanism (goat, rabbit), 120, 52
formation, L-trans-epoxysuccinyl-leucylamido (4-guanidino) butane effect (mouse), 118, 117; erratum, 119, 431
insulin receptor, inhibition of insulin-induced progesterone biosynthesis (cultured porcine granulosa cells), 120, 144
lamin B, inhibition of [^{3}H]uridine triphosphate incorporation (permeabilized murine L cells), 120, 256
monoclonal
extracellular and intracellular C9, inhibition of complement-induced [^{14}C]sucrose release (human erythrocyte ghosts), 118, 616
f(ab)' fragment, covalently linked to diphtheria toxin A chain, immunotoxin for Acanthamoeba castellanii, 125, 25

F_1-ATPase and oligomycin sensitivity-conferring protein, tools for conserved and essential epitope recognition (porcine cardiac mitochondria), 123, 254
glucose-6-phosphate dehydrogenase, cross-reactive material identification (rat hepatoma cell lines), 118, 854
HNK-1, reaction with human peripheral nerve ganglioside, 122, 1206
phenobarbital-inducible cytochrome P-450, preparation and characterization (rat hepatic microsomes), 119, 744
small nuclear RNA, reactive polypeptide subcellular location (HeLa cells), 120, 81
Sm and polyclonal RNP, reaction with small nuclear ribonucleoproteins: polypeptide pattern, comparison (human), 123, 345
plasma membrane 3,3',5-triiodo-L-thyronine-binding protein, characterization and cross-species immunoreactivity (rat pituitary GH_3 cells), 124, 956
polyclonal
characterization of interferon-mediated protein kinase (HeLa cells), 125, 1
small nuclear ribonucleoprotein particle, reactive polypeptide subcellular location (HeLa cells), 120, 81
Rh_o(D), binding to erythrocyte membrane, band-3 proteolysis enhancement (human), 124, 437
rubella, firefly luciferin-enhanced luminescent horseradish peroxidase immunoassay (human), 119, 481
Shigella toxin late rescue, primary amine and lysosomotropic agent effects (HeLa cells), 121, 69
site-specific, erbB oncogene product, epidermal growth factor receptor immunoprecipitation (chicken embryo fibroblasts), 123, 797
surface membrane immunoglobulins, pronase effect on immature B-lymphocyte nonresponsiveness (mouse), 119, 1
synthesis by spleen cells, effect of human peripheral blood mononuclear cell mRNA-encoded helper activity (Balb/c, C3H/He mice), 119, 868
synthetic acetylcholine receptor peptides, receptor structural characterization (Torpedo californica), 122, 1225
thrombospondin 23-kDa heparin-binding fragment, platelet aggregation inhibition (bovine), 124, 290
Antibody response
B cells to sheep erythrocytes, restoration and stimulation by interleukins and muramyl dipeptide (mouse), 125, 431
enhancement by bovine and human thyrotropin in vitro (murine spleen), 125, 30
Antiestrogens, see specific antiestrogens
Antigens
melanoma, amino-terminal variations (murine B16 cells), 121, 196
neo-, polymerized C9, monoclonal antibodies, inhibition of macromolecule diffusion through complement channels (human erythrocytes), 125, 1013
prostate-specific, proteolytic activity (human), 123, 482
proteins, nitrocellulose-blotted, visualization by immuno-gold staining, 121, 284
Rh_o(D), antibody binding to erythrocyte membrane, band-3 proteolysis enhancement (human), 124, 437
-stimulated mast cells, polyphosphoinositide metabolism (rat peritoneum), 123, 875
Antioxidants
synthetic, effect on NADPH-induced chemiluminescence (rat hepatic microsomes), 125, 1033
Antiserum, see also Antibodies
apolipoprotein CII and CIII, effect on very-low-density lipoprotein lipolysis in vitro (human), 121, 946
α-atrial natriuretic polypeptides, production and radioimmunoassay development (human, rat), 124, 815
murine L-cell, palmitic acid N-acylation enhancement in sphingomyelin (rabbit), 121, 605
synthetic proenkephalin peptide, high-molecular-weight enkephalin-containing protein recognition (bovine adrenal medulla), 120, 650
Aphidicolin
and deoxycoformycin, in vitro induction of DNA breaks and cell death (human lymphocytes), 120, 959
Apolipoprotein A-I
gene localization on chromosome 11 (human), 118, 934
Apolipoprotein A-II
cDNA nucleotide sequence and structural gene localization on chromosome 1 (human), 123, 1

gene localization on chromosome 1 (human), 122, 877; 125, 299
precursor, cDNA clone isolation and characterization (human), 120, 734
Apolipoprotein B
major form B-100, identification in mesenteric chyle (rat), 123, 1149
Apolipoprotein C-I
gene localization on chromosome 19 (human), 125, 299
Apolipoprotein C-II
antiserum, effect on very-low-density lipoprotein lipolysis in vitro (human), 121, 946
gene
analysis in ApoC-II-deficient patients, 124, 308
localization on chromosome 19 (human), 122, 687
Apolipoprotein C-III
antiserum, effect on very-low-density lipoprotein lipolysis in vitro (human), 121, 946
gene localization on chromosome 11 (human), 118, 934
Apolipoprotein E
-free high-density lipoprotein, binding to cultured endothelial cells, characterization (human), 122, 785
synthesis by recombinant bacteriophage-infected Escherichia coli (rat), 119, 657
Arachidonic acid
binding to α-fetoprotein, retinoid and bilirubin interactions (human), 119, 1122
biosynthesis from linoleic acid, capacity of epidermal microsomal preparations (guinea pig, rat), 124, 784
freeing, and 1-O-alkyl-2-acetyl-sn-glceryl-3-phosphorylcholine formation from ether-linked glyceryl-phosphorylcholine (rabbit platelets), 124, 637
incorporation in cholesteryl esters, chronic regulation by thyrotropin (thyroid cell culture), 119, 537
metabolism
by cultured malignant keratinocytes, stimulation by melittin (human epidermis), 124, 303
by cytochrome P-450-dependent mixed-function oxidase (canine neutrophils), 123, 581
inhibitors, effect on thromboplastin activity (human monocytes), 119, 179
and release by exogenous leukotriene B_4-stimulated neutrophils (human), 122, 535
oxidation inhibitors, effect on Ca-dependent cell aggregation (Microciona prolifera), 121, 863
with prostaglandin H synthase, 13-cis-retinoic acid cooxidation (ram seminal vesicle microsomes), 124, 430
trihydroxytetraene formation and structure (human leukocytes), 118, 943
Arachidoyl-CoA
elongation, stereospecific incorporation of hydrogens from NADPH (swine cerebral microsomes), 124, 322
Arene oxides
and azaarene oxides, kinetic and stereochemical recognition by glutathione transferase isozymes A_2 and C_2, comparison (rat liver), 121, 980
Arginine residues
dynorphin A, cleavage, peptidase assay (Aplysia californica atrial gland), 119, 415; erratum, 124, 994
glutathione reductase, recognition site for $NADP^+$ 2'-phosphate (yeast), 124, 572
Arginine vasopressin
effect on atrial natriuretic factor release in vitro (rat heart), 124, 443
iodinated, agonists and antagonists: synthesis, purification, characterization, and effect on receptor binding affinity, 121, 878
purification and characterization, analysis of gene evolution (Didelphis virginiana), 123, 306
Aromatic groups
stereo-orientation in enkephalins, role in opiate receptor recognition (rat cerebral membranes), 121, 966
Arsenite
resistance, production by plasmid-encoded arsenite pump (Escherichia coli), 124, 760
Ascochlorin
derivative AS-6, effect on structural and functional abnormalities in adipocyte plasma membrane (db/db mice), 125, 64
Asparagine
codons, basal-level misreading, analysis (Escherichia coli), 121, 487
Aspartate aminotransferase
L-aspartate oxidase redesignation, cofactor identification as α-ketoglutarate (cotton callus

cells), 123, 836
and porcine cardiac cytoplasmic and mitochondrial isoenzymes, amino acid sequences, comparison (Escherichia coli), 122, 62
Aspartate kinase II
-homoserine dehydrogenase II polypeptide chain, triglobular structure (Escherichia coli), 123, 16
D-Aspartate oxidase
substrates, thiazolidine-2-carboxylate derivatives formed from L-cysteine or L-cysteinylglycine and glyoxylate (bovine kidney), 125, 1039
L-Aspartate oxidase
redesignation as glutamic-oxaloacetic transaminase, cofactor identification as α-ketoglutarate (cotton callus cells), 123, 836
Aspartokinase II, see Aspartate kinase II
Aspartyl residues
ATP synthase subunit c, N,N'-dicyclohexylcarbodiimide-reactive, effect on F_O conformation (Escherichia coli), 120, 527
Aspirin
effect on thromboplastin activity (human monocytes), 119, 179
thromboxane production inhibition, recovery in vitro (guinea pig megakaryocytes), 119, 982
Ataxia telangiectasia
lymphoblastoid cell culture, cellular actin levels, regulation by cell density (human), 119, 561
ATP (adenosine 5'-triphosphate)
-binding site
Ca^{2+}-ATPase, Mg^{2+}-binding subsite identification (rabbit skeletal muscle sarcoplasmic reticulum), 124, 183
luciferase, kinetic distinction (firefly), 123, 764
-dependent
Ca^{2+} transport in plasma membranes, identification (bovine spermatozoa), 122, 479
catalytic phosphorylation, requirement in ADP-mediated pyruvate,P_i dikinase inactivation (Zea mays), 118, 65
Na^+ pump, and myocardial sarcolemmal creatine kinase, relationship (canine, guinea pig), 124, 696
-driven reverse electron transfer from succinate to acetoacetate, thermodynamics (rat hepatic mitochondria), 125, 8
hepatic phosphofructokinase activation (fed, starved rats), 118, 567
intracellular concentration, effects of doxorubicin, epirubicin, and mitoxantrone, comparison (rat heart), 125, 954
levels in isolated limb bud cells, benzamide effect (chicken), 121, 710
-stimulated factor, enhancement of activated receptor-glucocorticoid complex binding to nuclei (rat hepatic cytosol), 121, 940
-ubiquitin proteolytic system, repression of protease inhibitor (rabbit reticulocyte extract), 122, 116
ATPase
Ca^{2+}-
ATP-binding site, Mg^{2+}-binding subsite identification (rabbit skeletal muscle sarcoplasmic reticulum), 124, 183
identification in plasma membranes (bovine spermatozoa), 122, 479
stimulation by lipids of phosphatidylinositol cycle (rat cerebral synaptic, erythrocyte plasma membranes), 125, 908
Ca-pumping, sarcoplasmic reticulum, kinetic and structural properties (bovine aortic, cardiac, skeletal smooth muscles), 124, 797
F_1-
expression, K^+ and pH effects (Streptococcus faecalis membranes), 122, 151
structural asymmetry induction by dicyclohexylcarbodiimide (Escherichia coli), 121, 331
ß-subunit, lysine residue identification with 7-chloro-4-nitro-[^{14}C]benzofurazan (thermophilic bacterium PS3), 123, 1040
α- and ß-subunits, monoclonal antibody preparation: tool for conserved and essential epitope recognition (porcine cardiac mitochondria), 123, 254
Mg^{2+}-, identification in plasma membranes (bovine spermatozoa), 122, 479
modulation by cAMP (rat kidney), 120, 619
Na^+,K^+-
catalytic subunit molecular forms α and α(+), development and regional distribution (rat brain), 121, 208
fluorescein 5'-isothiocyanate reactive site, amino acid sequence (ovine, rat kidney), 125, 767
identification in plasma membranes

(bovine spermatozoa), 122, 479
interaction kinetics with Cibacron Blue F3GA, nucleotide fold probe (guinea pig, human), 119, 423
physicochemical interactions with spin-labeled ouabain, analysis (canine kidney), 124, 210
regulation by inorganic phosphate, pH dependence and physiological implications (canine renal medulla), 123, 438
Na^+,K^+,Mg^+-, activity in erythrocytes (Ornithorhynchus anatinus, Tachyglossus aculeatus), 119, 1161
plasma membrane, ADP regulatory effects (corn roots), 122, 1367
proton-pumping, purification from plasma membranes (oat roots), 121, 735
ATP-citrate lyase
phosphothreonine, dephosphorylation, insulin and isoproterenol effects (rat epididymal fat pads), 122, 1047
ATP synthase
subunit c, N,N'-dicyclohexylcarbodiimide-reactive aspartyl residue, effect on F_O conformation (Escherichia coli), 120, 527
Atrial natriuretic factor
amino acid sequence and disulfide linkage requirement (rat), 119, 524
conversion from high- to low-molecular-weight form (rat), 119, 282
detection in plasma (rat), 125, 315
genomic DNA clone, isolation (human), 125, 797
levels in atria, hypothalamus, and plasma: effect of Na loading, radioimmunoassay (rat), 124, 663
native and synthetic
effect on cGMP (rat), 123, 515
vasoactive effects, comparison (rabbit), 119, 685
peptides
aldosterone secretion inhibition, intramolecular disulfide bond role (rat adrenal glomerulosa cells), 122, 171
component isolation and sequence determination (rat), 120, 981
major: isolation, structure, and biological activities (rat), 123, 444
multiple forms, isolation and amino acid sequence (rat), 121, 585
natriuretic activity in vivo and smooth muscle relaxant activity in vitro (chick rectum, rat), 125, 938
synthesis and analysis of structural factors in tissue specificity (chick rectum, rabbit aorta, rat), 123, 338
release, adrenalin and arginine vasopressin effects in vitro (rat), 124, 443
synthetic
adenylate cyclase inhibition (rat aortic particles; mesenteric, renal arteries), 121, 855
direct radioimmunoassay (rat), 122, 593
α-Atrial natriuretic factor
polypeptides, antiserum production and radioimmunoassay development (human, rat), 124, 815
ß-Atrial natriuretic factor
purification and amino acid sequence (rat), 119, 933
Atrial natriuretic factor receptors
identification in cultured smooth muscle cells, effect on intracellular cGMP levels (rat), 125, 562
Atriopeptigens
purification and amino acid sequence (rat), 121, 802
Atriopeptins
isolation and characterization (rat), 120, 333
release and characterization (perfused rabbit heart), 124, 711
Atropine
and endogenous peptide in pancreatic juice, trypsinogen secretion stimulation, exogenous trypsin inhibitor action mode, comparison (rat duodenum), 118, 532
Avian sarcoma virus
src gene product $pp60^{v\text{-}src}$, mitogenic activity (rat kidney), 123, 411
Axolemma
-stimulated Schwann cell proliferation, mediation, Ca and cAMP roles (rat), 122, 373
AY 9944
effect on low-density lipoprotein metabolism (human fibroblast culture), 122, 955
Azaarene oxides
and arene oxides, kinetic and stereochemical recognition by glutathione transferase isozymes A_2 and C_2, comparison (rat liver), 121, 980
Azacitidine
demethylation of procollagen type-I genes, effect on expression (human SVWI-38 cells), 124, 236
and other S-phase inhibitors, effect

on hypoxanthine guanine phosphoribosyltransferase gene expression, comparison (mouse), 125, 812
5-Azacytidine, see Azacitidine
Azapeptides
dipeptidyl carboxypeptidase inhibition, 122, 791
Azetidine-2-carboxylic acid
incorporation by ovalbumin, effect on denaturation (hen), 118, 481
4-Azidoretinol
synthesis and use in photoaffinity labeling of cellular retinol-binding protein (vitamin A-deficient chick liver), 122, 577

B

Bacteria, see also specific bacteria
anaerobic, nitropolycyclic aromatic hydrocarbon metabolism (human intestine), 123, 262
nitrogen-fixing, rice embryo lectin binding (rice rhizosphere), 119, 549
Bacteriophages
λ, recombinant, -infected Escherichia coli
rat apolipoprotein-E synthesis, 119, 657
rat transferrin synthesis, 122, 960
λ_{gt11}, expression system, isolation of cDNA clones for human ß-glucocerebrosidase, 123, 574; erratum, 125, 843
Bacteriorhodopsin
blue-species and O_{650} photocycle intermediate, effects of purple membrane carboxyl modifications (Halobacterium halobium), 122, 1110
crosslinking by specific carboxyl modifications and proteolytic cleavage, analysis (Halobacterium halobium), 124, 565
and halorhodopsin, amplitudes of flash-induced absorption changes, comparison, 122, 91
Barbiturates
binding activity solubilization on γ-aminobutyric acid-benzodiazepine receptor complex (rat cerebral membranes), 119, 530
Bay k 8644
activation of voltage-dependent Ca^{2+} channels (rat heart), 125, 405
effect on
catecholamine release evoked by Ca reintroduction (feline adrenal gland), 120, 851
isolated and intact cardiac preparations, pharmacological and radioligand binding correlations (canine, guinea pig, porcine, rat), 125, 387
enhancement of Ca^{2+} uptake and insulin release by pancreatic B cells (rat), 123, 1062
^3H-labeled, binding to microsomal and synaptosomal membranes (guinea pig brain, rabbit heart), 121, 317
prolactin secretion stimulation (rat pituitary GH_4C_1 cells), 122, 991
Benzamide
effect on
ATP and NAD levels and cell proliferation (isolated chicken limb bud cells), 121, 710
hepatic enzymes in vivo (rat), 122, 770
Benzene
catalase activity increase after modification with polyethylene glycol (bovine liver), 125, 761
horseradish peroxidase solubilization and activation by 2,4-bis(O-methoxypolyethylene glycol)-6-chloro-s-triazine-induced modification, 121, 261
Benzodiazepine
-γ-aminobutyric acid receptor complex
convulsant-barbiturate binding activity solubilization (rat cerebral membranes), 119, 530
[^{35}S]-tert-butylbicyclophosphorothionate-labeled, solubilization and anionic regulation (rat brain), 120, 692
anticonvulsant action: γ-aminobutyric acid-dependent regulation of chloride ionophore (rat cortical membranes), 123, 1130
Benzofuran receptors
microsomal, selective ligand: centchroman cis isomer (rat), 125, 346
Nα-Benzoyl-l-arginine ethyl ester
inhibition of insulin-stimulated insulin receptor subunit phosphorylation (human placenta, rat adipocytes), 119, 465
Benzphetamine
cytochrome P-450-binding site location in membrane lipids (rabbit hepatic microsomes), 118, 916
Benzyl viologen
photosynthetic sulfide oxidation inhibition (Chromatium vinosum), 121, 755
Bergapten
binding to low-density lipoproteins (human serum), 120, 670

Bernard-Soulier syndrome
glycoprotein expression on platelets (human), 123, 1091
Betaine-homocysteine methyltransferase
inactivation by S-adenosylmethionine and S-adenosylethionine (rat liver), 118, 14
Bilirubin
interaction in arachidonic acid binding to α-fetoprotein (human), 119, 1122
Biliverdin
role in biliverdin reductase, heme metabolism, and heme oxygenase regulation (rat liver), 122, 40
Biliverdin reductase
molecular form conversion, converting enzyme isolation and characterization (rat liver), 121, 249
regulation, biliverdin role (rat liver), 122, 40
Biotin
-labeled DNA, binding site identification on surface membranes (human neutrophils), 122, 1034
Biphenyl, see Diphenyl
1,2-Bis(2-aminophenoxy) ethane-NNN'-N'-tetracetic acid
inhibition of carbamylcholine-stimulated amylase release (rat pancreatic acini), 119, 876
Bis(2-ethylhexyl) phthalate
laurate ω-hydroxylase activation (rat hepatic microsomes), 121, 304
2,4-Bis(O-methoxypolyethylene glycol)-6-chloro-s-triazine
-induced horseradish peroxidase modification, enzyme solubilization and activation in benzene, 121, 261
2,3-Bisphosphoglycerate
inhibition of phosphoenolpyruvate transport across erythrocyte membrane (human), 122, 609
Bisphosphoglyceromutase
mRNA, cell-free translation (human), 120, 441
-phosphoglyceromutase in vitro hybridization, partial characterization (human erythrocytes), 120, 715
Bis(tri-N-butyltin)oxide
heme oxygenase induction (rat intestine), 119, 1022
Bityrosine
production and identification in horseradish peroxidase-H_2O_2-tyrosine system, 125, 916
Bleomycin
and ethidium bromide, synergistic interactions on cellular DNA and growth inhibition (murine L1210 leukemia cells), 120, 156
Blood groups
A, subgroup A_1-specific glycolipid with globo-series structure: chemical basis for A_1 and A_2 distribution (human erythrocytes), 124, 523
Bolton-Hunter reagent
-substance P conjugate, ^{125}I-labeled, binding and internalization by pancreatic acinar cells (guinea pig), 124, 578
Bombesin
reduction of epidermal growth factor receptor affinity, role of phosphoinositol breakdown and protein kinase-C activation (Swiss 3T3 cells), 123, 377
Bone
inductive extracellular matrix proteins
dependence on vitamin D (rat), 124, 829
mineralized and demineralized, distribution (rat), 119, 949
marrow, and lymphocytes, normal and leukemic, tyrosine phosphorylation, comparison (human), 124, 766
resorption, cysteine proteinase role (murine embryonic calvaria), 125, 441
Borate
-serine complex, effect on [^3H]-leukotriene C_4 and [^3H]leukotriene D_4 binding inhibition by leukotrienes C_4, D_4, and E_4 (guinea pig brain, lung homogenates), 119, 612
Bradykinin
stimulation of inositol phosphate release from fibroblasts (human), 123, 663
Brain
cholecystokinin receptor size and subunit structure, comparison with pancreatic receptors (mouse), 124, 497
with normal blood perfusion and bloodless perfluorocarbon substitution, ^{31}P NMR in vivo (rat), 119, 913
regional distribution of
metorphamide (guinea pig, rat), 122, 892
neuromedins B and C, comparison (rat), 124, 925
substance P and neuromedins K and L (rat), 124, 731
Breast cancer
genome sequence in lymphocytes, comparison with sequence in tumor cells from mouse mammary tumor virus (human), 118, 324

MCF-7 cells, α-fetoprotein receptor identification (human), 122, 1322
N-Bromoacetyl-3,3',5-triiodothyronine
iodothyronine deiodinase inactivation and affinity labeling (rat liver), 124, 475
2-Bromoacrolein
metabolic formation from tris(2,3-dibromopropyl) phosphate, mutagenicity (rat hepatic microsomes), 121, 213
Bromocriptine
chronic treatment, effect on dopamine receptors (rat pituitary, estradiol-induced pituitary tumors), 123, 312
4-Bromophenacyl bromide
effect on thromboplastin activity (human monocytes), 119, 179
Bufuralol
1'-hydroxylation, stereoselectivity: characterization of cytochrome P-450 debrisoquine-sparteine type genetic polymorphism (human liver), 125, 374
L-Buthionine sulfoximine
glutathione synthesis inhibition in vitro (rat hepatic cytosol, mitochondria), 123, 1116
L-Buthionine-S-R-sulfoximine
glutathione depletion in lymphoma cells, effect on proliferation in tissue culture (mouse), 123, 626
tert-Butyl-bicyclophosphorothionate
^{35}S-labeled
binding activity solubilization on γ-aminobutyric acid-benzodiazepine receptor complex (rat cerebral membranes), 119, 530
-labeled sedative-convulsant receptors, solubilization and anionic regulation (rat brain), 120, 692
tert-Butylhydroperoxide
with tetraphenylporphyrinatoiron(III)-chloride, diarylpropane-1,3-diol C-C bond cleavage, 122, 1247
2(3)-tert-Butyl-4-hydroxyanisole
dietary, glutathione S-transferase isozyme induction (murine intestine), 119, 1015

C

Cadaverine
reversal of Mycoplasma dispar growth inhibition by DL-α-difluoromethyllysine, 125, 205
Cadmium ion
alteration of queuine-type tRNA, detection by reverse-phase 5 chromatography (Drosophila melanogaster), 123, 1027
binding to Cd,Zn-metallothionein, spectroscopy and protein concentration estimation by Cd saturation methods (rat liver), 121, 1006
ornithine decarboxylase induction (rat kidney, liver, testes), 125, 882
Caffeic acid
glutathione S-transferase inhibition in vitro (rat liver), 120, 427
Caffeine
effect on 1,25-dihydroxyvitamin D_3 production, comparison with theophylline and dibutyryl cAMP (chick renal tubules), 121, 355
Calcelectrins
purification by Ca^{2+}-dependent hydrophobic affinity chromatography, comparison with calmodulin (bovine), 123, 100
Calcimedins
level changes during cardiomyopathy (UM-X7.1 hamster), 121, 915
Calcineurin
-associated phosphotyrosyl-protein phosphatase activity, characterization (bovine brain), 121, 141
Calcitonin
and calmodulin, in vitro interactions (human, salmon), 118, 648
effect on human sperm motility in vitro (human, salmon), 125, 199
gene localization on chromosome-11 short arm (human), 120, 493
and related peptide, gene structure and expression (human lung, medullary thyroid carcinoma cells), 123, 648
release from C cells, stimulation by growth hormone-releasing factor (rat), 123, 497
selective activation of cAMP-dependent protein kinase (human lung cancer cells), 122, 1040
Calcitriol
inhibition of dimethyl sulfoxide-induced Friend erythroleukemia cell differentiation, 119, 807
Calcium
antagonists, photosystem-II oxygen evolution inhibition (stroma-free spinach thylakoids), 121, 626
-binding proteins
identification and characterization (bovine liver), 119, 440
levels in skin, vitamin D effect (rat), 123, 230
quinate:NAD^+ oxidoreductase regulatory subunit, characterization (dark-grown carrot cells), 125, 774

vitamin D-dependent, identification in intestinal cell cytosol (normal, X-linked hypophosphatemic mice), 119, 850
-calmodulin binding kinetics, stopped-flow fluorescence (bovine testes), 120, 185
channel
activator BAY K 8644, binding to microsomal and synaptosomal membranes (guinea pig brain, rabbit heart), 121, 317
site in myocardial membranes,[^{3}H]-nitrendipine binding, thioridazine diltiazem-like effect (rat), 121, 657
subunit-comigratory 42-kDa membrane protein, identification and isoproterenol- and nitrendipine-induced phosphorylation (canine heart), 121, 890
voltage-dependent
activation by dihydropyridine derivatives (rat heart), 125, 405
dihydropyridine receptor purification with probe (+)[^{3}H]-PN 200-110 (rabbit skeletal muscle transverse tubules), 122, 1357
compartments and fluxes in temperature-sensitive Rous sarcoma virus-transformed cells, effect of src gene product (Fisher rat cells), 125, 337
cytosolic
decrease, relationship to high extracellular K^+ stimulation of parathyroid hormone release (bovine), 123, 684
and steroidogenesis, angiotensin II and extracellular K^+ effects (rat adrenal glomerulosa cells), 123, 810
extracellular, role in hepatocyte injury prevention (rat), 121, 102
ß-glucuronidase stimulation (rat hepatic lysosomes, microsomes), 121, 987
-induced thyrotropin secretion in vitro, phorbol ester effects (rat pituitary cells), 125, 353
intracellular
elevation by ionomycin, effect on phospholipases A and C (human platelets), 123, 393
free
chemotactic factor-induced increase, inhibition by pertussis toxin: role of G protein (rabbit), 124, 644
in isolated ventricular myocytes at rest and during K^+-depolarization, measurement by quin-2 fluorescence (rat), 122, 1012
mitogen- and melittin-stimulated increase (human fibroblasts), 119, 69
increase in ventral photoreceptors, induction by inositol-trisphosphate (Limulus), 125, 1137
regulation by cyclic AMP, adenylate cyclase stimulator-inhibitor antagonism (human platelets), 120, 579
release, inositol 1,4,5-triphosphate effect (porcine coronary artery), 120, 481
role in cholecystokinin- and insulin-regulated insulin-like growth factor-II binding to pancreatic receptors (diabetic mouse), 119, 359
with ionophore A23187, inhibition of volume- and thiol-stimulated Cl-dependent K^+ transport (ovine erythrocytes), 125, 790
and Mg^{2+}-induced conformational changes in S-100a protein, subnanosecond-pulse fluorometric analysis (bovine brain), 123, 959
mobilization
and cGMP synthesis, carbachol-, histamine-, and prostaglandin E_1-mediated, correlation (neuroblastoma cells), 122, 333
by prostaglandin $F_{2\alpha}$ and vasopressin, Na^+ influx independence (quiescent Swiss 3T3 cells), 123, 803
and protein kinase-C activation, synergistic role in histamine release from mast cells (rat peritoneum), 121, 573
or phorbol ester with phospholipid, requirement for synthetic peptide phosphorylation by protein kinase C (rat brain), 124, 296
phospholipase A_2 regulation, calmodulin effect (human, rat platelets), 121, 507
plasma membrane-bound, phosphatidylinositol 4,5-bisphosphate receptor-linked release site (human platelets), 120, 226
-quin 2 interaction, stopped-flow kinetics, 123, 604
-regulated cellular differentiation, phospholipid metabolism (murine keratinocyte culture), 122, 1234
reintroduction, catecholamine relase induction, BAY-K-8644 and nifedipine effects (feline adrenal glands), 120, 851

release from
hepatic microsomes, induction by inositol(1,4,5)triphosphate (rat), 120, 858
platelet microsomes, 1-O-alkyl-2-acetyl-sn-glyceryl-3-phosphorylcholine effect (human), 120, 474
role in
mediation of axolemma- and myelin-stimulated Schwann cell proliferation (rat), 122, 373
phorbol ester-stimulated 2-deoxy-D-glucose uptake by lymphocytes (rat thymus), 124, 14
renin secretion (rat juxtaglomerula cells), 124, 359
uptake by pancreatic B cells, dihydropyridine effects (rat), 123, 1062
-Zn^{2+} derivatives of lentil and pea lectins, preparation and characterization, comparison with native forms, 124, 857
Calcium ionophores
lipid-associated, in plasma membrane, glucose stimulation effect (rat pancreatic islet cells), 118, 601
Calcium transport
ATP-dependent, in plasma membranes, identification (bovine spermatozoa), 122, 479
efflux from mitochondria
with inorganic pyrophosphate (rat heart), 118, 147
$NADP^+$-stimulated, membrane thiol group role (rat liver), 119, 305
ruthenium red-induced, inhibition by antibiotic X-537A (rat liver), 124, 80
influx in
erythrocyte membrane channel, effect of membrane cholesterol content (human), 124, 822
external and internal platelet membrane fractions, characterization, 123, 50
microsomes and mitochondria, N-methylformamide effect (murine liver), 125, 712
pancreatic ß-cells, glucose-promoted, blockage effect on glucose-regulated insulin release (mouse), 125, 875
platelets, enhancement by CGP 28392 (human), 118, 842
plasma membrane, actin and myosin roles (bovine chromaffin cells), 119, 652
12-O-tetradecanoylphorbol-13-acetate effect (rat liver), 122, 1057
theophylline and dibutyryl cAMP effects, comparison (chick renal tubules), 121, 355
Callus cells
crown gall transformation after co-cultivation with Agrobacterium tumefaciens (tobacco), 123, 458
Calmidazolium
photosystem-II oxygen evolution inhibition (stroma-free spinach thylakoids), 121, 626
Calmodulin
antagonists, effect on ovarian carcinoma cell proliferation in vitro (human), 123, 385
-binding proteins, identification and distribution in mitochondria (rat liver), 119, 343
-Ca binding, kinetics, stopped-flow fluorescence (bovine testes), 120, 185
and calcitonin, in vitro interactions (human, salmon), 118, 648
and calelectrins, purification by Ca^{2+}-dependent hydrophobic affinity chromatography, comparison (bovine), 123, 100
cAMP phosphodiesterase activation, inhibition by tamoxifen (bovine brain), 118, 27
conditions for reproducible detection by immunoblot analysis (chicken gizzard), 124, 752
conformational changes, aluminum-induced, citrate effects (bovine brain), 119, 376
effect on phospholipase A_2 regulation by Ca^{2+} (human, rat platelets), 121, 507
hydrophobic sites, spectrofluorometry (bovine brain), 119, 1154
interactions with avian and human spectrin (bovine brain), 122, 1194
modulation of Ca^{2+}-dependent K^+ permeability of cardiac sarcolemmal vesicles (bovine), 122, 237
role in
cyclic-nucleotide phosphodiesterase activity (rat caudal epididymal sperm), 118, 636
interferon-induced natural killer cell cytotoxicity (murine splenic lymphocytes), 121, 478
-trifluoperazine binding, shift reagent ^{43}Ca NMR (bovine brain, testes), 122, 1350
tryptic fragments, high-field proton NMR, native protein comparison (bovine testicles), 118, 225
Calpastatin
molecular diversity (human, porcine organs), 122, 912
Cannabidiol
effect on sphingomyelin hydrolysis

in vitro (Niemann-Pick patient fibroblasts), 121, 168
Capsids
polypeptides, major and minor yeast viruses, characterization, 121, 619
Carbachol
-induced [^{3}H]inositol-1-phosphate accumulation, inhibition by phorbol esters (rat hippocampal slices), 123, 703
-mediated Ca^{2+} mobilization and cGMP synthesis, correlation (neuroblastoma cells), 122, 333
Carbamoylphosphate synthetase (ammonia)
mRNA levels, regulation by glucocorticosteroids and cAMP, demonstration with specific cDNA (rat liver), 124, 882
Carbamylcholine
-stimulated amylase release, inhibition by Ca^{2+} chelators (rat pancreatic acini), 119, 876
Carbamyl phosphate synthetase I
in vitro transport and processing in mitochondria (murine liver), 118, 514
Carbohydrates
acid phosphatase, crosslinking and structural characterization (*Saccharomyces cerevisiae*), 122, 1083
dietary, effect on glucose-6-phosphate dehydrogenase synthesis (rat hepatocytes), 120, 1022
Carbon
aliphatic, in 7,8- and 9,10-dihydrobenzo[*a*]pyrenes, stereoselective hydroxylation by hepatic microsomes (rat), 124, 114
-C bond, diarylpropane-1,3-diol, cleavage by tetraphenylporphyrinato-iron(III)chloride with *tert*-butylhydroperoxide, 122, 1247
compounds, cyclic 12-, 8-, and 6-, effects on glutathione *S*-transferase (mouse), 120, 637
Carbonate dehydratase
inhibition, effect on thrombin-stimulated platelet aggregation velocity (human), 121, 266
monoclonal antibodies, comparative characterization (bovine, chicken, fish, human, mouse), 125, 690
Carbonic anhydrase, *see* Carbonate dehydratase
Carbon monoxide
-bound mitochondria, cytochrome *c* oxidase-dioxygen reaction sites, ir spectra (blowfly flight muscle; bovine heart, brain; porcine heart; rat kidney), 123, 247
inhibition of leukotriene B_4 ω-oxidation by neutrophils: role of cytochrome P-450 in leukotriene B_4 catabolism (human), 123, 475
γ-Carboxyglutamic acid
residues, factor X, chemical modification effect (human), 124, 256
Carboxylation
vitamin K-dependent, synthetic peptides, product characterization (rat hepatic microsomes), 119, 836
Carboxyl groups
heparin, modification, effect on circular dichroism spectrum, 123, 973
membrane protein, methylation, role in erythrocyte response to cytoskeletal stress (human), 123, 133
purple membrane, modification, effect on bacteriorhodopsin blue-species and O_{650} photocycle intermediate (*Halobacterium halobium*), 122, 1110
Carboxymethylcysteine
-containing acyclic peptide, enzymatic synthesis of penicillin and cephalosporin nuclei (*Streptomyces clavuligerus*), 120, 607
Carcinogenesis
azo dye-induced, aldolase A and B mRNA expression (rat liver), 124, 337
c-Ha-*ras* and c-*myc* gene expression (rat liver), 119, 1096
skin, 3-methylcholanthrene-induced, inhibition by ellagic acid (BALB/C mouse), 119, 751
Cardiomyopathy
-related changes in calcimedin levels (UM-X7.1 hamster), 121, 915
Cardionatrin
cDNA, cloned, isolation and nucleotide sequence (rat), 122, 1076
L-Carnitine
effect on urea synthesis after acute ammonia intoxication (mouse), 120, 726
Carotene
and glutathione *S*-transferase, relationship (human platelets), 122, 407
ß-Carotene
low-density lipoprotein-associated, resonance Raman spectra (human plasma), 122, 867
orientation in lipid bilayers, angle-resolved depolarized Raman spectroscopy, 120, 1060
Carrageenan
-induced edema, inhibition by organotin compounds (rat foot), 125, 59
Casein
gene expression, estrogen depletion effects (adrenalectomized, ovariectomized rat), 125, 682

ß-Casein
cleavage by plasmin and amino acid sequence determination (human), 125, 463
Casein kinase 1
and cAMP-dependent protein kinase, phosphorylation of tubulin and microtubule-associated protein 2, comparison, 121, 19
Casein kinase 2
ornithine decarboxylase phosphorylation (rat heart), 120, 997
Catalase
activity and intracellular distribution in Zellweger syndrome patients, 123, 1054
cDNA, molecular cloning and nucleotide sequence (rat liver), 122, 831
Mn-containing, Cu^{2+}-dependent inactivation by hydroxylamine, hydrogen peroxide role (Lactobacillus plantarum), 124, 75
polyethylene glycol-modified, activity increase in benzene (bovine liver), 125, 761
role in cyanamide metabolic conversion in vitro and in vivo to aldehyde dehydrogenase inhibitor (rat), 122, 358
Cataracts
cold, protein tyrosine residue microenvironmental change, Raman spectroscopy (rat lens), 119, 989
high-molecular-weight protein aggregates, Western blot analysis (human), 122, 1028
Catecholamines
release, Ca reintroduction-evoked, BAY-K-8644 and nifedipine effects (feline adrenal gland), 120, 851
Cathepsin J
purification and characterization (human tissues), 124, 909
Cathepsin K
purification and characterization (human tissues), 124, 909
Cathepsins
inhibition by γ-trace (human), 120, 631
Cation channels
conductance dispersity in des-L•Val^7-D•Val^8-Gramicidin A, side-chain orientation role, 118, 885
Cations
-dependent prolactin activation of guanylate cyclase in various organs (rat), 123, 1084
Cation transport
in erythrocytes (Ornithorhynchus anatinus, Tachyglossus aculeatus), 119, 1161
inhibition by caprine acetylcholine receptor antibodies (Torpedo californica), 120, 368
CCK, see Cholecystokinin
Celiac disease
pathogenesis, role of gliadin-derived peptides (human K562(S) cells), 121, 428
Cell culture
ataxia telangiectasia lymphoblastoid cell density, cellular actin level regulation (human), 119, 561
effect on complementation of epidermal growth factor binding in nonresponsive 3T3 variants (mouse), 118, 60
Cell cycle
S-phase, DNA-mediated gene transfer efficiency (mouse), 118, 310
Cell fusion
role in horizontal oncogenesis by human tumors (nude mice), 124, 933
Cell lines, see also Tumor cells
A431, preparation of epidermal growth factor receptor cDNA (human), 124, 125
C, calcitonin, cAMP, and neurotensin release, stimulation by growth hormone-releasing factor (rat), 123, 497
Chinese hamster ovary, insulin receptor identification and characterization: altered binding in glycosylation mutants, 125, 70
erythroleukemic
differentiation and proliferation, 5'-methylthioadenosine effect (mouse), 124, 172
dimethyl sulfoxide-induced differentiation, inhibition by diacylglycerols and phospholipase C, 125, 491
1α,25-dihydroxyvitamin D_3, 119, 807
HeLa, growth, effect of oxidant reduction by plasma membrane electron transport system, 125, 649
leukemic
ß-hexosaminidase isoenzyme separation (human lymphocytes, myelocytes), 122, 966
K562, hemin-mediated erythroid induction, cell proliferation, and c-abl and c-myc oncogene expression, relationship (human), 125, 90
L1210
inhibition by spermidine catecholamide Fe chelators, 121, 848
and L10, macrophage-mediated cytotoxicity, role of Fe depletion (mouse), 123, 716

proliferation
effect of methionine analog inhibitors of methionine adenosyltransferase (mouse), 122, 350
tumor-disturbing factor effects in vivo and in vitro (human, BALB/c murine sera), 120, 520
ribonucleotide to DNA channeling, analysis, 123, 656
myeloid
membrane potential changes in response to formyl-methionyl-leucyl-phenylalanine or 12-O-tetradecanoylphorbol 13-acetate (human), 123, 937
ML-1 and HL-60, differentiation induction, interferon-γ role (human), 124, 100
and normal bone marrow cells and lymphocytes, tyrosine phosphorylation, comparison (human), 124, 766
Leydig cells
angiotensin-converting enzyme and renin identification (rat testes), 122, 1337
secretory proteins, induction by estrogen in vitro and in vivo, analysis (mouse), 124, 277
lymphoblastic CCRF-CEM, 7-hydroxymethotrexate formation (human), 122, 1212
mastocytoma PY815, DNA, chlorpromazine effects (mouse), 125, 184
promyelocytic HL-60, differentiation to macrophage-like cells, stimulation by 1-O-hexadecyl-2-acetyl-sn-glycerol (human), 122, 824
prostate PC-3 and DU145, proliferation in vitro, reversible inhibition by 1,10-phenanthroline (human), 124, 538
smooth muscle BC3H-1, ß-adrenergic receptors, agonist-induced internalization, mechanism, 124, 863
3T3, normal and virally transformed, substrate-adhesion sites, ganglioside composition (Balb/c mice), 125, 142
Centchroman
cis isomer, selective ligand for microsomal antiestrogen binding sites (rat), 125, 346
Cephalosporin
nuclei, synthesis from carboxymethylcysteine-containing acyclic peptide (Streptomyces clavuligerus), 120, 607
Ceruloplasmin receptors
identification in erythrocyte membranes (human), 125, 157
CGP 28392
activation of voltage-dependent-Ca^{2+} channels (rat heart), 125, 405
Ca influx enhancement (human platelets), 118, 842
CHAPS, see 3-[(3-Cholamidopropyl)-dimethylammonio]-1-propane sulfonate
Charcoal
dextran-coated, effect on glucocorticoid-receptor complex dissociation kinetics, lipid role (rat thymus), 119, 1134
Chelex
-based competitive binding assay of aluminum binding to albumin and transferrin (human serum), 125, 1020
Chemiluminescence
Cu-facilitated, yeast alcohol dehydrogenase, spinach ferredoxin, and rabbit hepatic metallothionein, 125, 425
from isobutyraldehyde, horseradish peroxidase-catalyzed, rate-limiting factors, 122, 28
luminol-dependent and native, in stimulated neutrophils, simultaneous detection (human), 123, 1047
NADPH-induced, synthetic antioxidant effects (rat hepatic microsomes), 125, 1033
neutrophils, enhancement by low concentrations of trifluoperazine (human), 118, 53
Chemotaxis
neutrophils
generation in inflammatory sites, leukotriene B_4-stimulated, inhibition by dexamethasone (rat), 119, 884
inhibition by
organotin compounds (rabbit), 123, 543
synthetic peptides (rabbit), 118, 682
Chloramphenicol
and dipeptidyl analog, peptidyltransferase inhibition, binding mode analysis (Escherichia coli cell-free system), 122, 748
Chloride ion
adenylate cyclase stimulation, mechanism (rabbit heart), 118, 555
cotransport with K^+ and Na^+ in smooth muscle cells, regulation (embryonic rat aorta), 125, 500
effect on basal and isoprenaline- and GTP-stimulated adenylate cyclase (rabbit heart), 118, 561
lymphocyte permeability, kinetics (human), 122, 522

Chloride ionophore
γ-aminobutyric acid-dependent regulation by benzodiazepines (rat cortical membranes), 123, 1130
4-Chloroaniline
oxidation by microsomal fraction of germinating seeds (Pisum sativum), 121, 1001
4-Chlorobenzoate
dehalogenation-hydroxylation, origin of incorporated oxygen (Arthrobacter sp.), 124, 669
4-Chlorobenzoate dehalogenase
-catalyzed incorporation of ^{18}O-enriched water into 4-hydrobenzoic acid (Pseudomonas), 124, 178
Chloroform-d
solution containing enkephalinamide complexes with 18-crown-6-ether, stimulation of δ-opioid receptor environment, NMR spectroscopy, 121, 456
Chlorogenic acid
glutathione S-transferase inhibition in vitro (rat liver), 120, 427
7-Chloro-4-nitrobenzofurazan
^{14}C-labeled, identification of lysine residue in F_1-ATPase β-subunit (thermophilic bacterium PS3), 123, 1040
Chlorophyll
synthesis, protoporphyrinogen oxidation, effect of unsaturated fatty acids (barley, spinach etioplasts, mitochondria), 123, 1157
Chloroplasts
photosystem-I donors, reduction rates, dibromothymoquinone effects (pea seedling chloroplasts), 120, 721
Chloroquine
effect on Shigella toxin activity and late antibody rescue (HeLa cells), 121, 69
Chlorpromazine
α_1-acid glycoprotein crystallization (human), 124, 619
cholera toxin ADP-ribosyltransferase inhibition (rat liver), 120, 700
effect on DNA in PY815 mastocytoma cells (mouse), 125, 184
-S-100 protein interaction, effect on microtubule proteins in vitro (bovine brain), 122, 983
3-[(3-Cholamidopropyl)-dimethylammonio]-1-propane sulfonate
α_2-adrenergic receptor solubilization, preservation of agonist binding and sensitivity to GTP (bovine cerebral cortex), 119, 1116
microsomal NADH-ferricyanide reductase purification (potato tubers), 122, 1201
Cholecystokinin
C-terminal octapeptide, see Sincalide
regulation of insulin-like growth factor-II binding to pancreatic receptors, intracellular Ca^{2+} role (diabetic mouse), 119, 359
Cholecystokinin receptors
cerebral and pancreatic, size and subunit structure, comparison (mouse), 124, 497
subunits, covalently labeled, characterization (murine pancreatic plasma membrane), 118, 623
Cholera toxin
ADP-ribosyltransferase activity, inhibition by MDL 12330A and chlorpromazine (rat liver), 120, 700
effect on cyclic AMP and neurotensin release (rat C cells), 120, 540
and pertussis toxin, requirement for adenylate cyclase maximal activation (NG108-15 cell culture), 119, 1068
Cholesterol
antagonistic effect on hydroxysterol toxicity (rat hepatoma cells), 120, 657
content in
erythrocyte membranes, effect on Ca influx through channel (human), 124, 822
liposome membranes, effect on carbocyanine dye fluorescent response, 123, 178
dietary, effect on mevalonate metabolism by sterol and nonsterol pathways (male chicks), 122, 945
dissociation from membrane phosphatidylcholine bilayers, hydrogen belt interactions, 118, 743
distribution in mitochondrial membranes, regulation by sterol-carrier $protein_2$ (rat adrenal), 122, 509
long- and short-term feeding, changes in microsomal lipid fatty acid composition, age effect (chick liver), 124, 677
plasma concentrations, relationship to glutathione S-transferase (human platelets), 122, 407
side-chains, cleavage activity in outer and inner zones (guinea pig adrenal cortex), 118, 198
transfer reaction from liposomes to cytochrome P-450_{SCC}, enthalpy-entropy compensation effects (bovine adrenal cortex), 118, 877
Cholesterol esters
very-low-density lipoprotein, hydrolysis, effect on very-low-density

lipoprotein lipolysis *in vitro* (human), 121, 946
Cholesterol-7α-hydroxylase
sensitivity to insulin (diabetic, normal rat liver), 124, 896
stimulation *in vitro* by serum nonlipoprotein factors (streptozotocin-diabetic rat liver), 121, 743
Cholesteryl esters
arachidonic acid and palmitic acid incorporation, chronic regulation by thyrotropin (thyroid cell culture), 119, 537
bidirectional movement between rough and smooth microsomal membranes, facilitation by plasma lipid transfer proteins (rat liver), 120, 586
Choline
liberation for acetylcholine synthesis, synaptosomal phospholipase-D role (rat brain), 124, 945
release, stimulation by muscarinic receptor activation (rat corpus striatum slices), 120, 1002
Cholinergic receptors
muscarinic, identification in phaeochromocytoma cells (rat), 119, 163
Chondroitin sulfate
interaction with human plasma low-density lipoproteins, ^{2}H NMR spectra (whale cartilage), 121, 871
Chromatin
-dependent RNA polymerase II reactions, large-molecular-weight regulating factor isolation and characterization (rat hepatic cytoplasm), 125, 286
fiber, nucleosome orientation maintenance, role of histone H1 and core histone nonstructural domains (calf thymus), 122, 1021
micrococcal endonuclease-generated fragments, angiotensin-II receptor identification (rat hepatic nuclei), 119, 220
proteins, nonhistone, binding affinity for isopeptidase (Chinese hamster DON cells), 122, 1296
reassociation with bovine hepatic histone H1 subfractions, effect on structure: electric birefringence and relaxation time measurements (rat liver), 121, 530
simian virus-40, protein crosslinking to nascent DNA, induction by diisopropylfluorophosphate (CV-1 cells), 123, 271
Chromium ion
effect on poly(dG-dC) conformation, 124, 106
Chromosomes
1, apolipoprotein A-II gene localization (human), 122, 877; 123, 1; 125, 299
11, short arm, calcitonin gene localization (human), 120, 493
19
apolipoprotein C-I gene localization (human), 125, 299
apolipoprotein C-II gene localization (human), 122, 687
21, gene segment isolation and sublocalization by *in situ* hybridization (human), 121, 380
Chronic pancreatitis
trypsinogen-1 proteolysis, pathogenic implication (human), 118, 154
Chyle
mesenteric, identification of apolipoprotein-B major form B-100 (rat), 123, 1149
Chymotrypsin
peptide synthesis, nucleophile specificity (bovine pancreas), 118, 317
peptidyl carbamate ester effects (porcine pancreas), 122, 571
α-Chymotrypsin
-catalyzed peptide semisynthesis, mechanism and specificity, 120, 686
covalent attachment to functionalized polymeric liposomes, 119, 646
Cibacron Blue F3GA
interaction kinetics with Na^+,K^+-ATPase, nucleotide fold probe (guinea pig, human), 119, 423
Cigarette smoke
gas-phase, inactivation of α_1-proteinase inhibitor (human), 122, 676
Ciprofibrate
glutathione S-transferase inhibition *in vitro* and *in vivo* (rat liver), 123, 1012
Circular dichroism
spectrum of heparin, carboxyl group modification effect, 123, 973
Cisplatin
cis and *trans* isomers, -modified DNAs, S1 nuclease sensitivity: effects of nucleotide sequence and cytosine and guanine content (calf thymus, *Micrococcus lysodeikticus*), 124, 367
Citrate
effect on aluminum-induced conformational changes in calmodulin (bovine brain), 119, 376
Citrate (*pro*-3S)-lyase
large acyl-carrier protein subunit, repetitive structure (*Escherichia coli*), 122, 1253

Citrate synthase
binding to mitochondrial inner membranes: tissue distribution and substrate effects (lemon fruit, mammals), 121, 612
Clomiphene
binding sites, high-affinity, concentration in rough microsomal membranes (rat liver), 120, 109
Codons
asparagine, basal-level misreading, analysis (Escherichia coli), 121, 487
role in hydropathic amino acid anticomplementarity, 121, 203
Coenzyme F_{420}
reduction by hydrogenase, FAD requirement (Methanobacterium formicicum), 120, 775
Coenzyme Q_{10}, see Ubiquinone
Colcemid, see Demecolcine
Collagen
1α, 2α, and 3α chains, resistance to human collagenase (bovine hyaline cartilage), 118, 724
binding to hyaluronate-binding proteins (chicken cardiac fibroblasts, 3T3 cells), 121, 808
precursors, extra- and intracellular degradation by protease, qualitative and quantitative evaluation (chick embryo liver), 123, 1002
synthesis
1,25-dihydroxyvitamin D_3 effect (murine MC3T3-E1 osteoblastic cells), 119, 767
human monocyte cell factor effect, prostaglandin E_2 role (rabbit articular chondrocyte culture), 119, 499
transcriptional control by recombinant γ-interferon (cultured confluent human diploid fibroblasts), 123, 365
type-IX, hydroxypyridinium crosslinks, identification and localization (bovine cartilage), 123, 1033
Collagenase
latent, activation by serine proteinase (human skin), 125, 279
production in vitro by adherent rheumatoid sinovial cells, stimulation by canine mast cell extracts (human), 122, 270
resistance of collagen chains 1α, 2α, and 3α from bovine hyaline cartilage (human), 118, 724
Colony stimulating factor 1
chemical crosslinking to colony stimulating factor-1 receptors at cell surface (murine bone marrow macrophages, J774.2, and BAC1 cells), 119, 35
Colony stimulating factor-1 receptors
chemical crosslinking to colony stimulating factor 1 at cell surface (murine bone marrow macrophages, J774.2, and BAC1 cells), 119, 35
Complementation
epidermal growth factor binding in nonresponsive 3T3 variants, cocultivation effect (mouse), 118, 60
Complement pathway inhibitor
human alternative, purification and characterization (larval fall armyworm hemolymph), 122, 1426
Complements
C9, transmembrane protein in complement-induced [^{14}C]sucrose release (human erythrocyte ghosts), 118, 616
channels, macromolecule diffusion, inhibition by monoclonal antibody to polymerized C9 neoantigen (human erythrocytes), 125, 1013
Concanavalin A
effect on insulin cellular uptake and surface binding (isolated rat hepatoma cells), 122, 204
internalization by hepatoma cells, dependence on temperature and dose (rat), 125, 35
-mediated phospholipid synthesis stimulation, phosphate depletion effect (human peripheral lymphocytes), 118, 371
-stimulated lymphocytes
intracellular transferrin receptor expresssion (murine spleen), 119, 598
protein kinase identification (bovine), 121, 392
Congocidine
enhancement of S1 nuclease sensitivity to negatively superhelical DNA (simian virus 40), 124, 388
Convulsants
binding activity solubilization on γ-aminobutyric acid-benzodiazepine receptor complex (rat cerebral membranes), 119, 530
Copper ion
-coupled binuclear active site in native and type 2-depleted laccase, oxidation by peroxide, X-ray adsorption spectroscopy (Rhus vernicifera), 119, 567
deficiency, dietary and drug-induced, Cu and Zn molecular localization (fetal rat liver), 118, 697
-dependent Mn-catalase inactivation by hydroxylamine, hydrogen per-

oxide role (Lactobacillus plantarum), 124, 75
-facilitated chemiluminescence from sulfhydryl proteins: yeast alcohol dehydrogenase, spinach ferredoxin, and rabbit hepatic metallothionein, 125, 425
identification in cytochrome c oxidase preparations (bovine cardiac muscle), 124, 836
-induced high-affinity guanine nucleotide-insensitive state for muscarinic agonists (rat cerebral cortical membranes), 120, 271
mediation of divicine- and isouramil-promoted acetylcholinesterase inactivation (human erythrocyte ghosts), 122, 297
protein, and nitrous oxide reductase, comparison (Paracoccus denitrificans, Pseudomonas denitrificans, P. perfectomarinus), 119, 588
-transferrin complexes at N- and C-sites, quantification and visible absorption spectra (chicken egg white), 119, 298
Corticotropin-releasing factor
differential regulation of pro-opiomelanocortin mRNA levels in anterior and intermediate pituitary lobes (rat), 124, 407
identification in nerve fibers and perikarya, immunofluorescence (rat duodenum), 122, 381
isolation and characterization
bovine hypothalamus, 122, 899
caprine hypothalamic median eminence tissues, 122, 1218
Cortisol, see Hydrocortisone
Cortisone
effect on glycolipid composition during development (postnatal murine small intestine), 119, 1168
Coumarin receptors
microsomal, selective ligand: centchroman cis isomer (rat), 125, 346
Creatine kinase
isoenzyme CK-BB, plasma levels after chronic lead intoxication (rat), 125, 192
myocardial sarcolemmal, and ATP-dependent Na^+ pump, relationship (canine, guinea pig), 124, 696
18-Crown-6-ether
complexes with enkephalinamides in $CDCl_3$, stimulation of δ-opioid receptor environment, NMR spectroscopy, 121, 456
α-Crystalline
tertiary structure, nonenzymatic glycosylation effect (bovine), 123, 899
CV-2619, see Idebenone
Cyanamide
metabolic conversion in vitro and in vivo to aldehyde dehydrogenase inhibitor, catalase role (rat), 122, 358
β-Cyano-D-alanine
enzyme-activated temperature-dependent inhibition of D-amino acid transaminase (Bacillus sphaericus), 122, 485
Cyclic AMP (cAMP)
ATPase modulation (rat kidney), 120, 619
-binding sites, surface membrane, modulation by guanine nucleotides (Dictyostelium discoideum), 124, 597
inhibition of glycolytic enzyme gene transcription (rat liver), 125, 135
intracellular, effect on cardiac cell electrical coupling (canine), 119, 1001
production
gastric inhibitory peptide, pancreatic glucagon, and VIP effects (human HGT-1 cells), 120, 641
parathyroid hormone effect in vitro (osteoblastic MC3T3 cells), 123, 894
regulation of
carbamoylphosphate synthetase (ammonia) mRNA levels, demonstration with specific cDNA (rat liver), 124, 882
cytoplasmic Ca^{2+} in platelets, adenylate cyclase stimulator-inhibitor antagonism (human), 120, 579
release from C cells
cholera toxin and forskolin effects (rat), 120, 540
stimulation by growth hormone-releasing factor (rat), 123, 497
response to isoproterenol and forskolin, attenuation by 1,25-dihydroxyvitamin D (human U937 cells), 123, 210
role in
mediation of axolemma- and myelin-stimulated Schwann cell proliferation (rat), 122, 373
renin secretion (rat juxtaglomerula cells), 124, 359
Cyclic AMP phosphodiesterase, see 3',5'-Cyclic-nucleotide phosphodiesterase
Cyclic GMP (cGMP)
intracellular levels, atrial natriuretic factor effect (rat aortic

smooth muscle cell culture), 125, 562
isolation, characterization, and metabolism (Mycobacterium smegmatis), 121, 634
native and synthetic atrial natriuretic factor effects (rat), 123, 515
synthesis and Ca^{2+} mobilization, carbachol-, histamine-, and prostaglandin E_1-mediated, correlation (neuroblastoma cells), 122, 333
3',5'-Cyclic-nucleotide phosphodiesterase
activation by
calmodulin, inhibition by tamoxifen (bovine brain), 118, 27
Clostridium perfringens phospholipase C (rat cardiac cytosol), 119, 236
calmodulin-dependent, inhibition by flunarizine (bovine brain), 124, 315
calmodulin role (rat caudal epididymal sperm), 118, 636
oncomodulin effect (Morris rat hepatoma), 125, 420
Cyclobenzaprine N-oxide
reduction, cytosolic aldehyde oxidase and microsomal cytochrome P-450 roles (mammalian liver), 121, 749
Cycloheximide
Ca^{2+},Mg^{2+}-dependent endonuclease inactivation (rat hepatic nuclei), 119, 618
effect on vitamin D metabolism in fetal chick osteoblast-like cells (bovine), 125, 265
inhibition of polyriboinosinic:polyribocytidylic acid-induced depression of hepatic mixed function oxidases (mouse), 121, 237
Cycloleucine
effect on S-adenosylmethionine formation, cell growth, leucine incorporation, and polyamine biosynthesis (murine L1210 leukemia cells), 122, 350
Cyclooxygenase
products, role in platelet-activating factor vascular effects (perfused rat liver), 123, 507
vascular, hyperoxia and hypoxia effects in vitro, kinetic analyses (human umbilical cord), 125, 170
Cyclooxygenase inhibitors
effects on leukotriene C_4- and D_4-mediated $C5a_{desArg}$ anaphylatoxin spasmogenic activity on lung parenchymal strips, comparison (guinea pig), 125, 852
Cyclophosphamide
metabolism by hepatic microsomal cytochrome P-450 (phenobarbital-treated rat), 120, 390
L-Cycloserine
effect on sphingolipid and phospholipid synthesis (Bacteroides levii culture), 119, 814
Cyclosporin A
inhibition of macrophage activation and tumor cell cytolysis (rat), 123, 710
Cyclosporine, see Cyclosporins
Cyclosporins
effect on prolactin serum concentration (rat), 120, 614
prolactin receptor regulation (human lymphocytes), 121, 899
Cystatin
characterization (human), 118, 103
Cystatin C
cysteine proteinase inhibition (human), 120, 631
Cysteine
and glyoxylate, formation of thiazolidine-2-carboxylate derivatives: substrates for D-aspartate oxidase (bovine kidney), 125, 1039
in peroxidase-catalyzed acetaminophen metabolism, thiyl radical formation, 125, 109
reversal of N,N-dimethylformamide- and N-methylformamide-induced glutathione depletion and growth inhibition (human colon carcinoma cells), 122, 798
Cysteine proteinases
role in bone resorption (murine embryonic calvaria), 125, 441
L-Cysteinylglycine
and glyoxylate, formation of thiazolidine-2-carboxylate derivatives: substrates for D-aspartate oxidase (bovine kidney), 125, 1039
Cytidine diphosphate reductase, see Ribonucleoside diphosphate reductase
Cytidine-2'-phosphate, see 2'-Cytidylic acid
2'-Cytidylic acid
endoribonuclease VI noncompetitive inhibition (Artemia larvae), 121, 408
Cytochalasin
binding by human erythrocyte membrane spectrin-band 4.1-actin complex and rabbit muscle F-actin, inhibition by p-hydromercuribenzoate, mechanism, 122, 244
Cytochalasin B
^3H-labeled, -photolabeled and band 4.5 proteins, sensitivity to endo-

glycosidase F and trypsin, comparison (human erythrocyte membranes), 122, 218
Cytochalasin D
and actin-protein 90-kD complex, actin filament shortening, palloidin and tropomyosin effects, comparison (bovine brain), 123, 596
Cytochrome aa_3 complex
redox states in mitochondria in situ, glucagon effects (perfused rat liver), 119, 212
Cytochrome b
purification and properties (Rhodopseudomonas sphaeroides R-26), 123, 1234
redox states in mitochondria in situ, glucagon effects (perfused rat liver), 119, 212
Cytochrome b_{559}
component of NADPH-dependent superoxide radical-generating oxidase, catalytic properties (human neutrophils), 118, 430
Cytochrome b_{564}
coupling between redox and acid-base energy (Saccharomyces cerevisiae mitochondria), 124, 807
Cytochrome bc_1 complex
and mitochondrial cytochrome c oxidase, interactions with oxidized and reduced cytochrome c, 120, 124
Cytochrome c
oxidized and reduced, interactions with mitochondrial cytochrome c oxidase and cytochrome bc_1 complex (yeast), 120, 124
two-dimensional electron transfer to photosynthetic reaction centers (Rhodopseudomonas sphaeroides), 125, 592
Cytochrome c_1
isolation and characterization (Rhodopseudomonas sphaeroides R-26), 118, 964
Cytochrome c_3
structural and redox properties, correlation (Desulfovibrio), 120, 384
Cytochrome cc_1 complex
redox states in mitochondria in situ, glucagon effects (perfused rat liver), 119, 212
Cytochrome c oxidase
-dioxygen reaction sites, CO-bound mitochondria, ir spectra (blowfly flight muscle; bovine heart, brain; porcine heart; rat kidney), 123, 247
mitochondrial, and cytochrome bc_1 complex, interactions with oxidized and reduced cytochrome c (bovine heart), 120, 124
nuclear-coded subunit mRNA, cDNA clone construction (rat liver), 118, 902
polypeptide I, exon-2 coding region identification (Aspergillus nidulans mitochondria), 119, 786
preparations, identification of Cu, Fe, and Zn (bovine heart muscle), 124, 836
vesicles, proton pumping inhibition by subunit-III mono- and divalent antibody fragments, mechanism (bovine heart), 120, 52
Cytochrome oxidase, see Cytochrome c oxidase
Cytochrome P-448
-mediated 6-hydroxylation of 7-ethoxycoumarin, mechanism (rat), 121, 960
Cytochrome P-450
allylisopropylacetamide-mediated destruction, functional reconstitution in vitro with mesohemin (rat liver), 121, 95
-catalyzed biphenyl meta-hydroxylation, intramolecular isotope effects and deuterium retention (rat liver), 118, 867
cyclophosphamide metabolism (phenobarbital-treated rat liver), 120, 390
debrisoquine-sparteine type genetic polymorphism, characterization: Michaelis constant and bufuralol 1'-hydroxylation stereoselectivity (human liver), 125, 374
-dependent
7-ethoxycoumarin O-deethylation, assay (Saccharomyces cerevisiae), 123, 186
mixed-function oxidase, arachidonic acid metabolism (canine neutrophils), 123, 581
ethanol-inducible form, induction by alcohol dehydrogenase inhibitors (rabbit hepatic microsomes), 124, 375
expression, natural variation between strains (Drosophila), 123, 907
incorporation into large unilamellar liposomes, octylglucoside role (rabbit liver), 121, 118
isozymes
immunopurification and amino-terminal sequence analysis (guinea pig, mouse, rat), 123, 1201; addendum, 124, 675
quantification by enzyme-linked immunosorbent assay (murine hepatic microsomes), 122, 137
-mediated 6-hydroxylation of 7-ethoxycoumarin, mechanism (rat), 121, 960

and monooxygenase, induction by 2-acetylaminofluorene (chick embryo), 119, 382
monosubstituted olefin oxidation: aldehyde, epoxide, and allylic alcohol formation (rat hepatic microsomes), 119, 319
phenobarbital-inducible, monoclonal antibody preparation and characterization (rat hepatic microsomes), 119, 744
polyriboinosinic:polyribocytidylic acid-induced depression, inhibition by actinomycin D or cycloheximide (murine liver), 121, 237
production, ethanol effect (Saccharomyces cerevisiae), 123, 186
purification and properties (untreated simian hepatic microsomes), 125, 1089
role in
leukotriene B_4 catabolism (human), 123, 475
tertiary amine N-oxide reduction (mammalian hepatic microsomes), 121, 749
substrate binding site in membrane lipids (rabbit hepatic microsomes), 118, 916
synthesis de novo, induction by 2-allyl-2-isopropylacetamide and phenobarbital (cultured chick embryo hepatocytes), 125, 1096
valproic acid metabolism (rat hepatic microsomes), 122, 1166
vitamin D_3 25-hydroxylation-catalyzing, purification, characterization, and amino-terminal sequence analysis (rat hepatic microsomes), 121, 994
Cytochrome P-$450_{11\beta}$
reconstituted, aldosterone biosynthesis (bovine adrenocortical mitochondria), 119, 365
Cytochrome P-450b
coding and 3' noncoding cDNA sequences, and cytochrome P-450e-like genes, segmental homologies (rat liver), 118, 655
Cytochrome P-450e
coding and 3' noncoding cDNA sequences, and cytochrome P-450e-like genes, segmental homologies (rat liver), 118, 655
Cytochrome P-450 LM_2
phosphorylation by cAMP-dependent protein kinase, effect on monooxygenase activity (rabbit hepatic microsomes), 122, 620
Cytochrome P-450_{SCC}
cholesterol transfer reaction from liposomes, enthalpy-entropy compensation effects (bovine adrenal cortex), 118, 877
mRNA, cDNA cloning (bovine adrenal), 120, 264
phosphorylation in vitro by protein kinase C (bovine adrenal cortex), 125, 554
Cytosine
and guanine, content in cis- and trans-diamminedichloroplatinum (II)-modified DNAs, effect on S1 nuclease sensitivity (calf thymus, Micrococcus lysodeikticus), 124, 367
Cytotoxicity
epidermal growth factor hybrid proteins with ricin and ricin A-chain, role of binding ligand (A431 cells), 124, 551
methyl methane sulfonate, enhancement by ß-lapachone (human fibroblasts), 118, 828
natural killer cell, interferon-induced, calmodulin role (murine splenic lymphocytes), 121, 478
tumor cell, macrophage-mediated
inhibition by cyclosporin A (rat), 123, 710
role of Fe depletion (murine L10, L1210 cells), 123, 716

D

Dactinomycin
effect on Ca^{2+},Mg^{2+}-dependent endonuclease (rat hepatic nuclei), 119, 618
inhibition of
adenovirus type-5 DNA replication initiation and elongation in vitro and in vivo (HeLa cells), 121, 1033
polyriboinosinic:polyribocytidylic acid-induced depression of hepatic mixed function oxidases (mouse), 121, 237
Daunomycin, see Daunorubicin
Daunorubicin
inhibition of RNA polymerase-catalyzed RNA synthesis, mechanism, 123, 914
Debrisoquine
-sparteine type genetic polymorphism, cytochrome P-450, characterization: Michaelis constant and bufuralol 1'-hydroxylation stereoselectivity (human liver), 125, 374
Debromoaplysiatoxin
Ca-activated phospholipid-dependent protein kinase activation (rat brain), 120, 339

Decarbamoyl mitomycin C
-induced DNA crosslinks, sensitivity to alkaline conditions (human fibroblasts), 123, 549
O-Deethylation
7-ethoxycoumarin, cytochrome P-450-dependent, assay (Saccharomyces cerevisiae), 123, 186
Degranulation
neutrophil, enhancement by diacylglycerols (human), 123, 64
Dehalogenation
-hydroxylation, 4-chlorobenzoate, origin of incorporated oxygen (Arthrobacter sp.), 124, 669
Dehydroepiandrosterone, see Prasterone
Demecolcine
treatment of myeloma cells prior to fusion with spenocytes, effect on hybridoma formation (mouse), 124, 903
Demorphin
tetrapeptide analogs with Tyr^1-D-Arg^2 sequence, analgesic activity after subcutaneous administration (mouse), 120, 214
Deoxyadenosine
efflux and influx in adenosine deaminase-deficient lymphoma cells, dipyramidole and nitrobenzylthioinosine effects (human), 121, 514
Deoxycoformycin
and aphidicolin, in vitro induction of DNA breaks and cell death (human lymphocytes), 120, 959
4'-Deoxydoxorubicin
generation of oxygen-containing free radicals in vitro, analysis and relationship to cardiotoxicity, 125, 584
Deoxyglucose
uptake in cultured cells, inhibition by ADP-ribosylation inhibitors (3T3-L1, OK, UMR-106 cells), 123, 785
2-Deoxy-D-glucose
inhibition of branched-chain amino acid-stimulated protein synthesis (rat muscles), 125, 149
in low concentration, uptake by fibroblasts, kinetics (chick embryo), 123, 535
phorbol ester-stimulated uptake by lymphocytes, Ca^{2+} and Na^+/H^+ exchange roles (rat thymus), 124, 14
3'-Deoxyinosine
cytotoxic effects on and metabolism by Leishmania tropica promastigotes, 123, 677
1-Deoxymannojirimycin
effect on α-mannosidases (rat liver), 125, 324
Deoxynucleoside triphosphate pools
and DNA repair, 3-aminobenzamide effects (human fibroblasts), 124, 457
mutagen treatment effects (murine FM3A cells), 122, 1160
uv-induced changes, effect on DNA synthesis (Chinese hamster ovary cells), 123, 742
Deoxynucleotides
double-stranded $d(ATGCAT)_2$, sequential assignment of ^1H and ^{31}P resonances by 2D-NMR correlation spectroscopy, 124, 774
Deoxyribose
ring in d(ApGpCpT), proton NMR signal assignment by 2D-NMR, 121, 1021
Dephosphorylation
ATP-citrate lyase phosphothreonine, insulin and isoproterenol effects (rat epididymal fat pads), 122, 1047
-phosphorylation
1-alkyl-2-lyso-sn-glycero-3-phosphocholine:acetyl-CoA acetyltransferase, role in platelet-activating factor synthesis regulation (rat splenic microsomes), 120, 834
deinhibitor protein regulation (canine liver), 120, 405
myosin light chains and satellite proteins, effects on smooth muscle fibers (porcine carotid artery), 120, 933
Desmethylretrohydroxamate ferrichrome
biological activity (Arthrobacter flavescens, Bacillus subtilis, Ustaligo sphaerogena), 119, 1191
Desoxycorticosterone acetate
-salt hypertension, increase of circulating digitalis-like substance (rat), 122, 129
Detergents
photosynthetic membrane solubilization, reaction center integrity (Rhodopseudomonas viridis), 120, 164
Deuterium
retention in cytochrome P-450-catalyzed biphenyl meta-hydroxylation (rat liver), 118, 867
Deuterohemin
-reconstituted equine and human hemoglobin, heme orientational heterogeneity, ^1H NMR, 119, 640
Dexamethasone
fatty acyl-CoA desaturase modulation (Tetrahymena microsomes), 119, 401
inhibition of
chemotactic factor production by

polymorphonuclear leukocytes (rat), 119, 720
leukotriene B_4-stimulated polymorphonuclear leukocyte chemotactic activity generation in inflammatory sites (rat), 119, 884
prostaglandin synthetase enhancement (rat renal medulla cells), 121, 255
-receptor complexes, RNA-containing nuclear binding site localization (HeLa cells), 123, 78
with tamoxifen, estrogen-like effects (chick oviduct), 124, 57
Dextran
-coated charcoal, effect on glucocorticoid-receptor complex dissociation kinetics, lipid role (rat thymus), 119, 1134
Dextrorphan, see 3-Hydroxy-N-methylmorphinan
Diabetes
adipocyte plasma membrane structural and functional abnormalities, ascochlorin derivative AS-6 effects (db/db mice), 125, 64
alloxan-induced
effect on glucose metabolism pentose phosphate pathway (rat heart), 118, 110
glucose metabolism regulation, fructose 2,6-bisphosphate role (rat adrenal gland), 121, 8
effect on lens protein glycosylation (sensile cataract patients), 123, 888
insulin-resistant, insulin-releasing tetrapeptides, isolation and characterization (lipodystrophic patient urine), 122, 103
streptozotocin-induced, hepatic cholesterol-7α-hydroxylase stimulation in vitro by serum nonlipoprotein factors (rat), 121, 743
N,N-Diacetylchitobiose
virtual coupling in proton NMR spectrum, characterization by two-dimensional J-resolved spectroscopy, 123, 555
Diacylglycerol lipase, see Lipoprotein lipase
Diacylglycerols
effect on erythrocyte plasma membrane Ca^{2+}-ATPase (rat), 125, 908
induction of phospholipid bilayer membrane structural transitions (bovine brain), 124, 491
inhibition of dimethyl sulfoxide-induced differentiation in Friend erythroleukemia cells, 125, 491
long-chain unsaturated, stimulation of phospholipase-catalyzed phospholipid bilayer hydrolysis, 125, 836
neutrophil degranulation enhancement (human), 123, 64
substrate-dependent effect on protein kinase C (rat brain), 122, 1268
Diadenosine tetraphosphate
AMP deaminase activation (rat muscle), 121, 155
noncovalent complexes with divalent metal ions, biogenic amines, L-arginine, proteins, and poly(dT), 120, 1037
Diadenosine triphosphate
platelet aggregation mediation by ADP liberation (human), 118, 704
Diamide
-induced high-affinity guanine nucleotide-insensitive state for muscarinic agonists (rat cerebral cortical membranes), 120, 271
Diaminoalkanes
characterization of angiotensin II-binding site structure (bovine adrenal cortex), 123, 452
Diaminobenzidine
-shift protocol analysis of insulin uptake in vivo by Golgi fractions (rat liver), 123, 1144
1,3-Diaminopropane
detection in high concentrations (Acanthamoeba castellanii), 122, 388
Diamminedichloroplatinum(II), see Cisplatin
Diarylpropane-1,3-diol
C-C bond, cleavage by tetraphenylprophyrinatoiron(III)chloride with tert-butylhydroperoxide, 122, 1247
Dibromothymoquinone
effect on photosystem-I donor reduction rates (pea seedling chloroplasts), 120, 721
Dibutyltin dichloride
inhibition of
carrageenan-induced edema (rat foot), 125, 59
neutrophil chemotaxis (rabbit), 123, 544
Dibutyryl cyclic AMP
effect on 1,25-dihydroxyvitamin D_3 production and Ca fluxes, comparison with caffeine and theophylline (chick renal tubules), 121, 355
Dicarbonyl reductase
NADPH-dependent activity, exhibition by sepiapterin reductase (rat erythrocytes), 118, 859
Dictyostelium discoideum
cytoskeleton, chemoattractant-mediated actin accumulation, refrac-

toriness and adaptation, 123, 1076
surface membrane cAMP-binding sites, modification by guanine nucleotides, 124, 597
Dicyclohexylcarbodiimide
F_1-ATPase structural asymmetry induction (Escherichia coli), 121, 331
inhibition of proton translocation from O_2-pulsed cells (Anacystis nidulans), 123, 358
-reactive ATP synthase subunit c aspartyl-residue, effect on F_o conformation (Escherichia coli), 120, 527
1,2-Didecanoylglycerol
effect on phospholipases A_2 and C (human platelets), 121, 386
Dielectric permittivity
and elastomeric force in elastin crosslinked polypentapeptide coacervate, temperature dependence, correlation, 125, 1082
2,4-Dienoyl-CoA reductase
role in linoleate oxidation (rat cardiac mitochondria), 118, 162
Diet
2(3)-tert-butyl-4-hydroxyanisole, glutathione S-transferase isozyme induction (murine intestine), 119, 1015
carbohydrate, effect on glucose-6-phosphate dehydrogenase synthesis (rat hepatocytes), 120, 1022
cholesterol, effect on mevalonate metabolism by sterol and nonsterol pathways (male chicks), 122, 945
chronic alcohol, effect on lipid peroxidation, role in hydroxyl radical generation (rat hepatic microsomes), 118, 233
Cu-deficient, Cu and Zn molecular localization (fetal rat liver), 118, 697
fasting, induction of glucose-1,6-bisphosphate synthesis impairment (rat pancreatic islets), 119, 543
high fructose, and insulin, malic enzyme regulation, comparison (diabetic rat), 121, 730
starvation, effect on metabolite-induced phosphofructokinase activation (rat liver), 118, 567
Di(2-ethylhexyl)phthalate, see Bis(2-ethylhexyl) phthalate
Diethylnitrosamine, see N-Nitrosodiethylamine
N,N-Diethyl-2-[(4-phenylmethyl)-phenoxy]-ethane•HCl
synthetic, binding affinity for microsomal antiestrogen binding site and uterine estrogen receptor (rat hepatic microsomes), 123, 724
Diethylpyrocarbonate, see Pyrocarbonic acid diethyl ester
3,3'-Diethylthiocarbocyanine
fluorescent response in liposome membranes, lipid composition effect, 123, 178
DL-α-Difluoromethyllysine
inhibition of Mycoplasma dispar growth, reversal by cadaverine, 125, 205
Digalactosyl diacylglycerol
unsaturated, bilayers, with 1,6-diphenyl-1,3,5-hexatriene, angle-resolved fluorescence depolarization (spinach leaves), 123, 352
Digitalis
-like substance, circulating, increase in DOCA-salt hypertension (rat), 122, 129
Diglyceride kinase
activity in photoreceptor cells (Drosophila norpA mutants), 119, 389
Digoxin
firefly luciferin-enhanced luminescent horseradish peroxidase immunoassay, 119, 481
7,8-Dihydrobenzo[a]pyrene
aliphatic carbons, stereoselective hydroxylation by hepatic microsomes (rat), 124, 114
9,10-Dihydrobenzo[a]pyrene
aliphatic carbons, stereoselective hydroxylation by hepatic microsomes (rat), 124, 114
Dihydrofolate reductase, see Tetrahydrofolate dehydrogenase
Dihydropyridine receptors
voltage-dependent Ca^{2+} channel, purification with probe (+)[^{3}H]-PN 200-110 (rabbit skeletal muscle transverse tubules), 122, 1357
Dihydroteleocidin B
DNA fragmentation inhibition, mechanism (C3H 10T 1/2 fibroblasts), 118, 392
Dihydrotestosterone
conversion to 5α-androstan-3β,17β-diol and 5α-androstan-3α,17β-diol, ethanol effect (rat Leydig cells), 121, 558
5α-Dihydrotestosterone
effect on progesterone metabolism by ovarian granulosa cells (rat), 119, 694
Dihydroxyacetone-phosphate acyltransferase
deficiency in
brain, liver, and cultured skin fibroblasts (Zellweger syndrome patients), 120, 179

Zellweger syndrome (human), 123, 1054
7β,8α-Dihydroxy-9α,10α-epoxy-7,8,9,10-tetrahydrobenzo[a]pyrene
enantiomers, adduct formation with DNA, conformation and kinetics (bovine thymus), 122, 33
9-[(1,3-Dihydroxy-2-propoxy)methyl]-guanine
and recombinant human interferons, synergistic inhibition of herpes simplex virus type 2, 120, 66
1,25-Dihydroxyvitamin D
attenuation of cAMP response to isoproterenol and forskolin (human U937 cells), 123, 210
1,25-Dihydroxyvitamin D_3
effect on
alkaline phosphatase activity and collagen synthesis (murine MC3T3-E1 osteoblastic cells), 119, 767
clonal osteosarcoma cells, enhancement by sodium butyrate (rat), 121, 796
plasminogen activator stimulation (rat osteoblast-rich calvarial cells, osteogenic sarcoma cells), 122, 230
production: caffeine, theophylline, and dibutyryl cAMP effects, comparison (chick renal tubules), 121, 355
selective inhibition of medullary thymocyte mitogenic stimulation (mouse), 123, 163
1,25-Dihydroxyvitamin D_3 receptors
isolation and characterization (human mononuclear blood cells), 120, 199
localization in mitotically active lymphocytes (rat thymus), 121, 277
1α,25-Dihydroxyvitamin D_3, see Calcitriol
Diisopropylfluorophosphate, see Isoflurophate
4,4'-Diisothiocyano-2,2'-disulfonic acid stilbene
effect on degranulation and superoxide anion production by neutrophils (human), 120, 964
Diltiazem
effect on mechanical activity in skeletal muscle fibers (mouse, rat), 122, 1091
-like effect of thioridazine on [^{3}H]-nitrendipine binding to Ca channel site in myocardial membranes (rat), 121, 657
d-cis-Diltiazem
effect on [^{3}H]dihydropyridine binding to skeletal muscle transverse-tubular membranes (rabbit), 123, 41
Dimethylaniline monooxygenase (N-oxide-forming)
hepatic and pulmonary, immunocytochemistry and substrate activity, comparison (rabbit), 125, 116
7,12-Dimethylbenz[a]anthracene, see 9,10-Dimethyl-1,2-benzanthracene
7,12-Dimethylbenz[a]anthracene 5,6-epoxide
enantiomers: resolution, absolute configuration, and enzymatic hydration mechanism (rat hepatic microsomes), 125, 539
9,10-Dimethyl-1,2-benzanthracene
-induced mammary tumor, tyrosine protein kinase inhibition by quercetin (rat), 123, 1227
-transformed cells, L-glutamine-controlled nucleic acid and polyphosphate metabolism, protease role (human, mouse), 124, 6
N,N-Dimethylformamide
-induced glutathione depletion and growth inhibition, reversal by L-cysteine (human colon carcinoma cells), 122, 798
2,3-Dimethylmaleic anhydride
-induced two-step dissociation of 6S procarboxypeptidase A (bovine pancreas), 121, 162
Dimethylnitrosamine demethylase
expression, natural variation between strains (Drosophila), 123, 907
Dimethyl sulfoxide
-induced differentiation
inhibition by
diacylglycerols and phospholipase C (Friend erythroleukemia cells), 125, 491
1α,25-dihydroxyvitamin D_3 (Friend erythroleukemia cells), 119, 807
phospholipase activity (human histiocyte cell line U937), 118, 217
Diolein
protein kinase-C stereospecific activation, 122, 818
Dioxygen
-cytochrome c oxidase reaction sites, CO-bound mitochondria, ir spectra (blowfly flight muscle; bovine heart, brain; porcine heart; rat kidney), 123, 247
Dipalmitoyl phosphatidylcholine
vesicles, amphotericin B incorporation, antibiotic selectivity enhancement: circular dichroism and permeability analysis, 125, 360
Dipeptidyl carboxypeptidase
inhibition by

azapeptides, 122, 791
ketomethyldipeptides
analysis, 124, 141
effect of α-aminoketone moiety chemical modifications, 124, 148
metabolism and subcellular localization in cultured monocytes (human), 124, 843
and renin, identification in Leydig cells (rat testes), 122, 1337
ipeptidyl carboxypeptidase inhibitors
conformationally constrained, design, 125, 82
iphenyl
meta-hydroxylation, cytochrome P-450-catalyzed, intramolecular isotope effects and deuterium retention (rat liver), 118, 867
.6-Diphenyl-1,3,5-hexatriene
in unsaturated digalactosyl diacylglycerol bilayers, angle-resolved fluorescence depolarization (spinach leaves), 123, 352
,1-Diphenylhydrazine
N-nitrosodiphenylamine formation by hepatic microsomes (rat), 118, 958
iphenylmethane
derivative: probe for definition of antiestrogen-binding site biological role (human MCF-7 breast cancer cells), 124, 244
iphtheria toxin
A chain, covalently linked to monoclonal antibody f(ab)' fragment, immunotoxin for Acanthamoeba castellanii, 125, 25
conformation, salt effect, fluorescence characterization, 120, 286
,3'-Dipropylthiocarbocyanine
fluorescent response in liposome membranes, lipid composition effect, 123, 178
ipyramidole
effect on adenine nucleoside efflux and influx in adenosine deaminase-deficient lymphoma cells (human), 121, 514
iradylglycerols
protein kinase-C activation, structural and chemical specificity (murine brain), 125, 163
ispase
proteolytic activity, lymphoma cell electrofusion facilitation (mouse), 120, 138
isulfide bonds
intramolecular, atrial natriuretic factor-related peptides, role in aldosterone secretion inhibition (rat adrenal glomerulosa cells), 122, 171
requirement for atrial natriuretic factor activity (rat heart), 119, 524
Dithiobis(succinimidyl propionate)
crosslinking with RNA polymerase II, quaternary structure analysis (wheat germ), 121, 680
Divicine
acetylcholinesterase inactivation, mediation by Cu ions (human erythrocyte ghosts), 122, 297
glutathione, NADH, and NADPH in vitro oxidation, 120, 747
DNA
adduct formation with anti-benzo[a]pyrene diol epoxide enantiomers, conformation and kinetics (bovine thymus), 122, 33
adenovirus type-5, replication initiation and elongation, inhibition in vitro and in vivo by actinomycin D (HeLa cells), 121, 1033
affinity for isopeptidase (Chinese hamster DON cells), 122, 1296
alkaline transfer from agarose gel to plastic membrane (rat), 122, 340
binding to thyroxine and triiodothyronine receptors, comparison (rat liver), 124, 29
-binding proteins
HU-type, isolation, characterization, and comparison (Agrobacterium tumefaciens, Rhizobium japonicum, R. meliloti), 121, 471
isolation, characterization, and comparison with proteins H1 and B1 (Escherichia coli), 119, 1147
-binding sites, location on RNA polymerase II (wheat germ), 125, 569
biotin-labeled, binding site identification on surface membranes (human neutrophils), 122, 1034
catenation, topoisomerase II-catalyzed, inhibition by VM-26 and VP-16-213 (rat hepatoma cells), 122, 165
cellular, effects of ethidium bromide and bleomycin synergistic interactions (murine L1210 leukemia cells), 120, 156
chlorpromazine effects (murine PY815 mastocytoma cells), 125, 184
complementary (cDNA)
apolipoprotein A-II, clone nucleotide sequence (human), 123, 1
apolipoprotein A-II precursor, isolation and characterization (human), 120, 734
carbamoylphosphate synthetase (ammonia), demonstration of mRNA regulation by glucocorticosteroids and cAMP (rat liver), 124, 882
cardionatrin, clone isolation and

nucleotide sequence (rat), 122, 1076
cytochrome c oxidase nuclear-coded subunit mRNA, clone construction (rat liver), 118, 902
cytochrome P-450e and P-450b coding and 3' noncoding sequences and cytochrome P-450e-like genes, segmental homologies (rat liver), 118, 655
cytochrome $P\text{-}450_{scc}$ mRNA, molecular cloning (bovine adrenal), 120, 264
elastin, with translated sequences, clone construction and characterization (ovine), 118, 261
epidermal growth factor receptor, preparation from A431 carcinoma cells (human), 124, 125
ß-glucocerebrosidase, clone isolation from bacteriophage λ_{gt11} expression system (human), 123, 574; erratum, 125, 843
glycine methyltransferase, molecular cloning and mRNA quantitation in various tissues (rat), 124, 44
hepatic catalase, molecular cloning and nucleotide sequence (rat), 122, 831
lysosomal α-D-glucosidase mRNA, molecular cloning (monkey testes), 119, 252
maternal RNA, evolutionary conservation (sea urchins), 123, 278
myosin heavy chain, poly(A)+ RNA transient species detection during terminal differentiation (chick breast muscle), 120, 741
prealbumin
cloning and sequence analysis (human liver), 124, 558
use in diagnosis of familial amyloidotic polyneuropathy (human), 125, 636
probe, identification of renin mRNA (murine testes), 125, 662
for protein expressed in embryo and chemically-induced pancreatic B-cell tumor, molecular cloning and characterization (rat), 124, 164
steroid 21-hydroxylase, use in porcine enzyme peptide sequence alignment (bovine), 125, 734
transducin γ-subunit, isolation and partial nucleotide sequence (bovine), 124, 250
transferrin, molecular cloning and sequence analysis (human), 119, 273
crosslinked by mitomycin C, nitrogen mustard, and decarbamoyl mitomycin C, sensitivity to alkaline conditions (human fibroblasts), 123, 549
damage, radiation-induced, microelectrophoretic analysis (Chinese hamster fibroblasts, murine lymphoma cells), 123, 291
denaturation temperature, effects of high-mobility-group proteins 1 and 2 (bovine thymic nuclei), 120, 782
cis- and trans-diamminedichloroplatinum (II)-modified, S1 nuclease sensitivity: effects of nucleotide sequence and cytosine and guanine content (calf thymus, Micrococcus lysodeikticus), 124, 367
double-stranded (dsDNA)
release from acetic anhydride-modified nucleosomes (chicken erythrocytes), 121, 907
trp operator-Trp holorepressor interactions, protein distribution analysis (Escherichia coli), 119, 926
duplex, self-complementary, $[d\text{-}GGAATTCC]_2$, nonexchangeable ^1H NMR, resonances, assignment by 2D nuclear Overhauser effect spectra, 119, 663
elongation, aminoglycoside antibiotic effect (Escherichia coli), 122, 460
fragmentation, inhibition by epidermal growth factor and tumor promoters, mechanisms (C3H 10T 1/2 fibroblasts), 118, 392
genomic
atrial natriuretic factor, cloning (human), 125, 797
replication, periodic loss of metabolically unstable DNA (CHO cells), 119, 920
segments containing H1 histone genes, variations in organization (human), 124, 988
S_1-nuclease mapping, Lepore fusion gene ß-type large intervening sequence determination (Lepore-Boston patients), 120, 116
-histone complexes, fluorescence spectra (bovine thymus), 122, 656
hydropathic amino acid anti-complementarity, codon role, 121, 203
labeled with [^{3}H]thymidine, excretion by tonsillar lymphocytes in vitro, concomitant lymphocytic reversion to resting state (human), 125, 1110
-mediated gene transfer, efficiency

in cell cycle S-phase (mouse), 118, 310
metabolically unstable, periodic loss during chromosomal DNA replication (CHO cells), 119, 920
mitochondrial, co-linear organization (mouse, Pleurodeles waltlii, Xenopus laevis), 122, 918
nascent, in simian virus-40 chromatin, protein crosslinking, induction by diisopropylfluorophosphate (CV-1 cells), 123, 271
negatively supercoiled
isolation from tomato golden mosaic virus-infected plants (Nicotiana benthamiana), 118, 747
S1 nuclease sensitivity, enhancement by netropsin (simian virus 40), 124, 388
oriC sequences, -binding proteins, detection (Escherichia coli), 125, 600
repair, and deoxynucleoside triphosphate pools, 3-aminobenzamide effects (human fibroblasts), 124, 457
repetitive fragments
distribution in genome (human placenta), 124, 400
and transcribable sequences, in vitro transcribed 6-S RNA, pseudouridylic modification (salmon), 124, 514
ribonucleotide channeling, analysis in leukemic L1210 cells, 123, 656
sequence autonomous replication in Saccharomyces cerevisiae (Phanerochaete chrysosporium), 118, 821
short fragments, secretion by phytohemagglutinin-stimulated lymphocytes, 5'-end analysis (human peripheral blood), 118, 140
single-stranded, release from acetic anhydride-modified nucleosomes (chicken erythrocytes), 121, 907
strand breaks
esterification to 5'-thymidine aldehyde, hydrogen abstraction by neocarzinostatin, 122, 642
induction in vitro by aphidicolin and deoxycoformycin (human lymphocytes), 120, 959
naturally occurring, repair, ADP ribosylation role (murine lymphocytes), 122, 366
unintegrated proviral, Kirsten murine leukemia virus, characterization and cloning (murine NIH/3T3 fibroblasts), 119, 150
NA glycosylase
O^2-methylthymidine repair (Escherichia coli), 120, 1
DNA ligase, see Polydeoxyribonucleotide synthetase (ATP)
DNA nucleotidylexotransferase
inhibition by quinolone antibiotics (chicken thymus), 121, 762
DNA nucleotidyltransferase, see DNA polymerase
DNA polymerase
-associated 3' to 5' exonuclease activity (phage φ29), 123, 1019
identification and solubilization from nuclear matrices (normal, regenerating rat liver), 124, 917
induction by 5-iododeoxyuridine (Burkitt lymphoma-derived cells), 123, 1170
RNA-dependent, lymphadenopathy associated virus-associated, characterization, 121, 126
synthesis by poly(A)$^+$ RNA translation in vitro (bovine thymus), 122, 420
Zn content and effects (bacteriophage T7), 122, 1410
DNA polymerase α
activity in isolated nuclear matrix (Ehrlich ascites cells), 118, 609
inhibition by quinolone antibiotics (chicken thymus), 121, 762
stimulation by dexamethasone combined with tamoxifen (chick oviduct), 124, 57
DNA polymerase ß
activity in isolated nuclear matrix (Ehrlich ascites cells), 118, 609
inhibition by quinolone antibiotics (chicken thymus), 121, 762
DNA polymerase inhibitor
Moloney leukemia virus, mechanism (78A-1, HeLa cells), 123, 299
DNA synthesis
actin antibody-stimulated, effects of prostaglandins E_1 and $F_{2\alpha}$ (murine L cells), 124, 23
effect of uv-induced changes in deoxynucleoside triphosphate pool (Chinese hamster ovary cells), 123, 742
endoplasmic reticulum nuclease effect in vitro (rat liver), 121, 62
L-glutamine-controlled, in cells transformed by 9,10-dimethyl-1,2-benzanthracene, simian virus 40, or H-ras oncogene, protease role (human, mouse), 124, 6
granulosa cell, comparative effects of insulin and insulin-like growth factors I and II (porcine ovary), 124, 484
initiation, inhibition by aminoglycoside antibiotic (Escherichia coli), 122, 460

stimulation by NaCl (rat gastric mucosa), 121, 1027
unscheduled, uv-induced, age-related changes (rat hepatocytes), 118, 730
DNA topoisomerase
identification and solubilization from nuclear matrices (normal, regenerating rat liver), 124, 917
mitochondrial, isolation and characterization (human leukemic cells), 121, 77
DNA transalkylase
O^4-methylthymidine repair Escherichia coli), 120, 1
Docosahexaenoic acid
metabolism in vitro to lipoxygenase reaction products (canine retina), 125, 741
uptake, release, and metabolism by platelets and neutrophils (human), 120, 907
Dodecenoyl-CoA Δ-isomerase
role in linoleate oxidation (rat cardiac mitochondria), 118, 162
Dopamine
uptake, inhibition by N-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (rat PC12 cells), 119, 1186
Dopamine receptors
pituitary and estradiol-induced pituitary tumor, bromocriptine chronic treatment effects (rat), 123, 312
Down's syndrome
and Alzheimer's disease: cerebrovascular amyloid fibril protein, chemical relationship (human), 122, 1131
Doxorubicin
and epirubicin and mitoxantrone, effects on ATP intracellular concentration and oxygen uptake, comparison (rat heart), 125, 954
generation of oxygen-containing free radicals in vitro, analysis and relationship to cardiotoxicity, 125, 584
Dynorphin[1-8]
distribution, comparison with adrenorphin (rat brain), 120, 1030
Dynorphin A
with single arginine residue, substrate in peptidase assay (Aplysia californica atrial gland), 119, 415; erratum, 124, 994

E

Edema
carrageenan-induced, inhibition by organotin compounds (rat foot), 125, 59
Eicosatetraynoic acid
effect on thromboplastin activity (human monocytes), 119, 179
eIF-2, see Initiation factor-2
Elastase
inhibition by peptidyl carbamate esters (porcine pancreas), 122, 571
Elastin
cDNA clone with translated sequences, characterization (ovine), 118, 26
crosslinked polypentapeptide coacervate: temperature dependence of dielectric permittivity and elastomeric force, correlation, 125, 1082
Elastomeric force
and dielectric permittivity in elastin crosslinked polypentapeptide coacervate, temperature dependence, correlation, 125, 1082
Electrolectins
distribution, genetic and ontogenic variations (female mouse), 119, 801
Electrolysis
-mediated irreversible inactivation of lipoxygenase directed toward electroaffinity labelling (soybean), 123, 156
Electron transfer
reverse, ATP-driven, from succinate to acetoacetate, thermodynamics (rat hepatic mitochondria), 125,
system in plasma membranes, reduction of various oxidants, effect on cell growth (HeLa cells), 125, 64
two-dimensional, from cytochrome c to photosynthetic reaction centers (Rhodopseudomonas sphaeroides), 125, 592
Ellagic acid
inhibition of
glutathione S-transferase in vitro (rat liver), 120, 427
3-methylcholanthrene-induced skin carcinogenesis (BALB/C mouse), 119, 751
Embrinogen
purification and properties (murine embryonal carcinoma F9 cells), 119, 758
Endocytosis
tuftsin by macrophage cells, receptor-mediated (mouse), 119, 203
Endoglycosidase F
and trypsin, effect on band 4.5 and [^{3}H]cytochalasin B-photolabeled proteins, comparison

(human erythrocyte membranes), 122, 218
Endonucleases
Ca^{2+},Mg^{2+}-dependent, cycloheximide, puromycin, and actinomycin-D effects (rat hepatic nuclei), 119, 618
Endopeptidase
selective, detection and characterization with fluorogenic peptidyl substrates (Plasmodium berghei), 124, 703
substance P-hydrolyzing, purification and characterization (human cerebrospinal fluid), 125, 244
Endopeptidase I
heat and sodium dodecyl sulfate effects (Bacillus sphaericus NCTC 9602), 120, 448
Endoribonuclease VI
noncompetitive inhibition by cytidine-2'-phosphate (Artemia larvae), 121, 408
β-Endorphin
COOH-terminal segment, receptor specificity (human neuroblastoma cells), 120, 873
^{3}H-labeled, opioid and nonopioid receptor identification in NG108-15 cells (human), 122, 428
β-Endorphin receptors
specificity for β-endorphin COOH-terminal segment (human neuroblastoma cells), 120, 873
Endothelial cells
anionic growth factors, purification and characterization (human brain), 124, 262
aortic, cultured, glycoprotein secretion and interaction with blood platelets (bovine), 123, 114
capillary and large vessel,identification of IGF-I, IGF-II, and insulin receptors (bovine), 124, 203
cultured, binding to apolipoprotein E-free high-density lipoprotein, characterization (human), 122, 785
vascular, role in prostaglandin E_2 and I_2 production in isolated renal arteries (canine), 118, 873
Enkephalinamides
D-alanine-leucine, leucine, and methionine: complexes with 18-crown-6-ether in $CDCl_3$, δ-opioid receptor environment simulation, NMR spectroscopy, 121, 456
Enkephalins
[D-Ala^2-D-Leu^5]- and [D-Ala^2-MePhe^4-Gly-ol^5]-, binding to opioid receptors, demonstration by computer modeling and quantitative analysis (rat brain), 122, 265
-containing proteins, high-molecular-weight, recognition by synthetic proenkephalin peptide (bovine adrenal medulla), 120, 650
leucine-, see Leucine-enkephalin
opiate receptor recognition, effect of aromatic group stereo-orientation (rat cerebral membranes), 121, 966
cis-Δ^3-trans-Δ^2-Enoyl-CoA isomerase, see Dodecenoyl-CoA Δ-isomerase
Enterotoxins
heat-stable, amino acid sequence (Yersinia enterocolitica), 125, 845
purification procedure and characterization (Clostridium difficile), 124, 690
Epidermal growth factor
binding
to hepatic microsomes and Golgi fractions (human), 119, 1181
nonresponsive in 3T3 variants, cocultivation effect on complementation (mouse), 118, 60
DNA fragmentation inhibition, mechanism (C3H 10T 1/2 fibroblasts), 118, 392
forms I and II, chemical characterization (murine saliva), 125, 218
hybrid proteins with ricin and ricin A-chain, role of binding ligand in toxicity, internalization, and protein synthesis inhibition (A431 cells), 124, 551
^{125}I-labeled, binding, internalization, and mitogenic response: monensin effects (human fibroblasts), 124, 585
plasminogen activator stimulation (rat osteoblast-rich calvarial cells, osteogenic sarcoma cells), 122, 230
Epidermal growth factor receptors
affinity, reduction by heterologous ligands: role of phosphoinositide breakdown and protein kinase C activation (Swiss 3T3 cells), 123, 377
cDNA, preparation from A431 carcinoma cells (human), 124, 125
immunoprecipitation by site-specific antibodies to erbB oncogene product (chicken embryo fibroblasts), 123, 797
inactivation by xenotropic pseudotype Kirsten murine sarcoma virus-induced neoplasm (rat kidney), 120, 879

nonfunctional, in Kirsten sarcoma virus-transformed cells (rat kidney), 118, 538
pulmonary, glucocorticoid effects (fetal rabbit), 119, 408
structural domains, phorbol ester-induced threonine phosphorylation, mapping (human), 123, 618
Epidermis, see Skin
Epinephrine
effect on atrial natriuretic factor release in vitro (rat heart), 124, 443
-stimulated glycogenolysis and ureagenesis, insulin effect (euthyroid, hypothyroid rat hepatocytes), 118, 451
vascular effects, role of lipoxygenase products (perfused rat liver), 123, 507
Epirubicin
and doxorubicin and mitoxantrone, effects on ATP intracellular concentration and oxygen uptake, comparison (rat heart), 125, 954
Epithelial cells
cocultured with hepatocytes, long-term acute-phase protein production (adult rat liver), 120, 311
elongated, mammary cuboidal cell-derived, protein synthesis, comparison with mesenchymal cells (rat), 120, 351
Epitopes
conserved and essential, recognition tools: monoclonal antibodies to F_1-ATPase and oligomycin sensitivity-conferring protein (porcine cerebral mitochondria), 123, 254
Epoxide hydrolase
cytosolic and mitochondrial, immunological characteristics, comparison (murine liver), 122, 1434
microsomal, metabolism of 7,12-dimethylbenz[a]anthracene 5,6-epoxide enantiomers, mechanism (rat liver), 125, 539
Epoxides
formation during monosubstituted olefin oxidation by rat hepatic microsomal cytochrome P-450 and heme models, 119, 319
L-trans-Epoxysuccinyl-leucylamido (4-guanidino) butane
thiol protease inhibitor, effect on antibody formation (mouse), 118, 117; erratum, 119, 431
Erythrocytes
A_1 and A_2, chemical basis for distinction: subgroup A_1-specific glycolipid with globo-series structure (human), 124, 523
AMP deaminase complete deficiency, genetic and biochemical analysis (human), 122, 1344
band-3 proteolysis, enhancement by anti-Rh_o(D) binding to membrane (human), 124, 437
with Cad specificity, N-acetylgalactosamine residues, interaction with B_4 lectin (Vicia villosa seeds), 123, 1099
cation transport and Na^+,K^+,Mg^+-ATPase activity (Ornithorhynchus anatinus, Tachyglossus aculeatus), 119, 1161
hydroxyurea-induced damage, modification by radical scavengers (human), 120, 566
insulin receptors, absence of covalent binding by [^{125}I]insulin (human, rat), 123, 849
interaction with cobra venom cardiotoxins (frog skeletal muscle), 124, 629
membranes
band 4.1
phosphorylation, phorbol ester-stimulated (rabbit), 120, 291
-spectrin-actin complex, cytochalasin binding, inhibition by p-hydroxymercuribenzoate, mechanism (human), 122, 244
ceruloplasmin receptor identification (human), 125, 157
cholesterol content, effect on Ca influx through channel (human), 124, 822
phosphoenolpyruvate transport, inhibition by 2,3-bisphosphoglycerate, 2-phosphoglycerate, and 3-phosphoglycerate (human), 122, 609
surface property differences, detection by cell partitioning (human), 120, 250
response to cytoskeletal stress, membrane protein carboxyl methylation role (human), 123, 133
Escherichia coli
arsenite resistance, production by plasmid-encoded arsenite pump, 124, 760
growth inhibition in vitro by sparsomycin, role of inhibitor sulfoxide configuration, 125, 784
membrane potential, effect of macromolecular polylysine, 122, 401
recombinant bacteriophage-infected
rat apolipoprotein-E synthesis, 119, 657
rat transferrin synthesis, 122, 960
in steady state: mean cell diameter,

specific gravity, ß-galactosidase levels, comparison, 124, 625
sculetin
effect on Ca-activated phospholipid-dependent protein kinase (murine epidermal cytosol), 124, 63
stradiol-17ß
-binding plasma proteins, immunohistochemical detection (human mammary carcinoma cells), 118, 488
dissociated regulation of uterine growth and ornithine decarboxylase (rat), 122, 1186
effect on cellular proliferation, mechanism: indirect and negative control on cloned breast tumor cells (nude mouse), 122, 1097
feedback states, luteinizing hormone ß-subunit mRNA regulation (ovine pituitary gland), 122, 1307
-induced pituitary tumor, dopamine receptors, bromocriptine chronic treatment effects (rat), 123, 312
-specific internalization and binding to nuclear matrix (isolated rat uterine cells), 123, 84
stradiol 17ß-dehydrogenase, see Oestradiol 17ß-dehydrogenase
strogen
-binding proteins, cryptic, effect on estrogen receptor distribution analysis (rat uterus), 125, 577
depletion, effect on casein gene expression (adrenalectomized, ovariectomized rats), 125, 682
induction of secretory proteins in vitro and in vivo, analysis (murine Leydig cell tumors), 124, 277
-like effects of dexamethasone combined with tamoxifen (chick oviduct), 124, 57
(photo-)allergic side-effects, role of estrone photosensitized irreversible binding to albumin via hydroperoxide intermediate, analysis (human), 125, 675
strogen receptors
binding affinity of synthetic diphenylmethane derivative (rat uterus), 123, 724
distribution analysis, cryptic estrogen-binding protein effect (rat uterus), 125, 577
levels in breast cancer cells, sodium butyrate effect (human) 119, 132
strone
photosensitized irreversible binding to albumin via hydroperoxide intermediate, role in estrogen (photo-)allergic side-effects, analysis (human), 125, 675
Estrous cycle
prolactin receptor changes (rat mammary gland), 123, 612
Ethanol
effect on
cytochrome P-450 production (Saccharomyces cerevisiae), 123, 186
dihydrotestosterone conversion to 5α-androstan-3α,17ß-diol and 5α-androstan-3ß,17ß-diol (rat Leydig cells), 121, 558
Fe uptake from transferrin by isolated hepatocytes (rat), 125, 824
phospholipid fatty acid composition (murine embryonic neuron cultures), 122, 516
plasma membrane glycoprotein assembly (rat liver), 123, 951
metabolism by placental alcohol dehydrogenase (human), 119, 1047
Ethanolamine
and insulin, effect on glucose oxidation and lipogenesis in vitro, comparison (rat adipocytes), 121, 413
Ether
-linked glyceryl-phosphorylcholine, 1-O-alkyl-2-acetyl-sn-glyceryl-3-phosphorylcholine formation and arachidonic acid freeing (rabbit platelets), 124, 637
Ethidium, see Homidium
Ethidium bromide
and bleomycin, synergistic interactions on cellular DNA and growth inhibition (murine L1210 leukemia cells), 120, 156
N-(Ethoxycarbonyl)-2-ethoxy-1,2-dihydroxyquinoline
bacteriorhodopsin carboxyl group modification, crosslinking analysis (Halobacterium halobium), 124, 565
7-Ethoxycoumarin
O-deethylation, cytochrome P-450-dependent, assay (Saccharomyces cerevisiae), 123, 186
6-hydroxylation, mediation by cytochromes P-448 and P-450, mechanism (rat), 121, 960
O-Ethyl-S-(2-diisopropylaminoethyl)-methylphosphonothionate
analysis of acetylcholinesterase turnover in vivo (rat brain), 123, 71
1-Ethyl-3(3-dimethylaminopropyl)carbodiimide
bacteriorhodopsin carboxyl group modification, crosslinking analysis (Halobacterium halobium), 124, 565
Ethylene glycol bis(ß-aminoethyl ether) NNN',N'-tetracetic acid
inhibition of carbamylcholine-stimulated amylase release (rat pancre-

atic acini), 119, 876
Ethylene glycol tetracetic acid
with ionophore A23187, effect on volume and thiol-stimulated Cl-dependent K^+ transport (ovine erythrocytes), 125, 790
N-Ethylmaleimide
-stimulated Cl-dependent K^+ transport, effects of ionophore A23187 with Ca^{2+} or ethylene glycol tetracetic acid (ovine erythrocytes), 125, 790
Ethylmorphine N-demethylase
polyriboinosinic:polyribocytidylic acid-induced depression, inhibition by actinomycin D or cycloheximide (murine liver), 121, 237
Etoposide
inhibition of topoisomerase II-catalyzed DNA catenation (rat hepatoma cells), 122, 165
Etretinate
effect on D-[^{3}H]galactose incorporation into epidermal glycoproteins (porcine), 121, 364
Exo-1,4-α-D-glucosidase
immobilization supports, keratin and polyamide-coated inorganic matrices (Aspergillus niger C), 121, 220
Exonuclease
3'-5' activity, association with DNA polymerase (phage φ29), 123, 1019

F

Factor VIII
activated, inactivation by activated protein C, inhibition by activated factor IX (human), 125, 177
-von Willebrand factor, plasma and platelet, lectin activity (human), 118, 495
Factor IX
activated, inhibition of activated factor VIII and inactivation by activated protein C (human), 125, 177
Factor X
inactivation by chemical modification of γ-carboxyglutamic acid residues (human), 124, 256
Factor XIIIa
crosslinking of rabbit uteroglobin into higher-molecular-weight proteins (human placenta), 121, 400
FAD (flavin adenine dinucleotide)
requirement for coenzyme F_{420} reduction by hydrogenase (Methanobacterium formicicum), 120, 775
Familial amyloidotic polyneuropathy
amyloid fibril protein amino acid sequence, revision (human), 123, 92
diagnosis by recombinant DNA techniques (human), 125, 636
of Japanese origin, prealbumin-related low-molecular-weight amyloid fibril protein isolation and sequence analysis (human), 125, 622
Fasting, see Diet
Fatty acids
composition in
microsomal lipids after long- and short-term cholesterol feeding, age effect (chick liver), 124, 67
phospholipids, ethanol effect (murine embryonic neuron culture), 122, 516
covalently bound to gastric mucus glycoprotein, effect on
H^+ diffusion (canine), 118, 523
viscosity (canine), 121, 521
interaction with anilinonaphthyl-labeled spectrin, fluorescence analysis, 120, 344
long-chain, oxidation inhibition by methylglyoxal bis(guanylhydrazone) (rat cardiac muscle), 120, 9
unsaturated, effect on protoporphyrinogen oxidation during chlorophyll and heme synthesis (barley, spinach etioplasts, mitochondria), 123, 1157
Fatty acyl-CoA desaturase, see Acyl-CoA desaturase
Fatty acyl-CoA oxidase
activity and H_2O_2 production (Phanerochaete chrysosporium mycelia), 118, 437
Fc receptors
and pharmacologic agents, protein phosphorylation mediation, comparison (murine peritoneal macrophages), 124, 197
Ferredoxin
Cu-facilitated chemiluminescence (spinach), 125, 425
[2Fe-2S] clusters, and Clostridium pasteurianum red paramagnetic protein clusters, structural comparison, resonance Raman spectroscopy (spinach), 119, 828
role in methanol:5-hydroxybenzimidazolylcobamide methyltransferase reductive activation (Methanosarcina barkeri), 118, 760
Ferrichrome
synthetic analog, biological activities (Arthrobacter flavescens, Bacillus subtilis, Ustaliqo sphaerogena), 119, 1191

Ferric ion
reduction, catalysis by NADH:nitrate reductase (squash cotyledons), 125, 52
Ferrioxamine B
reduction, catalysis by NADH:nitrate reductase (squash cotyledons), 125, 52
Ferrocyanide
reduction of lactoperoxidase-H_2O_2 compounds, oxidizing equivalent identification on apoprotein site, 121, 463
Ferrulic acid
glutathione S-transferase inhibition in vitro (rat liver), 120, 427
α-Fetoprotein receptors
surface, identification in breast cancer MCF-7 cells (human), 122, 1322
α-Fetoproteins
-arachidonic acid binding, retinoid and bilirubin interactions (human), 119, 1122
gene expression, tissue-specific regulation (rat kidney, liver), 120, 677
Fibrinogen
-binding region in thrombospondin, isolation (platelets), 119, 1075
genes, analysis (congenital afibrinogenemia patients), 120, 376
Fibroblast growth factors
brain and pituitary, activities on high-performance liquid chromatography systems, comparison (bovine), 119, 311
Fibroblasts
human oncogene-transformed, interferon-induced phenotypic reversion biochemical correlates (mouse), 119, 21
[^{125}I]epidermal growth factor binding, internalization, and mitogenic response: monensin effects (human), 124, 585
inositol phosphate release, stimulation by bradykinin, serum, and vasopressin (human), 123, 663
multiplication, inhibition by structural glycoprotein fraction from rabbit dermis (human, rabbit dermis; murine sarcoma), 125, 509
uptake of 2-deoxyglucose and L-glucose in low concentrations, kinetics (chick embryo), 123, 535
Fibronectins
binding to hyaluronate-binding proteins (chicken cardiac fibroblasts, 3T3 cells), 121, 808
biochemical and functional heterogeneity (human plasma), 119, 1174
carboxy-terminal fragment, isolation and sequence determination (human plasma), 120, 1015
subunit interactions (human plasma), 124, 718
Ficin
inhibition by γ-trace (human), 120, 631
Filamin
phosphorylation, effect of human Ca^{2+}-activated phospholipid-dependent protein kinase (chicken gizzard), 118, 736
Flavocytochrome b_2, see Lactate dehydrogenase (cytochrome)
Flavoproteins
resolved component of NADPH-dependent superoxide radical-generating oxidase, catalytic properties (human neutrophils), 118, 430
Flunarizine
inhibition of calmodulin-dependent cyclic nucleotide phosphodiesterase (bovine brain), 124, 315
N-2-Fluorenylacetamide
cytochrome P-450 and monooxygenase induction (chick embryo), 119, 382
Fluorescein 5'-isothiocyanate
reactive site, Na^+,K^+-ATPase, amino acid sequence (ovine, rat kidney), 125, 767
Fluorescence
calmodulin hydrophobic sites (bovine brain), 119, 1154
carbocyanine dye, in liposome membranes, lipid composition effect, 123, 178
depolarization, angle-resolved, 1,6-diphenyl-1,3,5-hexatriene in unsaturated digalactosyl diacylglycerol bilayers (spinach leaves), 123, 352
glycogen phosphorylase b coenzyme, quenching by ionic solutes, kinetics (rabbit skeletal muscle), 122, 649
quin2, measurement of cytoplasmic free Ca^{2+} in isolated ventricular myocytes at rest and during K^+ depolarization (rat), 122, 1012
5-Fluorodeoxyuridylate
-thymidylate synthetase covalent binary complex, isolation by trichloroacetic acid precipitation, 124, 37
meta-Fluorotyrosine
incorporation by ovalbumin, effect on denaturation (hen), 118, 481
5-Fluorouracil
and 5-fluorouridine, intracellular synthesis of 5-fluorouridine-5'-phosphate, compartmentalization

(murine L1210 leukemia cells), 122, 439
5-Fluorouridine
and 5'-fluorouracil, intracellular synthesis of 5-fluorouridine-5'-phosphate, compartmentalization (murine L1210 leukemia cells), 122, 439
5-Fluorouridine-5'-phosphate
intracellular synthesis from 5-fluorouracil and 5-fluorouridine, compartmentalization (murine L1210 leukemia cells), 122, 439
Follicles
reconstruction, thyrotropin-induced, modulation by insulin (porcine thyroid cell culture), 118, 385
Follicle-stimulating hormone
effect on progesterone metabolism by ovarian granulosa cells (rat), 119, 694
Formate dehydrogenase ($NADP^+$)
nitrate reductase activation (Neurospora crassa nit-1), 121, 1042
Formylmethionine-tRNA
crosslinking, methionyl-tRNA synthetase lysine residue modification (Escherichia coli), 119, 677
Formyl-methionyl-leucyl-phenylalanine
-induced
increase in intracellular free Ca concentration, inhibition by pertussis toxin: role of G protein (rabbit), 124, 644
membrane potential changes (human myeloid leukemia cells, neutrophils), 123, 937
NADPH oxidase activation, potentiation by diacylglycerol (human neutrophils), 125, 367
N-Formyl-L-methionyl-L-leucyl-L-phenylalanine
cyclic tetrameric clusters, superactive activators of lysozyme release from neutrophils (human), 124, 939
effect on leukotriene B_4 association with neutrophil cytoskeleton (rabbit), 124, 963
Forskolin
and A23187, phorbol ester and thyrotropin-releasing hormone, stimulation of prolactin release from pituitary tumor cells, comparison, 123, 735
cAMP response, attenuation by 1,25-dihydroxyvitamin D (human U937 cells), 123, 210
effect on
cAMP and neurotensin release (rat C cells), 120, 540
glucose-induced electrical activity (murine pancreatic B cells), 120, 797
Free radicals
enhancement of phospholipid degradation and lysophospholipid production (rat hepatic lysosomes), 124, 229
oxygen-containing, generation in vitro by 4'-deoxydoxorubicin and doxorubicin, analysis and relationship to cardiotoxicity, 125, 584
Friend erythroleukemia virus
-transformed cells, ß-globin major and minor gene replication during S-phase early interval (mouse), 123, 108
Fructose
dietary, and insulin, malic enzyme regulation, comparison (diabetic rat), 121, 730
pyruvate kinase regulation (rat liver), 119, 671
Fructose-1,6-bisphosphatase
inhibition by fructose 2,6-bisphosphate (Escherichia coli), 119, 1103
molecular weight, re-evaluation (Saccharomyces cerevisiae), 120, 467
Fructose 2,6-bisphosphatase
effect of glucose loading (starved rat), 125, 655
-6-phosphofructo-2-kinase exchange reactions, characterization (rat liver), 123, 749
Fructose 1,6-bisphosphate
-induced phosphofructokinase activation in liver (fed, starved rats), 118, 567
Fructose 2,6-bisphosphate
fructose-1,6-bisphosphatase inhibition (Escherichia coli), 119, 1103
hepatic levels
alterations, role in ketosis development (diabetic mouse), 120, 103
glucose loading effect (starved rat), 122, 529
pentobarbital-anesthesia effect (rat), 122, 1154
-induced phosphofructokinase activation in liver (fed, starved rats), 118, 567
role in glucose metabolism regulation in alloxan-diabetes (rat adrenal gland), 121, 8
α,α-trehalose phosphorylase inhibition (Euglena gracilis), 122, 906
Fructose-bisphosphate aldolase
gene transcription, inhibition by cAMP (rat liver), 125, 135
isozymes A and B, mRNA expression during azo-dye-induced carcinogenesis

(rat liver), 124, 337
type I, purified by Cibacron Blue dye-ligand chromatography, susceptibility to X rays (pigeon, rabbit, rat, trout), 123, 1069
type A, mRNA from skeletal muscle and ascites hepatoma cells, comparison (rat), 119, 575
Fructose-6-phosphate
pathway rate, relationship to glucose-6-phosphate concentration (human erythrocytes), 125, 14
Fructose-6-phosphate,2-kinase
hepatic levels, alterations, role in ketosis development (diabetic mouse), 120, 103
Fucosylation
cell surface glycoproteins (rat neonate epidermis), 119, 1028
in membrane glycan biosynthesis, developmental shift from sialylation (rat small intestine microvilli), 125, 546
N$^{\beta}$-Fumarylcarboxyamido-L-2,3-diaminopropionic acid
glucosamine-6-phosphate synthetase inactivation (Salmonella typhimurium LT 2 SL 1027), 120, 865

G

GABA, see γ-Aminobutyric acid
Galactonate
accumulation in galactose-perfused liver (suckling rat), 118, 304
r-Galactono-1,4-lactone
identification in lens (galactose-fed guinea pig), 125, 643
6-O-ß-D-Galactopyranosyl-2-acetamido-2-deoxy-D-galactose
synthesis with immobilized ß-galactosidase (Escherichia coli), 123, 8
Galactose
cell surface residues, role in host cell invasion by Trypanosoma cruzi (murine peritoneal macrophages, rat cardiac myoblasts), 119, 228
-fed guinea pigs, r-galactono-1,4-lactone identification in lens, 125, 643
-perfused liver, galactonate accumulation (suckling rat), 118, 304
terminal α(1→3)-linked, identification in N-acetyllactosamine-type glycopeptides, NMR (bovine), 122, 859
D-Galactose
^{3}H-labeled, incorporation into epidermal glycoproteins, retinoid effects (porcine), 121, 364
ß-D-Galactosidase
cellular levels, comparison with mean cell diameter and specific gravity during steady state (Escherichia coli), 124, 625
immobilized, 6-O-ß-D-galactopyranosyl-2-acetamido-2-deoxy-D-galactose synthesis (Escherichia coli), 123, 8
ß-Galactosides
-binding lectin
monoclonal antibodies, recognition of antigen conformational change (chick embryo), 123, 1179
photochemical crosslinking to polylactosamino-proteoglycan (chick embryo skin), 123, 1215
purification and properties (human placenta), 122, 938
Gamma rays
-induced DNA damage, microelectrophoretic analysis (Chinese hamster fibroblasts, murine lymphoma cells), 123, 291
Gangliosides
composition
in normal and neoplastic melanocytes (human), 120, 500
substrate-adhesion sites (normal, virally transformed Balb/c 3T3 cells), 125, 142
reaction with monoclonal antibody HNK-1 (human peripheral nerve), 122, 1206
Gastric inhibitory peptide
effect on cAMP generation and VIP receptor desensitization in human HGT-1 cells (porcine), 120, 641
Gastric inhibitory peptide receptors
molecular identification by covalent crosslinking (hamster pancreatic ß-cell tumor), 122, 283
specific binding and biological effects (hamster pancreatic ß-cell tumor), 123, 671
Gastrin
^{125}I-labeled, and [^{125}I]cholecystokinin C-terminal octapeptide, binding characteristics, comparison (guinea pig fundic gastric glands), 123, 641
Gaucher's disease
ß-glucocerebrosidase, immunological and isoelectric focusing (human), 120, 325
GDP (guanosine 5'-diphosphate)
^{3}H-labeled, binding, and thermogenin antigen, parallel increases in adipose-tissue mitochondria (cafeteria-fed rats), 122, 1328

Genes
abnormal globin, Hemoglobin Miyada, DNA sequence analysis (human), 119, 968
actin, expression in proliferating L6 myoblasts and differentiated L6 myotubes (rat), 119, 630
α-actin and myosin heavy chain, expression, sodium butyrate effects (rat L6 myoblasts), 125, 1129
apolipoprotein
A-I and C-III, location on chromosome 11 (human), 118, 934
A-II
and C-I, chromosomal localization (human), 125, 299
localization on chromosome 1 (human), 122, 877; 123, 1
C-II
analysis in ApoC-II-deficient patients, 124, 308
localization on chromosome 19 (human), 122, 687
c-abl and c-myc oncogenes, expression, relationship to hemin-mediated erythroid induction and cell proliferation (human leukemic K562 cells), 125, 90
calcitonin
localization on chromosome 11 short arm (human), 120, 493
and related peptide, structure and expression (human lung, medullary thyroid carcinoma cells), 123, 648
casein, expression, estrogen depletion effects (adrenalectomized, ovariectomized rats), 125, 682
c-Ha-ras
and c-Ki-ras and N-ras, expression, increase in diethylnitrosamine-induced hepatocarcinoma (rat), 122, 259
expression in tumors and during carcinogenesis (rat liver), 119, 1096
cloned levansucrase sacB, expression in Escherichia coli minicells (Bacillus subtilis), 119, 795
c-myc, expression
modulation by poly(ADP-ribose)-polymerase inhibitors (HL-60 cells), 119, 473
in tumors and during carcinogenesis (rat liver), 119, 1096
c-ras^H oncogene, hormone-regulated expression (rat mammary carcinomas), 123, 141
cytochrome oxidase polypeptide I, exon-2 coding region identification (Aspergillus nidulans mitochondria), 119, 786
cytochrome P-450e-like, and cytochrome P-450e and P-450b coding and 3' non-coding cDNA sequences, segmental homologies (rat liver), 118, 655
erbB oncogene, protein, site-specific antibodies, epidermal growth factor receptor immunoprecipitation (chicken embryo fibroblasts), 123, 797
α-fetoprotein, tissue-specific regulation (rat kidney, liver), 120, 677
fibrinogen, analysis (congenital afibrinogenemia patients), 120, 376
β-globin, base substitution in IVS-2, β^+-thalassemia induction (Chinese patient), 121, 324
ζ-globin, deletion, reevaluation of causes (American black neonates), 125, 817
glycolytic enzymes, transcription inhibition by cAMP (rat liver), 125, 135
histone H1, -containing genomic DNA sequences, variations in organization (human), 124, 988
H-ras oncogene, -transformed cells, L-glutamine-controlled nucleic acid and polyphosphate metabolism, protease role (human, mouse), 124, 6
human oncogenic, -transformed murine fibroblasts, interferon-induced phenotypic reversion biochemical correlates, 119, 21
hypoxanthine guanine phosphoribosyltransferase, expression inhibition by 5-azacytidine, comparison with other S-phase inhibitors (mouse), 125, 812
ilvH, mutation, threonine deaminase regulatory mutant reversion (Escherichia coli K-12), 118, 270
interferon β, conformational changes during differentiation and viral induction (human MG63 cells, murine PC13 cells), 121, 290
Lepore fusion, β-type large intervening sequence, determination by genomic DNA S_1-nuclease mapping (Lepore-Boston patient), 120, 116
neurohypophysial hormones, analysis of evolution (Didelphis virginiana), 123, 306
paromycin phosphotransferase, from Streptomyces rimosus f. paromomycinus, cloning and expression in S. lividans, 125, 895
procollagen type-I, demethylation by 5-azacytidine, effect on expression (human SVWI-38 cells), 124, 236

segments, chromosome 21, isolation and sublocalization by in situ hybridization (human), 121, 380
sporulation spoOA, product identification (Bacillus subtilis), 122, 1104
src
avian sarcoma virus, pp60^{v-src} product, mitogenic activity (rat kidney), 123, 411
protein, effect on Ca compartments and fluxes in temperature-sensitive Rous sarcoma virus-transformed cells (Fisher rat cells), 125, 337
transferrin, expression in developing non-hepatic tissues (rat), 122, 212
ene transfer
DNA-mediated, efficiency in cell cycle S-phase (mouse), 118, 310
enome
distribution of repetitive DNA fragments (human placenta), 124, 400
sequences in mouse mammary tumor virus tumor cells and lymphocytes from breast cancer patients, comparison, 118, 324
lanzmann's thrombasthenia
glycoprotein expression on platelets (human), 123, 1091
liadin
-derived peptides, agglutinating activity, role in celiac disease pathogenesis (human K562(S) cells), 121, 428
lial cells
histone H1 subfraction accumulation during postnatal development (rat cerebral cortex), 123, 697
substance-P enzymatic degradation in vitro (rat brain), 125, 728
-Globin
mRNA translation, regulation by 50-kDa, 28-kDa, and 24-kDa polypeptide-containing fractions (Krebs-II ascites cell-free system), 120, 804
-Globin
genes
IVS-2 base substitution, β^{+}-thalassemia induction (Chinese patient), 121, 324
major and minor, replication during S-phase early interval (murine erythroleukemia cells), 123, 108
mRNA translation, regulation by 50-kDa, 28-kDa, and 24-kDa polypeptide-containing fractions (Krebs-II ascites cell-free system), 120, 804
ζ-Globin
gene deletion, reevaluation of causes (American black neonates), 125, 817
Globins
abnormal gene, Hemoglobin Miyada, DNA sequence analysis (human), 119, 968
γ-Globulins
post, murine, isolation and characterization, comparison with human equivalent, 122, 111
Glucagon
effect on cytochrome redox states in mitochondria in situ (perfused rat liver), 119, 212
and insulin, effect on pyruvate kinase short-term regulation in vivo and in vitro, comparison (murine, rat hepatocytes), 124, 651
pancreatic, effect on cAMP generation and VIP receptor desensitization in human HGT-1 cells (porcine), 120, 641
-related immunoreactive high-molecular-weight tritiated protein, characterization (fetal bovine pancreas), 125, 524
-stimulated glycogenolysis and ureogenesis, phorbol ester effects (rat hepatocytes), 119, 1128
synthetic analog, glucagon receptor heterogeneity detection (rat hepatocytes), 119, 713
Glucagon receptors
heterogeneity, detection by synthetic peptide probe for high-affinity site (rat hepatocytes), 119, 713
Glucoamylase, see Exo-1,4-α-D-glucosidase
β-Glucocerebrosidase, see Glucosylceramidase
Glucocorticoid receptors
cytosolic, activation, crosslinking effect (chick thymus), 119, 64
-glucocorticoid complexes, dissociation kinetics, dextran-charcoal effect, lipid role (rat thymus), 119, 1134
molybdate-stabilized, purified, protein kinase activity (rat liver), 125, 1067
phosphorylation in vivo (rat liver), 120, 59
purified, phosphorylation by endogenous protein kinase (rat hepatic cytosol), 119, 700
Glucocorticoids
effect on pulmonary epidermal growth factor receptors (fetal rabbits), 119, 408
inhibition of c-sis oncogene-specific

RNA transcripts (ductus deferens smooth muscle tumor cells), 122, 124
-receptor complexes
dissociation kinetics, dextran-charcoal effect, lipid role (rat thymus), 119, 1134
nuclear binding, enhancement by ATP-stimulated factor (rat hepatic cytosol), 121, 940
Glucocorticosteroids
regulation of carbamoylphosphate synthetase (ammonia) mRNA levels, demonstration with specific cDNA (rat liver), 124, 882
Glucosaminephosphate isomerase (glutamine-forming)
inactivation by N^{β}-fumarylcarboxyamido-L-2,3-diaminopropionic acid (Salmonella typhimurium LT 2 SL 1027), 120, 865
Glucosamine-6-phosphate synthetase, see Glucosaminephosphate isomerase (glutamine-forming)
Glucosaminidase
neutrophil-independent secretion, stimulation by platelet-activating factor (rat), 125, 980
Glucose
^{13}C-labeled, intragastric utilization, kinetic analysis in vivo by NMR with solenoid transmit/receiver coil (mouse), 123, 882
effect on
ß-adrenergic-induced downregulation of insulin receptor binding (isolated human fat cells), 122, 97
Mn-superoxide dismutase (murine brain, heart), 122, 682
-induced electrical activity, forskolin effect (murine pancreatic B cells), 120, 797
inhibition of insulin release by pancreatic ß-cells, induction by blockage of glucose-promoted Ca^{2+} uptake (mouse), 125, 875
loading, effect on
enzymes regulating hepatic carbohydrate metabolism (starved rat), 125, 655
fructose 2,6-bisphosphate hepatic levels (starved rat), 122, 529
metabolism
pentose phosphate pathway, alloxan diabetes effect (rat heart), 118, 110
regulation in alloxan diabetes, fructose-2,6-bisphosphate role (rat adrenal gland), 121, 8
oxidation, insulin and ethanolamine effects in vitro, comparison (rat adipocytes), 121, 413
phospholipid methylation stimulation (rat pancreatic islets), 122, 706
pyruvate kinase regulation (rat liver), 119, 671
-stimulated pancreatic islets
effect on lipid-associated Ca ionophores in plasma membrane (rat), 118, 601
endogenous phospholipases C and A_2, activities (neonatal rats), 120, 820
utilization by 3T3 adipocytes, human growth hormone effect, 125, 237
L-Glucose
in low concentration, uptake by fibroblasts, kinetics (chick embryo), 123, 535
Glucose-1,6-bisphosphate
synthesis impairment, fasting-induced (rat pancreatic islets), 119, 543
Glucose-6-phosphatase
regulation by insulin mediator (rat hepatic microsomes), 118, 40
Glucose-6-phosphate
concentration, relationship to hexose monophosphate pathway rate (human erythrocytes), 125, 14
transport system in hepatic microsomal membranes, defect in glycogen storage disease Ib (human, rat), 119, 593
Glucose-1-phosphate adenylyltransferase
inhibition by GTP (Escherichia coli), 122, 289
Glucose-6-phosphate dehydrogenase
carboxy-terminal end, amino acid sequence (human erythrocytes), 118, 332
monoclonal antibody preparation, cross-reactive material identification (rat hepatoma cell lines), 118, 854
synthesis induction by dietary carbohydrates (rat hepatocytes), 120, 1022
α-Glucosidase, see α-D-Glucosidase
α-D-Glucosidase
lysosomal, mRNA cloning (monkey testes), 119, 252
Glucosylceramidase
cDNA clones, isolation from bacteriophage λ_{gt11} expression system (human), 123, 574; erratum, 125, 843
normal and Gaucher disease, immunological analysis and isoelectric focusing (human), 120, 325
ß-Glucuronidase
stimulation by Ca^{2+} (rat hepatic lysosomes, microsomes), 121, 987

Glutamate decarboxylase
identification in uterine tissues (rabbit, rat), 125, 18
Glutamate synthase
ferredoxin- and NAD(P)H-dependent forms, separation and kinetic analysis (tomato leaves), 122, 1125
Glutamic acid decarboxylase
inhibition by phosphorylcholine and phosphorylethanolamine (murine brain, kidney, liver), 122, 277
Glutamic-oxaloacetic transaminase, see Aspartate aminotransferase
L-Glutamine
control of nucleic acid and polyphosphate metabolism in cells transformed by 9,10-dimethyl-1,2-benzanthracene, simian virus 40, or H-ras oncogene, protease role (human, mouse), 124, 6
Glutamine synthetase
adenylated and unadenylated, Mn-Mn interaction (Escherichia coli), 120, 939
γ-L-Glutaminyl-4-hydroxybenzene
ribonucleotide reductase inhibition in L1210 leukemia cells (Agaricus bisporus), 120, 1008
Glutaminyl-peptide γ-glutamyltransferase
crosslinking of rabbit uteroglobin into higher-molecular-weight proteins (guinea pig liver), 121, 400
Glutathione
conjugation with arylnitroso compound, detection of labile intermediates in situ by fast-atom bombardment mass spectrometry, 124, 1
depletion
N,N-dimethylformamide- and N-methylformamide-induced, reversal by L-cysteine (human colon carcinoma cells), 122, 798
in lymphoma cells with L-buthionine-S-R-sulfoximine, effect on proliferation in tissue culture (mouse), 123, 626
oxidation in vitro by divicine, 120, 747
in peroxidase-catalyzed acetaminophen metabolism, thiyl radical formation, 125, 109
synthesis, inhibition in vitro by L-buthionine sulfoximine (rat hepatic cytosol, mitochondria), 123, 1116
uptake by intestinal brush border membranes, analysis (porcine jejunum), 123, 929
Glutathione-insulin transhydrogenase, see Protein-disulphide reductase (glutathione)
Glutathione reductase (NAD(P)H)
identification of recognition site for $NADP^+$ 2'-phosphate (yeast), 124, 572
stimulation by 12-O-tetradecanoylphorbol-13-acetate, regulation by vitamin A (murine epidermis), 125, 967
Glutathione transferase
comparison with erythrocyte-derived equivalent and relationship with carotene, cholesterol, and retinol (human platelets), 122, 407
effects of cyclic 12-, 8-, and 6-carbon compounds (mouse), 120, 637
inhibition by
ciprofibrate in vitro and in vivo (rat liver), 123, 1012
plant phenols in vitro (rat liver), 120, 427
isozymes
A_2 and C_2, kinetic and stereochemical recognition of arene and azaarene oxides, comparison (rat liver), 121, 980
induction by dietary 2(3)-tert-butyl-4-hydroxyanisole (murine intestine), 119, 1015
purified, inhibition by indomethacin (rat liver), 119, 1034
purification and characterization
human erythrocytes, 125, 1053
rat cardiac cytosol, 123, 981
rat hepatic cytosol, 121, 1014
Glutathione S-transferase, see Glutathione transferase
Glyburide
pyruvate dehydrogenase complex activation (rat cardiac mitochondria, ventricular slices), 123, 202
Glycans
intestinal microvillus membrane, biosynthesis, developmental shift from sialylation to fucosylation (rat), 125, 546
Glyceraldehyde-phosphate dehydrogenase
mRNA, nucleotide sequence (chicken muscle), 118, 767
Glyceraldehyde-3-phosphate dehydrogenase, see Glyceraldehyde-phosphate dehydrogenase
Glycerol
matrix, with amino acids, SIMS spectra, hydrophobicity effect, 123, 27
pyruvate kinase regulation (rat liver), 119, 671
Glycerol 3-phosphate acyltransferase
activity in pulmonary microsomes (normal, hyperoxic rats), 119, 995

Glycerophosphate acyltransferase
location in mitochondrial outer membrane transverse plane (guinea pig lung), 123, 569
Glyceryl-phosphorylcholine
ether-linked, 1-O-alkyl-2-acetyl-sn-glyceryl-3-phosphorylcholine formation and arachidonic acid freeing (rabbit platelets), 124, 637
Glycine methyltransferase
cDNA, molecular cloning and mRNA quantitation in various tissues (rat), 124, 44
Glycogen
synthesis inhibition by Zn^{2+} (fasted rat hepatocytes), 122, 726
Glycogenolysis
α_1-adrenergic stimulation, phorbol ester effects (rat hepatocytes), 119, 1128
epinephrine-stimulated, insulin effect (euthyroid, hypothyroid rat hepatocytes), 118, 451
12-O-tetradecanoylphorbol-13-acetate effect (rat liver), 122, 1057
Glycogen phosphorylase
synergistic activation by A23187 and phorbol esters (rat hepatocytes), 119, 88
Glycogen phosphorylase b
coenzyme fluorescence, quenching by ionic solutes, kinetics (rabbit skeletal muscle), 122, 649
Glycogen storage disease
Ib, glucose-6-phosphate transport system defect in hepatic microsomal membrane (human, rat), 119, 593
role of phosphorylase kinase-deficiency (human heart), 119, 582
Glycogen synthase kinase-1, see Casein kinase-1
Glycolipids
blood group A, with globo-series structure, subgroup A_1-specific: chemical basis for A_1 and A_2 distinction (human erythrocytes), 124, 523
composition during development, thyroxine and cortisone effects (postnatal murine small intestine), 119, 1168
Glycopeptides
N-acetyllactosamine-type, identification of terminal $\alpha(1\rightarrow3)$-linked galactose, NMR (bovine), 122, 859
growth-regulating, identification on cerebral cortex cell surface with monoclonal antibodies (bovine, mouse), 124, 133
Glycoproteins
α_1-acid, see Orosomucoid
assembly (Leishmania mexicana), 118, 1
cell surface, fucosylation (rat neonate epidermis), 119, 1028
epidermal, D-[^{3}H]galactose incorporation, retinoid effects (porcine), 121, 364
expression on platelets from normal subjects and patients with congenital bleeding disorders, 123, 1091
gastric mucosal
H^+ diffusion, associated lipid and covalently-bound fatty acid effects (canine), 118, 523
viscosity, lipid and protein effects (canine), 121, 521
-glycosphingolipid hybrids, identification and characterization (canine gastric epithelium), 125, 211
large-molecular-weight regulating factor for chromatin-dependent RNA polymerase II reactions, isolation and characterization (rat hepatic cytoplasm), 125, 286
plasma membrane, assembly, ethanol effects (rat liver), 123, 951
secretion by cultured aortic endothelial cells, interactions with blood platelets (bovine), 123, 114
structural, extracted from rabbit dermis, fibroblast multiplication inhibition (human, rabbit dermis; murine sarcoma), 125, 509
Glycosphingolipids
-glycoprotein hybrids, identification and characterization (canine gastric epithelium), 125, 211
Glycosylation
lens proteins (diabetic, nondiabetic senile cataract patients), 123, 888
mutants, altered binding of insulin receptors (Chinese hamster ovary cells), 125, 70
non-enzymatic, effect on α-crystalline tertiary structure (bovine), 123, 899
Glycosyltransferases
thyrotropin differential effects (porcine thyroid cells), 118, 910; erratum, 119, 1211
Glyoxalase I, see Lactoyl-glutathione lyase
Glyoxylate
and L-cysteine or L-cysteinylglycine, formation of thiazolidine-2-carboxylate derivatives: substrates for D-aspartate oxidase (bovine kidney), 125, 1039
Golgi fractions
hepatic
epidermal growth factor and insulin binding (human), 119, 1181

insulin uptake in vivo, analysis by diaminobenzidine-shift protocol (rat), 123, 1144
Gonadotropin
human chorionic, see Human chorionic gonadotropin
Gonadotropin receptors
free and occupied, fate in culture during recovery from human chorionic gonadotropin stimulation (porcine Leydig cells), 118, 206
Gonadotropin-releasing hormone
and agonist, effects on polyphosphoinositide metabolism (rat granulosa cells), 122, 1289
degradation by GnRH-secreting hypothalamic cells in vitro, analysis (fetal rat), 124, 87
-like peptides, biological activity (rat testes), 122, 1071
Gonadotropin-releasing hormone inhibitors
ovulation long-term inhibition at low dosage (rat), 118, 351
Gonadotropin-releasing hormone receptors
in control and desensitized pituitary cells, photoaffinity labeling (female rat), 125, 532
Gossypol
-induced superoxide radical formation (human sperm, rat liver), 118, 573
(+)Gossypol
binding to proteins, CD spectroscopy (Thespesia populnea), 121, 953
Gramicidin A
analog, des-L•Val^{7}-D•Val^{8}-, single channel conductance dispersity, side-chain orientation role, 118, 885
crystalline and membrane-bound, vibrational analysis (Bacillus brevis), 125, 919
Gramicidin S
^{1}H-^{13}C selective NOE analysis, 124, 739
ornithine side-chain, hydrogen bonding, 118, 643
Granulosa cells
differentiation and DNA synthesis, comparative effects of insulin and insulin-like growth factors I and II (porcine ovary), 124, 484
GRF, see Growth hormone-releasing factor
Growth factors, see also specific growth factors
endothelial cell, anionic, purification and characterization (human brain), 124, 262
inhibitory and stimulatory, identification in hepatic membranes (mouse), 120, 891
thymocyte-specific, purification (bovine thymus), 120, 420
Growth hormone, see Somatotropin
Growth hormone-releasing factor
(1-29)-amide and analogs, in vivo potencies in rat and pig (human pancreas), 119, 265
analogs, human pancreatic, administration in vivo, enhancement of pituitary cell response to GRF in vitro (rat), 124, 217
human
C-terminal-deleted analogs, synthesis and in vitro bioactivity (rat anterior pituitary cells), 123, 854
position-1-substituted analogs, synthesis and bioactivity in vitro (rat anterior pituitary cells), 122, 304
isolation, sequence analysis, and total synthesis in
caprine and ovine hypothalamus, 125, 606
rat hypothalamus, 125, 1005
long-term administration, effect on growth hormone secretion and synthesis in vitro (rat anterior pituitary cells), 121, 111
stimulation of neurotensin, calcitonin, and cAMP release (rat C cells), 123, 497
GTP (guanosine 5'-triphosphate)
ADP-glucose synthetase inhibition (Escherichia coli), 122, 289
α_2-adrenergic receptor sensitivity, preservation after receptor solubilization by zwitterionic detergent (bovine cerebral cortex), 119, 1116
-stimulated adenylate cyclase, anion and cation effects (rabbit heart), 118, 561
GTPase
receptor-mediated stimulation by opiates (morphine-dependent, normal rat brain), 121, 641
Guanidinium chloride
-induced phosphoglycerate kinase unfolding-folding transition, analysis (equine muscle), 118, 416
Guanine nucleotides
content in cis- and trans-diamminedichloroplatinum (II)-modified DNAs, effect on S1 nuclease sensitivity (bovine thymus, Micrococcus lysodeikticus), 124, 367
modulation of surface membrane cAMP-binding sites (Dictyostelium discoideum), 124, 597
muscarinic receptor insensitivity, Cu ion- and diamide-induced (rat ce-

rebral cortical membranes), 120, 271
Guanylate cyclase
cation-dependent activation by prolactin in various organs (rat), 123, 1084
inhibition by methylxanthines and papaverine (rat brain, liver, lung), 123, 1194

H

Haem oxygenase (decyclizing)
induction by bis(tri-N-butyltin)oxide (rat intestine), 119, 1022
regulation, biliverdin role (rat liver), 122, 40
Halorhodopsin
and bacteriorhodopsin, amplitudes of flash-induced absorption changes, comparison, 122, 91
forms in alkaline solution (Halobacterium halobium), 118, 502
Halothane
-induced lipid peroxidation, hypoxia role (rat hepatic microsomes), 119, 139
Haptoglobin
long-term production by hepatocytes cocultured with epithelial cells (adult rat liver), 120, 311
Heart
cell-to-cell electrical coupling, effect of cAMP intracellular injection (canine), 119, 1001
isolated and intact preparations, effects of dihydropyridine Ca channel modulators: pharmacological and radioligand binding correlations (canine, guinea pig, porcine, rat), 125, 387
myocardial coenzyme Q_{10} levels, microanalysis (bovine, canine), 123, 1165
Hematoporphyrin
nonphotosensitized potentiation of horseradish peroxidase-catalyzed H_2O_2-mediated NADPH oxidation to $NADP^+$, 118, 191
Heme
metabolism, regulation, biliverdin role (rat liver), 122, 40
model systems, monosubstituted olefin oxidation: aldehyde, epoxide, and allylic alcohol formation, 119, 319
orientational heterogeneity in deuterohemin-reconstituted hemoglobin, ^1H NMR (equine, human), 119, 640
synthesis, protoporphyrinogen oxidation, effect of unsaturated fatty acids (barley, spinach etioplasts, mitochondria), 123, 1157
Heme oxygenase, see Haem oxygenase (decyclizing)
Hemin
-mediated erythroid induction, relationship to cell proliferation and c-abl and c-myc oncogene expression (human leukemic K562 cells), 125, 90
Hemoglobin
activation of Ca^{2+}-dependent neutral proteinase, structural requirements (human erythrocytes), 123, 331
derivatives, aquomet-, nitrosyl-, and des-Arg(α141)-, quaternary structure, high-pressure NMR (human), 121, 229
deuterohemin-reconstituted, heme orientational heterogeneity, ^1H NMR (equine, human), 119, 640
free, uptake by parenchymal cells (rat liver), 123, 489
Lepore-Boston, fusion gene ß-type intervening sequence, determination by genomic DNA S_1-nuclease mapping (human), 120, 116
Miyada, abnormal globin gene, DNA sequence analysis (human), 119, 968
reaction with hydrogen peroxide, nitroxide radical oxidation (bovine blood), 120, 534
synthesis induction, effect on tRNA levels (Friend leukemia cells), 120, 707
Hemopexin
long-term production by hepatocytes cocultured with epithelial cells (adult rat liver), 120, 311
Heparin
-binding 23-kDa thrombospondin fragment, antibodies, platelet aggregation inhibition (bovine), 124, 290
carboxyl group modification, effect on circular dichroism spectrum, 123, 973
-Sepharose affinity chromatography, separation of lipoprotein lipase and monoacylglycerol lipase (bovine brain), 122, 1241
Heparin cofactor II
lysine residues, covalent modification with pyridoxal 5'-phosphate, effect on activity (human plasma), 124, 745
Hepatectomy
partial
effect on transferrin receptors in regenerating cells (rat), 121, 717
serum hepatocyte growth factor puri-

fication and characterization (rat), 122, 1450
Hepatocyte growth factor
serum, purification and characterization (hepatectomized rats), 122, 1450
Hepatocytes
aflatoxin B_1 distribution and intracellular translocation in vitro (rat), 122, 1
cocultured with hepatic epithelial cells in serum-free medium, long-term acute-phase protein production (adult rat), 120, 311
cytosolic and mitochondrial glutathione synthesis, inhibition in vitro by L-buthionine sulfoximine (rat), 123, 1116
fetal, maturation in vitro, retinoic acid role (rat), 118, 168
Fe uptake from transferrin in vitro, ethanol effect (rat), 125, 824
growth in culture, L-proline effect (rat), 122, 884
injury prevention, extracellular Ca role (rat), 121, 102
mitochondria, role in cellular autofiltration (rat), 119, 955
$mRNA_{S14}$ synthesis in primary culture, stimulation by triiodothyronine, 123, 1122
Herpes simplex viruses
inhibition by spermidine catecholamide Fe chelators, 121, 848
Herpes simplex virus type 2
replication, synergistic inhibition by 9-[(1,3-dihydroxy-2-propoxy)methyl] guanine with recombinant human interferons, 120, 66
Hexachlorobenzene
-induced experimental porphyria, mitochondrial structural and functional properties (rat liver), 118, 356
Hexachlorophene
interaction with spin-labeled membranes (rat brain), 120, 434
Hexadecane
enhancement of 2,3,7,8-tetrachlorodibenzo-p-dioxin toxicity (rat), 125, 996
1-O-Hexadecyl-2-acetyl-sn-glycerol
stimulation of HL-60 promyelocytic leukemia cell differentiation to macrophage-like cells (human), 122, 824
1-O-Hexadecyl-2-O-acetyl-sn-glycero-3-phosphocholine
isolation and characterization (human neutrophils), 121, 815
Hexokinase
inhibition by P^1-(adenosine-5')-P^3-(glucose-6)-triphosphate binding to discrete regulatory site (rat brain), 118, 90
ß-Hexosaminidase, see ß-N-Acetyl-D-glucosaminidase
Hexose monophosphate, see Fructose-6-phosphate
High-density lipoproteins
apolipoprotein E-free, binding to cultured endothelial cells, characterization (human), 122, 785
effect on very-low-density lipoprotein lipolysis in vitro (human), 121, 946
Histamine
-mediated Ca^{2+} mobilization and cGMP synthesis, correlation (neuroblastoma cells), 122, 333
release from mast cells, synergistic role of Ca^{2+} mobilization and protein kinase-C activation (rat peritoneum), 121, 573
Histidine
and phenylalanine ring stacking in angiotensin II, interaction, role in receptor activation, NMR, 122, 434
residues, iodothyronine 5'-deiodinase active site, identification (rat hepatic microsomes), 120, 28
Histidine radicals
repair by vitamin-E analogs, 119, 245
Histidyl-tRNA synthetase
purification and inhibition by myositis-specific Jo-1 autoantibody (rat liver), 120, 15
Histone H1
effect on phosphorylase b kinase dephosphorylation by latent protein phosphatase (rabbit muscle), 125, 293
genes, containing genomic DNA sequences, variations in organization (human), 124, 988
and HMG8, phosphorylation by protein kinase C, kinetic parameters (rat brain), 122, 1268
phosphorylated by phospholipid, Ca^{2+}-dependent protein kinase, protein phosphatase specificity, catalytic subunit role (rat liver), 118, 278
role in nucleosome orientation maintenance in chromatin fiber (bovine thymus), 122, 1021
subfractions
accumulation in glial and neuronal cells during postnatal development (rat cerebral cortex), 123, 697
reassociation with rat hepatic chromatin, effect on structure: elec-

tric birefringence and relaxation time measurements (bovine liver), 121, 530
subtypes, isolation and characterization (chicken erythrocyte chromatin), 122, 1136
Histones
acetylation, sodium butyrate effect (human breast cancer MCF-7 cells), 119, 132
binding affinity for isopeptidase (bovine thymus), 122, 1296
core, non-structural domains, role in nucleosome orientation maintenance in chromatin fiber (bovine thymus), 122, 1021
-DNA complexes, fluorescence spectra (bovine thymus), 122, 656
silver staining, mechanism, role of clustered lysine residues (bovine thymus), 123, 729
Homidium
intercalation with poly d(G-C)•d-(G-C), NMR and stopped-flow kinetic analysis, 122, 804
Homoserine dehydrogenase II
-aspartokinase II polypeptide chain, triglobular structure (Escherichia coli), 123, 16
Hormones, see also specific hormones
melanin-concentrating, synthesis and biological activities (Anolis carolinensis, Rana pipiens, teleost fishes), 122, 613
-regulated expression, c-ras^H oncogene (rat mammary carcinomas), 123, 141
thymic peptide, conjugation with spermidine and spermine, conjugate properties, 122, 21
Horseradish peroxidase, see Peroxidase
Human chorionic gonadotropin
-stimulated
free and occupied gonadotropin receptors, fate in culture during recovery (porcine Leydig cells), 118, 206
protein phosphorylation in primary culture (porcine Leydig cells), 118, 8
α-subunit, free and combined form, discrimination by O-linked oligosaccharide, 122, 1260
Hyaluronate
-binding proteins, binding to collagen, fibronectin, and laminin (chicken cardiac fibroblasts, 3T3 cells), 121, 808
Hybridomas
formation between myeloma cells and splenocytes, effect of myeloma pretreatment with Colcemid (mouse), 124, 903
identification of particulate protein synthesis factors and translatable mRNA (mouse), 122, 1307
4-Hydrobenzoic acid
incorporation of ^{18}O-enriched water during 4-chlorobenzoate dehalogenase reaction (Pseudomonas), 124, 178
Hydrocortisone
production stimulation by 12-tetradecanoyl-phorbol-13-acetate and Ca^{2+} ionophore A23187 (bovine adrenocortical fasciculata cell suspension), 121, 499
Hydrogenase
coenzyme F_{420} reduction, FAD requirement (Methanobacterium formicicum), 120, 775
H_2-oxidizing (uptake), purification and properties (Clostridium pasteurianum W5), 122, 9
Ni-Fe, isolation and characterization (Desulfovibrio multispirans sp. n. cytoplasm), 125, 1025
role in methanol:5-hydroxybenzimidazolylcobamide methyltransferase reductive activation (Methanosarcina barkeri), 118, 760
Hydrogen belts
interactions in phosphatidylcholine membrane bilayers during cholesterol dissociation, 118, 743
Hydrogen ion
abstraction by neocarzinostatin during 5'-thymidine aldehyde formation on DNA, 122, 642
bonding to gramicidin-S ornithine side chains, 118, 643
diffusion in gastric mucus glycoprotein, associated lipid and covalently-bound fatty acid effects (canine), 118, 523
from NADPH, stereospecific incorporation in arachidoyl-CoA elongation (porcine cerebral microsomes), 124, 322
-Na^+ exchange
amiloride-sensitive, activation by chemotactic factors (human neutrophils), 122, 755
increase in NaCl-adapted cells (Synechococcus 6311), 122, 452
role in
phorbol ester-stimulated 2-deoxy-D-glucose uptake by lymphocytes (rat thymus), 124, 14
platelets activated by ionophore A23187 (human), 125, 1123
stimulation by vanadate (A431 cells), 118, 675
production, Na_2S role (Nostoc muscorum)

123, 1138
Hydrogen peroxide
generation, and fatty acyl-CoA oxidase activity (Phanerochaete chrysosporium mycelia), 118, 437
-horseradish peroxidase-tyrosine system: bityrosine production and identification, 125, 916
inactivation of Fe-superoxide dismutase, effect on tryptophan residues (Pseudomonas ovalis), 122, 635
-lactoperoxidase compounds, reduction by ferrocyanide, oxidizing equivalent identification on apoprotein site, 121, 463
-mediated horseradish peroxidase-catalyzed NADPH oxidation to $NADP^+$, non-photosensitized potentiation by hematoporphyrin, 118, 191
with prostaglandin H synthase, 13-cis-retinoic acid cooxidation (ram seminal vesicle microsomes), 124, 430
reaction with hemoglobin, nitroxide radical oxidation, 120, 534
role in
Cu^{2+}-dependent Mn-catalase inactivation by hydroxylamine (Lactobacillus plantarum), 124, 75
granulomatous inflammation induced by Schistosoma mansoni eggs (murine lung), 122, 184
Hydrolases
vascular lysosomal, neutrophil-independent secretion, stimulation by platelet-activating factor (rat), 125, 980
Hydrolysis
light-mediated, phosphatidylinositol 4,5-bisphosphate (isolated frog retina), 124, 503
10ß-Hydroperoxide
intermediate in photosensitized irreversible binding of estrone to albumin, role in estrogen (photo-)allergic side-effects, analysis (human), 125, 675
6ß-Hydroperoxyandrostenedione
de novo biosynthesis (human placental microsomes), 118, 805
13-Hydroperoxy-9-cis-11-trans-octadecadienoic acid
with prostaglandin H synthase, 13-cis-retinoic acid cooxidation (ram seminal vesicle microsomes), 124, 430
1-Hydroperoxy-5-phenyl-4-pentane
with prostaglandin H synthase, 13-cis-retinoic acid cooxidation (ram seminal vesicle microsomes), 124, 430
Hydroxamate
siderophores, -mediated Fe uptake, stereospecificity (Escherichia coli), 121, 922
Hydroxocobalamin
isomerization, biological implications (human), 125, 698
L-α-Hydroxyacid oxidase
analysis in Zellweger syndrome (human), 123, 1054
3-Hydroxyacyl-CoA epimerase, see 3-Hydroxybutyryl-CoA epimerase
4-Hydroxybenzoate:polyprenyl transferase
stimulation by polyprenyl pyrophosphate transport protein (rat mitochondria), 119, 1109
3-Hydroxybutyryl-CoA epimerase
role in linoleate oxidation (rat cardiac mitochondria), 118, 162
7ß-Hydroxycholesterol
effect on 3-hydroxy-3-methylglutaryl-coenzyme A reductase and cell membrane fluidity (cultured hepatoma cells), 120, 192
toxicity, cholesterol antagonistic effect (rat hepatoma cells), 120, 657
25-Hydroxycholesterol
effect on 3-hydroxy-3-methylglutaryl-coenzyme A reductase and cell membrane fluidity (cultured hepatoma cells), 120, 192
22R-Hydroxydesmosterol
toxicity, cholesterol antagonistic effect (rat hepatoma cells), 120, 657
11-Hydroxy-4,7,9-(trans)13,16,19 docosahexaenoic acid
formation during docosahexaenoic acid metabolism in vitro (canine retina), 125, 741
Hydroxylamine
Cu^{2+}-dependent Mn-catalase inactivation, hydrogen peroxide role (Lactobacillus plantarum), 124, 75
24-Hydroxylase
rapid and sensitive in vitro assay (rat kidney homogenates), 121, 174
Hydroxylation
-dehalogenation, 4-chlorobenzoate, origin of incorporated oxygen (Arthrobacter sp.), 124, 669
stereoselective, 7,8- and 9,10-dihydrobenzo[a]pyrene aliphatic carbons by hepatic microsomes (rat), 124, 114
1'-Hydroxylation
bufuralol, stereoselectivity: characterization of cytochrome P-450 debrisoquine-sparteine type genetic polymorphism (human liver), 125, 374

6-Hydroxylation
7-ethoxycoumarin, mediation by cytochromes P-448 and P-450, mechanism (rat), 121, 960
meta-Hydroxylation
biphenyl, cytochrome P-450-catalyzed, intramolecular isotope effects and deuterium retention (rat liver), 118, 867
ß-Hydroxyleucine
incorporation by ovalbumin, effect on denaturation (hen), 118, 481
Hydroxyl radicals
generation, chronic alcohol feeding effect, role in lipid peroxidation (rat hepatic microsomes), 118, 233
p-Hydroxymercuribenzoate
inhibition of cytochalasin binding by human erythrocyte membrane spectrin-band 4.1-actin complex and rabbit muscle F-actin, mechanism, 122, 244
7-Hydroxymethotrexate
formation in lymphoblastic CCRF-CEM cells (human), 122, 1212
3-Hydroxy-3-methylglutaryl CoA reductase
and membrane fluidity, growth-rate-related and hydroxysterol-induced changes (cultured hepatoma cells), 120, 192
topography (rat hepatic microsomes), 119, 772
3-Hydroxy-3-methylglutaryl-CoA reductase (NADPH)
allosteric activators, structural requirements (rat hepatic microsomes), 125, 902
phosphorylation, enhancement of susceptibility to proteolytic degradation in vitro (rat hepatic microsomes), 125, 629
regulation by bicyclic phosphorylation cascade (human hepatic microsomes), 119, 488
ß-Hydroxy-ß-methylglutaryl-CoA synthase
and acetoacetyl-CoA thiolase, -deficient mutants, isolation and characterization (yeast), 123, 424
3-Hydroxy-N-methylmorphinan receptors
d- and l-forms, -mediated GTPase stimulation (morphine-dependent, normal rat brain), 121, 641
L-Hydroxyproline
formation by L-proline hydroxylation (Streptomyces griseoviridus P8648 cell-free extract), 120, 45
Hydroxypyridinium
crosslinks, identification and localization in type-IX collagen (bovine cartilage), 123, 1033
Hydroxyurea
-induced erythrocyte damage, modification by radical scavengers (human), 120, 566
N-Hydroxyurea
genotoxic metabolite formation, cytochrome P-450-dependent monooxygenase role (rat hepatoma cells), 118, 409
25-Hydroxyvitamin D_3
metabolism in vitro by sarcoid granulomas (human), 123, 822
19-nor-10-keto-25-hydroxyvitamin D_3 formation (canine renal cell culture), 120, 919
25-Hydroxyvitamin D_3-1α-hydroxylase
rapid and sensitive in vitro assay (rat kidney homogenates), 121, 174
Hyperoxia
effect on vascular cyclooxygenase in vitro, kinetic analysis (human umbilical cord), 125, 170
Hypertension
-associated protein, purification (rat plasma), 125, 888
DOCA-salt, increase of circulating digitalis-like substance (rat), 122, 129
spontaneous, N-(P-substituted phosphinoyl) synthetic peptide antihypertensive activity (rat), 119, 1205
Hyperthermia
effect on poly(ADP-ribose) metabolism (murine SVT2 cell culture), 122, 1381
Hypophosphatemic osteomalacia
X-linked, vitamin D-dependent Ca-binding protein identification in intestinal cell cytosol (mouse), 119, 850
Hypotension
induction by adenosine and derivatives in rabbit cardiac extracts (anesthetized rat), 125, 1074
Hypothalamic cells
gonadotropin-releasing hormone-secreting, GnRH degradation in vitro, analysis (fetal rat), 124, 87
Hypothyroidism
increased insulin effect on epinephrine-stimulated glycogenolysis and ureogenesis (euthyroid, hypothyroid rat hepatocytes), 118, 451
Hypoxanthine guanine phosphoribosyltransferase
gene expression, inhibition by 5-azacytidine, comparison with other S-phase inhibitors (mouse), 125, 812
Hypoxia
effect on

glycerol 3-phosphate acyltransferase and serine palmitoyltransferase activities (rat pulmonary microsomes), 119, 995
vascular cyclooxygenase in vitro, kinetic analysis (human umbilical cord), 125, 170
-induced platelet-activating factor release (rat pulmonary alveolar fluid), 119, 58
role in halothane-induced lipid peroxidation (rat hepatic microsomes), 119, 139

I

Idebenone
lipoperoxidation inhibition, mechanism (rat cerebral mitochondria), 125, 1046
Imidazole
induction of cytochrome P-450 ethanol-inducible form (rabbit hepatic microsomes), 124, 375
(E)-3[4-(1-Imidazolylmethyl)phenyl]-2-propenoic acid
acyl side-chain shortening, role of peroxisomal ß-oxidation system (rat hepatocytes), 125, 123
Imipramine
^{3}H-labeled, high-affinity binding site identification (human lung), 120, 926
Imipramine N-oxide
reduction, cytosolic aldehyde oxidase and microsomal cytochrome P-450 roles (mammalian liver), 121, 749
Immunoglobulins
B-lymphocyte membrane, complexing, enhancement of B-cell tyrosine residue phosphorylation (human), 125, 859
hyposialylated, role in α_1-proteinase inhibitor inactivation (human), 119, 185
IgA, effect on gastric mucus glycoprotein viscosity (canine), 121, 521
IgE
-anti IgE system, 36-kDa membrane protein immunoprecipitation (rat basophilic leukemia cells), 125, 867
firefly luciferin-enhanced luminescent horseradish peroxidase immunoassay (human), 119, 481
IgG2, and acid and aglycosyl conformers, binding-fluorescence analysis with 8-anilinonaphthalene-1-sulfonic acid (human), 124, 605
surface membrane, antibodies, immature B-lymphocyte nonresponsiveness, pronase effect (mouse), 119, 1
Indole-3-acetic acid
reduction of lipid peroxidation in coleoptiles: effect on malondialdehyde levels (Avena sativa L.), 125, 76
Indomethacin
effect on thromboplastin activity (human monocytes), 119, 179
purified glutathione S-transferase isozyme inhibition (rat liver), 119, 1034
Inhibin
partial purification and characterization (bovine follicular fluid), 125, 307
Initiation factor-2 (eIF-2)
and co-eIF-2, stimulation of Met-tRNA$_f$ binding to 40-S ribosomes (rabbit reticulocytes), 122, 1418
phosphorylation, insulin-induced decrease, effect on protein synthesis (bovine chondrocytes), 121, 134
Initiation factor-2α (eIF-2α)
heme-regulated and dsRNA-dependent protein kinases, effect on protein synthesis (human reticulocytes), 119, 891
Inorganic pyrophosphate
effect on Ca^{2+} efflux from mitochondria (rat heart), 118, 147
Inositol
uptake by isolated Schwann cells (rat), 120, 486
Inositol-1-phosphate
^{3}H-labeled, carbachol- and norepinephrine-induced accumulation, inhibition by phorbol esters (rat hippocampal slices), 123, 703
Inositol phosphates
release from fibroblasts, stimulation by bradykinin, serum, and vasopressin (human), 123, 663
Inositol(1,4,5)triphosphate
Ca^{2+} release induction (rat hepatic microsomes), 120, 858
effect on intracellular Ca^{2+} release (porcine coronary artery), 120, 481
Inositol-trisphosphate
induction of intracellular Ca^{2+} increase in ventral photoreceptors (Limulus), 125, 1137
Insulin
binding to hepatic microsomes and Golgi fractions (human), 119, 1181
cellular uptake and surface binding, concanavalin-A effects (isolated

rat hepatoma cells), 122, 204
cholesterol 7α-hydroxylase sensitivity (diabetic, normal rat liver), 124, 896
and dietary fructose, malic enzyme regulation, comparison (diabetic rat), 121, 730
effect on
apical and basolateral cell membrane resistance in vitro (toad kidney), 124, 614
ATP-citrate lyase phosphothreonine dephosphorylation (rat epididymal fat pads), 122, 1047
epinephrine-stimulated glycogenolysis and ureogenesis (euthyroid, hypothyroid rat hepatocytes), 118, 451
and ethanolamine, effect on glucose oxidation and lipogenesis in vitro, comparison (rat adipocytes), 121, 413
and glucagon, effect on pyruvate kinase short-term regulation in vivo and in vitro, comparison (murine, rat hepatocytes), 124, 651
^{125}I-labeled, absence of covalent binding to receptors in erythrocytes and reticulocytes (human, rat), 123, 849
induction of
initiation factor-2 phosphorylation decrease, effect on protein synthesis (bovine chondrocytes), 121, 134
ovarian immunoprecipitable receptor ß-subunit-specific phosphorylation (cultured porcine granulosa cells), 120, 144
and insulin-like growth factors I and II, comparative effects on granulosa cell differentiation and DNA synthesis (porcine ovary), 124, 484
-like peptides, common high-affinity receptor identification by insulin growth factor-II binding (human lymphoid cells), 118, 774
-modulated thyrotropin-induced follicle reconstruction and iodine metabolism (porcine thyroid cell culture), 118, 385
mutants [Ser^{B24}] and [Ser^{B25}], receptor binding and biological activity (human), 119, 49
receptor downregulation (neonatal rabbit brain), 120, 359
regulation of
insulin-like growth factor-II binding to pancreatic receptors, intracellular Ca^{2+} role (diabetic mouse), 119, 359
pyruvate kinase (rat liver), 119, 671
surface insulin receptors, recycling pathway role (rat hepatocytes), 119, 706
release by
pancreatic ß-cells
dihydropyridine effects (rat), 123, 1062
inhibition by glucose, induction by blockage of glucose-promoted Ca^{2+} uptake (mouse), 125, 875
pancreatic islets, effect of Bordetella pertussis toxin, 124, 190
homogenous magnetic fields (rat), 122, 191
-releasing tetrapeptides, isolation and characterization (lipodystrophic diabetes patient urine), 122, 103
role in control of ornithine transcarbamylase postnatal increase (rat liver), 123, 317
-stimulating peptide, isolation from bovine serum albumin tryptic digests, characterization, 122, 1179
stimulation of
insulin receptor subunit phosphorylation, inhibition by Nα-p-tosyl-l-arginine methyl ester and Nα-benzoyl-l-arginine ethyl ester (human placenta, rat adipocytes), 119, 465
neurotransmitter amino acid uptake by synaptosomes, role in neuromodulation (rat brain), 119, 1198
uptake by Golgi fractions in vivo, analysis by diaminobenzidine-shift protocol (rat liver), 123, 1144
Insulin-like growth factor I
effect on granulosa cell differentiation and DNA synthesis, comparison with insulin and insulin-like growth factor II (porcine ovary), 124, 484
Insulin-like growth factor-I receptors
identification on capillary and large vessel endothelial cells (bovine), 124, 203
and insulin receptors, subunit structure, comparison (rat insulinoma cells), 124, 657
-mediated tyrosine kinase stimulation (rat hepatic BRL 3A2 cells), 119, 6
Insulin-like growth factor II
binding to
lymphoid cells, insulin-like peptide common high-affinity receptor identification (human), 118, 774

pancreatic receptors, regulation by cholecystokinin and insulin, intracellular Ca^{2+} role (diabetic mouse), 119, 359
effect on granulosa cell differentiation and DNA synthesis, comparison with insulin and insulin-like growth factor I (porcine ovary), 124, 484
Insulin-like growth factor-II receptors
identification on capillary and large vessel endothelial cells (bovine), 124, 203
Insulin mediator
glucose-6-phosphatase regulation (rat hepatic microsomes), 118, 40
Insulin receptors
antibodies, inhibition of insulin-induced progesterone biosynthesis (cultured porcine granulosa cells), 120, 144
downregulation
ß-adrenergic-induced, glucose effect (isolated human fat cells), 122, 97
by insulin (neonatal rabbit brain), 120, 359
erythrocyte and reticulocyte, absence of covalent binding by [^{125}I]-insulin (human, rat), 123, 849
identification
on capillary and large vessel endothelial cells (bovine), 124, 203
and characterization, altered binding in glycosylation mutants (Chinese hamster ovary cells), 125, 70
and insulin-like growth factor-I receptors, subunit structure, comparison (rat insulinoma cells), 124, 657
subunit phosphorylation, insulin-stimulated, inhibition by Nα-p-tosyl-l-arginine methyl ester and Nα-benzoyl-l-arginine ethyl ester (human placenta, rat adipocytes), 119, 465
surface, regulation by insulin, recycling pathway role (rat hepatocytes), 119, 706
Interferon α
cloned human leukocyte, vesicular stomatitis virus inhibition (human amnion U cells), 119, 326
and 9-[(1,3-dihydroxy-2-propoxy)methyl]guanine, synergistic inhibition of herpes simlex virus type 2 (human), 120, 66
Interferon ß
antiproliferative dose, effect on phosphoproteins (human bladder carcinoma cells), 119, 941
and 9-[(1,3-dihydroxy-2-propoxy)methyl]guanine, synergistic inhibition of herpes simlex virus type 2 (human), 120, 66
gene conformation, changes during differentiation and viral induction (human MG63, murine PC13 cells), 121, 290
Interferon γ
and 9-[(1,3-dihydroxy-2-propoxy)methyl]guanine, synergistic inhibition of herpes simlex virus type 2 (human), 120, 66
mRNA levels in fresh lymphocytes and cultured lymphoblasts (human), 119, 157
recombinant, transcriptional control of collagen synthesis (cultured confluent human diploid fibroblasts), 123, 365
role in induction of myeloid leukemic cell differentiation (human), 124, 100
Interferon-γ receptors
photoaffinity labeling (cultured human fibroblasts), 120, 828
Interferons
effect on mutants deficient in nucleoside transport or thymidine kinase activity (murine T-lymphoma S49 cells), 118, 124
hybrid recombinant, murine B-16 melanoma cell differentiation inhibition (human leukocytes), 119, 108
induction of
natural killer cell cytotoxicity, calmodulin role (murine splenic lymphocytes), 121, 478
phenotypic reversion in human oncogene-transformed fibroblasts, biochemical correlates (mouse), 119, 21
xanthine oxidase (mouse), 119, 144
-mediated protein kinase, characterization by polyclonal antibodies (HeLa cells), 125, 1
type I, inhibition of parathormone-stimulated bone resorption (mouse), 120, 553
Interleukin 2
medullary thymocyte stimulation, selective inhibition by 1,25-dihydroxyvitamin D_3 (mouse), 123, 163
mRNA, superinduction by translation inhibitors (human tonsils), 123, 842
Interleukins
and muramyl dipeptide, restoration and stimulation of B-cell antibody response to sheep erythrocytes (mouse), 125, 431

Interphotoreceptor matrix
retinoid-binding protein, synthesis by retina in organ culture, monensin effect (monkey), 118, 789
Iodination
effect on
ovine prolactin receptor binding affinity (rat liver), 121, 686
thyroglobulin structure (human), 121, 310
Iodine
metabolism, thyrotropin-induced, modulation by insulin (porcine thyroid cell culture), 118, 385
5-Iodocytidylyl(3'-5')guanosine
crystalline complex formation with 2-methyl-4-nitroaniline ethylene dimethylammonium hydrobromide, structural analysis, 121, 188
5-Iododeoxyuridine
DNA polymerase induction (Burkitt lymphoma-derived cells), 123, 1170
Iodothyronine deiodinase
inactivation and affinity labeling with N-bromoacetyl-3,3',5-triiodothyronine (rat liver), 124, 475
modification by diethylpyrocarbonate and Rose Bengal, active site histidine residue identification (rat hepatic microsomes), 120, 28
Ionomycin
intraplatelet Ca^{2+} elevation, effect on phospholipases A and C (human), 123, 393
Ionophore A23187
with Ca^{2+} or ethylene glycol tetracetic acid, effect on volume- and thiol-stimulated Cl-dependent K^+ transport (ovine erythrocytes), 125, 790
and 1-oleoyl-2-acetyl-glycerol, synergistic stimulation of superoxide production (human neutrophils), 125, 332
and phorbol ester
and forskolin and thyrotropin-releasing hormone, stimulation of prolactin release from pituitary tumor cells, comparison, 123, 735
glycogen phosphorylase synergistic activation (rat hepatocytes), 119, 88
and 4β-phorbol 12-myristate 13-acetate, synergistic stimulation of superoxide release by neutrophils (guinea pig), 122, 734
platelet activation, role of induced Na^+/H^+ exchange (human), 125, 1123
stimulation of
glycogenolysis and ureagenesis, phorbol ester effects (rat hepatocytes), 119, 1128
platelet-activating factor formation, inhibition by calmodulin antagonists (human neutrophils), 118, 629
and 12-tetradecanoyl-phorbol-13-acetate, cortisol production stimulation (bovine adrenocortical fasciculata cell suspension), 121, 499
Iron
chronic overload in vivo, effect on mitochondrial membrane functional efficiency (rat liver), 124, 462
depletion, role in macrophage-mediated tumor cell cytotoxicity (murine L10, L1210 cells), 123, 716
identification in cytochrome c oxidase preparations (bovine cardiac muscle), 124, 836
-S clusters
-containing NADH dehydrogenase subunits, detection by gel electrophoresis and high-performance gel chromatography (bovine cardiac mitochondria), 120, 237
in spinach ferredoxin and Clostridium pasteurianum red paramagnetic protein, structural comparison, resonance Raman spectroscopy, 119, 828
uptake
hydroxamate siderophore-mediated, stereospecificity (Escherichia coli), 121, 922
from transferrin by isolated hepatocytes, ethanol effect (rat), 125, 824
Iron chelators
spermidine catecholamide, antiherpetic and anti-neoplastic activity (herpes simplex, vesicular stomatitis viruses, L1210 leukemia cells), 121, 848
Islets of Langerhans, see Pancreas
Isobutyraldehyde
horseradish peroxidase-catalyzed chemiluminescent reaction, rate-limiting factors, 122, 28
Isoflurophate
induction of protein crosslinking to nascent DNA in simian virus-40 chromatin (CV-1 cells), 123, 271
Isomerization
hydroxocobalamin, biological implications (human), 125, 698
N^6-Isopentenyladenine
conversion to zeatin (Actinidia tissues), 124, 470
Isopeptidase
chromatin constituent binding affinities (calf thymus, Chinese ham-

ster DON cells), 122, 1296
Isoprenaline, see Isoproterenol
Isoprene
biosynthesis in vitro from mevalonate (rat hepatic cytosolic fraction), 123, 691
Isoproterenol
cAMP response, attenuation by 1,25-dihydroxyvitamin D (human U937 cells), 123, 210
effect on
adenylate cyclase desensitization and ß-adrenergic receptor phosphorylation (duck erythrocytes), 121, 973
ATP-citrate lyase phosphothreonine dephosphorylation (rat epididymal fat pads), 122, 1047
-stimulated
adenylate cyclase, anion and cation effects (rabbit heart), 118, 561
downregulation of insulin receptor binding, glucose effect (isolated human fat cells), 122, 97
internalization of ß-adrenergic receptors, mechanism (BC3H-1 cells), 124, 863
phosphorylation of Ca channel subunit comigratory 42-kDa membrane protein (canine heart), 121, 890
1-(5-Isoquinolinesulfonyl)-2-methylpiperazine
selective inhibition of protein kinase C (rabbit platelets), 125, 258
Isotopes
intramolecular, effect on cytochrome P-450-catalyzed biphenyl meta-hydroxylation (rat liver), 118, 867
Isouramil
acetylcholinesterase inactivation, mediation by Cu ions (human erythrocyte ghosts), 122, 297

K

Kainate
effect on tubulin polymerization in vitro (rat brain), 122, 925
Kallikrein
high-molecular-weight peptide activation (rat atrium), 120, 461
inactive, purification to homogeneity and characterization (rat urine), 122, 1282
-like
activity, reduction in anterior pituitary (New Zealand genetically hypertensive rats), 119, 689
latent serine protease, identification and characterization (human erythrocyte membranes), 121, 722
Keratin
-coated inorganic matrices, glucoamylase immobilization supports (Aspergillus niger C), 121, 220
Keratinocytes
differentiation in vitro, Ca^{2+}-regulated, phospholipd metabolism (mouse), 122, 1234
malignant, arachidonic acid metabolism in vitro, stimulation by melittin (human epidermis), 124, 303
α-Ketoglutarate
cofactor for glutamic-oxaloacetic transaminase (cotton callus cells), 123, 836
Ketomethyldipeptides
inhibition of angiotensin-converting enzyme
analysis, 124, 141
effect of α-aminoketone moiety chemical modification, 124, 148
Ketosis
development, hepatic fructose-2,6-bisphosphate and fructose-6-phosphate,2-kinase roles (diabetic mouse), 120, 103
Kirsten murine leukemia virus
genome characterization and cloning (murine NIH/3T3 fibroblasts), 119, 150
-transformed cells, effect on epidermal growth factor receptors (rat kidney), 118, 538
xenotropic pseudotype, -induced neoplasm, inactivation of epidermal growth factor receptor (rat kidney), 120, 879

L

Laccase
native and type 2-depleted, coupled binuclear Cu active site oxidation by peroxide, X-ray absorption spectroscopy (Rhus vernicifera), 119, 567
α-Lactalbumin
structure, pH-dependence, fluorescence spectroscopy (bovine), 119, 509
Lactase-phlorizin hydrolases
biosynthesis (porcine intestinal mucosal explants), 122, 82
L-Lactate cytochrome c oxidoreductase, see Lactate dehydrogenase (cytochrome)
Lactate dehydrogenase (cytochrome)
-pyruvate binding, redox equilibrium modification with semiquinone stabilization, 118, 753

Lactoperoxidase
-H_2O_2 compounds, reduction by ferrocyanide, oxidizing equivalent identification on apoprotein site, 121, 463
Lactose
operon promoter region, nucleotide sequence, comparison with melibiose operon (Escherichia coli), 121, 41
Lactoyl-glutathione lyase
activity and cell cycle regulation (Saccharomyces cerevisiae), 119, 962; erratum, 121, 420
Lamin B
antibodies, [^{3}H]uridine triphosphate incorporation inhibition (permeabilized murine L cells), 120, 256
Laminin
binding to hyaluronate-binding proteins (chicken cardiac fibroblasts, 3T3 cells), 121, 808
ß-Lapachone
methyl methane sulfonate lethality enhancement (human fibroblasts), 118, 828
Lasalocid A
inhibition of ruthenium red-induced Ca^{2+} efflux from mitochondria (rat liver), 124, 80
α-Latrotoxin
black widow spider venom, binding to phosphoinositide breakdown-coupled receptor (rat pheochromocytoma cells), 121, 538
Laurate ω-hydroxylase
activation by di(2-ethylhexyl) phthalate (rat hepatic microsomes), 121, 304
Lauric acid
peroxisomal oxidation, inhibition by phenothiazines (rat hepatocytes), 120, 505; erratum, 123, 410
L cells
rabbit antiserum-stimulated, palmitic acid N-acylation enhancement in sphingomyelin (mouse), 121, 605
Lead
chronic intoxication, effect on creatine kinase-BB isoenzyme plasma levels (rat), 125, 192
Lectins
activity in Factor VIII/Von Willebrand factor (human plasma, platelets), 118, 495
B_4, interaction with N-acetylgalactosamine residues on Cad erythrocytes (Vicia villosa seeds), 123, 1099
Ca^{2+}-Zn^{2+} derivatives, preparation and characterization, comparison with native form (lentil, pea), 124, 857
ß-galactoside-binding
monoclonal antibodies, recognition of antigen conformational change (chick embryo), 123, 1179
photochemical crosslinking polylactosamino-proteoglycan (chick embryo skin), 123, 1215
purification and properties (human placenta), 122, 938
purification and binding to nitrogen-fixing bacteria from rice rhizosphere (rice embryo), 119, 549
-treated lymphocytes, tyrosine phosphorylation stimulation (human), 124, 682
Leishmania mexicana
temperature-induced differentiation in vitro, induction of heat shock proteins, 125, 755
Lens
proteins
glycosylation (diabetic, nondiabetic senile cataract patients), 123, 888
tyrosine residue microenvironmental change in cold cataract, Raman spectroscopy (rat), 119, 989
spectrin and protein 4.1-like protein identification (bovine, canine, human, rabbit), 119, 726
Leucine
incorporation, effect of methionine analog inhibitors of methionine adenosyltransferase (murine L1210 leukemia cells), 122, 350
Leucine-enkephalin
thioamide analogs, selective receptor recognition, peptide backbone role (guinea pig ileum, murine vas deferens), 120, 305
Leukocytes
polymorphonuclear, see Neutrophils
Leukotriene B_4
association with neutrophil cytoskeleton, chemotactic factor and phorbol ester effects (rabbit), 124, 963
epitope recognized by specific monoclonal antibody, characterization (mouse), 123, 944
exogenous, neutrophil stimulation, effect on metabolism and release of arachidonic acid and platelet-activating factor synthesis (human), 122, 535
-induced
Ca-dependent cell aggregation (Microciona prolifera), 121, 863
increase in intracellular free Ca concentration, inhibition by per-

tussis toxin: role of G protein (rabbit), 124, 644
polymorphonuclear leukocyte chemotactic activity in inflammatory sites, inhibition by dexamethasone (rat), 119, 884
NADPH-dependent catabolism in cell-free neutrophil preparation (human), 125, 615
ω-oxidation by neutrophils, inhibition by CO: role of cytochrome P-450 in catabolism (human), 123, 475
production by polymorphonuclear leukocytes, stimulation by opsonized zymosan particles, inhibition by dexamethasone (rat), 119, 720
Leukotriene C_4
biosynthesis and metabolism, detection by HPLC and radioimmunoassay, 125, 97
^{3}H-labeled, binding inhibition by leukotrienes C_4, D_4, and E_4, serine-borate complex effect (guinea pig brain, lung homogenates), 119, 612
and leukotriene D_4, -mediated $C5a_{desArg}$ anaphylatoxin spasmogenic activity on lung parenchymal strips, cyclooxygenase inhibitor effects, comparison (guinea pig), 125, 852
release, platelet-activating factor-stimulated, inhibition by vasoactive intestinal polypeptide (rat lung homogenates), 125, 105
Leukotriene D_4
biosynthesis and metabolism, detection by HPLC and radioimmunoassay, 125, 97
^{3}H-labeled
binding inhibition by leukotrienes C_4, D_4, and E_4, serine-borate complex effect (guinea pig brain, lung homogenates), 119, 612
and [^{3}H]leukotriene E_4, binding activities, comparison (guinea pig tissues), 122, 949
receptor binding site identification (guinea pig lung homogenates), 118, 20; erratum, 121, 420
and leukotriene C_4, -mediated $C5a_{desARg}$ anaphylatoxin spasmogenic activity on lung parenchymal strips, cyclooxygenase inhibitor effects, comparison (guinea pig), 125, 852
release, platelet-activating factor-stimulated, inhibition by vasoactive intestinal polypeptide (rat lung homogenates), 125, 105
Leukotriene D_4 receptors
binding site identification with [^{3}H]leukotriene D_4 (guinea pig lung homogenates), 118, 20; erratum, 121, 420
Leukotriene E_4
biosynthesis and metabolism, detection by HPLC and radioimmunoassay, 125, 97
^{3}H-labeled, and [^{3}H]leukotriene D_4, binding activities, comparison (guinea pig tissues), 122, 949
[^{3}H]leukotriene D_4 and [^{3}H]leukotriene C_4 binding inhibition, serine-borate complex effect (guinea pig brain, lung homogenates), 119, 612
release, platelet-activating factor-stimulated, inhibition by vasoactive intestinal polypeptide (rat lung homogenates), 125, 105
Leukotrienes
isolation and characterization (human neutrophils), 120, 548
Leumorphin
detection and opioid activity (human brain), 123, 148
Levansucrase
Bacillus subtilis exocellular, precursor characterization (Escherichia coli minicells), 119, 795
Levorphanol, see 3-Hydroxy-N-methylmorphinan
Light
-mediated phosphatidylinositol 4,5-bisphosphate hydrolysis (isolated frog retina), 124, 503
red and near uv, -induced production of rhodopsin-like pigment photochemical intermediate (Halobacterium halobium), 123, 989
Linoleate
degradation, modified pathway (rat cardiac mitochondria), 118, 162
oxidation, 2,4-dienoyl-CoA reductase, cis-Δ^3-trans-Δ^2-enoyl-CoA isomerase, and 3-hydroxyacyl-CoA epimerase roles (rat cardiac mitochondria), 118, 162
Linoleic acid
arachidonic acid biosynthesis, capacity of epidermal microsomal preparations (guinea pig, rat), 124, 784
Lipid methyltransferase
partially purified, activation by phosphorylation (rat liver), 122, 1065
Lipids
-associated Ca ionophores in plasma membranes, glucose stimulation effect (rat pancreatic islet

cells), 118, 601
bilayer membranes
inner mitochondrial, fluidity, succinate and phenylsuccinate effects, EPR and fluorescence (rat liver), 119, 854
7,7,8,8-tetracyanoquinodimethane-containing, cyclic voltammetry, 119, 372
gastric mucus glycoprotein-associated, effect on
H^+ diffusion (canine), 118, 523
viscosity (canine), 121, 521
microsomal
composition evolution, UDPglucuronosyltransferase role (rat neonate liver), 119, 29
fatty acid composition after long- and short-term cholesterol feeding, age effect (chick liver), 124, 677
membrane fluidity, fluorescence polarization (active, torpid European hamster brain), 119, 396
neutral, platelet-activating factor precursor, antihypertensive activity (hypertensive, normotensive rats), 118, 344
peroxidation, see Lipoperoxidation
phase transitions in sarcoplasmic reticulum membranes, Raman spectroscopy (rabbit combined muscle), 122, 446
role in dextran-charcoal effect on glucocorticoid-receptor complex dissociation kinetics (rat thymus), 119, 1134
selenium binding (Dunaliella primolecta, Porphyridium cruentum), 118, 176
transfer proteins, plasma, facilitation of cholesteryl ester bidirectional movement between rough and smooth microsomal membranes (rat liver), 120, 586
Lipogenesis
insulin and ethanolamine effects in vitro, comparison (rat adipocytes), 121, 413
Lipolysis
induction by growth hormone and synthetic adrenocorticotropin in isolated rabbit adipocytes, comparison (human, ovine, porcine, rabbit), 122, 197
Lipoperoxidation
chronic alcohol feeding effect, role in hydroxyl radical generation (rat microsomes), 118, 233
coleoptiles, reduction by indole-3-acetic acid: effect on malondialdehyde levels (Avena sativa L.), 125, 76
effect of polyamine binding to phospholipid vesicles (soybean), 122, 550
halothane-induced, hypoxia role (rat hepatic microsomes), 119, 139
inhibition by idebenone, mechanism (rat cerebral mitochondria), 125, 1046
O_2^-- and H_2O_2-dependent, in intact and Triton X-100-dispersed membranes (human erythrocytes), 118, 474
Lipopolysaccharides
xanthine oxidase induction (mouse) 119, 144
Lipoprotein lipase
hydrolysis of 1-acyl-2-[6-[(7-nitro-2,1,3-benzoxadiazol-4-yl)amino]-caproyl]phosphatidylcholine (bovine milk), 118, 894
inhibition by 2,3,7,8-tetrachlorodibenzo-p-dioxin (guinea pig adipose tissue), 122, 810
macrophage, major source in lung (rat), 125, 273
and monoacylglycerol lipase, separation by heparin-Sepharose affinity chromatography (bovine brain), 122, 1241
polyethylene glycol-modified, catalysis of ester synthesis in benzene (Pseudomonas fluorescens), 122, 845
tumor-promoting phorbol diester substrates (rat serum), 123, 170
Lipoproteins
high-density, see High-density lipoproteins
low-density, see Low-density lipoproteins
nonlipoprotein factors, serum: hepatic cholesterol-7α-hydroxylase stimulation in vitro (streptozotocin-diabetic rat), 121, 742
very-low-density, see Very-low-density lipoproteins
Liposomes
cholesterol transfer reaction to cytochrome P-450_{scc}, enthalpy-entropy compensation effects (bovine adrenal cortex), 118, 877
contents, distribution in tissues: analysis in vivo with ^{125}I-labeled tyraminyl-insulin marker (rat), 122, 319
functionalized polymeric, α-chymotrypsin covalent attachment, 119, 646
large unilamellar, cytochrome P-450 and NADPH cytochrome P-450 reductase incorporation, octylgluco-

side role (rabbit liver), 121, 118
marker release, induction by Cerebratulus lacteus toxin A-III, 121, 14
membranes, lipid composition, effect on carbocyanine dye fluorescent response, 123, 178
-prothrombin interactions, analysis, 125, 381
Lipoxygenase
directed toward electroaffinity labeling, electrolysis-mediated irreversible inactivation (soybean), 123, 156
products, role in epinephrine vascular effects (perfused rat liver), 123, 507
Low-density lipoprotein receptors
2,3,7,8-tetrachlorodibenzo-p-dioxin effect (guinea pig, rat hepatocyte plasma membranes), 118, 548
Low-density lipoproteins
-associated ß-carotene, resonance Raman spectra (human plasma), 122, 867
binding to 5-methoxypsoralen (human serum), 120, 670
defective endocytosis in V79 cell mutants, effect on membrane fatty acid composition (Chinese hamster), 122, 627
interaction with whale cartilage chondroitin sulfate, ^2H NMR spectra (human plasma), 121, 871
metabolism, AY 9944 effects (human fibroblast culture), 122, 955
reactivity with monoclonal antibodies, analysis by ELISA and immunoprecipitation (mouse), 125, 704
Luciferase
active, synthesis in vitro by poly $(A)^+$ RNA translation (adult firefly lanterns), 124, 592
ATP sites, kinetic distinction (firefly), 123, 764
Luciferin
synthetic firefly, -enhanced luminescent horseradish peroxidase immunoassays for rubella antibody, immunoglobulin E, and digoxin (human), 119, 481
Luminol
-dependent and native luminescence in stimulated neutrophils, simultaneous detection (human), 123, 1047
Luteinizing hormone
-stimulated testosterone production, inhibition by phorbol esters (murine Leydig cell culture), 119, 1062
ß-subunit mRNA, regulation during estradiol feedback states (ovine pituitary gland), 122, 1307
subunit precursor mRNA, in vitro translation (porcine pituitary), 118, 254
α- and ß-subunit precursors, physiochemical properties (porcine pituitary), 124, 383
Luteinizing hormone-releasing hormone antagonists, synthesis and effects, chicken II and salmon LHRH use as models, 123, 1221
Lycopene
cyclization, inhibition by nicotine (Phaseolus vulgaris cotyledons), 120, 625
Lymphadenopathy-associated virus
-associated RNA-dependent DNA polymerase, characterization, 121, 126
Lymphoblasts
ataxia telangiectasia, cellular actin levels in culture, regulation by cell density (human), 119, 561
cultured, interferon-γ mRNA levels (human), 119, 157
ß-hexosaminidase deficiency, frequency (various cell lines), 119, 841
Lymphocytes
antibody response, enhancement by bovine and human thyrotropin in vitro (murine spleen), 125, 30
B-cell
antibody response to sheep erythrocytes, restoration and stimulation by interleukins and muramyl dipeptide (mouse), 125, 431
helper activity, peripheral blood mononuclear cell mRNA-encoded, effect on antibody synthesis by nude murine spleen cells (human), 119, 868
immature, nonresponsiveness to anti-immunoglobulin, pronase effect (mouse), 119, 1
palmitoyl-tetrapeptide mitogenic effects in vitro (Escherichia coli), 121, 55
proliferation induction, endogenous membrane protein phosphorylation enhancement (murine spleen), 124, 544
tyrosine residue phosphorylation, enhancement upon membrane immunoglobulin complexing (human), 125, 859
and bone marrow cells, normal and leukemic: tyrosine phosphorylation, comparison (human), 124, 766
lectin-treated, tyrosine phosphorylation stimulation (human), 124, 682
leukemic, ß-hexosaminidase iso-

enzyme separation (human), 122, 966
peripheral blood mononuclear, interferon-γ mRNA levels (human), 119, 157
permeability to chloride, kinetics (human), 122, 522
phospholipase A_2 activity, characterization (human, rat), 125, 719
phytohemagglutinin-stimulated, short DNA fragment secretion, 5'-end analysis (human peripheral blood), 118, 140
prolactin receptors, identification (human), 121, 899
proliferation, concanavalin A-stimulated and phorbol ester-inhibited, protein kinase identification (bovine), 121, 392
quiescent and concanavalin A-stimulated, intracellular transferrin receptor expression (murine spleen), 119, 598
T-cell, monoclonal antigen-binding proteins, production and purification (murine ascites), 125, 475
thymic, see Thymocytes
tonsillar, in vitro excretion of [^{3}H]thymidine-labeled DNA and concomitant reversion to resting state (human), 125, 1110
viability loss, in vitro induction by aphidicolin and deoxycoformycin (human), 120, 959

Lysine
ornithine decarboxylase short-term regulation (Dictyostelium discoideum), 119, 1141
residues
clustered, histone: role in silver staining (calf thymus), 123, 729
heparin cofactor II, covalent modification with pyridoxal 5'-phosphate: effect on activity (human plasma), 124, 745
identification in F_1-ATPase β-subunit with 7-chloro-4-nitro-[^{14}C]benzofurazan (thermophilic bacterium PS3), 123, 1040
methionyl-tRNA synthetase, modification by crosslinking to formylmethionine-tRNA (Escherichia coli), 119, 677

Lysine decarboxylase
selective irreversible inhibition by DL-α-difluoromethyllysine (Mycoplasma dispar), 125, 205

Lysipressin
purification and characterization, analysis of gene evolution (Didelphis virginiana), 123, 306

Lysophospholipids
production enhancement by free radicals (rat hepatic lysosomes), 124, 229

Lysosomes
exogenous mannitol accumulation (rat liver), 123, 286
lysophospholipid production and phospholipid degradation, enhancement by free radicals (rat liver), 124, 229

Lysozyme
multiple phosphorescent tryptophan residues, identification by optically detected magnetic resonance, 125, 974
release from neutrophils, induction by cyclic tetrameric clusters of chemotactic peptides (human), 124, 939

Lytic enzyme
spore, precursor: energy-dependent activation by germinated spores (Clostridium perfringens), 123, 463

M

α-Macroglobulins
and ovomacroglobulin, CD spectra, comparison (bovine, chicken, frog), 123, 771

$α_2$-Macroglobulins
and C_3 chain of rat prostatic steroid-binding protein, amino acid sequence homology (human), 122, 662
long-term production by hepatocytes cocultured with epithelial cells (adult rat liver), 120, 311
and matrix-linked trypsin reaction, proteinase-binding site nonproductive activation (human), 118, 691

Macrophages
alveolar, tumoricidal activation by muramyldipeptide-bound mannosylated bovine serum albumin (mouse, rat), 121, 579
interaction with Trypanosoma cruzi
regulation by parasite membrane phospholipase A_2-sensitive components (mouse), 121, 931
surface galactose residue role (mouse), 119, 228
major source for lipoprotein lipase in lung (rat), 125, 273
peritoneal
activation and tumor cell cytolysis, inhibition by cyclosporin A (rat), 123, 710

-mediated tumor cell cytotoxicity, role of Fe depletion (murine L10, L1210 cells), 123, 716
progenitor cells, radioprotection by superoxide dismutase (murine bone marrow), 119, 1089
tuftsin endocytosis, receptor-mediated (mouse), 119, 203
Magnesium ion
-binding subsite, identification in ATP-binding site of Ca^{2+}-ATPase (rabbit skeletal muscle sarcoplasmic reticulum), 124, 183
and Ca^{2+}-induced conformational changes in S-100a protein, subnanosecond-pulse fluorometric analysis (bovine brain), 123, 959
effect on spermine-induced phosphorylase kinase inhibition (porcine liver), 121, 271
intracellular free, concentration regulation by Mg^{2+} efflux (chicken erythrocytes), 119, 124
Magnetic fields
homogenous, effect on insulin secretion (isolated rat pancreatic islets), 122, 191
Malate
-oxaloacetate shuttle reconstruction and oxaloacetate uptake by mitochondria (rat brain), 119, 1039
Malate dehydrogenase
binding to mitochondrial inner membranes, tissue distribution (lemon fruit, mammals), 121, 612
Malate dehydrogenase (oxaloacetate-decarboxylating) ($NADP^+$)
regulation by dietary fructose and insulin, comparison (diabetic rat), 121, 730
Malate synthase
inactivation after irradiation, 118, 364
4-(N-Maleimidobenzyl)trimethylammonium
-binding site of nicotinic acetylcholine receptor, immunochemical identification (Torpedo californica), 122, 602
Malic enzyme, see Malate dehydrogenase (oxaloacetate-decarboxylating) ($NADP^+$)
Malondialdehyde
levels in coleoptiles, reduction by indole-3-acetic acid (Avena sativa L.), 125, 76
Maltooligosaccharides
hydrolysis by α-amylase, subsite binding kinetics (porcine pancreas), 122, 75
Maltoporin
affinity for starch and maltose, enhancement by affinity-chromatographic selection (Escherichia coli), 121, 34
limited proteolysis, generated peptide location by computer search, 125, 926
Maltose
maltoporin affinity, enhancement by affinity-chromatographic selection (Escherichia coli), 121, 34
Manganese ion
-Mn interaction in adenylated and unadenylated glutamine synthetase (Escherichia coli), 120, 939
release into restricted aqueous compartment after photosynthetic oxygen evolution inhibition (chloroplast nonvesicular membrane fragments), 119, 168
role in activity of calmodulin-dependent protein phosphatase subunit A (bovine brain), 122, 1389
Mannitol
exogenous, accumulation in lysosomes and mitochondria (rat liver), 123, 286
Mannose
high, and complex oligosaccharide-containing form of acid α-D-mannosidase, identification (Macaca radiata brain), 123, 1185
α-Mannosidases
1-deoxymannojirimycin effects (rat liver), 125, 324
Mass spectrometry
secondary-ion, amino acids in glycerol matrix, hydrophobicity effect, 123, 27
Mast cells
antigen-stimulated, polyphosphoinositide metabolism (rat peritoneum), 123, 875
extracts, stimulation of collagenase and prostaglandin-E production in vitro by human adherent rheumatoid sinovial cells (canine), 122, 270
histamine release, synergistic role of Ca^{2+} mobilization and protein kinase-C activation (rat peritoneum), 121, 573
MDL 12330A, see N-(cis-2-Phenyl cyclopentyl)azacyclotridecan-2-imine hydrochloride
Mechlorethamine
-induced DNA crosslinks, sensitivity to alkaline conditions (human fibroblasts), 123, 549
Melanin
-concentrating hormone, synthesis and biological activities (Anolis carolinensis, Rana pipiens, tele-

ost), 122, 613
Melanocytes
normal and neoplastic, ganglioside composition (human), 120, 500
γ-Melanotropin
identification in nerve endings, nerve fibers, and neurons by immunofluorescence microscopy (rat duodenum), 125, 448
Melatonin
cerebral metabolite N-acetyl-5-methoxy kynurenamine, prostaglandin biosynthesis inhibition (bovine, ovine seminal vesicle microsomes), 121, 372
Melibiose
operon promoter region, nucleotide sequence, comparison with lactose operon (Escherichia coli), 121, 41
Melittin
stimulation of
arachidonic acid metabolism by cultured malignant keratinocytes (human epidermis), 124, 303
increase in intracellular free Ca^{2+} concentration (human fibroblasts), 119, 69
Membranes
acetylcholine receptor, reconstituted: multiple binding sites for local anesthetics (Torpedo californica), 123, 862
apical and basolateral cells, resistance: insulin effects in vitro (toad kidney), 124, 614
B-lymphocyte, immunoglobulin complexing, enhancement of B-cell tyrosine residue phosphorylation (human), 125, 859
brush border
glutathione uptake analysis (porcine jejunum), 123, 929
Na^+ transport (rat kidney), 123, 562
sulfate transport (human placental syncytiotrophoblasts), 123, 223
cardiac, 42-kDA protein, Ca channel subunit-comigratory: identification and isoproterenol- and nitrendipine-induced phosphorylation (canine), 121, 890
-cytoskeleton interaction, effect of receptor- and non-receptor-mediated platelet activation, 120, 898
dipalmitoyl phosphatidylcholine, amphotericin B incorporation, antibiotic selectivity enhancement: circular dichroism and permeability analysis, 125, 360
electrical potential
changes in response to formyl-methionyl-leucyl-phenylalanine or 12-O-tetradecanoylphorbol 13-acetate (human myeloid leukemia cells, neutrophils), 123, 937
effect of macromolecular polylysine (Escherichia coli), 122, 401
epithelial, [^{125}I]vasoactive intestinal peptide binding and adenylate cyclase activity, peptide partial sequence effect (human, rat intestine), 121, 493
erythrocyte
anti-Rh_o(D) binding, band-3 proteolysis enhancement (human), 124, 437
band-4.1 phosphorylation, stimulation by phorbol 12-myristate 13-acetate (rabbit), 120, 291
ceruloplasmin receptor identification (human), 125, 157
cholesterol content, effect on Ca influx through channel (human), 124, 822
phosphoenolpyruvate transport, inhibition by 2,3-bisphosphoglycerate, 2-phosphoglycerate, and 3-phosphoglycerate (human), 122, 609
surface property differences, detection by cell partitioning (human), 120, 250
Triton X-100-dispersed and intact, O_2^-- and H_2O_2-dependent lipid peroxidation (human), 118, 474
F_1-ATPase expression, K^+ and pH effects (Streptococcus faecalis), 122, 151
fatty acid composition, alteration in V79 cell mutants with defective low-density lipoprotein endocytosis (Chinese hamster), 122, 627
fluidity
fluorescence polarization analysis (active, torpid European hamster brain), 119, 396
and 3-hydroxy-3-methylglutaryl CoA reductase activity, growth-rate-related and hydroxysterol-induced changes (cultured hepatoma cells), 120, 192
inner mitochondrial lipid bilayers, succinate and phenylsuccinate effects, EPR and fluorescence (rat liver), 119, 854
hepatic, identification of inhibitory and stimulatory growth factors (mouse), 120, 891
intestinal microvillus, glycan biosynthesis, developmental shift from sialylation to fucosylation (rat), 125, 546
lipid bilayer
cytochrome P-450 substrate-binding

site location (rabbit liver microsomes), 118, 916
7,7,8,8-tetracyanoquinodimethane-containing, cyclic voltammetry, 119, 372
liposome, lipid composition, effect on carbocyanine dye fluorescent response, 123, 178
microsomal
BAY K 8644 binding (rabbit heart), 121, 317
rough, antiestrogen high-affinity binding site concentration (rat liver), 120, 109
rough and smooth, cholesteryl ester bidirectional movement, facilitation by plasma lipid transfer proteins (rat liver), 120, 586
mitochondrial
cholesterol distribution, regulation by sterol-carrier protein$_2$ (rat adrenal), 122, 509
functional efficiency, chronic Fe overload effect in vivo (rat liver), 124, 462
inner
citrate synthase and malate dehydrogenase binding, tissue distribution and substrate effects (lemon fruit, mammals), 121, 612
protein sulfhydryl groups, modification by succinate and phenylsuccinate, EPR analysis (rat liver), 122, 1404
outer membrane transverse plane, glycerophosphate acyltransferase location (guinea pig lung), 123, 569
myocardial
[^{3}H]nitrendipine binding to Ca channel site, thioridazine diltiazem-like effect (rat), 121, 657
sarcolemmal, creatine kinase and ATP-dependent Na^+ pump, relationship (canine, guinea pig), 124, 696
neuronal, phospholipid fatty acid composition, ethanol effect (murine embryos), 122, 516
neutrophil, surface DNA-binding site, identification with biotin-labeled DNA (human), 122, 1034
nonvesicular fragments, Mn^{2+} release into restricted aqueous compartment after oxygen evolution inhibition (chloroplasts), 119, 168
nuclear, peptides, androgen dependence (rat ventral prostate), 125, 469
phosphatidylcholine bilayer, cholesterol dissociation, hydrogen belt interactions, 118, 743
phospholipid bilayer
fluidity, phosphatidylethanolamine N-methylation effects (rat basophile leukemia cells), 120, 989
structural transitions, induction by diacylglycerol (bovine brain), 124, 491
photosynthetic, reaction center integrity after proteolysis and detergent solubilization (Rhodopseudomonas viridis), 120, 164
planar bilayer, des-L•Val^7-D•Val^8-Gramicidin A, side chain orientation, role in single channel conductance dispersity, 118, 885
plasma, see Plasma membranes
plastic, DNA alkaline transfer (rat), 122, 340
platelet external and internal fractions, simultaneous isolation: biochemical, immunological, and functional characterization, 123, 50
porous, triolein-doped, Na^+/K^+ concentration gradient-induced: electrical potential oscillation, 123, 792
proteins
ADP-ribosylation, effect of Bordetella pertussis toxin (rat pancreatic islets), 124, 190
biologically active, HPLC isolation (Rhodopseudomonas sphaeroides R 26 reaction centers), 121, 47
carboxyl methylation, role in erythrocyte response to cytoskeletal stress (human), 123, 133
endogenous, phosphorylation enhancement during B-lymphocyte proliferation induction (murine spleen), 124, 544
36-kDa, Ca^{2+}-dependent phorbol ester-activated phosphorylation and immunoprecipitation with IgE-anti IgE system (rat basophilic leukemia cells), 125, 867
purple
carboxyl modifications, effect on bacteriorhodopsin blue-species and O_{650} photocycle intermediate (Halobacterium halobium), 122, 1110
surface charge, measurement by laser Doppler velocimetry (Halobacterium halobium), 122, 252
sarcolemma, role in adrenochrome formation (bovine heart), 120, 22
sarcoplasmic reticulum, lipid phase transitions, Raman spectroscopy (rabbit combined muscle), 122, 446
skeletal muscle transverse-tubular

[^{3}H]dihydropyridine binding, temperature and d-cis-diltiazem effects (rabbit), 123, 41
[^{3}H]verapamil-binding sites (rabbit), 118, 239
spin-labeled, interaction with hexachlorophene (rat brain), 120, 434
substrate-adhesion sites, ganglioside composition (normal, virally transformed Balb/c 3T3 cells), 125, 142
surface cAMP-binding sites, modulation by guanine nucleotides (Dictyostelium discoideum), 124, 597
synaptosomal
ammonia effect (murine brain), 119, 516
BAY K 8644 binding (guinea pig brain), 121, 317
Trypanosoma cruzi, phospholipase A_2-sensitive components, parasite-macrophage interaction regulation (mouse), 121, 931
unsaturated digalactosyl diacylglycerol bilayer, with 1,6-diphenyl-1,3,5-hexatriene, angle-resolved fluorescence depolarization (spinach leaves), 123, 352
zymogen granule, protein phosphorylation in vitro (rat pancreatic acinar cells), 122, 413
Mesenchymal cells
cultured, protein synthesis, comparison with mammary cuboidal epithelial cell derivatives (rat), 120, 351
Mesohemin
cytochrome P-450 functional reconstitution in vitro after allylisopropylacetamide-mediated destruction (rat liver), 121, 95
Mesotocin
purification and characterization, analysis of gene evolution (Didelphis virginiana), 123, 306
Metal ions
divalent, noncovalent complexes with diadenosine 5',5'''-P^1,P^4-tetraphosphate, 120, 1037
Metallothionein
Cd,Zn-, binding to Cd, spectroscopy and protein concentration estimation by Cd saturation methods (rat liver), 121, 1006
Cu-facilitated chemiluminescence (rabbit liver), 125, 425
Methanol
-water solutions, poly(dA-dT)•poly(dA-dT) thermal melting, 123, 831
Methanol: 5-hydroxybenzimidazolylcobamide methyltransferase
reductive activation, hydrogenase and ferredoxin roles (Methanosarcina barkeri), 118, 760
Methionine radicals
repair by vitamin E analog, 119, 245
Methionyl-tRNA synthetase
lysine residue modification by cross-linking to formylmethionine-tRNA (Escherichia coli), 119, 677
Methotrexate
affinity of dihydrofolate reductase multiple forms, comparison (murine leukemia L1210 cells), 119, 352
5-Methoxypsoralen, see Bergapten
Methoxyvinylpyrene
analog, chemiluminescent probe for singlet oxygen, 123, 869
[Methyl]-S-adenosyl-L-methionine
^{3}H-labeled, uv-induced covalent binding to bovine adrenal phenylethanolamine N-methyltransferase and human erythrocyte protein-O-carboxylmethyltransferase, methyl acceptor substrate effects, 122, 499
Methylation
carboxyl, membrane proteins, role in erythrocyte response to cytoskeletal stress (human), 122, 133
heat shock protein 70, sodium arsenite effect (chicken embryo fibroblasts), 119, 735
phospholipid, stimulation by glucose (rat pancreatic islets), 122, 706
N-Methylation
phosphatidylethanolamine, effect on phospholipid bilayer membrane fluidity (rat basophile leukemia cells), 120, 989
2-Methylbutyryl CoA dehydrogenase
role in NADH-dependent 2-methylcrotonyl CoA reduction (Ascaris suum mitochondria), 118, 783
3-Methylcholanthrene
-induced skin carcinogenesis, inhibition by ellagic acid (BALB/C mouse), 119, 751
Methylcoenzyme-M methylreductase
inhibition by NAD^+ and $NADP^+$ (Methanosarcina barkeri cell extracts), 123, 238
2-Methylcrotonyl CoA
NADH-dependent reduction, 2-methylbutyryl CoA dehydrogenase role (Ascaris suum mitochondria), 118, 783
3'-Methyl-4-dimethylaminoazobenzene
-induced carcinogenesis, aldolase A and B mRNA expression (rat liver), 124, 337

N-Methylformamide
effect on plasma membrane potential and microsomal and mitochondrial Ca^{2+} uptake (murine liver), 125, 712
-induced glutathione depletion and growth inhibition, reversal by L-cysteine (human colon carcinoma cells), 122, 798
-O-Methyl-D-glucose
phosphorylation (rat heart), 119, 1008
Methylglyoxal bis(guanylhydrazone), see Mitoguazone
-Methyl-9-hydroxy-ellipticinium
oxidized, covalent binding to yeast RNA and poly A in vitro, 124, 416
-Methyl-3-isobutylxanthine
guanylate cyclase inhibition (rat brain, liver, lung), 123, 1194
Methyl methanesulfonate
lethality, enhancement by ß-lapachone (human fibroblasts), 118, 828
'-O-Methyl-1-methyl adenosine
identification in tRNA (Eleusine coracana seedlings), 121, 243
-Methyl-4-nitroaniline ethylene dimethylammonium hydrobromide
crystalline complex formation with 5-iodocytidylyl (3'-5')guanosine, structural analysis, 121, 188
N-Methyl-N'-nitro-N-nitrosoguanidine
effect on deoxynucleoside triphosphate pool (murine FM3A cells), 122, 1160
-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine
metabolism in hepatic microsomal preparations (mouse), 125, 484
oxidation by and suicide inactivation of monoamine oxidases A and B (bovine liver, human placenta), 125, 831
-Methyl-4-phenyl-1,2,3,6-tetrahydropyridine
dopamine uptake inhibition (rat PC12 cells), 119, 1186
-Methyl-4-phenyl-1,2,4,5-tetrahydropyridine
metabolism by monoamine oxidase (rat brain), 120, 574
-Methyltetrahydrofolate-homocysteine methyltransferase, see Tetrahydro-pteroylflutamate methyltransferase
'-Methylthioadenosine
effect on murine erythroleukemia cell differentiation and proliferation, 124, 172
efflux and influx in adenosine deaminase-deficient lymphoma cells, dipyramidole and nitrobenzylthioinosine effects (human), 121, 514
O^2-Methylthymidine
repair by DNA glycosylase (Escherichia coli), 120, 1
O^4-Methylthymidine
repair by DNA transalkylase (Escherichia coli), 120, 1
Metoclopramide
-stimulated serum factor, role in aldosterone secretion regulation (bovine adrenal zona glomerulosa cells), 119, 95
Metorphamide
regional distribution in brain (guinea pig, rat), 122, 892
Mevalonate
isoprene in vitro biosynthesis (rat hepatic cytosolic fraction), 123, 691
metabolism by sterol and nonsterol pathways, effect of dietary cholesterol (male chicks), 122, 945
Mevinolin
neuroblastoma cell differentiation induction (mouse), 120, 454
Mezerein
protein kinase-C activation in vitro and in vivo, competitive inhibition of tumor-promoting phorbol ester binding (rat brain), 121, 649
Microcin 7
purification and properties (Escherichia coli), 119, 779; erratum, 121, 741
Microciona prolifera
Ca-dependent cell aggregation, induction by leukotriene B_4, inhibition by arachidonic acid, 121, 863
Micrococcal endonuclease
-generated chromatin fragments, angiotensin-II receptor identification (rat hepatic nuclei), 119, 220
Microsomes
epidermal, ability to biosynthesize arachidonic acid from linoleic acid in vitro (guinea pig, rat), 124, 784
hepatic
Ca^{2+} release, induction by inositol (1,4,5)triphosphate (rat), 120, 858
Ca^{2+} uptake, N-methylformamide effect (mouse), 125, 712
epidermal growth factor and insulin binding (human), 119, 1181
lipid fatty acid composition after long- and short-term cholesterol feeding, age effect (chick), 124, 677
1-methyl-4-phenyl-1,2,3,6-tetrahydro-

pyridine metabolism in vitro (mouse), 125, 484
neonatal structural changes, UDP-glucuronosyltransferase role (rat), 119, 29
N-nitrosodiphenylamine formation from 1,1-diphenylhydrazine (rat), 118, 958
protein fraction, reconstituted vitamin D_3 25-hydroxylase inhibition (rat), 123, 1209
rough
membrane antiestrogen high-affinity binding site concentration (rat), 120, 109
and smooth membranes, cholesteryl ester bidirectional movement facilitation by plasma lipid transfer proteins (rat), 120, 586
stereoselective hydroxylation of 7,8- and 9,10-dihydrobenzo[a]-pyrene aliphatic carbons (rat), 124, 114
and microsomal lipids, membrane fluidity, fluorescence polarization (active, torpid European hamster brain), 119, 396
organosulfur compound oxidation (Pisum sativum seeds), 121, 1001
pancreatic, cleavage of rat liver nascent UDPglucuronosyltransferase (canine), 122, 1441
platelet, Ca release, 1-O-alkyl-2-acetyl-sn-glyceryl-3-phosphorylcholine effect (human), 120, 474
ventricular, membranes, BAY K 8644 binding (rabbit), 121, 317
Microtuble-associated proteins
1 and 2, competitive binding to microtubules (bovine brain), 119, 173
2, phosphorylation by casein kinase-1 and cAMP-dependent protein kinase, comparison, 121, 19
Microtubules
competitive binding by microtubule-associated proteins 1 and 2 (bovine brain), 119, 173
proteins
assembly inhibition by S-100 proteins, mechanism (bovine brain), 124, 850
effects of chlorpromazine-S-100 protein interactions in vitro (bovine brain), 122, 983
Mitochondria
ATP-driven reverse electron transfer from succinate to acetoacetate, thermodynamics (rat liver), 125, 8
bioenergetic function, inhibition by rhodamine 123 (rat liver), 118, 717
Ca^{2+} efflux
with inorganic pyrophosphate (rat heart), 118, 147
$NADP^+$-stimulated, membrane thiol group role (rat liver), 119, 305
ruthenium red-induced, inhibition by antibiotic X-537A (rat liver), 124, 80
Ca^{2+} influx, N-methylformamide effect (murine liver), 125, 712
carbamyl phosphate synthetase-I in vitro transport and processing (murine liver), 118, 514
carrier-mediated γ-aminobutyric acid translocation (rat brain), 121, 770
CO-bound, cytochrome c oxidase-dioxygen reaction sites, ir spectra (blowfly flight muscle; bovine heart, brain; porcine heart; rat kidney), 123, 247
coupling between redox and acid-base energy by cytochrome b-564 (Saccharomyces cerevisiae), 124, 807
cytochrome redox state in situ, glucagon effects (perfused rat liver), 119, 212
DNA, co-linear organization (mouse, Pleurodeles waltlii, Xenopus laevis), 122, 918
electro-injected [^{14}C]sucrose trapping, role in cellular autofiltration (rat hepatocytes), 119, 955
exogenous mannitol accumulation (rat liver), 123, 286
glutathione synthesis in vitro, inhibition by L-buthionine sulfoximine (rat liver), 123, 1116
inner membranes
citrate synthase and malate dehydrogenase binding: tissue distribution and substrate effects (lemon fruit, mammals), 121, 612
lipid bilayer fluidity, succinate and phenylsuccinate effects, EPR and fluorescence (rat liver), 119, 854
protein sulfhydryl groups, modification by succinate and phenylsuccinate, EPR analysis (rat liver), 122, 1404
membranes
cholesterol distribution, regulation by sterol-carrier protein$_2$ (rat adrenal), 122, 509
functional efficiency, chronic Fe overload effect in vivo (rat liver), 124, 462
outer, transverse plane, glycerophosphate acyltransferase location (guinea pig lung), 123, 569

oxaloacetate uptake and malate/oxaloacetate shuttle reconstruction (rat brain), 119, 1039
pancreatic, functional, isolation and properties (rat), 121, 545
proteins, changes during neuroblastoma differentiation (murine brain), 120, 411
structural and functional properties in hexachlorobenzene-induced experimental prophyria (rat liver), 118, 356
ubiquinone-protein binding, quantitation (bovine heart), 124, 889
Mitogenic factor
testicular activity, vitamin-A deprivation effect (rat), 125, 454
Mitogens
-stimulated increase in intracellular free Ca^{2+} concentration (human fibroblasts), 119, 69
Mitoguazone
long-chain fatty acid oxidation inhibition (rat heart muscle), 120, 9
Mitomycin C
effect on deoxynucleoside triphosphate pool (murine FM3A cells), 122, 1160
-induced DNA crosslinks, sensitivity to alkaline conditions (human fibroblasts), 123, 549
Mitoxantrone
and doxorubicin and epirubicin, effects on ATP intracellular concentration and oxygen uptake, comparison (rat heart), 125, 954
Moloney leukemia virus
reverse transcriptase inhibitor, mechanism (78A-1, HeLa cells), 123, 299
Molybdate
-stabilized purified glucocorticoid receptor, protein kinase activity (rat liver), 125, 1067
Monensin
effect on
[^{125}I]epidermal growth factor binding, internalization, and mitogenic response (human fibroblasts), 124, 585
interphotoreceptor retinoid-binding protein synthesis by retina in organ culture (monkey), 118, 789
Monoacylglycerol lipase
and diacylglycerol lipase, separation by heparin-Sepharose affinity chromatography (bovine brain), 122, 1241
Mono ADP-ribosyltransferase
NAD-dependent, guanidino group-specific activity (porcine, rabbit skeletal muscle), 120, 973
Monoamine oxidase, see Amine oxidase (flavin-containing)
Monoclonal antibodies
carbonate dehydratase, comparative characterization (bovine, chicken, fish, human, mouse), 125, 690
characterization and localization of photosystem-I complex protein (spinach thylakoids), 123, 995
ß-galactoside-binding lectin, recognition of antigen conformational change (chick embryo), 123, 1179
glutathione-insulin transhydrogenase, preparation and screening applications (rat liver), 125, 668
identification of cell surface growth-regulating glycopeptide (bovine, murine cerebral cortex), 124, 133
low-density lipoprotein, reactivity with low-density and very-low-density lipoproteins, analysis by ELISA and immunoprecipitation (mouse), 125, 704
-monoamine oxidase B complex, catalytically active, isolation from hepatic mitochondria (human), 125, 748
polymerized C9 neoantigen, inhibition of macromolecule diffusion through complement channels (human erythrocytes), 125, 1013
-purified cytochrome P-450 isozymes, amino-terminal sequence analysis (guinea pig, mouse, rat), 123, 1201; addendum, 124, 675
-recognized leukotriene B_4 epitope, characterization (mouse), 123, 944
T-lymphocyte antigen-binding, production and purification (murine ascites), 125, 475
Monocyte cell factor
human, effect on collagen production, prostaglandin E_2 role (rabbit articular chondrocyte culture), 119, 499
Monocytes
cultured, angiotensin-converting enzyme metabolism and subcellular localization (human), 124, 843
Monooxygenases
cytochrome P-450-dependent
induction by 2-acetylaminofluorene (chick embryo), 119, 382
role in genotoxic metabolite formation from N-hydroxyurea (rat hepatoma cell line), 118, 409
effect of cytochrome P-450 LM_2 phosphorylation by cAMP-dependent protein kinase (rabbit hepatic microsomes), 122, 620
flavin-containing, see Dimethylaniline monooxygenase (N-oxide-forming)

Morphine receptors
-mediated GTPase stimulation (morphine-dependent, normal rat brain), 121, 641
Mouse mammary tumor virus
genome sequence in tumor cells, comparison with sequence in lymphocytes from breast cancer patients, 118, 324
Muramyl dipeptide
and interleukins, restoration and stimulation of B-cell antibody response to sheep erythrocytes (mouse), 125, 431
Murine leukemia virus
endogenous, -related protein, identification in pancreatic islets (mouse), 124, 344
Muscarinic receptors
activation, effect on choline release (rat corpus striatum slices), 120, 1002
and ß-adrenergic receptors, simultaneous assay with double isotope technique (bovine smooth muscle), 120, 665
binding properties, verapamil effects (rat heart), 121, 340
high-affinity guanine nucleotide-insensitive state, Cu ion- and diamide-induced (rat cerebral cortical membranes), 120, 271
[^{3}H]pirenzepine high-affinity binding (murine neuroblastoma x rat glioma hybrid NG108-15 cells), 119, 289
pirenzepine-binding site, determination by [^{3}H]pirenzepine vs [^{3}H](-)quinuclindinylbenzilate binding (rat brain), 118, 950
Muscles
skeletal
mechanical activity, diltiazem effect (mouse, rat), 122, 1091
plasma membrane isolation and characterization (rabbit), 123, 216
transverse-tubular membranes, [^{3}H]-dihydropyridine binding, temperature and d-cis-diltiazem effects (rabbit), 123, 41
smooth
$Cl^-/K^+/Na^+$ cotransport regulation (embryonic rat aorta), 125, 500
cultured
atrial natriuretic factor receptor identification (rat), 125, 562
prostacyclin synthesis, stimulation by thromboxane A_2-like prostaglandin endoperoxide analogs (rat), 123, 21
fibers, myosin light chain and satellite protein phosphorylation-dephosphorylation effects (porcine carotid artery), 120, 933
relaxation in vitro by atrial natriuretic factor-related peptides (chick rectum), 125, 938
12-O-tetradecanoylphorbol-13-acetate induced contractions
isolated rabbit ear artery, 122, 776
rabbit and rat aorta, 125, 1103
Mutagenesis
site-directed, cys_{148} in lac carrier protein (Escherichia coli), 119, 860
Mutants
deficient in
acetoacetyl-CoA thiolase and ß-hydroxy-ß-methylglutaryl-CoA synthetase, isolation and characterization (yeast), 123, 424
epidermal growth factor receptors, cocultivation effect on complementation (mouse), 118, 60
nucleoside transport, interferon effect (murine T-lymphoma S49 cells), 118, 124
thymidine kinase activity, interferon effect (murine T-lymphoma S49 cells), 118, 124
dysmyelinating, cerebral levels of myelin basic protein-specific protein methylase I, effect of age (mouse), 123, 468
glycosylation, altered binding of insulin receptors (Chinese hamster ovary cells), 125, 70
Hemoglobin Miyada globin gene, DNA sequence analysis (human), 119, 968
insulin, [Ser^{B24}] and [Ser^{B25}], receptor binding and biological activity (human), 119, 49
second-step, toyocamycin- and tubercidin-resistant, isolation and characterization (Chinese hamster ovary cells), 120, 88
threonine deaminase regulatory, reversion by mutation in ilvH gene (Escherichia coli K-12), 118, 270
V79 cells with defective low-density lipoprotein endocytosis, altered membrane fatty acid composition (Chinese hamster), 122, 627
vision, norpA, diglyceride kinase activity in photoreceptor cells (Drosophila), 119, 389
Mycoplasma dispar
growth inhibition by DL-α-difluoromethyllysine, reversal by cadaverine, 125, 205
Myelin
-stimulated Schwann cell prolifera-

tion, mediation, Ca and cAMP roles (rat), 122, 373
Myelocytes
leukemic, ß-hexosaminidase isoenzyme separation (human), 122, 966
Myeloma cells
treatment with Colcemid prior to fusion with splenocytes, effect on hybridoma formation (mouse), 124, 903
Myeloperoxidase
singlet molecular oxygen generation, ir electronic emission spectra (canine granulocytes), 122, 668
Myelopoiesis
modulation in vitro by retinoic acid (human bone marrow), 123, 128
Myoblasts
invasion by Trypanosoma cruzi, surface galactose residue role (rat heart), 119, 228
proliferating L6, actin gene expression (rat), 119, 630
Myocytes
isolated ventricular, at rest and during K^+-depolarization, cytoplasmic free Ca^{2+} measurement by quin2 fluorescence (rat), 122, 1012
Myosin
heavy chain
cDNA probe, poly(A)+ RNA transient species detection during terminal differentiation (chick breast muscle), 120, 741
gene expression, sodium butyrate effects (rat L6 myoblasts), 125, 1129
light chains, phosphorylation-dephosphorylation, effects on smooth muscle fibers (porcine carotid artery), 120, 933
role in Ca^{2+} transport through plasma membrane (bovine chromaffin cells), 119, 652
Myositis
-specific Jo-1 autoantibody, histidyl-tRNA synthetase inhibition (rat liver), 120, 15
Myotubes
differentiated L6, actin gene expression (rat), 119, 630
12-Myristate 13-acetate
effect on leukotriene B_4 association with neutrophil cytoskeleton (rabbit), 124, 963

N

NAD^+ (oxidized nicotinamide adenine dinucleotide)
inhibition of methylcoenzyme-M methylreductase system (Methanosarcina barkeri cell extracts), 123, 238
levels in isolated limb bud cells, benzamide effect (chicken), 121, 710
selective depression, induction by tiazofurin (rat hepatoma 3924A), 122, 345
NADH (reduced nicotinamide adenine dinucleotide)
oxidation in vitro by divicine, 120, 747
NADH dehydrogenase
Fe-S center-containing subunits, detection by gel electrophoresis and high-performance gel chromatography (bovine cardiac mitochondria), 120, 237
NADH-ferricyanide reductase
microsomal, purification with zwitterionic detergent (potato tubers), 122, 1201
$NADP^+$ (oxidized nicotinamide adenine dinucleotide phosphate)
inhibition of methylcoenzyme-M methylreductase system (Methanosarcina barkeri cell extracts), 123, 238
from NADPH horseradish peroxidase-catalyzed H_2O_2-mediated oxidation, nonphotosensitized potentiation by hematoporphyrin, 118, 191
2'-phosphate, glutathione reductase recognition site, identification (yeast), 124, 572
-stimulated Ca^{2+} efflux from mitochondria, membrane thiol group role (rat liver), 119, 305
NADPH (reduced nicotinamide adenine dinucleotide phosphate)
-dependent leukotriene B_4 catabolism in cell-free neutrophil preparation (human), 125, 615
hydrogens, stereospecific incorporation in arachidoyl-CoA elongation (porcine cerebral microsomes), 124, 322
-induced chemiluminescence, synthetic antioxidant effects (rat hepatic microsomes), 125, 1033
oxidation
by divicine in vitro, 120, 747
horseradish peroxidase-catalyzed H_2O_2-mediated, nonphotosensitized potentiation by hematoporphyrin, 118, 191
NADPH-cytochrome reductase
-cytosolic aldehyde oxidase system, nicotinamide N-oxide reduction (rabbit hepatic microsomes), 125, 1117

purification and partial characterization (Trypanosoma cruzi cytosol), 124, 121
NADPH-cytochrome c reductase, see NADPH-cytochrome reductase
NADPH cytochrome P-450 reductase
incorporation into large unilamellar liposomes, octylglucoside role (rabbit liver), 121, 118
NADPH oxidase
activation by chemotactic peptide, potentiation by diacylglycerol (human neutrophils), 125, 367
Nalidixic acid
effect on DNA ligase, DNA polymerases α and ß, and terminal deoxynucleotidyl transferase (chicken thymus), 121, 762
Naloxone
binding to opioid receptors, demonstration by computer modeling and quantitative analysis (rat brain), 122, 265
Naltrexone
derivative-containing affinity gel, opioid-binding site solubilization (bovine, rat, toad brain), 119, 624
α-Naphthofuran receptors
microsomal, selective ligand: centchroman cis isomer (rat), 125, 346
ß-Naphthofuran receptors
microsomal, selective ligand: centchroman cis isomer (rat), 125, 346
Natriuretic factors
atrial, see Atrial natriuretic factor
Neocarzinostatin, see Zinostatin
Neplanocin A
metabolic conversion to S-neplanocylmethionine (murine L929 cells), 120, 131
S-Neplanocylmethionine
formation by neplanocin-A metabolic conversion (murine L929 cells), 120, 131
Netropsin, see Congocidine
Neurokinin
α and ß, synthesis and substance-P activity, 118, 405
Neuromedin B
and neuromedin C, comparative regional distribution in adrenal gland, brain, pituitary, and spinal cord (rat), 124, 925
Neuromedin C
isolation and characterization (porcine spinal cord), 119, 14
and neuromedin B, comparative regional distribution in adrenal gland, brain, pituitary, and spinal cord (rat), 124, 925
Neuromedin K
regional distribution in brain and spinal cord (rat), 124, 731
Neuromedin L
regional distribution in brain and spinal cord (rat), 124, 731
Neuromedin N
isolation, amino acid sequence, and biological activity (porcine spinal cord), 122, 542
Neurons
histone H1 subfraction cellular accumulation during postnatal development (rat cerebral cortex), 123, 697
membrane phospholipids, fatty acid composition, ethanol effect (murine embryos), 122, 516
substance-P enzymatic degradation in vitro (rat brain), 125, 728
Neuropeptides
M I and II, amino acid sequences, determination by fast-atom bombardment mass spectrometry (cockroach), 124, 350
Neurotensin
binding to receptor sites, characterization and visualization (human), 120, 206
release from C cells
forskolin and cholera toxin effects (rat), 120, 540
stimulation by growth hormone-releasing factor (rat), 123, 497
tyrosine 3 residue-iodinated, biological activity and receptor-binding properties (guinea pig, rat), 120, 812
Neurotensin receptors
high-affinity, loss in Parkinsonian subjects (human substantia nigra), 125, 395
neurotensin binding, characterization and visualization (human), 120, 206
tyrosine 3 residue-iodinated neurotensin interactions (guinea pig, rat), 120, 812
Neurotoxins
Clostridium botulinum type A, heavy and light chains, partial amino acid sequence, 119, 900
Neutrophils
amiloride-sensitive Na^+-H^+ exchange, activation by chemotactic factors (human), 122, 755
cell-free preparation, NADPH-dependent leukotriene B_4 catabolism (human), 125, 615
chemotactic factor production, stimulation by opsonized zymosan particles, inhibition by dexametha-

sone (rat), 119, 720
chemotaxis
in inflammatory sites, leukotriene B_4-stimulated, inhibition by dexamethasone (rat), 119, 884
inhibition by
organotin compounds (rabbit), 123, 543
synthetic peptides (rabbit), 118, 682
cytoskeleton, association with leukotriene B_4, chemotactic factor and phorbol ester effects (rabbit), 124, 963
degranulation
enhancement by diacylglycerols (human), 123, 64
and superoxide anion production, 4,4'-diisothiocyano-2,2'-disulfonic acid stilbene effects (human), 120, 964
docosahexaenoic acid uptake, release, and metabolsim (human), 120, 907
-independent vascular lysosomal hydrolase secretion, stimulation by platelet-activating factor (rat), 125, 980
intracellular free Ca concentration, chemotactic factor-induced increase, inhibition by pertussis toxin: role of G protein (rabbit), 124, 644
ionophore A23187-stimulated, platelet-activating factor formation, inhibition by calmodulin antagonists (human), 118, 629
leukotriene B_4 ω-oxidation, inhibition by CO: role of cytochrome P-450 in leukotriene B_4 catabolism (human), 123, 475
lysozyme release, induction by cyclic tetrameric clusters of chemotactic peptides (human), 124, 939
membrane potential, changes in response to formyl-methionyl-leucyl-phenylalanine or 12-O-tetradecanoylphorbol 13-acetate (human), 123, 937
production of platelet-activating factor species: 1-O-hexadecyl-2-O-acetyl-sn-glycero-3-phosphocholine isolation and characterization (human), 121, 815
stimulated
by exogenous leukotriene B_4, effect on metabolism and release of arachidonic acid and platelet-activating factor synthesis (human), 122, 535
luminol-dependent and native luminescence, simultaneous detection (human), 123, 1047
platelet-activating factor release, molecular heterogeneity (human), 122, 325
superoxide
generation, induction by zymosan-activated serum (human), 121, 695
production, synergistic stimulation by A23187 and 1-oleoyl-2-acetylglycerol (human), 125, 332
release, synergistic stimulation by ionophore A23187 and 4ß-phorbol 12-myristate 13-acetate (guinea pig), 122, 734
surface membranes, DNA-binding site, identification with biotin-labeled DNA (human), 122, 1034
Nicotinamide
inhibition of deoxyglucose uptake in cultured cells (3T3-L1, OK, UMR-106 cells), 123, 785
Nicotinamide N-oxide
cytosolic, reduction, hepatic aldehyde oxidase role (rabbit), 120, 602
NAD(P)H-dependent reduction by cytosolic aldehyde oxidase-NADPH-cytochrome c reductase system (rabbit hepatic microsomes), 125, 1117
Nicotine
lycopene cyclization inhibition (Phaseolus vulgaris cotyledons), 120, 625
Nifedipine
effect on catecholamine release evoked by Ca reintroduction (feline adrenal glands), 120, 851
inhibition of Ca^{2+} uptake and insulin release by pancreatic B cells (rat), 123, 1062
Nimodipine
effect in isolated and intact cardiac preparations: pharmacological and radioligand binding correlations (canine, guinea pig, porcine, rat), 125, 387
^3H-labeled, binding to skeletal muscle transverse-tubular membranes, temperature and d-cis-diltiazem effects (rabbit), 123, 41
Nitrate reductase
activation by formate dehydrogenase (Neurospora crassa nit-1), 121, 1042
derepression in culture with excess ammonium and phosphate limitation (Cyanidium caldarium), 119, 259
siderophore reduction catalysis (squash cotyledon), 125, 52
Nitrendipine
effect in isolated and intact cardiac preparations: pharmacological and radioligand binding correlations

(canine, guinea pig, porcine, rat), 125, 387
³H-labeled, binding
to Ca channel site, thioridazine diltiazem-like effect (rat myocardial membranes), 121, 657
displacement by tetrodotoxin, effect of age (fetal murine spinal cord culture), 124, 979
to skeletal muscle transverse-tubular membranes, temperature and d-cis-diltiazem effects (rabbit), 123, 41
-induced phosphorylation of Ca channel subunit-comigratory 42-kDa membrane protein (canine heart), 121, 890
Nitrite reductase
turnover kinetics, product inhibition analysis (Paracoccus denitrificans, Pseudomonas aeruginosa), 123, 966
6-Nitrobenzo[a]pyrene
metabolism by intestinal microflora (human intestine), 123, 262
p-Nitrobenzylidine aminoguanidine
-specific activity of NAD-dependent mono ADP-ribosyltransferase (porcine, rabbit skeletal muscle), 120, 973
Nitrobenzylthioinosine
effect on adenine nucleoside efflux and influx in adenosine deaminase-deficient lymphoma cells (human), 121, 514
high-affinity binding sites, photoaffinity labeling (guinea pig, rat lung), 118, 594
Nitrogenase
short-term inhibition by ammonium (Azotobacter chroococcum), 123, 431
Nitrogen mustard, see Mechlorethamine
1-Nitropyrene
metabolism by intestinal microflora (human intestine), 123, 262
N-Nitrosodiethylamine
-induced hepatocarcinoma, increased expression of c-Ha-ras, c-Ki-ras, and N-ras genes (rat), 122, 259
N-Nitrosodimethylamine N-demethylase I
polyriboinosinic:polyribocytidylic acid-induced depression, inhibition by actinomycin D or cycloheximide (murine liver), 121, 237
N-Nitrosodimethylamine N-demethylase II
polyriboinosinic:polyribocytidylic acid-induced depression, inhibition by actinomycin D or cycloheximide (murine liver), 121, 237
N-Nitrosodiphenylamine
formation from 1,1-diphenylhydrazine by hepatic microsomes (rat), 118, 958
2-Nitroso-6-methyldipyrido[1,2-a:3',2'-d]imidazole
conjugation with glutathione, detection of labile intermediates in situ by fast-atom bombardment mass spectrometry, 124, 1
Nitrous oxide reductase
and Cu protein, comparison (Paracoccu denitrificans, Pseudomonas denitrificans, P. perfectomarinus), 119, 588
Nitroxide radicals
oxidation by hemoglobin-hydrogen peroxide reactions, 120, 534
NOE, see Nuclear Overhauser effects
Noradrenalin N-methyltransferase
uv-induced covalent binding of ³H-[methyl]-S-adenosyl-L-methionine, methyl acceptor substrate effects (bovine adrenal), 122, 499
Nordihydroguaiaretic acid
effect on
Ca-activated phospholipid-dependent protein kinase (murine epidermal cytosol), 124, 63
thromboplastin activity (human monocytes), 119, 179
Norepinephrine
-induced [³H]inositol-1-phosphate accumulation, inhibition by phorbol esters (rat hippocampal slices), 123, 703
19-Nor-10-keto-25-hydroxyvitamin D_3
formation from 25-hydroxyvitamin D_3 (canine renal cell culture), 120, 919
NSC 264137, see N^2-Methyl-9-hydroxyellipticinium
Nuclear magnetic resonance (NMR)
¹H, $[d-(GGAATTCC]_2$, nonexchangeable resonance assignment by 2D nuclear Overhauser effect spectra, 119, 663
proton, spectrum, virtual coupling of N,N'-diacetylchitobiose, characterization by 2D J-resolved spectroscopy, 123, 555
with solenoid transmit/receiver coil, kinetic analysis in vivo of [¹³C] glucose intragastric utilization (mouse), 123, 882
two-dimensional
correlation spectroscopy, sequential assignment of double-stranded deoxynucleotide ¹H and ³¹P resonances, 124, 774
deoxyribose proton NMR signal assignment in d(ApGpCpT), 121, 1021
peptide and protein spectra, computer-aided evaluation, 125, 1143

Nuclear Overhauser effects
^1H-^{13}C selective, gramicidin-S analysis, 124, 739
spectra, 2D, [d-(GGAATTCC]$_2$ nonexchangeable ^1H NMR resonance assignment, 119, 663
Nuclease
endoplasmic reticulum, DNase activity and effect on DNA synthesis in vitro (rat liver), 121, 62
Nuclease S1
sensitivity to
cis- and trans-diamminedichloroplatinum (II)-modified DNAs: effects of nucleotide sequence and cytosine and guanine content (calf thymus, Micrococcus lysodeikticus), 124, 367
negatively superhelical DNA, enhancement by netropsin (simian virus 40), 124, 388
Nuclei
androgen-dependent proteins, changes during functional differentiation and dedifferentiation (rat dorsolateral prostate), 118, 467
binding of activated receptor-glucocorticoid complex, enhancement by ATP-stimulated factor (rat hepatic cytosol), 121, 940
binding sites, RNA-containing, for glucocorticoid-receptor complexes, localization (HeLa cells), 123, 78
matrix
DNA polymerase and DNA topoisomerase identification and solubilization (normal, regenerating rat liver), 124, 917
estrogen binding (isolated rat uterine cells), 123, 84
isolated, DNA polymerase α and ß activities (Ehrlich ascites cells), 118, 609
proteins, induction by heat shock, composition (Chinese hamster ovary cells), 118, 444
membrane peptides, androgen dependence (rat ventral prostate), 125, 469
Nucleoli
matrix, proteins, induction by heat shock, composition (Chinese hamster ovary cells), 118, 444
phosphoproteins, 19-kDa, purification and partial characterization (Novikoff hepatoma cells), 122, 47
Nucleophiles
specificity in chymotrypsin peptide synthesis (bovine pancreas), 118, 317
Nucleoside diphosphatase
and thiamine pyrophosphatase, separation and properties (rat brain), 118, 292
Nucleoside transport
-deficient mutants, interferon effect (murine T-lymphoma S49 cells), 118, 124
in lung (guinea pig, rat), 118, 594
Nucleoside triphosphates
-induced phosphofructokinase activation in liver (fed, starved rats), 118, 567
Nucleosomes
acetic anhydride-modified, single- and double-stranded DNA release (chicken erythrocytes), 121, 907
orientation maintenance in chromatin fiber, role of histone H1 and core histone nonstructural domains (calf thymus), 122, 1021
Nucleotides
-binding sites
location on RNA polymerase II (wheat germ), 125, 569
in tubulin, affinity labeling (human platelets), 123, 92
d(ApGpCpT), deoxyribose ring, proton NMR signal assignment by 2D NMR, 121, 1021
guanine, see Guanine nucleotides
Nucleotide sequence
apolipoprotein A-II
cDNA clone (human), 123, 1
precursor cDNA (human), 120, 734
atrial natriuretic factor genomic DNA clone (human), 125, 797
cardionatrin cDNA clone (rat), 122, 1076
catalase cDNA (rat liver), 122, 831
cDNA for protein expressed in embryo and chemically-induced pancreatic B-cell tumor (rat), 124, 164
cytochrome oxidase polypeptide I exon-2 coding region (Aspergillus nidulans mitochondria), 119, 786
cis- and trans-diamminedichloroplatinum (II)-modified DNAs, effect on S1 nuclease sensitivity (calf thymus, Micrococcus lysodeikticus), 124, 367
glyceraldehyde-3-phosphate dehydrogenase mRNA (chicken muscle), 118, 767
Hemoglobin Miyada abnormal globin gene (human), 119, 968
melibiose and lactose operon promoter regions, comparison (Escherichia coli), 121, 41
prealbumin cDNA (human liver), 124, 558
pro-opiomelanocortin mRNA 3' nontranslated regions, heterogeneity

(Onchorhynchus keta pituitary), 122, 556
transducin γ-subunit (bovine), 124, 250
transferrin cDNA (human), 119, 273
$tRNA^{Ile}$ (Saccharomyces cerevisiae), 119, 905
Nylon
-coated inorganic matrices, glucoamylase immobilization supports (Aspergillus niger C), 121, 220

O

Octylglucoside
role in cytochrome P-450 and NADPH cytochrome P-450 reductase incorporation into large unilamellar liposomes (rabbit liver), 121, 118
Oestradiol 17ß-dehydrogenase
dehydroepiandrosterone substrate kinetics (human placenta), 119, 83
OKT-1581
thromboxane synthetase inhibition in vivo (infarcted, normal canine myocardium), 121, 552
Olefins
monosubstituted, oxidation by rat hepatic microsomal cytochrome P-450 and heme models: aldehyde, epoxide, and allylic alcohol formation, 119, 319
Oleic acid
peroxisomal oxidation, inhibition by phenothiazines (rat hepatocytes), 120, 505; erratum, 123, 410
1-Oleoyl-2-acetyl-glycerol
effect on phospholipases A_2 and C (human platelets), 121, 386
and ionophore A23187, synergistic stimulation of superoxide production (human neutrophils), 125, 332
stimulation of
NADPH oxidase activation by chemotactic peptide (human neutrophils), 125, 367
phosphatidylinositol 4-phosphate formation in intact platelets (human), 123, 589
superoxide generation, retinol effects (human neutrophils), 120, 318
2',5'-Oligoadenylate
analog, probe for RNA ligase and substrate detection (CV-1, HeLa, human neuroblastoma cells), 123, 194
and 2',5'-oligoadenylate phosphodiesterase, levels in plasma and serum (human), 125, 1061
synthesis, 2',5'-oligo(A) synthetase identification (rat hepatic nuclear matrix), 120, 996
2',5'-Oligoadenylate phosphodiesterase
and 2',5'-oligoadenylate, levels in plasma and serum (human), 125, 1061
2',5'-Oligoadenylate synthetase
identification and 2',5'-oligoadenylate synthesis (rat hepatic nuclear matrix), 120, 996
stimulation in vitro by phenobarbital (rat hepatic nuclei), 121, 788
Oligomycins
sensitivity-conferring proteins, monoclonal antibody preparation: tool for conserved and essential epitope recognition (porcine cardiac mitochondria), 123, 254
Oligosaccharides
complex, and high mannose-containing form of acid α-D-mannosidase, identification (Macaca radiata brain), 123, 1185
O-linked, discrimination of human chorionic gonadotropin α-subunit free and combined forms, 122, 1260
Oligouridylic acid
and polyadenylic acid mRNA-associated proteins, comparison (rat liver), 120, 1044
Oncogenesis
horizontal, by human tumors, mechanism: cell fusion role (nude mice), 124, 933
Oncomodulin
effect on cAMP phosphodiesterase (Morris rat hepatoma), 125, 420
Oncornaviruses
actin identification (chicken embryo fibroblasts), 118, 580
Ontogeny
electrolectin distribution variations (female mouse), 119, 801
Operons
lactose and melibiose, promoter regio nucleotide sequence, comparison (Escherichia coli), 121, 41
Opioid receptors
agonist binding, regulation by Na, pertussis toxin effect (NG108-15 cells), 123, 1107
binding site solubilization by affinity chromatography with naltrexone derivative (bovine, rat, toad brain), 119, 624
demonstration by computer modeling ar quantitative ligand binding analysis (rat brain), 122, 265
and non-opioid receptors for ^3H-labeled ß-endorphin, identification in NG108-15 cells (human), 122, 428
recognition by enkephalins, effect of

ligand aromatic group stereo-orientation (rat cerebral membranes), 121, 966
-Opioid receptors
environment, simulation by enkephalinamide complexes with 18-crown-6-ether in $CDCl_3$, NMR spectroscopy, 121, 456
nithine
side chains in gramicidin S, hydrogen bonding, 118, 643
nithine carbamoyltransferase
postnatal increase, control, insulin role (rat liver), 123, 317
nithine decarboxylase
inactivation/phosphorylation, and RNA polymerase-I stimulation, protein kinase NII role (murine kidney), 120, 219
induction by Cd (rat kidney, liver, testes), 125, 882
inhibition by phosphorylcholine and phosphorylethanolamine (murine brain, kidney, liver), 122, 277
phosphorylation by casein kinase type 2 (rat heart), 122, 997
short-term regulation by lysine (Dictyostelium discoideum), 119, 1141
stimulation by NaCl (rat gastric mucosa), 121, 1027
and uterine growth, dissociated regulation by estrogen (rat), 122, 1186
rnithine transcarbamylase, see Ornithine carbamoyltransferase
rosomucoid
crystallization with chlorpromazine (human serum, urine), 124, 619
steoblasts
-like cells, vitamin D metabolism, bovine serum albumin and cycloheximide effects (fetal chicks), 125, 265
uabain
spin-labeled, physicochemical interactions with Na,K-ATPase receptor, analysis (canine kidney), 124, 210
valbumin
denaturation, amino acid analog incorporation effect (hen), 118, 481
vomacroglobulin
and α-macroglobulins, CD spectra, comparison (bovine, chicken, frog), 123, 771
votransferrin, see Transferrin
vulation
long-term inhibition by gonadotropin-releasing hormone inhibitor at low dosage (rat), 118, 351
xaloacetate
-malate shuttle reconstruction and oxaloacetate uptake by mitochondria (rat brain), 119, 1039
Oxidase
mixed-function, cytochrome P-450-dependent, arachidonic acid metabolism (canine neutrophils), 123, 581
NADPH-dependent superoxide radical-generating, resolved flavoprotein and cytochrome b_{559} components, catalytic properties (human neutrophils), 118, 430
Oxidation
glucose, insulin and ethanolamine effects in vitro, comparison (rat adipocytes), 121, 413
peroxisomal, fatty acids, inhibition by phenothiazines (rat hepatocytes), 120, 505; erratum, 123, 410
protoporphyrinogen, during chlorophyll and heme synthesis, effect of unsaturated fatty acids (barley, spinach etioplasts, mitochondria), 123, 1157
state, Cu,Zn-superoxide dismutase, ^{19}F NMR (human erythrocytes), 122, 1276
ß-Oxidation
peroxisomal system, role in xenobiotic acyl compound chain shortening (rat hepatocytes), 125, 123
ω-Oxidation
leukotriene B_4, by neutrophils, inhibition by CO: role of cytochrome P-450 in leukotriene B_4 catabolism (human), 123, 475
Oxolinic acid
effect on DNA ligase, DNA polymerases α and ß, and terminal deoxynucleotidyl transferase (chicken thymus), 121, 762
Oxygen
-containing free radicals, generation in vitro by 4'-deoxydoxorubicin and doxorubicin, analysis and relationship to cardiotoxicity, 125, 584
incorporated by 4-chlorobenzoate during dehalogenation-hydroxylation, origin (Arthrobacter sp.), 124, 669
photosystem II, evolution
inhibition by
calmodulin-type and other Ca antagonists (stroma-free spinach thylakoids), 121, 626
Zn^{2+}, Mn^{2+} release into restricted aqueous compartment (chloroplast nonvesicular membrane fragments), 119, 168
role of 16- and 24-kDa polypeptides

(spinach), 120, 299
-pulsed cells, proton translocation, inhibition by dicyclohexylcarbodiimide and vanadate (Anacystis nidulans), 123, 358
singlet
methoxyvinylpyrene analog chemiluminescent probe, 123, 869
molecular, generation by myeloperoxidase, ir electronic emission spectra (canine granulocytes), 122, 668
quenching by D-α-tocopherol (human granulocytes), 119, 1056
uptake by cardiac slices, effects of doxorubicin, epirubicin, and mitoxantrone, comparison (rat), 125, 954
Oxytocin
purification and characterization: analysis of gene evolution (Didelphis virginiana), 123, 306

P

Pactamycin
interleukin-2 mRNA superinduction (human tonsils), 123, 842
Palate
developing, adenylate cyclase-coupled ß-adrenergic receptor identification (mouse), 119, 193
Palmitic acid
N-acylation in sphingomyelin, enhancement in rabbit antiserum-stimulated L cells (mouse), 121, 605
incorporation in cholesteryl esters, chronic regulation by thyrotropin (thyroid cell culture), 119, 537
-palmitoleic acid membrane ratio, alteration in V79 cell mutants with defective low-density lipoprotein endocytosis (Chinese hamster), 122, 627
peroxisomal oxidation, inhibition by phenothiazines (rat hepatocytes), 120, 505; erratum, 123, 410
Palmitoleic acid
-palmitic acid membrane ratio, alteration in V79 cell mutants with defective low-density lipoprotein endocytosis (Chinese hamster), 122, 627
Palmitoyl-tetrapeptide
B-lymphocyte mitogenicity in vitro (Escherichia coli), 121, 55
Pancreas
acinar cells, [^{125}I]Bolton-Hunter-substance P binding and internalization (guinea pig), 124, 578
ß-cells
Ca^{2+} uptake and insulin release, dihydropyridine effects (rat), 123, 1062
insulin release inhibition by glucose, induction by blockage of glucose-promoted Ca^{2+} uptake (mouse), 125, 875
cholecystokinin receptor size and subunit structure, comparison with cerebral receptors (mouse), 124, 497
islets
adenylate cyclase activity, insulin release, and membrane protein ADP ribosylation, effect of Bordetella pertussis toxin (rat), 124, 19
ADP-ribosylation (rat), 118, 663
glucose-stimulated, endogenous phospholipases C and A_2, activities (neonatal rat), 120, 820
identification of leukemia virus-related protein (mouse), 124, 344
insulin secretion in vitro, effect of homogenous magnetic fields (rat), 122, 191
Papain
bacteriorhopsin proteolytic cleavage, crosslinking analysis (Halobacterium halobium), 124, 565
inhibition by γ-trace (human), 120, 631
Papaverine
guanylate cyclase inhibition (rat brain, liver, lung), 123, 1194
Parathormone, see Parathyroid hormone
Parathyroid cells
parathyroid hormone release, stimulation by high extracellular K^+, relationship to cytosolic Ca^{2+} decrease (bovine), 123, 684
Parathyroid hormone
effect on alkaline phosphatase and cAMP production in vitro (osteoblastic MC3T3 cells), 123, 894
plasminogen activator stimulation (rat osteoblast-rich calvarial cells, osteogenic sarcoma cells), 122, 230
release by parathyroid cells, stimulation by high extracellular K^+, relationship to cytosolic Ca^{2+} decrease (bovine), 123, 684
-stimulated bone resorption, inhibition by interferon type I (mouse) 120, 553
Parenchymal cells
free hemoglobin uptake (rat liver), 123, 489
Parietal cells
aminopyrine accumulation, 12-O-tetradecanoylphorbol-13-acetate effect

(rat), 121, 566
Parkinson's disease
high-affinity neurotensin receptor loss in substantia nigra (human), 125, 395
N-methyl-4-phenyl-1,2,3,6-tetrahydropyridine-induced, dopamine uptake inhibition (rat PC12 cells), 119, 1186
Paromomycin phosphotransferase
gene from Streptomyces rimosus f. paromomycinus, cloning and expression in S. lividans, 125, 895
Pefloxacin
effect on DNA ligase, DNA polymerases α and β, and terminal deoxynucleotidyl transferase (chicken thymus), 121, 762
D-Penicillamine
-induced Cu-deficiency, Cu and Zn molecular localization (rat fetal liver), 118, 697
Penicillin
nuclei, synthesis from carboxymethylcysteine-containing acyclic peptide (Streptomyces clavuligerus), 120, 607
Pent-4-enoic acid
ureagenesis inhibition, potentiation by ammonia (rat hepatocytes), 118, 47
Pentobarbital
-induced anesthesia, effect on fructose 2,6-bisphosphate levels (rat liver), 122, 1154
Pentose phosphate pathway
glucose metabolism, alloxan diabetes effect (rat heart), 118, 110
Peptidase
assay, dynorphin-A cleavage at single arginine residue (Aplysia californica atrial gland), 119, 415; erratum, 124, 994
Peptides
acyclic, carboxymethylcysteine-containing, penicillin and cephalosporin nuclei enzymatic synthesis (Streptomyces clavuligerus), 120, 607
β_1-adrenergic receptor, heterogeneity after photoaffinity labeling, preparation procedure role (turkey erythrocytes), 119, 458
atrial natriuretic factor
aldosterone secretion inhibition, intramolecular disulfide bond role (rat adrenal glomerulosa cells), 122, 171
components, isolation and sequence determination (rat), 120, 981
isolation, structure, and biological activities (rat), 123, 444
natriuretic activity in vivo and smooth muscle relaxant activity in vitro (chick rectum, rat), 125, 938
synthesis and analysis of structural factors in tissue specificity (chick rectum, rabbit aorta, rat), 123, 338
atriopeptigen, bioactive, purification and amino acid sequence (rat), 121, 802
calcitonin-related, gene structure and expression (human lung, medullary thyroid carcinoma cells), 123, 648
chymotrypsin, synthesis, nucleophile specificity (bovine pancreas), 118, 317
cyclic pseudohexapeptide, somatostatin analog, synthesis and biological activity, 120, 840
endogenous, in pancreatic juice, trypsinogen secretion stimulation with atropine, exogenous trypsin inhibitor action mode comparison (rat duodenum), 118, 532
gastric inhibitory, see Gastric inhibitory peptide
generated by maltoporin limited proteolysis, location by computer search, 125, 926
gliadin-derived, agglutinating activity, role in celiac disease pathogenesis (human K562(S) cells), 121, 428
gonadotropin-releasing hormone-like, biological activity (rat testes), 122, 1071
high-molecular-weight, activation by kallikrein (rat atrium), 120. 461
insulin
-like, common high-affinity receptor identification by insulin growth factor-II binding (human lymphoid cells), 118, 774
-stimulating, isolation from bovine serum albumin tryptic digests, characterization, 122, 1179
leucine-enkephalin backbone, thiomide-substituted, effect on selective receptor recognition (guinea pig ileum, murine vas deferens), 120, 305
mapping, 2D, by polyacrylamide-gel electrophoresis with limited proteolysis in sodium dodecyl sulfate (bovine serum, murine splenocytes), 122, 932
nonsomatostatin, prosomatostatin amino terminal-derived, identification in medullary thyroid carcinoma cells (rat), 124, 450

nuclear membrane, androgen dependence (rat ventral prostate), 125, 469
opioid, proenkephalin-derived, purification and amino acid sequence (ovine), 118, 299
progastrin amino-terminal, purification (human gastrinoma cells), 123, 404
ribonuclease A N-terminal, folding, fundamental role of salt bridge Glu 2^-...Arg 10^+ (bovine pancreas), 123, 757
semisynthesis, α-chymotrypsin and ß-trypsin-catalyzed, mechanism and specificity, 120, 686
sequences of steroid 21-hydroxylase, alignment with cDNA sequence of bovine enzyme (porcine), 125, 734
synthetic
acetylcholine receptor
antibodies, receptor structural characterization (Torpedo californica), 122, 1225
α-subunit, antibody induction (Torpedo californica), 121, 673
middle sized tumor antigen tyrosine phosphorylating site sequence-specific, neutrophil chemotaxis inhibition (rabbit), 118, 682
phosphorylation by protein kinase C with phospholipid and Ca^{2+} or phorbol ester (rat brain), 124, 296
pp60^{src} tyrosine phosphorylating site sequence-specific, neutrophil chemotaxis inhibition (rabbit), 118, 682
proenkephalin, high-molecular-weight enkephalin-containing protein recognition (bovine adrenal medulla), 120, 650
N-(P-substituted phosphinoyl), antihypertensive activity (spontaneously hypertensive rat), 119, 1205
vitamin K-dependent carboxylation, product characterization (rat hepatic microsomes), 119, 836
thymic hormone, conjugation with spermidine and spermine, conjugate properties, 122, 21
tryptic, in thyroglobulin, thyroxine-containing, isolation and amino acid sequence (bovine, ovine, porcine), 118, 423
two-dimensional NMR spectra, computer-aided evaluation, 125, 1143
vasoactive intestinal, see Vasoactive intestinal peptide
Peptidyl-3-amino-9-ethyl-carbazole
fluorogenic, selective endopeptidase detection and characterization (Plasmodium berghei), 124, 703
Peptidyl carbamate esters
effect on chymotrypsin, elastase, and trypsin (porcine pancreas), 122, 571
Peptidyltransferase
inhibition by
chloramphenicol and dipeptidyl analog, binding mode analysis (Escherichia coli cell-free system), 122, 748
sparsomycin in vitro, role of inhibitor sulfoxide configuration (Escherichia coli), 125, 784
Peptidyl-tRNA
enzymatic translocation, zaluzanin-C effect (HeLa cells, rabbit reticulocytes, Saccharomyces cerevisiae), 123, 59
Perfluorocarbon
blood substitution in brain, ^{31}P NMR in vivo (rat), 119, 913
Peroxidase
-catalyzed
acetaminophen metabolism with thiols, thiyl radical formation, 125, 109
H_2O_2-mediated NADPH oxidation to $NADP^+$, nonphotosensitized potentiation by hematoporphyrin, 118, 191
isobutyraldehyde chemiluminescence, rate-limiting factors, 122, 28
-hydrogen peroxide-tyrosine system: bityrosine production and identification, 125, 916
native and type 2-depleted laccase-coupled binuclear Cu active site oxidation, X-ray absorption spectroscopy (Rhus vernicifera), 119, 567
solubilization and activation in benzene by 2,4-bis(O-methoxypolyethylene glycol)-6-chloro-s-triazine induced modification, 121, 261
Peroxidation
lipid, see Lipoperoxidation
Peroxisomes
biliverdin reductase-converting enzymes, isolation and characterization (rat liver), 121, 249
fatty acid oxidation, inhibition by phenothiazines (rat hepatocytes), 120, 505; erratum, 123, 410
ß-oxidation system, role in xenobiotic acyl compound chain shortening (rat hepatocytes), 125, 123
Pertussis toxin
and choleragen, requirement for adenylate cyclase maximal activation (NG108-15 cell culture), 119, 106
effect on Na regulation of opioid agonist binding (NG108-15 cells),

123, 1107
inhibition of chemotactic factor-induced increase in intracellular free Ca concentration, role of G protein (rabbit neutrophils), 124, 644
pH
-dependent α-lactalbumin structure, fluorescence spectroscopy (bovine), 119, 509
effect on
DNA crosslinked by mitomycin C, nitrogen mustard, and decarbamoyl mitomycin C (human fibroblasts), 123, 549
F_1-ATPase expression (Streptococcus faecalis membranes), 122, 151
Na^+,K^+-ATPase regulation by inorganic phosphate (canine renal medulla), 123, 438
-induced diphtheria toxin conformational change, fluorescence characterization, 120, 286
Phalloidin
effect on actin filament shortening by actin-protein 90-kD complex and cytochalasin D, comparison (bovine brain), 123, 596
Phanerochaete chrysosporium
DNA sequence autonomous replication in Saccharomyces cerevisiae, 118, 821
1,10-Phenanthroline, see o-Phenanthronline
o-Phenanthronline
reversible inhibition of prostate carcinoma cell proliferation in vitro (human), 124, 538
Phenethylamine
effect on amino acid distribution (rat brain), 122, 143
Phenobarbital
and 2-allyl-2-isopropylacetamide, induction of cytochrome P-450 de novo synthesis (cultured chick embryo hepatocytes), 125, 1096
effect on hepatic enzymes in vivo (rat), 122, 770
-induced cytochrome P-450, monoclonal antibody preparation and characterization (rat hepatic microsomes), 119, 744
2,5-oligoadenylate synthetase stimulation in vitro (rat hepatic nuclei), 121, 788
Phenothiazines
peroxisomal fatty acid oxidation inhibition (rat hepatocytes), 120, 505; erratum, 123, 410
Phenylalanine
and histidine ring stacking in angiotensin II, interaction: role in receptor activation, NMR, 122, 434
D-threo-2-(L-Phenylalanylglycyl)amino-3-p-nitrophenyl-1,3-propanediol
chloramphenicol analog, peptidyltransferase inhibition, binding mode analysis (Escherichia coli cell-free system), 122, 748
N-(cis-2-Phenyl cyclopentyl)azacyclotridecan-2-imine hydrochloride
cholera toxin ADP-ribosyltransferase inhibition (rat liver), 120, 700
Phenylethanolamine N-methyltransferase, see Noradrenalin N-methyltransferase
ß-Phenylethylamine, see Phenethylamine
Phenylsuccinate
effect on inner mitochondrial membrane lipid bilayer fluidity, EPR and fluorescence (rat liver), 119, 854
inner mitochondrial membrane protein sulfhydryl group modification, EPR analysis (rat liver), 122, 1404
Phenyl sulfide
oxidation by microsomal fraction of germinating seeds (Pisum sativum), 121, 1001
Phloretin
inhibition of Ca-activated phospholipid-dependent protein kinase (murine epidermal cytosol), 124, 63
Phorbol 12,13-dibutyrate
effect on adenylate cyclase desensitization (duck erythrocytes), 121, 973
4α-Phorbol 12,13-didecanoate
effect on adenylate cyclase desensitization (duck erythrocytes), 121, 973
Phorbol ester receptors
reduction by N-(6-aminohexyl)-5-chloro-1-naphthalenesulfonamide (murine skin), 124, 726
Phorbol esters, see also specific phorbol esters
and A23187, glycogen phosphorylase synergistic activation (rat hepatocytes), 119, 88
binding to protein kinase C, competitive inhibition and enzyme activation by mezerein in vitro and in vivo (rat brain), 121, 649
inhibition of
carbachol- and norepinephrine-induced [^{3}H]inositol-1-phosphate accumulation (rat hippocampus), 123, 703
luteinizing hormone-stimulated testosterone production (murine Leydig cell culture), 119, 1062
lymphocyte proliferation, protein kinase identification (bovine),

121, 392
progressive inhibition of Ca^{2+}-sensitive phospholipid-dependent protein kinase activity (murine 3T3 cells), 120, 1053
protein kinase-C activation, characterization (murine brain), 121, 448
Phorbol-12-myristate-13-acetate
-activated Ca^{2+}-dependent 36-kDa membrane protein phosphorylation (rat basophilic leukemia cells), 125, 867
effect on α_1-adrenergic stimulation of glycogenolysis and ureogenesis (rat hepatocytes), 119, 1128
stimulation of
membrane band 4.1 phosphorylation (intact rabbit erythrocytes), 120, 291
phosphatidylinositol 4-phosphate and phosphatidylinositol 4,5-bisphosphate formation (human platelets), 124, 507
4ß-Phorbol 12-myristate 13-acetate and ionophore A23187, synergistic stimulation of superoxide release by neutrophils (guinea pig), 122, 734
Phosphatase inhibitor-1
activity in smooth muscle (bovine aorta), 120, 397
2'-Phosphate
$NADP^+$, glutathione reductase recognition site, identification (yeast), 124, 572
Phosphates
depletion, effect on mitogen-mediated phospholipid synthesis stimulation (human peripheral lymphocytes), 118, 371
effect on basal and isoprenaline- and GTP-stimulated adenylate cyclase (rabbit heart), 118, 561
inorganic
-mediated pyruvate,P_i dikinase activation, regulation (Zea mays), 120, 559
Na^+,K^+-ATPase regulation, pH dependence and physiological implications (canine renal medulla), 123, 438
limitation, in culture with excess ammonium, nitrate reductase derepression (Cyanidium caldarium), 119, 259
Phosphatidic acid
stimulation of erythrocyte plasma membrane Ca^{2+}-ATPase (rat), 125, 908
synthesis, inhibition by prostacyclin, protein kinase-C role (human platelets), 120, 37
Phosphatidylcholine
alkylacyl, diacyl, and alkenylacyl subclasses, differential susceptibility to biosynthesis stimulation by phospholipase C (Krebs II ascites cells), 125, 413
bilayer membranes
cholesterol dissociation, hydrogen belt interactions, 118, 743
structural transitions, induction by diacylglycerol (egg), 124, 491
and diether analogs, in vitro transfer by plasma exchange factor (human, rat lipoprotein-deficient sera), 119, 452
Phosphatidylethanolamine
bilayer membranes, structural transitions, induction by diacylglycerol (egg), 124, 491
composition in liposome membranes, effect on carbocyanine dye fluorescent response, 123, 178
N-methylation, effect on phospholipid bilayer membrane fluidity (rat basophile leukemia cells), 120, 989
Phosphatidylinositol
composition in liposome membranes, effect on carbocyanine dye fluorescent response, 123, 178
effect on erythrocyte plasma membrane Ca^{2+}-ATPase (rat), 125, 908
metabolism in
adrenal fasciculata cells, bacterial phospholipase-C effect (bovine), 123, 33
antigen-stimulated mast cells (rat peritoneum), 123, 875
phosphorylation to phosphatidylinositol-4-monophosphate, stimulation by cAMP-dependent protein kinase (porcine granulocyte plasma membrane), 124, 871
Phosphatidylinositol 4,5-bisphosphate
effect of angiotensin II-induced steroidogenesis (bovine adrenocortical fasciculata cells), 124, 393
formation, stimulation by phorbol myristate acetate (human platelets), 124, 507
light-mediated hydrolysis (isolated frog retina), 124, 503
metabolism in antigen-stimulated mast cells (rat peritoneum), 123, 875
release site of plasma membrane-bound Ca upon stimulation (human platelets), 120, 226
stimulation of plasma membrane Ca^{2+}-ATPase (rat brain synapses, erythrocytes), 125, 908

nosphatidylinositol 4-monophosphate
effect of angiotensin II-induced steroidogenesis (bovine adrenocortical fasciculata cells), 124, 393
formation
in intact platelets, stimulation by 1-oleoyl-2-acetyl-glycerol (human), 123, 589
phorbol myristate acetate (human), 124, 507
from phosphatidylinositol, phosphorylation stimulation by cAMP-dependent protein kinase (porcine granulocyte plasma membrane), 124, 871
metabolism in antigen-stimulated mast cells (rat peritoneum), 123, 875
osphatidylserine
bilayer membranes, structural transitions, induction by diacylglycerol (bovine brain), 124, 491
composition in liposome membranes, effect on carbocyanine dye fluorescent response, 123, 178
vesicles, and brain synaptosomes, interactions (rat), 119, 821
hosphoenolpyruvate
phosphofructokinase-2 inhibition (rat liver), 124, 793
transport across erythrocyte membrane, inhibition by 2,3-bisphosphoglycerate, 2-phosphoglycerate, and 3-phosphoglycerate (human), 122, 609
hosphofructokinase, see 6-Phosphofructokinase
-Phosphofructokinase
activation in liver, metabolite-induced (fed, starved rats), 118, 567
UDP-glucose-incubated, phosphoryl donor, pyrophosphate utilization (rabbit muscle), 121, 842
-Phosphofructo 2-kinase
effect of glucose loading (starved rat), 125, 655
-fructose-2,6-bisphosphatase exchange reactions, characterization (rat liver), 123, 749
inhibition by phosphoenolpyruvate and ADP (rat liver), 124, 793
-Phosphoglycerate
inhibition of phosphoenolpyruvate transport across erythrocyte membrane (human), 122, 609
hosphoglycerate kinase
unfolding-folding transition, guanidinium chloride-induced, analysis (equine muscle), 118, 416
osphoglycerate mutase, see Phosphoglyceromutase
Phosphoglyceromutase
anion effects (rabbit muscle), 121, 834
-bisphosphoglyceromutase in vitro hybridization, partial characterization (human erythrocytes), 120, 715
macrostructural organization (yeast), 121, 826
Phosphoinositide
breakdown, role in epidermal growth factor receptor affinity reduction by heterologous ligands (Swiss 3T3 cells), 123, 377
Phosphoinositide receptors
breakdown-coupled, black widow spider venom α-lactrotoxin binding (rat pheochromocytoma cells), 121, 538
Phospholipase A
ionomycin effect (human platelets), 123, 393
Phospholipase A_2
characterization (human, rat lymphocytes), 125, 719
endogenous, activity in glucose-stimulated pancreatic islets (neonatal rats), 120, 820
hydrolysis of 1-acyl-2-[6-[(7-nitro-2,1,3-benzoxadiazol-4-yl)amino]-caproyl]phosphatidylcholine (porcine pancreas), 118, 894
1-oleoyl-2-acetyl-glycerol and 1,2-didecanoylglycerol effects (human platelets), 121, 386
phospholipid bilayer hydrolysis, stimulation by long-chain unsaturated diacylglycerols (rat intestinal mucosa), 125, 836
regulation by Ca^{2+}, calmodulin effect (human, rat platelets), 121, 507
-sensitive Trypanosoma cruzi membrane components, parasite-macrophage interaction regulation (mouse), 121, 931
Phospholipase A_2 inhibitor
identification in normal serum (human), 122, 1117
Phospholipase C
activation of 3':5'-cyclic-nucleotide phosphodiesterase from rat cardiac cytosol (Clostridium perfringens), 119, 236
bacterial, effect on phosphatidylinositol metabolism and steroidogenesis (bovine adrenal fasciculata cells), 123, 33
endogenous, activity in glucose-stimulated pancreatic islets (neonatal rats), 120, 820
inhibition of dimethyl sulfoxide-in-

duced differentiation in Friend erythroleukemia cells, 125, 491
ionomycin effect (human platelets), 123, 393
1-oleoyl-2-acetyl-glycerol and 1,2-didecanoylglycerol effects (human platelets), 121, 386
phosphatidylcholine biosynthesis stimulation, differential susceptibility of alkylacyl, diacyl, and alkenylacyl subclasses (Krebs II ascites cells), 125, 413
phospholipid bilayer hydrolysis, stimulation by long-chain unsaturated diacylglycerols (human platelets), 125, 836
proteolytic activation of human platelet Ca^{2+}-activated phospholipid-dependent protein kinase (Clostridium perfringens), 118, 835
Phospholipase D
synaptosomal, role in providing choline for acetylcholine synthesis (rat brain), 124, 945
Phospholipids
bilayers
membrane fluidity, phosphatidylethanol amine N-methylation effects (rat basophile leukemia cells), 120, 989
phospholipase-catalyzed hydrolysis, stimulation by long-chain unsaturated diacylglycerols, 125, 836
with Ca^{2+} or phorbol ester, requirement for synthetic peptide phosphorylation by protein kinase C (rat brain), 124, 296
degradation, enhancement by free radicals (rat hepatic lysosomes), 124, 229
fatty acid composition, ethanol effect (murine embryonic neuron cultures), 122, 516
formation from 1-alkyl-2-acetyl-sn-glycerols in platelets (rabbit), 124, 156
interaction with anilinonaphthyl-labeled spectrin, fluorescence, 120, 344
metabolism during Ca^{2+}-regulated cellular differentiation (murine keratinocyte culture), 122, 1234
methylation, stimulation by glucose (rat pancreatic islets), 122, 706
vesicles, binding to polyamines, effect on lipid peroxidation (soybean), 122, 550
Phospholipid synthesis
L-cycloserine effect (Bacteroides levii culture), 119, 814
mitogen-mediated stimulation, phosphate depletion effect (human peripheral lymphocytes), 118, 371
Phosphoprotein phosphatase
activated ATP,Mg-dependent and latent phosphorylase b kinase dephosphorylation, deinhibitor protein and histone H1 effects (rabbit muscle), 125, 293
calmodulin-dependent, subunit A, Mn^{2+} role (bovine brain), 122, 1389
catalytic subunit, role in specificity for phospholipid, Ca^{2+}-dependent protein kinase-phosphorylated histone H1 (rat liver), 118, 278
latent, purification and subunit structure (rabbit skeletal muscle), 118, 923
Phosphoproteins
effect of interferon-ß in antiproliferative doses (human bladder carcinoma cells), 119, 941
nucleolar, 19-kDa, purification and partial characterization (Novikoff hepatoma cells), 122, 47
tyrosine protein kinase-like, 58-kDa, identification (murine lymphoma cells), 122, 563
Phosphorylase kinase
deficiency, role in glycogen storage disease (human heart), 119, 582
spermine-induced inhibition, Mg^{2+} effect (porcine liver), 121, 271
Phosphorylase b kinase
dephosphorylation by activated ATP,Mg dependent and latent protein phosphatases, deinhibitor protein and histone H1 effects (rabbit muscle), 125, 293
Phosphorylation, see also Protein kinas
actin-binding proteins
human Ca^{2+}-activated phospholipid-dependent protein kinase effect (chicken gizzard), 118, 736
role in platelet cytoskeleton assembly (human), 118, 508
activation of partially purified lipi methyltransferase (rat liver), 122, 1065
Ca^{2+}- and cAMP-enhanced, separate mechanisms for two 57,000 Mr proteins (rat pancreatic islets), 118, 797
Ca^{2+}-dependent phorbol ester-activated, 36-kDa membrane protein (rat basophilic leukemia cells), 125, 867
cascade, bicyclic, 3-hydroxy-3-methyl glutaryl CoA reductase regulation (human hepatic microsomes), 119, 488
catalytic, ATP-dependent, requirement

in ADP-mediated pyruvate,P_i dikinase inactivation (Zea mays), 118, 65
-dephosphorylation
l-alkyl-2-lyso-sn-glycero-3-phosphocholine:acetyl-CoA acetyltransferase, role in platelet-activating factor synthesis regulation (rat splenic microsomes), 120, 834
deinhibitor protein regulation (canine liver), 120, 405
myosin light chains and satellite proteins, effects on smooth muscle fibers (porcine carotid artery), 120, 933
endogenous membrane protein, enhancement during B-lymphocyte proliferation inducton (murine splenocytes), 124, 544
erythrocyte membrane band 4.1, phorbol ester-stimulated (rabbit), 120, 291
glucocorticoid receptors in vivo (rat liver), 120, 59
3-hydroxy-3-methylglutaryl-CoA reductase, enhancement of susceptibility to proteolytic degradation in vitro (rat hepatic microsomes), 125, 629
initiation factor-2, insulin-induced decrease, effect on protein synthesis (bovine chondrocytes), 121, 134
3-O-methyl-D-glucose (rat heart), 119, 1008
nuclear protein, 11-kDa, inhibition by spermine (various mammalian cell lines), 118, 710
ovarian insulin receptor ß-subunit, induction by insulin (cultured porcine granulosa cells), 120, 144
protein
actin antibody-stimulated, effects of prostaglandins E_1 and $F_{2\alpha}$ (murine L cells), 124, 23
mediation by Fc receptor and pharmacologic agents, comparison (murine peritoneal macrophages), 124, 197
stimulation by
human chorionic gonadotropin in primary culture (porcine Leydig cells), 118, 8
polyamines (corn coleoptiles), 122, 1374
purified glucocorticoid receptors, by endogenous protein kinase (rat hepatic cytosol), 119, 700
rhodopsin (isolated bovine rod outer segments), 123, 121
ribosomal protein, in organello and in vitro (Spinacea oleracea chloroplasts), 121, 297
threonine, of epidermal growth factor receptors, phorbol ester-induced, mapping (human), 123, 618
tyrosine residues
in B-lymphocytes, enhancement upon membrane immunoglobulin complexing (human), 125, 859
in normal bone marrow cells, lymphocytes, and leukemic cells, comparison (human), 124, 766
zymogen granule membrane proteins in vitro (rat pancreatic acinar cells), 122, 413
Phosphorylcholine
glutamic acid decarboxylase and ornithine decarboxylase inhibition (murine brain, kidney, liver), 122, 277
Phosphorylethanolamine
glutamic acid decarboxylase and ornithine decarboxylase inhibition (murine brain, kidney, liver), 122, 277
Phosphothreonine
ATP-citrate lyase, dephosphorylation, insulin and isoproterenol effects (rat epididymal fat pads), 122, 1047
Phosphotyrosyl-protein phosphatase
calcineurin-associated activity, characterization (bovine brain), 121, 141
Photoreceptors
cellular diglyceride kinase activity (Drosophila norpA mutants), 119, 389
outer segment proteins, endogenous phosphorylation by Ca-activated phospholipid-dependent protein kinase (bovine retina), 122, 1397
ventral, intracellular Ca^{2+} increase, induction by inositol-trisphosphate (Limulus), 125, 1137
Photosensitization
-induced irreversible binding of estrone to albumin via hydroperoxide intermediate, role in estrogen (photo-)allergic side-effects, analysis (human), 125, 675
Photosynthesis
anoxygenic, Na_2S role (Nostoc muscorum), 123, 1138
C_4
pyruvate,P_i dikinase catalytic dephosphorylation, regulation (Zea mays), 120, 559
regulation (Zea mays), 118, 65
membrane reaction center
integrity after proteolysis and detergent solubilization (Rhodopseudomonas viridis), 120, 164

two-dimensional electron transfer from cytochrome c (Rhodopseudomonas sphaeroides), 125, 592
sulfide oxidation, inhibition by organic cations (Chromatium vinosum), 121, 755
Photosystem I
complex proteins, characterization and localization with monoclonal antibodies (spinach thylakoids), 123, 995
donors, reduction rates, dibromothymoquinone effects (pea seedling chloroplasts), 120, 721
Photosystem II
-associated polypeptides, radioisotopic identification (Cucumis sativus L. seeds), 125, 988
donor function, effect of salt washing, EPR analysis (inside-out thylakoids), 124, 269
oxygen evolution
inhibition by calmodulin-type inhibitors and other Ca antagonists (stroma-free spinach thylakoids), 121, 626
role of 16- and 24-kDa polypeptides (spinach), 120, 299
Phytohemagglutinin
lymphocyte stimulation, short DNA fragment secretion, 5'-end analysis (human peripheral blood), 118, 140
medullary thymocyte stimulation, inhibition by 1,25-dihydroxyvitamin D_3 (mouse), 123, 163
Pirenzepine
^{3}H-labeled, high-affinity binding to muscarinic receptors (murine neuroblastoma x rat glioma NG108-15 cells), 119, 289
muscarinic receptor binding site, determination by [^{3}H]pirenzapine vs [^{3}H](-)quinuclidinyl-benzilate binding (rat brain), 118, 950
Pituitary
anterior
and intermediate lobes, pro-opiomelanocortin mRNA levels, differential regulation by corticotropin-releasing factor (rat), 124, 407
kallikrein-like activity reduction (New Zealand genetically hypertensive rats), 119, 689
cellular response in vitro to human pancreatic growth hormone-releasing factors, enhancement by GRF analog administration in vivo (rat), 124, 217
GH_4C_1 cells, prolactin secretion, Bay K 8644 effects (rat), 120, 991
regional distribution of neuromedins and C, comparison (rat), 124, 925
Placenta
decidua, prolactin mRNA identificatio (human), 124, 530
term, explants, binding of basic somatomedin, effect on α-aminoisobutyrate uptake (human), 122, 583
Plasma, see also Serum
atrial natriuretic factor detection (rat), 125, 315
fibronectin biochemical and functiona heterogeneity (human), 119, 1174
levels of 2',5'-oligoadenylate and 2',5'-oligoadenylate phosphodiesterase (human), 125, 1061
lipid transfer proteins, facilitation of cholesteryl ester bidirectional movement between rough and smooth microsomal membranes (rat liver), 120, 586
Plasma exchange factor
phosphatidylcholine and diether analo in vitro transfer (human, rat lipoprotein-deficient sera), 119, 452
Plasma membranes
adipocyte, functional and structural abnormalities in obese diabetic strains, ascochlorin derivative AS-6 effects (mouse), 125, 64
ATP-dependent Ca^{2+} transport and Ca^{2+}-, Na^+,K^+-, and Mg^{2+}- ATPase activities, identification (bovin spermatozoa), 122, 479
-bound Ca, phosphatidylinositol 4,5-bisphosphate release site (human platelets), 120, 226
Ca^{2+} transport, actin and myosin roles (bovine chromaffin cells), 119, 652
electrical potential, N-methylformamide effect (murine liver), 125, 712
electron transport system, reduction of various oxidants, effect on HeLa cell growth, 125, 649
glycoprotein assembly, ethanol effect (rat liver), 123, 951
polyphosphate fraction localization b ^{31}P NMR (Saccharomyces fragilis), 119, 447
proton-pumping ATPase purification (oat roots), 121, 735
skeletal muscle, isolation and charac terization (rabbit), 123, 216
sterol levels, correlation with tumor metastasis (murine LM fibroblast-derived cells), 124, 283
Plasmids
R773, -encoded arsenite pump, production of arsenite resistance

(Escherichia coli), 124, 760
lasmin
ß-casein cleavage, product amino acid sequence determination (human), 125, 463
regulation by embryonal carcinoma F9 cells (mouse), 119, 758
lasminases
A and B, purification and properties (murine embryonal carcinoma F9 cells), 119, 758
lasminogen activator, see Urokinase
latelet-activating factor
formation
from 1-alkyl-2-acetyl-sn-glycerols (rabbit platelets), 124, 156
ionophore A23187-induced, inhibition by calmodulin antagonists (human neutrophils), 118, 629
isolation and characterization (normal, anephric mammalian blood), 120, 789
precursor, antihypertensive activity (hypertensive, normotensive rats), 118, 344
release
hypoxia-induced (rat pulmonary alveolar fluid), 119, 58
by stimulated neutrophils, molecular heterogeneity (human), 122, 325
species: 1-O-hexadecyl-2-O-acetyl-sn-glycero-3-phosphocholine, isolation and characterization (human neutrophils), 121, 815
stimulation of neutrophil-independent vascular lysosomal hydrolase secretion (rat), 125, 980
synthesis
by exogenous leukotriene B_4-stimulated neutrophils (human), 122, 535
regulation, role of 1-alkyl-2-lyso-sn-glycero-3-phosphocholine:acetyl-CoA acetyltransferase (rat splenic microsomes), 120, 834
vascular effects, role of cyclooxygenase products (perfused rat liver), 123, 507
latelet-derived growth factor
exogenous, effect on cell proliferation after inhibition by triamcinolone acetonide (ductus deferens smooth muscle tumor), 122, 68
reduction of epidermal growth factor receptor affinity, role of phosphoinositide breakdown and protein kinase-C activation (Swiss 3T3 cells), 123, 377
latelets
activation
actin polymerization induction, agonist-specific desensitization (bovine), 120, 846
by ionophore A23187, role of induced Na^+/H^+ exchange (human), 125, 1123
receptor- and non-receptor-mediated, effect on membrane-cytoskeleton interaction, 120, 898
aggregation
diadenosine triphosphate mediation by ADP liberation (human), 118, 704
inhibition by antibodies to thrombospondin heparin-binding fragment (bovine), 124, 290
thrombin-stimulated velocity, carbonic anhydrase inhibition effects (human), 121, 266
Ca influx, enhancement by CGP 28392 (human), 118, 842
conversion of 1-alkyl-2-acetyl-sn-glycerols to platelet-activating factor and related phospholipids (rabbit), 124, 156
cytoskeleton assembly, actin-binding protein phosphorylation role (human), 118, 508
docosahexaenoic acid uptake, release, and metabolism (human), 120, 907
glycoprotein expression in normal subjects and patients with congenital bleeding disorders, 123, 1091
intact, phosphatidylinositol 4-phosphate formation, stimulation by 1-oleoyl-2-acetyl-glycerol (human), 123, 589
interactions with glycoproteins secreted by cultured aortic endothelial cells (bovine), 123, 114
intraplatelet Ca^{2+}, elevation by ionomycin, effects on phospholipases A and C (human), 123, 393
membranes, external and internal fractions, simultaneous isolation: biochemical, immunological, and functional characterization, 123, 50
-solanum tuberosum agglutinin interactions (human), 121, 27
terbium effects, aggregation and fluorescence analysis (human), 122, 311
tubulin, nucleotide-binding site, affinity labeling (human), 123, 92
(+)PN 200-110
^3H-labeled, probe in purification of voltage-dependent Ca^{2+} channel dihydropyridine receptor (rabbit skeletal muscle transverse tubules), 122, 1357
Polyadenylic acid
and oligouridylic acid mRNA-associated proteins, comparison (rat liver), 120, 1044

oxidized N^2-methyl-9-hydroxy-ellipticinium covalent binding in vitro, 124, 416
Poly(ADP-ribose)
metabolism, hyperthermia effects (murine SVT2 cell culture), 122, 1381
Poly(ADP-ribose) polymerase
benzamide and phenobarbital effects in vivo (rat liver), 122, 770
Poly(ADP-ribose) polymerase inhibitors
c-myc gene expression modulation (HL-60 cells), 119, 473
Polyamide, see Nylon
Polyamines
binding to phospholipid vesicles, effect on lipid peroxidation (soybean), 122, 550
biosynthesis, effect of methionine analog inhibitors of methionine adenosyltransferase (murine L1210 leukemia cells), 122, 350
concentration and function in Halobacterium halobium, 124, 423
effect on in vivo synthesis of RNA polymerase ββ' subunits (Escherichia coli), 123, 528
Poly(A) polymerase, see Polynucleotide adenylyltransferase
Poly(dA-dT)•poly(dA-dT)
thermal melting in methanol-water solutions, 123, 831
Polydeoxyribonucleotide synthetase (ATP)
quinolone antibiotic effects (chicken thymus), 121, 762
Poly(dG-dC)
conformation, Cr(III) effects, 124, 106
Poly d(G-C)•d(G-C)
intercalation with ethidium, NMR and stopped-flow kinetic analysis, 122, 804
Poly(d2NH_2A-dT)
B to Z transition, 2-amino substituent effect, 118, 848
Poly(dT)
with methylated pyrimidines, repair by O^6-alkylguanine-DNA alkyl-transferase, comparison (Escherichia coli, rat liver), 123, 324
noncovalent complexes with diadenosine 5',5'''-P^1,P^4-tetraphosphate, 120, 1037
Polyenoic acids
oxygenated, serologic and immunochromatographic detection (Euglena gracilis Klebs var. bacillaris), 120, 278
Polyethylene glycol
-modified
catalase, activity increase in benzene (bovine liver), 125, 761
lipoprotein lipase, catalysis of ester synthesis in benzene (Pseudomonas fluorescens), 122, 845
Polyinosylic-polycyticylic acid
xanthine oxidase induction (mouse), 119, 144
Polylactosamino-proteoglycan
photochemical crosslinking to ß-galactoside-binding lectin (chick embryo skin), 123, 1215
Polylysine
macromolecular, effect on membrane potential (Escherichia coli), 122, 401
Polymerization
actin, platelet activation-induced, agonist-specific desensitization (bovine), 120, 846
Polynucleotide adenylyltransferase
regulation by thyroxine in glial and neuronal nuclei, analysis (neonatal rat cerebral cortex), 125, 931
Polyoma virus
replication in vitro, inhibition by vitamin A (murine embryonic fibroblasts), 122, 851
Polypeptides
anionic endothelial cell growth-stimulating, purification and characterization (human brain), 124, 26
aspartokinase II-homoserine dehydrogenase II, triglobular structure (Escherichia coli), 123, 16
atrial natriuretic, multiple forms, isolation and amino acid sequence (rat), 121, 585
α-atrial natriuretic
antiserum production and radioimmunoassay development (human, rat), 124, 815
purification and amino acid sequenc (human), 118, 131
capsid, major and minor yeast viruses characterization, 121, 619
-containing fractions, 24-, 28-, and 50-kDa: α- and ß-globin mRNA translation regulation (Krebs II ascites cell-free system), 120, 804
cytochrome oxidase, exon-2 coding region identification (Aspergillus nidulans mitochondria), 119, 786
photosystem II-associated, radioisotopic identification (Cucumis sativus seeds), 125, 988
16- and 24-kDa, role in photosystem-II O_2 evolution (spinach), 120, 299
small-nuclear ribonucleoprotein, pattern after reaction with anti-Sm and anti-RNP antibodies, comparison (human), 123, 345

subcellular location by reaction with small nuclear RNA and ribonucleoprotein particle antibodies (HeLa cells), 120, 81
thyroglobulin amino terminus-derived 10K, structure (bovine), 119, 335
polyphosphates
fraction localization outside plasma membrane by ^{31}P NMR (Saccharomyces fragilis), 119, 447
L-glutamine-controlled metabolism in cells transformed by 9,10-dimethyl-1,2-benzanthracene, simian virus 40, or H-ras oncogene, protease role (human, mouse), 124, 6
polyphosphoinositide
metabolism, gonadotropin-releasing hormone and agonist effects (rat granulosa cells), 122, 1289
polyriboinosinic:polyribocytidylic acid
-induced depression of hepatic mixed function oxidases, inhibition by actinomycin D or cycloheximide (mouse), 121, 237
polyribonucleotide synthetase (ATP)
and substrates, detection with 2-5A analog probe (CV-1, HeLa, human neuroblastoma cells), 123, 194
porphyria
experimental, hexachlorobenzene-induced, mitochondrial structural and functional properties (rat liver), 118, 356
potassium chloride
activation of androgen receptor complex in vitro (rat liver), 120, 953
potassium ion
channels, Ca^{2+}-dependent, distinct classes, coexistence in muscle cells (rat), 118, 669
-Cl^--Na^+ cotransport in smooth muscle cells, regulation (embryonic rat aorta), 125, 500
effect on
basal and isoprenaline- and GTP-stimulated adenylate cyclase (rabbit heart), 118, 561
F_1-ATPase expression (Streptococcus faecalis membranes), 122, 151
extracellular
and angiotensin II, effects on cytosolic Ca^{2+} and steroidogenesis, comparison (rat adrenal glomerulosa cells), 123, 810
high, stimulation of parathyroid hormone release, relationship to cytosolic Ca^{2+} decrease (bovine), 123, 684
-Na^+ concentration gradient-induced triolein-doped porous membrane, electrical potential oscillation, 123, 792
permeability of cardiac sarcolemmal vesicles, Ca^{2+}-dependent, modulation by calmodulin and cAMP-dependent protein kinase (bovine), 122, 237
transport, Cl-dependent, volume- and thiol-stimulated, effect of ionophore A23187 with Ca^{2+} or ethylene glycol tetracetic acid (ovine erythrocytes), 125, 790
Prasterone
substrate for estradiol 17ß-dehydrogenase, kinetics (human placenta), 119, 83
Prealbumin
cDNA
cloning and sequence analysis (human liver), 124, 558
use in diagnosis of familial amyloidotic polyneuropathy (human), 125, 636
-related low-molecular-weight amyloid fibril protein, isolation and sequence analysis (Japanese familial amyloidotic polyneuropathy patient), 125, 622
serum, variant isolation and characterization (familial amyloidotic polyneuropathy patient), 122, 712
variant, amino acid sequence, revision (familial amyloidotic polyneuropathy patient), 123, 921
Proacrosin
and acrosin, amino-terminal sequences, comparison (boar sperm), 121, 884
Procarboxypeptidase A
6 S, two-step dissociation, induction by 2,3-dimethylmaleic anhydride (bovine pancreas), 121, 162
Procollagen
type-I, gene demethylation by 5-azacytidine, effect on expression (human SVWI-38 cells), 124, 236
Proenkephalin
-derived opioid peptide, purification and amino acid sequence (ovine), 118, 299
synthetic peptide, high-molecular-weight enkephalin-containing protein recognition (bovine adrenal medullar), 120, 650
Progastrin
amino-terminal fragments, purification (human gastrinoma cells), 123, 404
Progesterone
biosynthesis, inhibition by insulin receptor antibody (cultured porcine granulosa cells), 120, 144
-induced synthesis of 250-kDa protein

(human breast cancer MCF_7, T_47D cells), 121, 421
metabolism by ovarian granulosa cells, follicle-stimulating hormone and androgen effects (rat), 119, 694
Progesterone receptors
B-subunit, antibody purification and characterization (chick oviduct), 119, 433
Progestin, see Progesterone
Prolactin
cation-dependent activation of guanylate cyclase in various organs (rat), 123, 1084
mRNA, identification in decidua (human placenta), 124, 530
plasminogen activator induction in rat tissues (ovine), 122, 1005
secretion from
GH_4C_1 cells, stimulation by Bay K 8644 (rat pituitary), 122, 991
pituitary tumor cells, stimulation by A23187, forskolin, phorbol ester, and thyrotropin-releasing hormone, comparison, 123, 735
serum concentration, cyclosporine effect (rat), 120, 614
Prolactin receptors
binding affinity, iodination effects (rat liver), 121, 686
changes during estrous cycle (rat mammary gland), 123, 612
identification on lymphocytes and regulation by cyclosporine (human), 121, 899
L-Proline
effect on hepatocyte growth in culture (rat), 122, 884
hydroxylation to L-hydroxyproline (Streptomyces griseoviridus P8648 cell-free extract), 120, 45
Pronase
effect on immature B-lymphocyte nonresponsiveness to anti-immunoglobulin (mouse), 119, 1
photosynthetic membrane proteolysis, reaction center integrity (Rhodopseudomonas viridis), 120, 164
proteolytic activity, lymphoma cell electrofusion facilitation (mouse), 120, 138
Pro-opiomelanocortin
isolation and amino-terminal sequence characterization (bovine posterior pituitary), 125, 229
mRNA
levels in anterior and intermediate pituitary lobes, differential regulation by corticotropin-releasing factor (rat), 124, 407
3' nontranslated regions, heterogeneity (Onchorhynchus keta pituitary), 122, 556
Prosomatostatin
and amino terminal-derived nonsomatostatin peptides, identification in medullary thyroid carcinoma cells (rat), 124, 450
Prostacyclin
phosphatidic acid synthesis inhibition, protein kinase-C role (human platelets), 120, 37
production in isolated renal arteries vascular endothelial cell role (canine), 118, 873
synthesis stimulation by thromboxane A_2-like prostaglandin endoperoxide analogs (rat vascular smooth muscle cell culture), 123, 21
Prostacyclin synthetase
modulation in microsomes (bovine coronary artery), 118, 33
Prostaglandin E
production in vitro by adherent rheumatoid sinovial cells, stimulation by canine mast cell extracts (human), 122, 270
Prostaglandin E_1
effect on actin antibody-stimulated DNA synthesis and protein phosphorylation (murine L cells), 124, 23
-mediated Ca^{2+} mobilization and cGMP synthesis, correlation (neuroblastoma cells), 122, 333
Prostaglandin E_2
catabolism by renal medulla (rat), 124, 69
plasminogen activator stimulation (ra osteoblast-rich calvarial cells, osteogenic sarcoma cells), 122, 230
production in isolated renal arteries vascular endothelial cell role (canine), 118, 873
role in human monocyte cell factor ef fect on collagen production (rabbit articular chondrocyte culture), 119, 499
Prostaglandin E_2 isomerase
unmasking in microsomes (bovine coronary artery), 118, 33
Prostaglandin endoperoxide
analogs, thromboxane A_2-like, prostacyclin synthesis stimulation (rat vascular smooth muscle cell culture), 123, 21
Prostaglandin $F_{2\alpha}$
Ca^{2+} mobilization, Na^+ influx independence (quiescent Swiss 3T3 cells), 123, 803
catabolism by renal medulla (rat), 124, 69
effect on actin antibody-stimulated

DNA synthesis and protein phosphorylation (murine L cells), 124, 23
motional parameters in aqueous media, temperature- and field-dependent ^1H NMR relaxation rates, 121, 702
rostaglandin H synthase
13-cis-retinoic acid cooxidation with alkyl or fatty acid hydroperoxides, arachidonic acid, or H_2O_2 (ram seminal vesicle microsomes), 124, 430
rostaglandin H_2
and decomposition pathways, high-field ^1H NMR, 120, 512
rostaglandin I_2, see Prostacyclin
rostaglandins
biosynthesis inhibition by N-acetyl-5-methoxy kynurenamine (bovine, ovine seminal vesicle microsomes), 121, 372
rostaglandin synthetase
enhancement by dexamethasone (rat renal medulla), 121, 255
rotease inhibitors
repression by ATP-ubiquitin proteolytic system (rabbit reticulocyte extract), 122, 116
roteases, see also specific proteases
Ca^{2+}-activated
α-actinin susceptibility (human platelets), 124, 877
neutral, -associated kinases, isolation (rat skeletal muscle), 120, 767
extra- and intracellular protocollagen degradation, qualitative and quantitative evaluation (chick embryo liver), 123, 1002
prostate-specific antigen-associated, identification and characterization (human), 123, 482
role in L-glutamine control of nucleic acid and polyphosphate metabolism in cells transformed by 9,10-dimethyl-1,2-benzanthracene, simian virus 40, or H-ras oncogene (human, mouse), 124, 6
rotein (arginine) methyltransferase
myelin basic protein-specific, brain levels, effect of age (dysmyelinating mutant, normal mice), 123, 468
$_1$-Proteinase inhibitor
inactivation
by gas-phase cigarette smoke (human), 122, 676
hyposialylated immunoglobulin role (human), 119, 185
synthesis, demonstration in experimentally-inflammed and normal lung tissue (rat), 122, 394
Proteinase inhibitor IIA
α-helix and antiparallel ß-sheets, amide proton exchange, comparison (bovine seminal plasma), 122, 1174
Proteinases, see also specific proteinases
-binding sites, nonproductive activation after α_2-macroglobulin and matrix-linked trypsin reaction (human), 118, 691
neutral Ca^{2+}-dependent, activation by hemoglobin, structural requirements (human erythrocytes), 123, 331
Protein-O-carboxylmethyltransferse, see Protein O-methyltransferase
Protein-disulphide reductase (glutathione)
monoclonal antibodies, preparation and screening application (rat liver), 125, 668
Protein kinase C
activation
and Ca^{2+} mobilization, synergistic role in histamine release from mast cells (rat peritoneum), 121, 573
by diolein, stereospecificity, 122, 818
by diradylglycerols, structural and chemical specificity (murine brain), 125, 163
by mezerein in vitro and in vivo, competitive inhibition of tumor-promoting phorbol ester binding (rat brain), 121, 649
by phorbol esters and other tumor promoters, characterization (murine brain), 121, 448
role in epidermal growth factor receptor affinity reduction by heterologous ligands (Swiss 3T3 cells), 123, 377
adrenocortical cytochrome P-450_{scc} phosphorylation in vitro (bovine), 125, 554
effect on prostacyclin inhibition of phosphatidic acid synthesis (human platelets), 120, 37
photoreceptor outer segment protein endogenous phosphorylation (bovine retina), 122, 1397
purification, characterization, and substrate-dependent diacylglycerol effect (rat brain), 122, 1268
selective inhibition by 1-(5-isoquinolinesulfonyl)-2-methylpiperazine (rabbit platelets), 125, 258
soluble Ca^{2+}- and phosphatidylserine-dependent, bovine retinoid-binding protein phosphorylation

(murine brain), 120, 593
strain differences (inbred mice), 122, 492
synthetic peptide phosphorylation in presence of phospholipid and Ca^{2+} or phorbol ester (rat brain), 124, 296
Protein kinase NII
fractions, heterogeneity (rat hepatic nuclei), 123, 398
role in ornithine decarboxylase inactivation/phosphorylation and RNA polymerase-I stimulation (murine kidney), 120, 219
Protein kinases, see also Phosphorylation
-associated activity of
Ca-activated neutral protease, isolation (rat skeletal muscle), 120, 767
molybdate-stabilized purified glucocorticoid receptor (rat liver), 125, 1067
pp60^{src}-related proteins (human lymphoblastoid cells), 121, 779
Ca^{2+}-activated, phospholipid-dependent, see also Protein kinase C
activation by tumor promoters (rat brain), 120, 339
effect on actin-binding proteins from chicken gizzard (human), 118, 736
effects of complete and incomplete tumor promoters and other compounds (murine epidermal cytosol), 124, 63
progressive inhibition by phorbol ester (murine 3T3 cells), 120, 1053
proteolytic activation by Clostridium perfringens phospholipase C (human platelets), 118, 835
stimulation by retinoic acid (rabbit retina), 118, 460
12-O-tetradecanoylphorbol-13-acetate effect (human platelets), 122, 158
cAMP-dependent
activation in macrophages (rat), 119, 1082
and casein kinase-1, phosphorylation of tubulin and microtubule-associated protein 2, comparison, 121, 19
cytochrome P-450 LM_2 phosphorylation, effect on monooxygenase activity (rabbit hepatic microsomes), 122, 620
identification and characterization (Aphelenchus avenae), 125, 947
modulation of Ca^{2+}-dependent K^+ permeability of cardiac sarcolemmal vesicles (bovine), 122, 237
nuclear, androgen receptor phosphorylation (rat ventral prostate), 123, 778
selective activation by calcitonin (human lung cancer cells), 122, 1040
stimulation of phosphatidylinositol phosphorylation to phosphatidylinositol-4-monophosphate (porcine granulocyte plasma membrane), 124, 871
endogenous, purified glucocorticoid receptor phosphorylation (rat hepatic cytosol), 119, 700
identification during concanavalin A-stimulated and phorbol ester-inhibited lymphocyte proliferation (bovine), 121, 392
initiation factor-2α, heme-regulated and dsRNA-dependent, effect on protein synthesis (human reticulocytes), 119, 891
interferon-mediated, characterization by polyclonal antibodies (HeLa cells), 125, 1
-substrate complex, precipitable with Ca^{2+}, isolation and characterization (AH-66 hepatoma cells), 125, 251
Protein methylase I, see Protein (arginine) methyltransferase
Protein O-methyltransferase
uv-induced covalent binding of ^{3}H-[methyl]-S-adenosyl-L-methionine, methyl acceptor substrate effects (human erythrocytes), 122, 499
Protein phosphatase, see Phosphoprotein phosphatase
Proteins
actin-binding, phosphorylation, role in platelet cytoskeleton assembly (human), 118, 508
-actin complex, 90-kDa, and cytochalasin D, actin filament shortening, phalloidin and tropomyosin effects, comparison (bovine brain), 123, 596
acyl-carrier, citrate lyase subunit, repetitive structure (Escherichia coli), 122, 1253
adrenocorticotropic hormone-induced, mRNA cell-free translation (rat adrenal gland), 119, 975
amyloid fibril
amino acid sequence, revision (familial amyloidotic polyneuropathy patient), 123, 921
low-molecular-weight prealbumin-related, isolation and sequence analysis (Japanese familial amyloidotic polyneuropathy patient), 125, 622

antigenic, nitrocellulose-blotted, visualization by immuno-gold staining, 121, 284
B1, and DNA-binding protein, comparison (Escherichia coli), 119, 1147
band 4.5 and [^{3}H]cytochalasin B-photolabeled, sensitivity to endoglycosidase F and trypsin, comparison (human erythrocyte membranes), 122, 218
binding to (+)gossypol, CD spectroscopy (Thespesia populnea), 121, 953
bone inductive, distribution in mineralized and demineralized extracellular matrix (rat), 119, 949
-bound Zn, distribution in serum (analbuminemic rat), 125, 45
C, activated, inactivation of activated factor IX (human), 125, 177
Ca^{2+}-binding
identification and characterization (bovine liver), 119, 440
quinate:NAD^+ oxidoreductase regulatory subunit, characterization (dark-grown carrot cells), 125, 774
skin levels, vitamin D effect (rat), 123, 230
vitamin D-dependent, identification in intestinal cell cytosol (normal, X-linked hypophosphatemic mice), 119, 850
calmodulin-binding, identification and distribution in mitochondria (rat liver), 119, 343
cell division-active, purification and characterization (Escherichia coli), 118, 587
cerebrovascular amyloid
in Alzheimer's disease and Down's syndrome patients, chemical relationship, 122, 1131
isolation and characterization (Alzheimer's disease patients), 120, 885
chromatin, nonhistone, binding affinity for isopeptidase (Chinese hamster DON cells), 122, 1296
crosslinking to nascent DNA in simian virus-40 chromatin, induction by diisopropylfluorophosphate (CV-1 cells), 123, 271
cryptic estrogen-binding, effect on estrogen receptor distribution analysis (rat uterus), 125, 577
Cu, and nitrous oxide reductase, comparison (Paracoccus denitrificans, Pseudomonas denitrificans, P. perfectomarinus), 119, 588
deinhibitor
effect on phosphorylase b kinase dephosphorylation by activated ATP,Mg-dependent protein phosphatase (rabbit muscle), 125, 293
regulation by phosphorylation-dephosphorylation (canine liver), 120, 405
DNA-binding
HU-type, isolation, characterization, and comparison (Agrobacterium tumefaciens, Rhizobium japonicum, R. meliloti), 121, 471
isolation, characterization, and comparison with proteins H1 and B1 (Escherichia coli), 119, 1147
erbB oncogene, site-specific antibodies, epidermal growth factor receptor immunoprecipitation (chicken embryo fibroblasts), 123, 797
expressed in embryo and chemically-induced pancreatic B-cell tumor, cDNA molecular cloning and characterization (rat), 124, 164
extracellular matrix, bone inductive, dependence on vitamin D (rat), 124, 829
57,000 Mr, Ca^{2+}- and cAMP-enhanced phosphorylation, separate mechanisms (rat pancreatic islet), 118, 797
G, role in Ca mobilization (rabbit neutrophils), 119, 644
glucagon-related, immunoreactive high-molecular-weight, characterization (fetal bovine pancreas), 125, 524
H1, and DNA-binding protein, comparison (Escherichia coli), 119, 1147
heat shock
composition in nuclear and nucleolar matrices (Chinese hamster ovary cells), 118, 444
induction during temperature-induced differentiation of Leishmania mexicana in vitro, 125, 755
methylation, sodium arsinite effect (chicken embryo fibroblasts), 119, 735
high-mobility-groups 1 and 2, effect on DNA denaturation temperature (bovine thymus nuclei), 120, 782
high-molecular-weight
aggregates, Western blot analysis (human cataracts), 122, 1028
enkephalin-containing, recognition by synthetic proenkephalin peptide antisera (bovine adrenal medulla), 120, 650
hyaluronate-binding, binding to collagen, fibronectin, and laminin (chicken cardiac fibroblasts, 3T3 cells), 121, 808
hypertension-associated, purification

(rat plasma), 125, 888
interphotoreceptor retinoid-binding, synthesis by retina in organ culture, monensin effect (monkey), 118, 789
lac carrier, cys_{148} site-directed mutagenesis (Escherichia coli), 119, 860
lens
glycosylation (diabetic, nondiabetic senile cataract patients), 123, 888
tyrosine residues, microenvironmental change in cold cataract, Raman spectroscopy (rat), 119, 989
lysine-rich, role in adrenocorticotropin-stimulated steriodogenesis (rat adrenal cells), 118, 400
membrane
ADP-ribosylation, effect of Bordetella pertussis toxin (rat pancreatic islets), 124, 190
biologically active, HPLC isolation (Rhodopseudomonas sphaeroides R 26 reaction centers), 121, 47
carboxyl methylation, role in erythrocyte response to cytoskeletal stress (human), 123, 133
endogenous, phosphorylation enhancement during B-lymphocyte proliferation induction (murine splenocytes), 124, 544
42-kDa, Ca channel subunit-comigratory, identification and isoproterenol- and nitrendipine-induced phosphorylation (canine heart), 121, 890
36-kDa, Ca^{2+}-dependent phorbol ester-activated phosphorylation and immunoprecipitation with IgE-anti IgE system (rat basophilic leukemia cells), 125, 867
microsomal, reconstituted vitamin D_3 25-hydroxylase inhibition (rat liver), 123, 1209
microtubule
assembly, inhibition by S-100 proteins, mechanism (bovine brain), 124, 850
effect of chlorpromazine-S-100 protein interactions in vivo (bovine brain), 122, 983
microtubule-associated, see Microtubule-associated proteins
mitochondrial
changes during neuroblastoma differentiation (murine brain), 120, 411
inner membrane, sulfhydryl group, modification by succinate and phenylsuccinate, EPR analysis (rat liver), 122, 1404
monoclonal T-lymphocyte antigen-binding, production and purification (murine ascites), 125, 475
noncovalent complexes with diadenosine 5',5'''-P^1,P^4-tetraphosphate, 120, 1037
nuclear
androgen-dependent, changes during functional differentiation and dedifferentiation (rat dorsolateral prostate), 118, 467
11-kDa, phosphorylation inhibition by spermine (various mammalian cell lines), 118, 710
oligomycin sensitivity-conferring, monoclonal antibody preparation: tool for conserved and essential epitope recognition (porcine cardiac mitochondria), 123, 254
oriC DNA-binding, detection (Escherichia coli), 125, 600
from pancreatic juice, isolation, characterization, and N-terminal sequence (human), 125, 516
phospholipid-exchange, nonspecific, amino-terminal sequence (bovine liver), 120, 232
phosphorylation
actin antibody-stimulated, effects of prostaglandins E_1 and $F_{2\alpha}$ (murine L cells), 124, 23
increase by human chorionic gonadotropin in primary culture (porcine Leydig cells), 118, 8
mediation by Fc receptor and pharmacologic agents, comparison (murine peritoneal macrophages), 124, 197
polyamine-stimulated (corn coleoptiles), 122, 1374
photoreceptor outer segment, endogenous phosphorylation by Ca-activated phospholipid-dependent protein kinase (bovine retina), 122, 1397
photosystem-I complex, characterization and localization with monoclonal antibodies (spinach thylakoids), 123, 995
plasma
lipid transfer, facilitation of cholesteryl ester bidirectional movement between rough and smooth microsomal membranes (rat liver), 120, 586
sex steroid-binding, immunohistochemical detection (human mammary carcinoma cells), 118, 488
polyadenylic and oligouridylic acid mRNA-associated, comparison (rat liver), 120, 1044
polyprenyl pyrophosphate transport, 4-hydroxybenzoate:polyprenyl

transferase stimulation (rat mitochondria), 119, 1109
pp60$^{v\text{-}src}$, avian sarcoma virus
isolation by immunoprecipitation and kinase activity identification (human lymphoblastoid cells), 121, 779
mitogenic activity (rat kidney), 123, 411
protein 4.1-like, identification in lens (bovine, canine, human, rabbit), 119, 726
red paramagnetic, [2Fe-2S] clusters, and spinach ferredoxin clusters, structural comparison, resonance Raman spectroscopy (Clostridium pasteurianum), 119, 828
retinoic acid-binding, phosphorylation by soluble murine Ca^{2+}- and phosphatidylserine-dependent protein kinase (bovine uterus), 120, 593
retinol-binding
phosphorylation by soluble murine Ca^{2+}- and phosphatidylserine-dependent protein kinase (bovine liver), 120, 593
photoaffinity labeling with synthesized 4-azidoretinol (vitamin A-deficient chick liver), 122, 577
ribosomal, phosphorylation in organello and in vitro (spinach chloroplasts), 121, 297
S-100
-chlorpromazine interactions, effects on microtubule proteins in vitro (bovine brain), 122, 983
microtubule protein assembly inhibition, mechanism (bovine brain), 124, 850
S-100a, Ca^{2+}- and Mg^{2+}-induced conformational changes, subnanosecond-pulse fluorometric analysis (bovine brain), 123, 959
$S100_{\beta}$, conditions for reproducible detection by immunoblot analysis (bovine brain), 124, 752
satellite, phosphorylation-dephosphorylation, effects on smooth muscle fibers (porcine carotid artery), 120, 933
secretory, induction by estrogen in vitro and in vivo, analysis (murine Leydig cell tumors), 124, 277
sporulation gene spo0A, identification (Bacillus subtilis), 122, 1104
src gene, effect on Ca compartments and fluxes in temperature-sensitive Rous sarcoma virus-transformed cells (Fisher rat cells), 125, 337
steroid-binding, C_3 chain, and human α_2-macroglobulin, amino acid sequence homology (rat prostate), 122, 662
sterol-carrier
levels in LM fibroblast-derived cells, correlation with tumor metastasis (mouse), 124, 283
protein$_2$, regulation of mitochondrial membrane cholesterol distribution (rat adrenal), 122, 509
stress, induction after sodium arsenite intravenous administration (rabbit brain, heart, kidney, liver), 120, 150
Tp100, 2D peptide mapping by polyacrylamide-gel electrophoresis with limited proteolysis in sodium dodecyl sulfate (murine lymphocyte membrane), 122, 932
transmembrane C9, in complement-induced [^{14}C]sucrose release (human erythrocyte ghosts), 118, 616
3,3',5-triiodo-L-thyronine-binding, plasma membrane, antibodies: characterization and cross-species immunoreactivity (rat pituitary GH_3 cells), 124, 956
two-dimensional NMR spectra, computer-aided evaluation, 125, 1143
-ubiquinone binding, quantitation in mitochondria (bovine heart), 124, 889
vitamin K-dependent, warfarin-induced accumulation (rat), 114, 991; erratum, 118, 696
water-soluble 33-kDa, purification and characterization (spinach thylakoids), 122, 17
zymogen granule membrane, phosphorylation in vitro (rat pancreatic acinar cells), 122, 413
Protein synthesis
branched-chain amino acid-stimulated, inhibition by tunicamycin or 2-deoxy-D-glucose (rat muscles), 125, 149
cellular 250-kDa, induction by progesterones (human breast cancer MCF_7, $T_{47}D$ cells), 121, 421
effect of heme-regulated and dsRNA-dependent initiation factor-2α kinases (human reticulocytes), 119, 891
elongated mammary cuboidal epithelial cell derivatives and cultured mesenchymal cells, comparison (rat), 120, 351
ribosomal, amino acid starvation effect (Escherichia coli), 118, 246
stimulation, role of insulin-induced

decrease of initiation factor-2 phosphorylation (bovine chondrocytes), 121, 134
Protein synthesis factors
particulate, and translatable mRNA, identification in hybridoma cells (mouse), 122, 1314
Proteolysis
band 3, enhancement by anti-Rh_o(D) binding to membrane (human erythrocytes), 124, 437
3-hydroxy-3-methylglutaryl-CoA reductase susceptibility, enhancement by phosphorylation (rat hepatic microsomes), 125, 629
limited, maltoporin, generated peptide location by computer search, 125, 926
trypsinogen 1, pathogenic implication in chronic pancreatitis (human), 118, 154
Prothrombin
-liposome interactions, analysis, 125, 381
Protons
in d(ApGpCpT), NMR signal assignment by 2D NMR, 121, 1021
^1H and ^{31}P, double-stranded deoxynucleotide $d(ATGCAT)_2$, resonance sequential assignment by 2D NMR correlation spectroscopy, 124, 774
pumping by cytochome c oxidase vesicles, inhibition by anti-subunit III mono- and divalent fragments, mechanism (bovine heart), 120, 52
translocation from O_2-pulsed cells, inhibition by vanadate and dicyclohexylcarbodiimide (Anacystis nidulans), 123, 358
Protoporphyrinogen
oxidation during chlorophyll and heme synthesis, effect of unsaturated fatty acids (barley, spinach etioplasts, mitochondria), 123, 1157
Pseudouridylic acid
modification of 6-S RNA transcribed in vitro from repetitive and transcribable DNA sequences (salmon), 124, 514
Puromycin
Ca^{2+},Mg^{2+}-dependent endonuclease inactivation (rat hepatic nuclei), 119, 618
Putrescine
anaerobic degradation, pyrrolidine formation, 119, 556
stimulation of
protein phosphorylation (corn coleoptiles), 122, 1374
pyruvate dehydrogenase phosphatase (bovine heart, kidney), 124, 95
Pyrazole
induction of cytochrome P-450 ethanol-inducible form (rabbit hepatic microsomes), 124, 375
Pyridoxal 5'-phosphate
covalent modification of lysine residues in heparin cofactor II, effect on cofactor activity (human plasma), 124, 745
Pyrimidines
methylated, in poly(dT), repair by O^6-alkylguanine-DNA alkyltransferase, comparison (Escherichia coli, rat liver), 123, 324
Pyrocarbonic acid diethyl ester
iodothyronine 5'-deiodinase inactivation, active site histidine residue identification (rat hepatic microsomes), 120, 28
Pyrophosphates
phosphoryl donor function in UDP-glucose-treated phosphofructokinase (rabbit muscle), 121, 842
polyprenyl, transport protein, 4-hydroxybenzoate:polyprenyl transferase stimulation (rat mitochondria), 119, 1109
Pyrrolidine
formation by anaerobic polyamine degradation, 119, 556
Pyruvate
binding to flavocytochrome b_2, redox equilibrium modifications with semiquinone stabilization, 118, 753
Pyruvate dehydrogenase
complex, activation by glyburide (rat cardiac mitochondria, ventricular slices), 123, 202
Pyruvate dehydrogenase phosphatase
stimulation by polyamines (bovine heart, kidney), 124, 95
Pyruvate kinase
effect of glucose loading (starved rat), 125, 655
regulation by insulin and glycolytic intermediates (rat liver), 119, 671
short-term regulation in vivo and in vitro, glucagon and insulin effects, comparison (murine, rat hepatocytes), 124, 651
L-Pyruvate kinase
gene transcription, inhibition by cAM (rat liver), 125, 135
Pyruvate,orthophosphate dikinase
C_4 photosynthesis catalytic dephosphorylation and P_i-mediated activation, regulation (Zea mays) 120, 559
inactivation, ADP-mediated, ATP-dependent catalytic phosphorylation

requirement (Zea mays), 118, 65
Pyruvate,P_i dikinase, see Pyruvate, orthophosphate dikinase

Q

Quercetin
inhibition of
Ca-activated phospholipid-dependent protein kinase (murine epidermal cytosol), 124, 63
tyrosine protein kinase in 7,12-dimethylbenz[a]anthracene-induced mammary tumor (rat), 123, 1227
Queuine
-type tRNA, alteration by Cd^{2+}, detection by reverse-phase 5 chromatography (Drosophila melanogaster), 123, 1027
Quin 2
-Ca^{2+} interaction, stopped-flow kinetics, 123, 604
fluorescence, measurement of cytoplasmic free Ca^{2+} in isolated ventricular myocytes at rest and during K^+-depolarization (rat), 122, 1012
Quinacrine
effect on thromboplastin activity (human monocytes), 119, 179
Quinate dehydrogenase
Ca^{2+}-binding regulatory protein subunit, characterization (dark-grown carrot cells), 125, 774
Quinate:NAD^+ oxidoreductase, see Quinate dehydrogenase
(-)Quinuclidinylbenzilate
^{3}H-labeled, vs [^{3}H]perenzepine binding to muscarinic receptor, pirenzepine-binding site determination (rat brain), 118, 950

R

Radical scavengers
modification of hydroxyurea-induced erythrocyte damage (human), 120, 566
Redox equilibria
flavocytochrome b_2, modification by pyruvate binding, 118, 753
Renin
and angiotensin-converting enzyme, identification in Leydig cells (rat testes), 122, 1337
mRNA, identification by hybridization with cDNA probe (murine testes), 125, 662
secretion, Ca and cAMP roles (rat juxtaglomerula cells), 124, 359
Renin inhibitors
angiotensinogen analogs, conformational analysis, 122, 700
synthesis from angiotensin-I peptide aldehyde derivatives (human), 118, 929
Retina
in organ culture, interphotoreceptor retinoid-binding protein synthesis, monensin effect (monkey), 118, 789
Retinal
inhibition of diacylglycerol-induced superoxide production (human neutrophils), 120, 318
Retinoic acid
effect on D-[^{3}H]galactose incorporation into epidermal glycoproteins (porcine), 121, 364
myelopoiesis modulation in vitro (human bone marrow), 123, 128
role in fetal hepatocyte maturation in vitro (rat), 118, 168
stimulation of Ca^{2+}-activated phospholipid-dependent protein kinase (rabbit retina), 118, 460
13-cis-Retinoic acid
cooxidation by prostaglandin H synthase with alkyl or fatty acid hydroperoxides, arachidonic acid, or H_2O_2 (ram seminal vesicle microsomes), 124, 430
effect on D-[^{3}H]galactose incorporation into epidermal glycoproteins (porcine), 121, 364
Retinol, see Vitamin A
12-O-Retinoylphorbol-13-acetate
stimulation of Ca-activated phospholipid-dependent protein kinase (murine epidermal cytosol), 124, 63
all-trans-Retinyl acetate
effect on D-[^{3}H]galactose incorporation into epidermal glycoproteins (porcine), 121, 364
Retrohydroxamate ferrichrome
biological activity (Arthrobacter flavescens, Bacillus subtilis, Ustaligo sphaerogena), 119, 1191
Reverse transcriptase, see DNA polymerase
Rhodamine 123
inhibition of mitochondrial bioenergetic function (rat liver), 118, 717
Rhodopsin
-like pigment, photochemical intermediate, production by simultaneous illumination with red and near uv light (Halobacterium halobium), 123, 989
phosphorylation (isolated bovine rod

outer segments), 123, 121
target size analysis in situ (bovine retinal rod disk membranes), 122, 56
Rhodotorulic acid
-mediated Fe uptake, stereospecificity (Escherichia coli), 121, 922
Riboflavin
xylene moiety enzymatic formation from [^{14}C]ribulose 5-phosphate (Candida guilliermondii), 118, 814
Ribonuclease A
S-peptide, folding, fundamental role of salt bridge Glu 2^-...Arg 10^+ (bovine pancreas), 123, 757
Ribonucleoproteins
small nuclear
particles, antibodies: reactive polypeptide subcellular location (HeLa cells), 120, 81
reaction with anti-Sm and anti-RNP antibodies, polypeptide pattern, comparison (human), 123, 345
Ribonucleoside diphosphate reductase
separation from Yoshida ascites sarcoma (rat), 118, 212
Ribonucleotide reductase
inhibition by Agaricus bisporus γ-L-glutaminyl-4-hydroxybenzene (L1210 leukemia cells), 120, 1008
Ribonucleotides
channeling to DNA, analysis in leukemic L1210 cells, 123, 656
Ribosomes
proteins, phosphorylation in organello and in vitro (Spinacea oleracea chloroplasts), 121, 297
50S, and 23S RNAs, from 70S ribosome tight and loose couples, physical and biological properties, comparison, 124, 970
40S, mRNA-dependent Met-tRNA$_f$ binding, stimulation by eIF-2 and Co-eIF-2 (rabbit reticulocytes), 122, 1418
Ribulose 1,5-bisphosphate carboxylase/oxygenase
subunit B, effect on subunit A substrate binding (Aphanothece halophytica), 122, 763
Ribulose 5-phosphate
^{14}C-labeled, riboflavin xylene moiety enzymatic formation (Candida guilliermondii), 118, 814
Ricin
and A-chain, hybrid proteins with epidermal growth factor, role of binding ligand in toxicity, internalization, and protein synthesis inhibition (A431 cells), 124, 551
RNA
-containing nuclear binding sites for glucocorticoid-receptor complexes, localization (HeLa cells), 123, 78
detection with 2-5A analog probe (CV-1, HeLa, human neuroblastoma cells), 123, 194
L-glutamine-controlled synthesis in cells transformed by 9,10-dimethyl-1,2-benzanthracene, simian virus 40, or H-ras oncogene, protease role (human, mouse), 124, 6
maternal, cDNA evolutionary conservation (sea urchins), 123, 278
messenger (mRNA)
adrenocorticotropic hormone-induced protein, cell-free translation (rat adrenal gland), 119, 975
aldolase A, from skeletal muscle and ascites hepatoma cells, comparison (rat), 119, 575
aldolases A and B, expression during azo dye-induced carcinogenesis (rat liver), 124, 337
bisphosphoglyceromutase, cell-free translation (human), 120, 441
carbamoylphosphate synthetase (ammonia), regulation by glucocorticosteroids and cAMP, demonstration with specific cDNA (rat liver), 124, 882
cytochrome c oxidase nuclear-coded subunit, cDNA clone construction (rat liver), 118, 902
cytochrome P-450$_{SCC}$, cDNA cloning (bovine adrenal), 120, 264
-encoded helper activity, effect on antibody synthesis by nude murine spleen cells (human peripheral blood mononuclear cells), 119, 868
α- and ß-globin, translation regulation by 24-, 28-, and 50-kDa polypeptide-containing fractions (Krebs II ascites cell-free system), 120, 804
glyceraldehyde-3-phosphate dehydrogenase, nucleotide sequence (chicken muscle), 118, 767
glycine methyltransferase, quantitation in various tissues (rat), 124, 44
interferon-γ, levels in fresh lymphocytes and cultured lymphoblasts (human), 119, 157
interleukin-2, superinduction by translation inhibitors (human tonsils), 123, 842
luteinizing hormone
subunit precursors, in vitro translation (porcine pituitary), 118, 254
ß-subunit, regulation during

estradiol feedback states (ovine pituitary gland), 122, 1307
lysosomal α-D-glucosidase, cloning (monkey testes), 119, 252
polyadenylic acid and oligouridylic acid-associated proteins, comparison (rat liver), 120, 1044
prolactin, identification in decidua (human placenta), 124, 530
pro-opiomelanocortin
levels in anterior and intermediate pituitary lobes, differential regulation by corticotropin-releasing factor (rat), 124, 407
3' nontranslated regions, heterogeneity (Onchorhynchus keta pituitary), 122, 556
renin, identification by hybridization with cDNA probe (murine testes),125, 662
spliced in vitro, internucleotide bond formation, characterization (murine myeloma cell nuclear extracts), 122, 466
thyroglobulin, intracellular concentration in vitro and in vivo, regulation by thyrotropin (rat thyroid cells), 122, 472
thyroid hormone-responsive, synthesis stimulation by triiodothyronine (primary hepatocyte culture), 123, 1122
translatable, and particulate protein synthesis factors, identification in hybridoma cells (mouse), 122, 1314
uroporphyrinogen decarboxylase, cell-free translation (human), 118, 378
mitochondrial, concentration determination (adult rat liver), 118, 284
oxidized N²-methyl-9-hydroxy-ellipticinium covalent binding in vitro (yeast), 124, 416
poly(A)⁺
cell-free translation, α_1-proteinase inhibitor synthesis (experimentally-inflammed, normal rat lung), 122, 394
transient species, detection by myosin heavy-chain cDNA probe during terminal differentiation (chick breast muscle), 120, 741
translational efficiency, sodium butyrate effects (rat L6 myoblasts), 125, 1129
translation in vitro
active luciferase synthesis (adult firefly lanterns), 124, 592
DNA polymerase synthesis (bovine thymus), 122, 420
6S, transcribed in vitro from repetitive and transcribable DNA sequences, pseudouridylic modification (salmon), 124, 514
small nuclear (snRNA)
antibodies, reactive polypeptide subcellular location (HeLa cells), 120, 81
U1, -like sequences in high-molecular-weight RNA, analysis (human), 122, 838
synthesis, RNA polymerase-catalyzed, inhibition by daunomycin, mechanism, 123, 914
transcripts, c-sis oncogene-specific, inhibition by glucocorticoids (ductus deferens smooth muscle tumor cells), 122, 124
transfer (tRNA), see also specific tRNAs
levels, changes during hemoglobin synthesis induction (Friend leukemia cells), 120, 707
2'-O-methyl-1-methyl adenosine identification (Eleusine coracana seedlings), 121, 243
Met-tRNA$_f$, binding to 40S ribosomes, stimulation by eIF-2 and Co-eIF-2 (rabbit reticulocytes), 122, 1418
queuine-type, alteration by Cd^{2+}, detection by reverse-phase 5 chromatography (Drosophila melanogaster), 123, 1027
tRNA^{Ile}, nucleotide sequence (Saccharomyces cerevisiae), 119, 905
23S, and 50S ribosomes, from 70S ribosome tight and loose couples, physical and biological properties, comparison, 124, 970
RNA ligase, see Polyribonucleotide synthetase(ATP)
RNA polymerase I
stimulation, and ornithine decarboxylase inactivation/phosphorylation, protein kinase NII role (murine kidney), 120, 219
RNA polymerase II
affinity isolation on amanitin-Sepharose (calf thymus, wheat germ), 119, 42
chromatin-dependent reactions, large-molecular-weight regulating factor isolation and characterization (rat hepatic cytoplasm), 125, 286
crosslinking with dithiobis(succinimidyl propionate), quaternary

structure analysis (wheat germ), 121, 680
localization of DNA- and nucleotide-binding sites (wheat germ), 125, 569
RNA polymerases
-catalyzed RNA synthesis, inhibition by daunomycin, mechanism, 123, 914
inhibition by N-trifluoroacetyladriamycin-14-O-hemiadipate (chicken myeloblastosis cells, Escherichia coli), 120, 946
ββ' subunits, in vivo synthesis, polyamine effects (Escherichia coli), 123, 528
Rose Bengal
iodothyronine 5'-deiodinase inactivation, active site histidine residue identification (rat hepatic microsomes), 120, 28
Rous sarcoma virus
temperature-sensitive
-infected cells, thymidine transport increase at permissive temperature (rat kidney), 125, 129
-transformed cells, Ca compartments and fluxes, src gene product effect (Fisher rat cells), 125, 337
Rubella
antibodies, firefly luciferin-enhanced luminescent horseradish peroxidase immunoassay (human), 119, 481
Ruthenium red
-induced Ca^{2+} efflux from mitochondria, inhibition by antibiotic X-537A (rat liver), 124, 80

S

Saccharomyces cerevisiae
cell cycle regulation, glyoxalase-I role, 119, 962
mutants, deficient in acetoacetyl-CoA thiolase and β-hydroxy-β-methylglutaryl-CoA synthase, isolation and characterization, 123, 424
Phanerochaete chrysosporium DNA sequence autonomous replication, 118, 821
Salt
-desoxycorticosterone acetate hypertension, increase of circulating digitalis-like substance (rat), 122, 129
effect on diptheria toxin conformation, fluorescence characterization, 120, 286
Salt bridge
Glu 2^-...Arg 10^+, fundamental role in ribonuclease A S-peptide folding (bovine pancreas), 123, 757
Salt washing
effect on photosystem-II donor function, EPR analysis (inside-out thylakoids), 124, 269
granulomas, 25-hydroxyvitamin D_3 metabolism in vitro (human), 123, 822
Sarcolemma
adrenochrome formation (bovine heart), 120, 22
vesicles, Ca^{2+}-dependent K^+ permeability, modulation by calmodulin and cAMP-dependent protein kinase (bovine heart), 122, 237
Sarcoplasmic reticulum
membrane lipids, phase transitions, Raman spectroscopy (rabbit combined muscle), 122, 446
Schistosoma mansoni
eggs, granulomatous inflammation induction, hydrogen peroxide roles (murine lung), 122, 184
Schwann cells
isolated, inositol uptake (rat), 120, 486
proliferation, axolemma- and myelin-stimulated, mediation, Ca and cAMP roles (rat), 122, 373
Selenium
binding to lipids (Dunaliella primolecta, Porphyridium cruentum), 118, 176
Selenomethionine
effect on S-adenosylmethionine formation, cell growth, leucine incorporation, and polyamine biosynthesis (murine L1210 leukemia cells), 122, 350
Semiquinone
flavocytochrome b_2, stabilization by pyruvate binding, 118, 753
Sepharose
-heparin affinity chromatography, separation of lipoprotein lipase and monoacylclycerol lipase (bovine brain), 122, 1241
Sepiapterin reductase
exhibition of NADPH-dependent dicarbonyl reductase activity (rat erythrocytes), 118, 859
Serine
-borate complex, effect on [^{3}H]leukotriene C_4 and [^{3}H]leukotriene D_4 binding inhibition by leukotrienes C_4, D_4, and E_4 (guinea pig brain, lung homogenates), 119, 612
Serine palmitoyltransferase
activity in lung microsomes (normal, hyperoxic rat), 119, 995
Serine proteases
kallikrein-like latent, identifica-

tion and characterization (human erythrocyte membranes), 121, 722
Serine proteinase
latent collagenase activation (human skin), 125, 279
Serine proteinase inhibitors
identification in skeletal muscle (rat), 120, 96
Serotonin
uptake by intact and isolated dense bodies, comparison (human platelets), 119, 116
Serum, see also Plasma
-dependent post-translational control of amino acid transport (cultured fetal human fibroblasts), 120, 172
prealbumin variant, isolation and characterization (familial amyloidotic polyneuropathy patient), 122, 712
protein-bound Zn distribution (analbuminemic rat), 125, 45
stimulation of inositol phosphate release from fibroblasts (human), 123, 663
zymosan-activated, superoxide generation induction (human neutrophils), 121, 695
Serum albumin
binding to aluminum, quantitative analysis by chelex competitive binding assay (human), 125, 1020
bovine
mannosylated, muramyldipeptide-bound, tumoricidal activation of alveolar macrophages (mouse, rat), 121, 579
tryptic digests, insulin-stimulating peptide isolation and characterization, 122, 1179
two-dimensional peptide mapping by polyacrylamide-gel electrophoresis with limited proteolysis in sodium dodecyl sulfate, 122, 932
effect on
gastric mucous glycoprotein viscosity (canine), 121, 521
vitamin D metabolism in fetal chick osteoblast-like cells (bovine), 125, 265
photosensitized irreversible binding to estrone via hydroperoxide intermediate, role in estrogen (photo-)allergic side-effects, analysis (human), 125, 675
Serum factors
metoclopramide-stimulated, role in aldosterone secretion regulation (bovine adrenal glomerulosa cells), 119, 95
nonlipoprotein, hepatic cholesterol-7α-hydroxylase stimulation in vitro (streptozotocin diabetic rat), 121, 742
Sialic acid
content on cell surface in X- and and Y-bearing sperm, comparison (human), 124, 950
Sialosylglobotetraosylceramide
marker for amyotropic lateral sclerosis (human), 118, 82
Sialylation
in membrane glycan biosynthesis, developmental shift to fucosylation (rat small intestine microvilli), 125, 546
Siderophores
hydroxamate, -mediated Fe uptake, stereospecificity (Escherichia coli), 121, 922
Silver staining
histones, mechanism: role of clustered lysine residues (calf thymus), 123, 729
Simian virus 40
chromatin, protein crosslinking to nascent DNA, induction by diisopropylfluorophosphate (CV-1 cells), 123, 271
-transformed cells, L-glutamine-controlled nucleic acid and polyphosphate metabolism, protease role (human, mouse), 124, 6
SIMS, see Mass spectrometry
Sincalide
^{125}I-labeled, and [^{125}I]gastrin, binding characteristics, comparison (guinea pig fundic gastric glands), 123, 641
Sinovial cells
adherent rheumatoid, collagenase and prostaglandin-E production in vitro, stimulation by canine mast cell extracts (human), 122, 270
Skin
epidermal, microsomal preparations, ability to biosynthesize arachidonic acid from linoleic acid (guinea pig, rat), 124, 784
Sodium arsenite
effect on heat shock protein methylation (chicken embryo fibroblasts), 119, 735
stress protein induction after intravenous administration (rabbit brain, heart, kidney, liver), 120, 150
Sodium butyrate
effect on
α-actin and myosin heavy-chain gene expression and on poly(A)$^+$ RNA translational efficiency (rat L6 myoblasts), 125, 1129
histone acetylation and estrogen re-

ceptor levels (human breast cancer MCF-7 cells), 119, 132
enhancement of 1,25-dihydroxyvitamin D_3 effects on clonal osteosarcoma cells (rat), 121, 796
Sodium chloride
DNA synthesis and ornithine decarboxylase stimulation (rat gastric mucosa), 121, 1027
Sodium dodecyl sulfate
effect on endopeptidase I (Bacillus sphaericus NCTC 9602), 120, 448
Sodium ion
$-Cl^- - K^+$ cotransport in smooth muscle cells, regulation (embryonic rat aorta), 125, 500
effect on basal and isoprenaline- and GTP-stimulated adenylate cyclase (rabbit heart), 118, 561
$-H^+$ exchange
amiloride-sensitive, activation by chemotactic factors (human neutrophils), 122, 755
increase in NaCl-adapted cells (Synechococcus 6311), 122, 452
role in
phorbol ester-stimulated 2-deoxy-D-glucose uptake by lymphocytes (rat thymus), 124, 14
platelets activated by ionophore A23187 (human), 125, 1123
stimulation by vanadate (A431 cells), 118, 675
influx, -independent Ca^{2+} mobilization by prostaglandin $F_{2\alpha}$ and vasopressin (quiescent Swiss 3T3 cells), 123, 803
$-K^+$ concentration gradient-induced triolein-doped porous membrane, electrical potential oscillation, 123, 792
loading, effect on atrial natriuretic factor levels, radioimmunoassay (rat atria, hypothalamus, plasma), 124, 663
pump, ATP-dependent, and myocardial sarcolemmal creatine kinase, relationship (canine, guinea pig), 124, 696
regulation of opioid agonist binding, pertussis toxin effect (NG108-15 cells), 123, 1107
transport in brush border membranes (rat kidney), 123, 562
Sodium sulfide
role in anoxygenic photosynthesis and H_2 production (Nostoc muscorum), 123, 1138
Solanum tuberosum agglutinin
-platelet interactions (human), 121, 27
Somatomedin C
production in vitro by osteosarcoma cells (human), 123, 373
Somatomedin receptors
basic, binding and effect on α-aminoisobutyrate uptake in term placenta explants (human), 122, 583
Somatostatin
cyclic pseudohexapeptide analog, synthesis and biological activity, 120, 840
Somatotropin
effect on glucose utilization in 3T3 adipocytes (human), 125, 237
secretion and synthesis in vitro, effects of growth hormone-releasing factor administration (rat anterior pituitary cells), 121, 111
and synthetic adrenocorticotropin, lipolytic activity in isolated rabbit adipocytes, comparison (human, ovine, porcine, rabbit), 122, 197
Sparsomycin
interleukin-2 mRNA superinduction (human tonsils), 123, 842
sulfoxide configuration, role in peptidyltransferase inhibition in vitro (Escherichia coli), 125, 784
Sparteine
-debrisoquine type genetic polymorphism, cytochrome P-450, characterization: Michaelis constant and bufuralol 1'-hydroxylation stereoselectivity (human liver), 125, 374
Spectrin
anilinonaphthyl-labeled, interaction with fatty acids and phospholipids, fluorescence, 120, 344
-band 4.1-actin complex, cytochalasin binding, inhibition by p-hydroxymercuribenzoate, mechanism (human erythrocyte membranes), 122, 244
identification in lens (bovine, canine, human, rabbit), 119, 726
interaction with bovine calmodulin (avian, human), 122, 1194
Spermatozoa
motility in vitro, human and salmon calcitonin effects (human), 125, 199
X- and Y-bearing, sialic acid content on cell surface, comparison (human), 124, 950
Spermidine
anaerobic degradation, pyrrolidine formation, 119, 556
conjugation with thymic peptide hormone, conjugate properties, 122, 21

stimulation of
protein phosphorylation (corn coleoptiles), 122, 1374
pyruvate dehydrogenase phosphatase (bovine heart, kidney), 124, 95
Spermidine catecholamide
Fe chelators, antiherpetic and antineoplastic activity (herpes simplex, vesicular stomatitis viruses, L1210 leukemia cells), 121, 848
Spermine
anaerobic degradation, pyrrolidine formation, 119, 556
conjugation with thymic peptide hormone, conjugate properties, 122, 21
-induced phosphorylase kinase inhibition, Mg^{2+} effect (porcine liver), 121, 271
inhibition of 11-kDa nuclear protein phosphorylation (various mammalian cell lines), 118, 710
stimulation of
protein phosphorylation (corn coleoptiles), 122, 1374
pyruvate dehydrogenase phosphatase (bovine heart, kidney), 124, 95
Sphingolipids
synthesis, inhibition by L-cycloserine (Bacteroides levii culture), 119, 814
Sphingomyelin
hydrolysis, cannabidiol effect in vitro (Niemann-Pick patient fibroblasts), 121, 168
palmitic acid N-acylation, enhancement in rabbit antiserum-stimulated L cells (mouse), 121, 605
Spinal cord
regional distribution of
neuromedins B and C, comparison (rat), 124, 925
neuromedins K, L, and substance P (rat), 124, 731
Splenocytes
hybridoma formation with myeloma cells, effect of myeloma pretreatment with Colcemid (mouse), 124, 903
Spores
germinated, energy-dependent activation of spore lytic enzyme precursor (Clostridium perfringens), 123, 463
Spreading factor
serum, thrombin-catalyzed cleavage product, biological activity (human), 118, 339
Starch
maltoporin affinity, enhancement by affinity-chromatographic selection (Escherichia coli), 121, 34
Starvation, see Diet
Steroid 21-hydroxylase, see Steroid 21-monoxygenase
Steroid 21-monoxygenase
peptide alignment with cDNA sequence of bovine enzyme (porcine), 125, 734
Steroidogenesis
angiotensin II-induced, effect on polyphosphoinositide compounds (bovine adrenocortical fasciculata cells), 124, 393
bacterial phospholipase-C effect (bovine adrenocortical fasciculata cells), 123, 33
and cytosolic Ca^{2+}, angiotensin II and extracellular K^{+} effects, comparison (rat adrenal glomerulosa cells), 123, 810
stimulation by adrenocorticotropin, lysine-rich protein role (rat adrenal cells), 118, 400
Steroids
-binding protein, C_3 chain, and human α_2-macroglobulin, amino acid sequence homology (rat prostate), 122, 662
Sterols
-carrier protein, levels in LM fibroblast-derived cells, correlation with tumor metastasis (mouse), 124, 283
-carrier protein$_2$, regulation of mitochondrial membrane cholesterol distribution (rat adrenal), 122, 509
and nonsterol pathways, mevalonate metabolism, effect of dietary cholesterol (male chicks), 122, 945
plasma membrane levels, correlation with tumor metastasis (murine LM fibroblast-derived cells), 124, 283
Stress
cytoskeletal, erythrocyte response, membrane protein carboxyl methylation role (human), 123, 133
Substance P
-associated activity of neurokinins α and ß, 118, 405
-Bolton-Hunter reagent conjugate, ^{125}I-labeled, binding and internalization by pancreatic acinar cells (guinea pig), 124, 578
enzymatic degradation in glial cell and neuron cultures (rat brain), 125, 728
-hydrolyzing endopeptidase, purification and characterization (human cerebrospinal fluid), 125, 244

regional distribution in brain and spinal cord (rat), 124, 731
Succinate
effect on inner mitochondrial membrane lipid bilayer fluidity, EPR and fluorescence (rat liver), 119, 854
inner mitochondrial membrane protein sulfhydryl group modification, EPR analysis (rat liver), 122, 1404
reverse electron transfer to acetoacetate, ATP-driven, thermodynamics (rat hepatic mitochondria), 125, 8
Sucrose
^{14}C-labeled
complement-induced release, inhibition by monoclonal antibodies to C9 (human erythrocyte ghosts), 118, 616
electro-injected, trapping by mitochondria, role in cellular autofiltration (rat hepatocytes), 119, 955
Sulfate
transport in brush-border membranes (human placental syncytiotrophoblasts), 123, 223
Sulfhydryl groups
identification in aldosterone receptor binding sites (porcine kidney cytosol), 124, 51
inner mitochondrial membrane protein, modification by succinate and phenylsuccinate, EPR analysis (rat liver), 122, 1404
Sulfide
photosynthetic oxidation, inhibition by organic cations (Chromatium vinosum), 121, 755
Sulfonium
asymmetric pole, 1-aminocyclopropane-1-carboxylic acid, role in stereochemical course during biosynthesis (Lycopersicon esculentum), 121, 181
Sulfoxide
configuration in sparsomycin, role in peptidyltransferase inhibition in vitro (Escherichia coli), 125, 784
Sulfur
-Fe clusters
-containing NADH dehydrogenase subunits, detection by gel electrophoresis and high-performance chromatography (bovine cardiac mitochondria), 120, 237
in spinach ferredoxin and Clostridium pasteurianum red paramagnetic protein, structural comparison, resonance Raman spectroscopy, 119, 828
Superoxide
anion production by neutrophils, 4,4'-diisothiocyano-2,2'-disulfonic acid stilbene effects (human), 120, 964
generation by
1-oleoyl-2-acetyl-glycerol, retinol effects (human neutrophils), 120, 318
zymosan-activated serum (human neutrophils), 121, 695
production, synergistic stimulation by A23187 and 1-oleoyl-2-acetyl-glycerol (human neutrophils), 125, 332
release by neutrophils, ionophore A23187 and 4ß-phorbol 12-myristate 13-acetate synergistic effects (guinea pig), 122, 734
role in granulomatous inflammation induced by Schistosoma mansoni eggs (murine lung), 122, 184
Superoxide dismutase
Cu,Zn-, oxidation state, ^{19}F NMR (human erythrocytes), 122, 1276
Fe-containing, H_2O_2-induced inactivation, effect on tryptophan residues (Pseudomonas ovalis), 122, 635
macrophage progenitor cell radioprotection (murine bone marrow), 119, 1089
Mn-containing, glucose effect (murine brain, heart), 122, 682
Superoxide radicals
formation, gossypol-induced (human sperm, rat liver), 118, 573
-generating oxidase, NADPH-dependent, resolved flavoprotein and cytochrome b_{559} components, catalytic properties (human neutrophils), 118, 430
Synaptosomes
membranes
ammonia effects (murine brain), 119, 516
BAY K 8644 binding (guinea pig brain), 121, 317
neurotransmitter amino acid uptake, stimulation by insulin, role in neuromodulation (rat brain), 119, 1198
and phosphatidylserine vesicles, interactions (rat brain), 119, 821
Syncytiotrophoblasts
brush-border membranes, sulfate transport (human placenta), 123, 223
Synechococcus 6311
NaCl-adapted, Na^+-H^+ exchange increase, 122, 452

T

Tamoxifen
and analogs, high-affinity binding sites, concentration in rough microsomal membranes (rat liver), 120, 109
-binding site
biological role, definition with diphenylmethane derivative probe (human MCF-7 breast cancer cells), 124, 244
synthetic diphenylmethane derivative binding affinity (rat hepatic microsomes), 123, 724
calmodulin antagonist in cAMP phosphodiesterase activation (bovine brain), 118, 27
with dexamethasone, estrogen-like effects (chick oviduct), 124, 57
Tamoxifen receptors
microsomal, selective ligand: centchroman cis isomer (rat), 125, 346
Teleocidin
Ca-activated phospholipid-dependent protein kinase activation (rat brain), 120, 339
Temperature effects
androgen receptor complex activation in vitro (rat liver), 120, 953
concanavalin-A internalization by hepatoma cells (rat), 125, 35
dielectric permittivity and elastomeric force in elastin cross-linked polypentapeptide coacervate, correlation, 125, 1082
differentiation of Leishmania mexicana in vitro and induction of heat shock proteins, 125, 755
endopeptidase I (Bacillus sphaericus NCTC 9602), 120, 448
enzyme-activated inhibition of D-amino acid transaminase by ß-cyano-D-alanine (Bacillus sphaericus), 122, 485
[^{3}H]dihydropyridine binding to skeletal muscle transverse-tubular membranes (rabbit), 123, 41
nuclear and nucleolar matrix protein composition (Chinese hamster ovary cells), 118, 444
thymidine transport increase in temperature-sensitive Rous sarcoma virus-infected cells (rat kidney), 125, 129
Z conformation of $(m^5dC\text{-}dG)_2$, 125, 803
Teniposide
inhibition of topoisomerase II-catalyzed DNA catenation (rat hepatoma cells), 122, 165
Terbium ion
effect on platelets, aggregation and fluorescence analysis (human), 122, 311
Terminal deoxynucleotidyl transferase, see DNA nucleotidylexotransferase
Testosterone
effect on progesterone metabolism by ovarian granulosa cells (rat), 119, 694
production, luteinizing hormone-stimulated, inhibition by phorbol esters (murine Leydig cell culture), 119, 1062
2,3,7,8-Tetrachlorodibenzo-p-dioxin
effect on low-density lipoprotein receptors (guinea pig, rat hepatic plasma membranes), 118, 548
lipoprotein lipase inhibition (guinea pig adipose tissue), 122, 810
toxicity, enhancement by hexadecane (rat), 125, 996
2,3,7,8-Tetrachlorodibenzo-p-dioxin receptors
cytosolic, ontogeny (rat lung, liver, thymus), 118, 183
7,7,8,8-Tetracyanoquinodimethane
-containing lipid bilayer membranes, cyclic voltammetry, 119, 372
12-O-Tetradecanoylphorbol-13-acetate
and A23187, forskolin, and thyrotropin-releasing hormone, stimulation of prolactin release from pituitary tumor cells, comparison, 123, 735
Ca-activated phospholipid-dependent protein kinase activation (rat brain), 120, 339
and Ca^{2+} ionophore A23187, cortisol production stimulation (bovine adrenocortical fasciculata cell suspension), 121, 499
or Ca^{2+} with phospholipid, requirement for synthetic peptide phosphorylation by protein kinase C (rat brain), 124, 296
DNA fragmentation inhibition, mechanism (C3H 10T 1/2 fibroblasts), 118, 392
effect on
adenylate cyclase desensitization and ß-adrenergic receptor phosphorylation (duck erythrocytes), 121, 973
aminopyrine accumulation (isolated rat parietal cells), 121, 566
Ca^{2+}-activated phospholipid-dependent protein kinase (human platelets), 122, 158
hepatic glycogenolysis and Ca transport (rat), 122, 1057
thyrotropin secretion induced by Ca,

thyrotropin-releasing hormone, and triiodothyronine *in vitro* (rat pituitary cells), 125, 353
glutathione reductase (NAD(P)H) stimulation, regulation by vitamin A (murine epidermis), 125, 967
induction of
membrane potential changes (human myeloid leukemia cells, neutrophils), 123, 937
smooth muscle contractions and inhibition of α-adrenergic receptor response (rabbit, rat aorta), 125, 1103
in isolated artery (rabbit ear), 122, 776
threonine phosphorylation, epidermal growth factor receptor structural domains, mapping (human), 123, 618
reduction of epidermal growth factor receptor affinity, role of phosphoinositide breakdown and protein kinase-C activation (Swiss 3T3 cells), 123, 377
stimulation of
Ca-activated phospholipid-dependent protein kinase (murine epidermal cytosol), 124, 63
2-deoxy-D-glucose uptake by lymphocytes, Ca^{2+} and Na^{+}/H^{+} exchange roles (rat thymus), 124, 14
substrate for diacylglycerol lipase (rat serum), 123, 170
Tetrahydrobiopterin
intermediates, identification during enzymatic synthesis (*Drosophilia melanogaster*), 120, 754
de novo biosynthesis (bovine adrenal medulla), 120, 761
Tetrahydrofolate dehydrogenase
multiple forms, methotrexate affinity, comparison (murine leukemia L1210 cells), 119, 352
Tetrahydropteroylflutamate methyltransferase
coenzyme specificity, corrin binding mechanism (various species), 120, 74
Tetranucleoside triphosphates
$(m^5dC\text{-}dG)_2$, Z conformation, thermal stability, 125, 803
Tetrapeptides
insulin-releasing, isolation and characterization (lipodystrophic diabetes patient urine), 122, 103
Tetraphenylphosphonium
photosynthetic sulfide oxidation inhibition (*Chromatium vinosum*), 121, 755
Tetraphenylporphyrinatoiron(III)chloride
with *tert*-butylhydroperoxide, diarylpropane-1,3-diol C-C bond cleavage, 122, 1247
Tetrodotoxin
[^{3}H]nitrendipine binding displacement, effect of age (fetal murine spinal cord culture), 124, 979
β$^+$-Thalassemia
induction by base substitution in IVS-2 of β-globin gene (Chinese patient), 121, 324
Theophylline
effect on 1,25-dihydroxyvitamin D_3 production and Ca fluxes, comparison with caffeine and dibutyryl cAMP (chick renal tubules), 121, 355
guanylate cyclase inhibition (rat brain, liver, lung), 123, 1194
Thermogenin
and [^{3}H]GDP binding, parallel increases in brown-adipose-tissue mitochondria (cafeteria-fed rats), 122, 1328
4-Thiaisoleucine
incorporation by ovalbumin, effect on denaturation (hen), 118, 481
Thiamine pyrophosphatase
and nucleoside diphosphatase, separation and properties (rat brain), 118, 292
Thiazolidine-2-carboxylate
derivatives formed from L-cysteine or L-cysteinylglycine and glyoxylate, substrates for D-aspartate oxidase (bovine kidney), 125, 1039
Thioanisole
oxidation by microsomal fraction of germinating seeds (*Pisum sativum*), 121, 1001
Thiol groups
membrane, role in $NADP^+$-stimulated Ca^{2+} efflux from mitochondria (rat liver), 119, 305
Thiol protease
inhibition by L-*trans*-epoxysuccinyl-leucylamido (4-guanidino) butane, effect on antibody formation (mouse), 118, 117; *erratum*, 119, 431
Thiol proteinase inhibitors
amino acid sequence (rat epidermis), 121, 149
immunohistochemical analysis (rat liver, peripheral blood), 123, 816
Thioridazine
diltiazem-like effect on [^{3}H]nitrendipine binding to Ca channel site in myocardial membranes (rat), 121, 657
Thiyl radicals
formation during peroxidase-catalyzed acetaminophen metabolism with thiols, 125, 109

Threonine
phosphorylation, epidermal growth factor receptors, phorbol ester-induced, mapping (human), 123, 618
Threonine deaminase, see Threonine dehydratase
Threonine dehydratase
regulatory mutant, reversion by mutation in ilvH gene (Escherichia coli K-12), 118, 270
Thrombin
-catalyzed serum spreading factor cleavage product, biological activity (human), 118, 339
-stimulated platelet aggregation, velocity, carbonic anhydrase inhibition effects (human), 121, 266
Thromboplastin
monocyte, arachidonic acid metabolism inhibitor effects (human), 119, 179
Thrombospondin
fibrinogen-binding region, isolation (platelets), 119, 1075
heparin-binding fragment, antibodies, platelet aggregation inhibition (bovine), 124, 290
Thromboxane A_2
-like prostaglandin endoperoxide analogs, prostacyclin synthesis stimulation (rat vascular smooth muscle cell culture), 123, 21
Thromboxane B_2
production, recovery in vitro after inhibition by aspirin (guinea pig megakaryocytes), 119, 982
Thromboxane synthetase
inhibition in vivo by OKY-1581 (infarcted, normal canine myocardium), 121, 552
Thylakoids
inside-out, salt washing, effect on photosystem-II donor function, EPR analysis, 124, 269
Thymidine
transport in temperature-sensitive Rous sarcoma virus-infected cells, increase at permissive temperature (rat kidney), 125, 129
Thymidine kinase
-deficient mutants, interferon effect (murine T-lymphoma S49 cells), 118, 124
Thymidylate synthetase
-5-fluorodeoxyuridylate covalent binary complex, isolation by trichloroacetic acid precipitation (Lactobacillus casei), 124, 37
Thymocytes
B-cell, glucose-induced electrical activity, forskolin effect (murine pancreas), 120, 797
medullary, mitogenic stimulation, inhibition by 1,25-dihydroxyvitamin D_3 (mouse), 123, 163
mitotically active, 1,25-dihydroxyvitamin D_3 receptor localization (rat), 121, 277
phorbol ester-stimulated 2-deoxy-D-glucose uptake, Ca^{2+} and Na^+/H^+ exchange roles (rat), 124, 14
-specific growth factor, purification (bovine), 120, 420
Thyroglobulins
amino terminus-derived 10K polypeptide, structure (bovine), 119, 335
carboxyl terminal region, hormonogenic domain identification (bovine), 125, 961
mRNA, intracellular concentration in vitro and in vivo, regulation by thyrotropin (rat), 122, 472
structure, iodination effects (human), 121, 310
tryptic peptides, thyroxine-containing, isolation and amino acid sequence (bovine, ovine, porcine), 118, 423
Thyrotropin
bovine and human, enhancement of antibody response in vitro (murine spleen), 125, 30
chronic regulation of arachidonic acid and palmitic acid incorporation in cholesteryl esters (thyroid cell culture), 119, 537
differential effects on glycosyltransferase (porcine thyroid cells), 118, 910; erratum, 119, 1211
-induced follicle reconstruction and iodine metabolism, modulation by insulin (porcine thyroid cell culture), 118, 385
regulation of
plasminogen activator (ovine thyroid cell culture), 123, 633
thyroglobulin mRNA intracellular concentration in vitro and in vivo (rat thyroid cells), 122, 472
secretion in vitro, induction by Ca, thyrotropin-releasing hormone, and triiodothyronine, phorbol ester effects (rat pituitary cells), 125, 353
Thyrotropin-releasing hormone
and A23187, forskolin, and phorbol ester, stimulation of prolactin release from pituitary tumor cells, comparison, 123, 735
-induced thyrotropin secretion in vitro, phorbol ester effects (rat pituitary cells), 125, 353
Thyroxine
-containing tryptic peptides in thyro-

globulin, isolation and amino acid sequence (bovine, ovine, porcine), 118, 423
effect on glycolipid composition during development (postnatal murine small intestine), 119, 1168
poly(A) polymerase regulation in glial and neuronal nuclei, analysis (neonatal rat cerebral cortex), 125, 931
Thyroxine receptors
and triiodothyronine receptors, DNA binding, comparison (rat liver), 124, 29
Tiazofurin
-induced NAD selective depression (rat hepatoma 3924A), 122, 345
Tilorone
xanthine oxidase induction (mouse), 119, 144
D-α-Tocopherol, see Vitamin E
Tomato golden mosaic virus
-infected plants, negatively supercoiled DNA isolation (Nicotiana benthamiana), 118, 747
Topoisomerase II
-catalyzed DNA catenation, inhibition by VM-26 and VP-16-213 (rat hepatoma cells), 122, 165
Nα-p-Tosyl-l-arginine methyl ester
inhibition of insulin-stimulated insulin receptor subunit phosphorylation (human placenta, rat adipocytes), 119, 465
Toxins, see also specific toxins
Bordetella pertussis, effect on adenylate cyclase, insulin release, and membrane protein ADP-ribosylation (rat pancreatic islets), 124, 190
cardio-, cobra venom, interaction with erythrocytes (frog skeletal muscle), 124, 629
Cerebratulus lacteus A-III, liposomal marker release induction, 121, 14
Shigella dysenteriae, primary amine and lysosomotropic agent effects (HeLa cells), 121, 69
Tityus serrulatus VII, amino acid sequence, 122, 1146
Toyocamycin
-resistant second-step mutants, action mechanism, comparison with tubercidin (Chinese hamster ovary cells), 120, 88
γ-Trace, see Cystatin C
Transcription
glycolytic enzyme genes, inhibition by cAMP (rat liver), 125, 135
Transducin
γ-subunit, cDNA isolation and partial nucleotide sequence (bovine), 124, 250
Transferrin
binding to aluminum, quantitative analysis by chelex competitive binding assay (human serum), 125, 1020
-bound Fe, uptake by isolated hepatocytes, ethanol effect (rat), 125, 824
cDNA, molecular cloning and sequence analysis (human), 119, 273
-Cu^{2+} complexes at N- and C-sites, quantification and visible absorption spectra (chicken egg white), 119, 298
gene expression in developing non-hepatic tissues (rat), 122, 212
synthesis in recombinant bacteriophage-infected Escherichia coli (rat), 122, 960
Transferrin receptors
increase in regenerating cells after partial hepatectomy (rat), 121, 717
intracellular, expression in quiescent and concanavalin A-stimulated lymphocytes (murine spleen), 119, 598
Transformation
crown gall, tobacco callus cells after cocultivation with Agrobacterium tumefaciens, 123, 458
Transglutaminase, see Glutaminyl-peptide γ-glutamyltransferase
α,α-Trehalose phosphorylase
inhibition by fructose 2,6-bisphosphate (Euglena gracilis), 122, 906
Triacylglycerol lipase
characterization and subcellular localization (rat skeletal muscle), 122, 87
Triamcinolone acetonide
cell proliferation inhibition, effect of exogenous platelet-derived growth factor (ductus deferens smooth muscle tumor), 122, 68
Tributyltin chloride
neutrophil chemotaxis inhibition (rabbit), 123, 544
Trichloroacetic acid
precipitative isolation of 5-fluorodeoxyuridylate-thymidylate synthetase covalent binary complex, 124, 37
Triethylenetetramine
-induced Cu-deficiency, Cu and Zn molecular localization (fetal rat liver), 118, 697
Trifluoperazine
-calmodulin binding, shift reagent ^{43}Ca NMR (bovine brain, tes-

tes), 122, 1350
inhibition of
ionophore A23187-induced platelet-activating factor formation (human neutrophils), 118, 629
photosystem-II oxygen evolution (stroma-free spinach thylakoids), 121, 626
in low concentration, neutrophil chemiluminescence enhancement (human), 118, 53
N-Trifluoroacetyladriamycin-14-O-hemiadipate
RNA polymerase inhibition (chicken myeloblastosis cells, Escherichia coli), 120, 946
Triglyceride lipase, see Triacylglycerol lipase
Trihydroxytetraene
formation from arachidonic acid and structure (human leukocytes), 118, 943
Triiodothyronine
-binding proteins, plasma membrane, antibodies: characterization and cross-species immunoreactivity (rat pituitary GH_3 cells), 124, 956
-induced thyrotropin secretion in vitro, phorbol ester effects (rat pituitary cells), 125, 353
mRNA $_{S14}$ synthesis stimulation (primary hepatocyte culture), 123, 1122
Triiodothyronine receptors
and thyroxine receptors, DNA binding, comparison (rat liver), 124, 29
Triolein
-doped porous membrane, Na^+/K^+ concentration gradient-induced, electrical potential oscillation, 123, 792
Triphenyltin chloride
inhibition of
carrageenan-induced edema (rat foot), 125, 59
neutrophil chemotaxis (rabbit), 123, 544
Tris-BP
mutagen 2-bromoacrolein metabolic formation (rat hepatic microsomes), 121, 213
Tris(2,3-dibromopropyl) phosphate, see Tris-BP
Trolox C
amino acid radical repair, 119, 245
Tropomyosin
effect on actin filament shortening by actin-protein 90-kD complex and cytochalasin D, comparison (bovine brain), 123, 596
Trypanosoma cruzi
host cell invasion, cell surface galactose residue role (murine peritoneal macrophages, rat cardiac myoblasts), 119, 228
interaction with macrophages, regulation by parasite membrane phospholipase A_2-sensitive components (mouse), 121, 931
Trypsin
bacteriorhopsin proteolytic cleavage, crosslinking analysis (Halobacterium halobium), 124, 565
and endoglycosidase F, effect on band 4.5 and [^{3}H]cytochalasin B-photolabeled proteins, comparison (human erythrocyte membranes), 122, 218
-like enzyme, isolation and characterization: substrate specificity and physiological role (Strongylocentrotus intermedius eggs), 121, 598
lymphoma cell electrofusion facilitation (mouse), 120, 138
matrix-linked, and α_2-macroglobulin reaction, proteinase-binding site nonproductive activation (human), 118, 691
peptidyl carbamate ester effects (porcine pancreas), 122, 571
photosynthetic membrane proteolysis, reaction center integrity (Rhodopseudomonas viridis), 120, 164
ß-Trypsin
-catalyzed peptide semisynthesis, mechanism and specificity, 120, 686
Trypsin inhibitors
trypsinogen secretion stimulation, action mode, comparison with endogenous peptide in pancreatic juice with atropine (rat duodenum), 118, 532
Trypsinogen
secretion, stimulation by endogenous peptide in pancreatic juice with atropine and exogenous trypsin inhibitors, action mode comparison (rat duodenum), 118, 532
Trypsinogen 1
proteolysis, pathogenic implication in chronic pancreatitis (human), 118, 154
L-Tryptophan holorepressor
-trp operator interactions, protein distribution analysis (Escherichia coli), 119, 926
Tryptophan radicals
repair by vitamin E analog, 119, 245
Tryptophan residues
modification in H_2O_2-inactivated Fe-superoxide dismutase (Pseudo-

monas ovalis), 122, 635
multiple phosphorescent, in lysozyme, identification by optically detected magnetic resonance, 125, 974
T-2 toxin
interleukin-2 mRNA superinduction (human tonsils), 123, 842
Tubercidin
-resistant mutants, action mechanism, comparison with toyocamycin (Chinese hamster ovary cells), 120, 88
Tubulin
nucleotide-binding site, affinity labeling (human platelets), 123, 92
phosphorylation by casein kinase-1 and cAMP-dependent protein kinase, comparison, 121, 19
polymerization in vitro, kainate effect (rat brain), 122, 925
Tuftsin
endocytosis by macrophage cells, receptor-mediated (mouse), 119, 203
Tuftsin receptors
-mediated tuftsin endocytosis by macrophage cells (mouse), 119, 203
Tumor cells, see also Cell lines
breast, proliferation, indirect and negative control by estradiol-17β (nude mouse), 122, 1097
colon, alkaline phosphatase isozymes, relationship with large intestine isozymes (Fischer 344 rat), 122, 740
ductus deferens smooth muscle, proliferation, inhibition by triamcinolone acetonide: effect of exogenous platelet-derived growth factor, 122, 68
gastrinoma, progastrin amino-terminal fragment purification (human), 123, 404
granuloma
induction by Schistosoma mansoni eggs, hydrogen peroxide and superoxide roles (murine lung), 122, 184
sarcoid, 25-hydroxyvitamin D_3 metabolsim in vitro (human), 123, 822
growth inhibition by tumor inhibitory factor in rat ascites fluid (human), 119, 76
hepatoma
c-Ha-ras and c-myc gene expression (rat), 119, 1096
concanavalin-A internalization, dependence on temperature and dose (rat), 125, 35
diethylnitrosamine-induced, increased expression of c-Ha-ras, c-Ki-ras, and N-ras genes (rat), 122, 259
protein kinase-substrate complex precipitable with Ca^{2+}, isolation and characterization, 125, 251
human, horizontal oncogenesis, mechanism: cell fusion role (nude mice), 124, 933
insulinoma, insulin and insulin-like growth factor-1 receptors: subunit structure, comparison (rat), 124, 657
lung and medullary thyroid, calcitonin and related peptide genes, structure and function (human), 123, 648
lymphoma
adenosine deaminase-deficient, adenine nucleoside efflux and influx, dipyramidole and nitrobenzylthioinosine effects (human), 121, 514
Burkitt, -derived cells, DNA polymerase induction by 5-iododeoxyuridine treatment, 123, 1170
electrofusion, facilitation by protease proteolytic activities (mouse), 120, 138
proliferation in tissue culture after glutathione depletion with L-buthionine-S-R-sulfoximine (mouse), 123, 626
mammary
c-ras^H oncogene, hormone-regulated expression (rat), 123, 141
7,12-dimethylbenz[a]anthracene-induced, tyrosine protein kinase inhibition by quercetin (rat), 123, 1227
medullary thyroid, identification of prosomatostatin and amino terminal-derived nonsomatostatin peptides (rat), 124, 450
melanoma
antigens, amino-terminal variation (murine B16 cells), 121, 196
differentiation, inhibition by hybrid recombinant human leukocyte interferon (murine B-16), 119, 108
macrophage-mediated cytolysis, inhibition by cyclosporin A (rat), 123, 710
metastasis, correlation with plasma membrane sterol and sterol-carrier protein levels in LM fibroblast-derived cells (mouse), 124, 283
neuroblastoma
differentiation
induction by mevinolin (mouse), 120, 454
mitochondrial protein changes (mu-

rine brain), 120, 411
ß-endorphin receptor specificity for COOH-terminal segment (human), 120, 873
osteosarcoma
clonal, 1,25-dihydroxyvitamin D_3 effects, enhancement by sodium butyrate (rat), 121, 796
insulin-like growth factor production in vitro (human), 123, 373
ovarian, proliferation in vitro, calmodulin antagonist effects (human), 123, 385
pancreatic ß-cell
chemically-induced, proteins, cDNA molecular cloning and characterization (rat), 124, 164
gastric inhibitory peptide receptors, specific binding and biological effects (hamster), 123, 671
phaeochromocytoma, muscarinic cholinergic receptor identification (rat), 119, 163
pituitary
estradiol-induced, dopamine receptors, bromocriptine chronic treatment effects (rat), 123, 312
prolactin release, stimulation by A23187, forskolin, phorbol ester, and thyrotropin-releasing hormone, comparison, 123, 735
sarcoma, Yoshida ascites, cytidine diphosphate reductase separation (rat), 118, 212
Tumor disturbing factor
isolation and effect on L1210 cell proliferation in vivo and in vitro (human, BALB/c murine sera), 120, 520
Tumor inhibitory factor
identification in ascites fluid, effect on human carcinoma cells (rat), 119, 76
Tumor promoters
-mediated protein kinase-C activation, characterization (murine brain), 121, 448
Tunicamycin
inhibition of branched-chain amino acid-stimulation protein synthesis (rat muscles), 125, 149
Tyraminyl-inulin
^{125}I-labeled, liposomal deposition marker in vivo (rat), 122, 319
Tyrosine
histone, complexes with DNA, fluorescence spectra (bovine thymus), 122, 656
-horseradish peroxidase-hydrogen peroxide system, bityrosine production and identification, 125, 916
-iodinated neurotensin, biological activity and receptor-binding properties (guinea pig, rat), 120, 812
lens protein, microenvironmental change in cold cataract, Raman spectroscopy (rat), 119, 989
phosphorylation
in B-lymphocytes, enhancement upon membrane immunoglobulin complexing (human), 125, 859
in normal bone marrow cells, lymphocytes, and leukemic cells, comparison (human), 124, 766
stimulation in lectin-treated lymphocytes (human), 124, 682
Tyrosine kinases
inhibition by quercetin in 7,12-dimethylbenz[a]anthracene-induced mammary tumor (rat), 123, 1227
-like 58-kDa phosphoprotein, identification (murine lymphoma cells), 122, 563
stimulation, insulin-like growth factor-1 receptor-mediated (rat hepatic BRL 3A2 cells), 119, 6
Tyrosine 3-monooxygenase
inhibition by endogenous factor (rat brain), 124, 223
Tyrosine radicals
repair by vitamin E analog, 119, 245

U

Ubiquinone
myocardial levels, microanalysis (bovine, canine), 123, 1165
-protein binding, quantitation in mitochondria (bovine heart), 124, 889
Ubiquitin
-ATP proteolytic system, repression of protease inhibitor (rabbit reticulocyte extract), 122, 116
binding affinity for isopeptidase (calf thymus), 122, 1296
UDP-glucose
-incubated phosphofructokinase, phosphoryl donor function of pyrophosphate (rabbit muscle), 121, 842
UDPglucuronosyltransferase
nascent, cleavage by canine pancreatic microsomes (rat liver), 122, 1441
role in neonatal microsomal structural changes (rat liver), 119, 29
Ultraviolet (uv)
effect on deoxynucleoside triphosphate pool (murine FM3A cells), 122, 1160
-induced
changes in deoxynucleoside triphosphate pool, effect on DNA synthesis (Chinese hamster ovary cells), 123, 742

^{3}H-[methyl]-S-adenosyl-L-methionine covalent binding to bovine adrenal phenylethanolamine N-methyltransferase and human erythrocyte protein-O-carboxylmethyl transferase, methyl acceptor substrate effects, 123, 499
unscheduled DNA synthesis, age-related changes (rat hepatocytes), 118, 730
Ureagenesis
α_1-adrenergic stimulation, phorbol ester effects (rat hepatocytes), 119, 1128
L-carnitine effect after acute ammonia intoxication (mouse), 120, 726
epinephrine-stimulated, insulin effect (euthyroid, hypothyroid rat hepatocytes), 118, 451
inhibition by pent-4-enoic acid, potentiation by ammonia (rat hepatocytes), 118, 47
Uridine triphosphate
^{3}H-labeled, cellular incorporation inhibition by lamin-B antibodies (permeabilized murine L cells), 120, 256
Urokinase
regulation by thyrotropin (ovine thyroid cell culture), 123, 633
stimulation by
bone-resorbing hormones (rat osteoblast-rich calvarial cells, osteogenic sarcoma cells), 122, 230
ovine prolactin (rat tissues), 122, 1005
Uroporphyrinogen decarboxylase
mRNAs, cell-free translation (human), 118, 378
Uteroglobin
crosslinking into higher-molecular-weight proteins by guinea pig transglutaminase or human factor XIIIa (rabbit), 121, 400
Uterus
γ-aminobutyric acid and glutamate decarboxylase detection and γ-aminobutyric acid receptor-binding site identification (rabbit, rat), 125, 18
estrogen-specific internalization by isolated cells and binding to nuclear matrix (rat), 123, 84
growth and ornithine decarboxylase, dissociated regulation by estrogen (rat), 122, 1186

V

Valine
-sensitive acetolactate synthase basal unit, purification and stabilization (Neurospora crassa), 123, 418
Valproic acid
metabolism by cytochrome P-450 (rat hepatic microsomes), 122, 1166
Vanadate
inhibition of proton translocation from O_2-pulsed cells (Anacystis nidulans), 123, 358
stimulation of Na^+/H^+ exchange (A431 cells), 118, 675
Vasoactive intestinal peptide
effect on cAMP generation and receptor desensitization in human HGT-1 cells (chicken, porcine), 120, 641
inhibition of platelet-activating factor-stimulated leukotriene release (rat lung homogenates), 125, 105
partial sequences, effect on ^{125}I-VIP binding and adenylate cyclase in epithelial membranes (human, rat intestine), 121, 493
Vasopressin
arginine, see Arginine vasopressin
Ca^{2+} mobilization, Na^+ influx independence (quiescent Swiss 3T3 cells), 123, 803
reduction of epidermal growth factor receptor affinity, role of phosphoinositide breakdown and protein kinase-C activation (Swiss 3T3 cells), 123, 377
stimulation of
glycogenolysis and ureagenesis, phorbol ester effects (rat hepatocytes), 119, 1128
inositol phosphate release from fibroblasts (human), 123, 663
Vasopressin receptors
photoaffinity label [1,6-α-aminosuberic acid,3-(p-azidophenylalanine),8-arginine]vasopressin, evaluation (bovine kidney), 122, 974
Verapamil
effect on muscarinic receptor binding properties (rat heart), 121, 340
^{3}H-labeled, binding sites in transverse tubule membranes (rabbit skeletal muscle), 118, 239
Very-low-density lipoproteins
lipolysis in vitro, effects of anti-apolipoproteins CII and CIII, high-density lipoproteins, and very-low-density lipoprotein cholesterol ester hydrolysis (human), 121, 946
reactivity with low-density lipoprotein monoclonal antibodies, analysis by ELISA and immunoprecipitation (mouse), 125, 704

Vesicular stomatitis virus
inhibition by
cloned human leukocyte interferon (human amnion U cells), 119, 326
spermidine catecholamide Fe chelators, 121, 848
Vinculin
phosphorylation, human Ca^{2+}-activated phospholipid-dependent protein kinase effect (chicken gizzard), 118, 736
VIP, see Vasoactive intestinal peptide
Vitamin A
-binding proteins, interphotoreceptor, synthesis by retina in organ culture, monensin effect (monkey), 118, 789
deprivation, effect on mitogenic factor activity (rat testes), 125, 454
inhibition of polyoma virus replication in vitro (murine embryonic fibroblasts), 122, 851
interaction in arachidonic acid binding to α-fetoprotein (human), 119, 1122
plasma concentrations, relationship to glutatione S-transferase (human platelets), 122, 407
regulation of glutathione reductase (NAD(P)H) stimulation by 12-O-tetradecanoylphorbol-13-acetate (murine epidermis), 125, 967
Vitamin A acid, see Retinoic acid
Vitamin D
-dependent bone inductive extracellular matrix proteins (rat), 124, 829
effect on skin Ca-binding protein levels (rat), 123, 230
metabolism in fetal chick osteoblast-like cells, bovine serum albumin and cycloheximide effects, 125, 265
Vitamin D_3
25-hydroxylation by cytochrome P-450, enzyme purification, characterization, and amino-terminal sequence analysis (rat hepatic microsomes), 121, 994
Vitamin D_3 25-hydroxylase
reconstituted, inhibition by microsomal protein fraction (rat liver), 123, 1209
Vitamin E
analog, amino acid radical repair, 119, 245
singlet oxygen quenching (human granulocytes), 119, 1056
Vitamin K
-dependent proteins, warfarin-induced accumulation (rat), 114, 991; erratum, 118, 696
VM-26, see Teniposide
Von Willebrand factor
-factor VIII, plasma and platelet, lectin activity (human), 118, 495
VP-16-213, see Etoposide

W

Warfarin
-induced accumulation of vitamin K-dependent proteins (rat), 114, 991; erratum, 118, 696
Wasting syndrome
2,3,7,8-tetrachlorodibenzo-p-dioxin-induced, primary target: brown adipose tissue (rat), 125, 996
Water
-methanol solutions, poly(dA-dT)•poly(dA-dT) thermal melting, 123, 831
^{18}O-enriched, incorporation into 4-hydrobenzoic acid during 4-chlorobenzoate dehalogenase reaction (Pseudomonas), 124, 178
Wheat germ agglutinin
-monosaccharide binding, fluorescence and NMR spectroscopy, 119, 603

X

Xanthine oxidase
induction by interferon and interferon inducers (mouse), 119, 144
X rays
effect on type-I aldolases purified by Cibacron Blue dye-ligand chromatography (pigeon, rabbit, rat, trout), 123, 1069
macrophage progenitor cell irradiation, protection by superoxide dismutase (murine bone marrow), 119, 1089
malate synthase post-irradiation inactivation, 118, 364
Xylene
riboflavin moiety, enzymatic formation from [^{14}C]ribulose 5-phosphate (Candida guilliermondii), 118, 814

Y

Yeast viruses
major and minor, capsid polypeptides, characterization, 121, 619
Yohimbine
^{3}H-labeled, binding to lymphocytes, α_2-adrenoceptor subtype characterization (human), 121, 1

Z

Zaluzanin C
effect on peptidyl-tRNA enzymatic translocation (HeLa cells, rabbit reticulocytes, Saccharomyces cerevisiae), 123, 59
Zeatin
N^6-isopentenyladenine conversion (Actinidia tissues), 124, 470
Zellweger syndrome
acyl-CoA:dihydroxyacetone phosphate acyltransferase deficiency (human brain, liver, cultured skin fibroblasts), 120, 179
peroxisomal enzyme activity and intracellular distribution (human), 123, 1054
Zinc ion
-Ca^{2+} derivatives of lentil and pea lectins, preparation and characterization, comparison with native forms, 124, 857
content in and effect on DNA polymerase (bacteriophage T7), 122, 1410
glycogen synthesis inhibition (fasted rat hepatocytes), 122, 726
identification in cytochrome c oxidase preparations (bovine cardiac muscle), 124, 836
molecular localization in dietary and drug-induced Cu-deficient liver (rat fetus), 118, 697
protein-bound, distribution in serum (analbuminemic rat), 125, 45
Zinostatin
hydrogen abstraction during 5'-thymidine aldehyde formation on DNA, 122, 642
Zymogens
granule membrane proteins, phosphorylation in vitro (rat pancreatic acinar cells), 122, 413
Zymosan
-activated serum, superoxide generation induction (human neutrophils), 121, 695
opsonized particles, stimulation of chemotactic factor production by polymorphonuclear leukocytes (rat), 119, 720
